On the Workers Day that falls on 1 May 2009, I send this message in recognition of the brilliant performances the mass of workers give for transforming the Union of Myanmar into a modern, developed nation and improving the living standard of the people.

In Myanmar, the government, the people and the Tatmadaw remain harmonious in pursuing the prudent objectives, and that has resulted in consolidated national unity, fine economic infrastructure, and fine social infrastructure that amounts to greater longevity and higher education standard of the people.

Today, the government is implementing the Project for Development of Border Areas and National Races, the 24-Special Region Development Project and the Rural Development Project for equitable development of all parts of the nation. In that regard, thanks to the active participation of the mass of workers, the people are now in a position to enjoy the fruitful results of the projects.

The government is seeking ways and means to harmonize the State sector and private sector in pursuance of the goal of building an industrialized nation with economic growth resulting from development in the agricultural sector.

In its bid to industrialize the nation, the government has established many industrial zones across the nation, and so the contribution of the private-owned industries to the industrial sector is growing considerably. The ratio of the industrial sector contribution to the GDP is on the increase year by year thanks to growing local and foreign investments and establishment of more and more State-owned heavy industries.

Raise productivity for better living conditions of the people

Today (1 May 2009) is Workers Day. The mass of Myanmar workers demonstrated their active role together with the entire people in anti-colonialist movements and independence struggles. Till today, workers have served as a united, strong national force in nation-building tasks.

In an effort to build a modern, developed nation, the government is improving infrastructures in various fields for restoration of peace and stability throughout the nation, economic growth and improvement of the living standard of the people.

Moreover, the government is building many new State-owned factories and plants across the nation for industrial development necessary for modernizing and industrializing a nation.

Effective encouragement to development of industrial zones and private-owned industrial zones has resulted in boosting production of import-substitute goods.

Seeing a growing number of modern machine factories and import-substitute goods factories, the industrial zones have gained many new manufacturing methods and created many job opportunities.

Today, boosting production of export goods, reduction of importing goods and establishment of new import-substitute industries have become at the centre of the industrial sector. Therefore, factories and plants have to pay more attention to improve productivity, especially to qualitative and quantitative improvement of machines and personal goods, and boosting production of marketable goods.

Now, workers, blue collar and white collar, are showing their enthusiasm in the industrial sector in transforming the nation into a modern, developed one. Therefore, the people will be able to enjoy higher living conditions if the mass of workers with a fine tradition of preserving nationalistic fervour in successive periods continue to work hard for completion of ongoing projects ahead of schedule and boosting production of goods.

**Coord meeting of sports plus education leading committee held**

NAV PYI TAW, 30 April—The coordination meeting of sports and education leading committee was held at the meeting hall of the Ministry of Education, here yesterday with an address by Chairman of Sports plus Education Leading Committee Deputy Minister for Education Brig-Gen Aung Myo Min.

Present on the occasion were officials of the Ministry of Sports, Ministry of Home Affairs and Ministry of Religious Affairs, directors-general of departments under the Ministry of Education, rectors of colleges and universities, schoolheads, principals of education colleges, state and division level education officers and officials.

First, Brig-Gen Aung Myo Min made a speech on the occasion, saying that it is required to promote sports standard of the students in the combination of education and sports. Basic and higher level students need to strive for shining Myanmar sports prestige. Sports competitions are to be held in both basic education and higher education drawing sports calendar starting from the 2009-2010 academic year.

Officials from the education departments are to take cooperative measures with other related departments for achieving success in the tasks of sports and education.

Next, Director-General of General of Sports and Physical Education Department U Thaung Htaik explained that a total of 150 physical instructors are conducting 22 kinds of sports for eight weeks. Sports facilities will be provided for enabling sports events to be held. State and division former selected players will be appointed as physical instructors.

Afterwards, officials replied to the queries raised by those present. All responsible personnel are to actively cooperate in the task of combining sports and education.

Death toll rises to 41 in Baghdad triple car bombings

BAGHDAD, 30 April—The death toll from three car bomb explosions in marketplaces in Baghdad’s Sadr City neighbourhood on Wednesday, rose to 41 and up to 68 people injured, an Interior Ministry source said.

“The latest reports said that 41 people were killed and some 68 others wounded by the three car bombings in Sadr City neighbourhood,” the source told Xinhua on condition of anonymity.

Many women and children were among the victims, the source said.

Earlier, the source said 16 killed and 45 others injured by the blasts.

The incident occurred in the afternoon when three booby-trapped cars parked at different popular market places in Sadr City neighborhood in eastern Baghdad, detonated simultaneously, the source said.

One of the car bombs detonated in the Souq Mreidy market, another at a pet market and the third at a separate market in the sprawling neighbourhood, the source added.

Iraqi security forces sealed off the scenes while ambulances and some civilian vehicles transferred the victims to nearby hospitals, he said.

Sri Lanka vows to fight until rebel leaders captured

COLOMBO, 30 April—Sri Lanka told Britain and France that it would keep up its military offensive until the leaders of the rebel Tamil Tigers have been “captured or dead.”

The British government’s figures included only those killed in action. At least 3,435 military personnel had died in the Iraq war since it began in March 2003. The figure includes eight military civilians killed as a result of hostile action, according to the military’s numbers.

The British military has reported 179 deaths; Italy, 11; Denmark, seven; El Salvador, five; Slovakia, four; Latvia and Georgia, three each; Estonia, Netherlands, Thailand and Romania, two each; and Australia, Hungary, Kazakhstan and South Korea, one death each.

Obama welcomes Australia’s decision to increase troops to Afghanistan

WASHINGTON, 30 April—US President Barack Obama welcomes Australia’s decision to increase troops to Afghanistan, saying Canberra’s contribution is “critical” to prevent the central Asian country from becoming terrorists’ safe haven.

Obama said on Wednesday, President Obama called Australian Prime Minister Kevin Rudd on Tuesday evening (US Eastern Time) and thanked him for the decision to “increase military, civilian and financial commitment to Afghanistan,” said the White House in a statement.

In response to Obama’s recent call for more troops from NATO and other allies, Prime Minister Rudd announced on Wednesday that Australia will boost its troops in Afghanistan by 450 to 1,550 soldiers.

Russian envoy blasts NATO exercises in Georgia

BRUSSELS, 30 April—Russian envoy to NATO, Dmitry Rogozin, on Wednesday blasted NATO’s planned military exercises in Georgia, labelling them as “totally out of place.”

Rogozin, who met formally for the first time in eight months with ambassadors of NATO countries, said he was not convinced by NATO allies’ explanation that the exercises scheduled for 6 May to 1 June in Georgia pose no threat to Russia’s security.

“I insist that these exercises are totally out of place,” he told reporters after the meeting. “Any muscle flexing along our borders is not acceptable at all.”

He noted that the exercises will be held against the background of parliamentary elections in the Georgian breakaway region of South Ossetia, the first such poll after Russia’s recognition of independence of the region.

“I cannot name it other than political blackmailing.”

Rogozin said Russia is also worried by statements from high-ranking US officials that the NATO exercises are meant to support Georgia’s territorial integrity.

He blamed NATO for its “political blindness” that refuses to recognize Russia’s national interests. “In a sense, NATO reminds me of a blind rhinoceros.”

NATO has said the two series of exercises were planned in January 2008, long before the August 2008 Russian military conflict over South Ossetia. But Rogozin argued on Wednesday that the fact that they were planned long ago does not mean that they could not be postponed or even canceled altogether.
Brazil confirms two suspected swine flu cases

KATHMANDU, 30 April — Two people were suspected to be infected with swine flu virus among 36 people with flu-like symptoms, Brazilian Health Minister Jose Gomes Temporao said here on Wednesday.

Of the 36 people from 11 states, who were being monitored by the local health authorities after showing some swine flu symptoms, but only two of them confirmed to the World Health Organization’s criteria as suspected cases.

One is from Minas Gerais state, and the other, Sao Paulo state, Temporao said. The patients were under medical treatment, and the results of the tests will be released in 10 days. Temporao asserted that his country was well-prepared to deal with the outbreak of swine flu.

New Zealand records 13 confirmed swine flu cases, 104 suspected cases

WELLINGTON, 30 April — There were 13 confirmed cases of the flu in New Zealand, Health Minister Tony Ryall said on Thursday.

“The growth in suspect numbers is primarily from close family contacts from passengers on flights,” Ryall told a press conference in Wellington.

He added that the 13 confirmed cases of swine flu in New Zealand were all in the Auckland area.

That was a decrease of one from Wednesday as one recent arrival in Auckland had come from Samoa and not from Los Angeles as first thought.

An evening rainbow sets above the Sydney Harbour Bridge on 29 April, 2009. Sydney’s 1,149 metre-long (3,770 feet) harbour crossing, affectionately known as the Coathanger, is one of Australia’s most recognizable landmarks.—XINHUA

Total of swine flu cases in Canada rise

OTTAWA, 30 April — The total of confirmed swine flu cases in Canada has risen to 19, with six more cases added on Wednesday, health officials said.

Three of the new cases are in British Columbia, and the other three come from Ontario.

Earthquake jolts India-controlled Kashmir

SRINAGAR, 30 April — An earthquake of moderate intensity shook Srinagar, the summer capital of India-controlled Kashmir, and its adjoining areas on Wednesday, officials said.

According to the disaster management officials in the region, the earthquake, which measured 4.5 on the Richter Scale, occurred at 9:42 am local time (0412 GMT).

The epicenter of the earthquake was in Pakistan 36.04 degrees North, 71.27 degrees East, said Aamir Ali, coordinator of the Disaster Management Office in Srinagar.

Seven killed in train collision in India

NEW DELHI, 30 April — At least seven people were killed and 20 injured when a local passenger train collided with a goods train carrying several oil tanks in the southern Indian city Chennai in the state of Tamil Nadu on Wednesday, said police.

The collision took place around 06:00 am (00:30 GMT) at the northern Vyasarpadi suburb of Chennai, causing a big fire, said police.

All the injured were rushed to the General Hospital in Chennai while police are trying to identify the dead, including the motormen of the two trains who were believed to be among the dead.

Railway authorities have suspended all local and long distance trains going to Chennai Central from the northern suburb town of Arakkonam, where the mishappened passenger train departed, on a route which is one of the busiest urban rail lines in India.

Workers carry out rescue operation near the damaged coach of a Electric Multiple Unit (EMU) after it collided with a goods train in the southern Indian city of Chennai on 29 April, 2009. —XINHUA

Shanghai particle accelerator to open its doors for business

BEIJING, 30 April — The building and testing of a machine that can create super X-rays capable of exposing the complex structures of chemical compounds and proteins has been completed at Shanghai Zhangjiang High-tech Park in Pudong New Area.

The Shanghai Synchrotron Radiation Facility is expected to significantly boost China’s capability and competitiveness in scientific research, especially in life sciences, officials from the Shanghai Institute of Applied Physics of the Chinese Academy of Sciences, the facility’s key developer, were quoted as saying by Thursday’s Shanghai Daily.

The 1.2 billion yuan (176 million US dollars) particle accelerator, China’s biggest light facility, will also help in the study of viruses and new drugs and the development of technology.
### Bolivia bans pork imports from Mexico, USA, Canada

La Paz, 30 April—Bolivia banned Wednesday the imports of pork or sub products from Mexico, the United States and Canada, a step taken to stop the entrance of swine flu to the country.

All the import requests of pork food must be sent to the National Unit of Animal Safety to be evaluated and wait for authorization from the National Service of Agriculture Sanity and Food Safety (Senasag) said.—INTERNET

### Oil rises near 51 dollars despite inventory buildup

New York, 30 April—Crude oil rose near 51 US dollars a barrel on Wednesday despite a government report showed a larger-than-expected buildup in the crude supplies.

Light, sweet crude for June delivery gained 1.05 dollars to settle at 50.97 dollars a barrel on the New York Mercantile Exchange.

Oil seems to have followed the equity market performance and remained resilient to another jump in the crude inventory. Wall Street rebounded strongly with major indexes gaining more than two percent, as investors found optimism after the Federal Reserve said the pace of the economic contraction is slowing down.

However, oil demand remained weak in the United States, the world’s largest oil consumption country. The US Energy Department’s Energy Information Administration (EIA) reported on Wednesday that, during the week ended 24, crude stockpiles jumped by 4.1 million barrels, more than doubled analysts’ expectations. Current crude inventory reached 374.7 million barrels, highest level since 31 Aug, 1990.

EIA report also showed that average petroleum consumption is down to 18.4 million barrels a day, the lowest since 28 May, 1995.—INTERNET

### Mexico orders economic shutdown; pandemic imminent

Mexico City, 30 April—Mexico’s president told citizens to stay home from Friday for a five-day partial shutdown of the economy, after the World Health Organization raised its alert level and said a swine flu pandemic was imminent.

In his first televised address since the crisis erupted last week, President Felipe Calderon told Mexicans to stay home with their families. The country will suspend non-essential work and services, including some government ministries, from 1-5 May. “There is no safer place than your own home to avoid being infected with the flu virus,” Calderon said.

Mexico reported another 17 deaths potentially linked to swine flu, bringing the total to as many as 176. Ten countries have reported cases of the H1N1 strain, and Texas officials said a 22-month-old boy had died while on a family visit from Mexico, the first confirmed swine flu death outside Mexico.

“Influenza pandemics must be taken seriously precisely because of their capacity to spread rapidly to every country in the world,” WHO Director General Margaret Chan told a news conference in Geneva on Wednesday as she raised the official alert level to phase 5, the last step before a pandemic.

### China calls for strengthened efforts on economic reforms

Beijing, 30 April—China’s State Council, or Cabinet, Wednesday called for greater efforts on economic reforms to boost domestic demand, improve economic structure and maintain relatively fast and sound economic development.

An executive meeting of the Cabinet, presided over by Premier Wen Jiabao Wednesday, reviewed and passed a guideline document on deepening economic reforms in 2009.

The document urged local governments to simplify administrative approval procedures to stimulate investment vitality and open more investment channels for the private sector.

The State Councilors called for deeper reforms of state-owned enterprises and promoting the development of the non-public economy and the growth of small and medium-sized enterprises.

### Will GM become ‘Government Motors’?

Washington, 30 April—If the government takes a majority stake in General Motors, will it end up taking the wheel, too?

Under a restructuring plan put forth this week by GM, the ailing automaker would give majority ownership to the federal government to stave off bankruptcy. That handoff would amount to an extraordinary partial nationalization of the maker of Buicks, Cadillacs and Chevys that has been an independent company since 1908.

The Obama administration has said it isn’t interested in running an auto company, but with that bag of a stake, some analysts say the government would probably be tempted to push its own policies on such issues as alternative fuel vehicles and unions. And that could affect the types of cars that roll off GM’s assembly lines. “The fear here is that a company owned by the government would move toward the do-good results, not the bottom line,” said Gerald Meyers, a University of Michigan business professor and former CEO of American Motors Corp.

### Brazil’s quarterly industrial production hits 10-year low

Rio de Janeiro, 30 April—The international financial crisis has led to a sharp fall in the Brazilian industry production indicator in the first quarter of this year, which hit a 10-year low, the country’s National Industry Confederation (CNI) announced Wednesday.

According to a study released by the CNI, the indicator which measures Brazil’s industry’s production fell to 36.1 points in the quarter, lower than the previous quarter’s 40.8 points and 52.2 percent in the first quarter of 2008. The indicator goes from zero to 100. Any figure under 50 indicates a contraction in the activity, which means that production is downward.
**Indian army increases surveillance capabilities along LoC**

NEW DELHI, 30 April—With two major infiltration bids along the Line of Control in the Indo-Pak border in the last month, Indian Army Wednesday said it had “redeployed” its troops and increased surveillance capabilities to prevent the ‘terrorists’ from crossing over into India.

“The Indian Army has done redeployment (of troops to counter infiltration)...We have built in additional surveillance capabilities to look across LoC...We have deployed more technical equipment for surveillance even at most difficult places keeping the LoC under active patrolling and surveillance at all the times,” Army Vice Chief Noble Thamburaj told reporters here. On the major infiltration bids by terrorists, he said, “In the last fortnight of month, there have been two major infiltration bids, which were partly successful but we in our second tier were able to neutralize most of them.” The Army Vice Chief said the region may witness a “defining moment” as Pakistan Army has started major operations against the Taliban militants.

**India says it cannot accept a cap on development**

WASHINGTON, 30 April—India Wednesday said it will not accept any cap on its development in the name of climate change, assuring that any negotiation on climate change should take into account the overriding developmental objective of the developing countries.

Briefing reporters at the conclusion of a two-day meeting of 17 major economies on climate change and energy, Indian Prime Minister’s Special Envoy Shyam Saran said there has to be a balance between historical responsibility and current emissions.

“Focus on current emissions is not going to give you an equitable result,” he said, adding developed countries simply can’t absolve of their historic responsibilities and talk about current emissions only.

“We have been saying that the developed countries, sooner or later should indicate what the emissions targets they are willing to take are? Whatever they had agreed to take on in the Kyoto protocol 1997, only few countries are going to be able to meet those targets,” he said.

**Obamas keen on Indo-US renewable energy partnership**

WASHINGTON, 30 April—US President Obama is keen to build an Indo-US renewable energy partnership, taking forward his recent discussions with Prime Minister Mannohman Singh on climate change and energy security, a senior Indian official said here Wednesday. This message was conveyed by Obama to Indian Prime Minister Singh’s Special Envoy on Climate Change Shyam Saran during an official reception.

Obama reminded Saran the conversation he had in this regard with Singh in London early this month and said he was “encouraged and pleased” with the exchange of views.

Indian and the US should seek to build renewable energy partnership, Obama told Saran during the brief exchange they had at the reception hosted by the President at White House for the participants of the 17 nation Major Economies Forum on Energy and Climate.

**Man bits snake after attack**

A Kenyan man survived a Python attack, partly because he bit the snake after it tried to drag him into a tree.

According to local media on Wednesday, Ben Nyaumbe, a local farmer, was attacked by the 13-foot snake and fought him for several hours.

The enormous reptile wrapped him in its coils and hauled him up a tree, but Nyaumbe was able to cover the snake’s head with his shirt, and reach his cell phone, where he called police for help.

The man’s employer arrived with police and local villagers who tied the python on the tail, causing its lip to split open where it came in contact with the sharp tip.

**Coins, mummies and statues point to Cleopatra tomb**

Zahi Hawass showed off the ancient treasures to journalists during a tour of a 2,000-year-old temple to the goddess Osiris, where they were found. He believes the site near the Mediterranean Sea contains the tomb of the doomed lovers that has been shrouded in mystery for so long.

“In my opinion, if this tomb is found, it will be one of the most important discoveries of the 21st century because of the love between Cleopatra and Mark Antony, and because of the sad story of their death,” he said.

Mark Antony and Cleopatra challenged Caesar Augustus for control of the Roman Empire more than two millennia ago. Their armies were defeated and rather than submit to captivity, the lovers committed suicide — Mark Antony by his sword, Cleopatra with a poisonous asp.

**Bamboo keyboards expect to bring green life to computer users**

Eight hours of computer work everyday always makes white collars feel boring, but Zhang Keli has found a welcome respite from office chores — a bamboo keyboard.

“It’s a novelty to me,” said 28-year-old Zhang, a fashion-loving employee of the Jianshou Advertisement Co Ltd in the eastern Chinese city of Nanchang, Jiangxi Province, the hometown of bamboo.

She just bought such a bamboo keyboard to replace a plastic one for her home computer a few days ago.

“I feel fun whenever I press the bamboo buttons, which gives me a feeling of gentleness and ease my tension and tiredness from work,” she said.
Nav Pyi Taw, 30 April—Members of National League for Democracy U Tun Tun from Shwepetthit township, Yangon Division on 11 November 2008, U Win Maung from Moeyin township, Kachin State on 12 November, U Win Naing from Thegon township, Bago Division on 25 November and U Maung Htwe (a) Kyu Sha Daung from Hsipaw township, Shan State (North) on 19 December resigned from the party of their own volition by sending their resignation letters to NLD headquarters and local authorities.

In addition, NLD members U Phyu and U Ohn Thaung from Nay Pyi Taw Tatkon on 5 January, 2009, U Win Thaung and U Min Gaung from Myinmu township, Bago Division on 12 January, U Bo Gyi from Shwegyin township, Bago Division and U San Hla (a) Kyaw Me Lay, U Kyaw Thaung, U Thaung Pe, U Chit Win, U Lin Aung and U Thein Zaw from Bannauk township, Katha District, Sagaing Division on 17 January, U Win Maung and U Po Paing from Nay Pyi Taw Tatkon on 19 January, U Kyi Tin from Nay Pyi Taw Tatkon on 21 January, Ma Zin Zin Latt and Ma Win Phyu Ei from Maahangnyang township, Mandalay Division on 22 January, U Win Swe from Nay Pyi Taw Tatkon on 23 January, Ko Aung Kyaw Moe from Maahangnyang township, Mandalay Division and 11 members including U Khin Maung Htwe and U Kyaw Myint from Moeyin township, Kachin State on 26 January, U Kyaw Nyunt from Wundwin township, Mandalay Division on 28 January, U Zaw Min Latt, U Aung Myint Aye, U Hla Htay, U Tha Sein, U Aye Pe and U Maung Maung from Moeyin township, Kachin State on 10 February, U Soe Naing from Mayangon township, Yangon Division on 12 February, U Nay Lin Aung, Daw Myat Mon Aung and Daw Tha Zin Htwe from Seikkyi Kanaungto township, Yangon Division on 8 March, U Tin Gyi Maung from Phaungpyin township, Sagaing Division on 9 March, U Khan Maung Aye from Namhsan township, Shan State (South) on 4 April and U Aung Myint Sein from Taungdwingyi township, Magway Division on 24 April quitteed the party of their own volition.

Their resignation letters expressed that they joined NLD party with the aims of serving the interests of the state and the people, that there is no trust and unity among the members despite the party seems to be in a good form, that there are bullies and giving priority to self-interest, that some leaders are lackeys of foreign countries and that they resigned from the party with the conviction that they would take part in the real national politics designed by the state and agree on the State's seven-step Road Map.—MNA

Myanmar Railways to complete nationwide railroad network

(from page 16)

Now, Yangon-Mandalay dual railroad has come into existence, thus saving a lot of time spent by a train to wait for another train till the latter has left the station. Now, 95 miles long Katha-Bhamo railroad, 198 miles long Namsang-Kengtung railroad, 95 miles long Pyawbwe-Natmauk-Magway railroad, 257 miles long Sittway-An-Minbu railroad and 132 miles long Dawei-Mayik railroad are under construction. Minbu-Sittway railroad section project will be very challenging because it will get across the west Yoma mountain range.

Thazi-Shwenyaung-Taunggyi-Hsaikkhau-Namsang railroad and Thazi-Aungban-Lokaw railroad pass through the east Yoma and Shan Yoma mountain ranges. While in service, I served as the person in-charge of a section of Hsaikkhau-Namsang railroad.

Here, I mean that construction of a railroad is more difficult in a hilly region than in a plain. So, to construct a railroad in a mountainous region is a really onerous task. After the groundwork, 1” x 2” pieces of gneiss are laid, then sleepers on them, and then rails on them. In that regard, the gneiss is to be of high quality and to be used adequately. Today, the Myanmar Railways is constructing new railroad that covers the whole country. To make the rail runs across the nation daily, the MR uses more than 80 locomotives.

Therefore, very soon, the people can travel by train from a region to any other region in the nation, enjoying greater development in the economic, social, education, health, religious and cultural sectors thanks to smooth transport resulting from the hard work the Myanmar Railways is exerting in the national interest.

Senior General Than Shwe sends Workers Day message

(from page 1)

So, the government has been able to generate a large number of job opportunities. Now, the government is nurturing and training the workers into human resources.

In recognition of the important role of the workers in the nation-building tasks, the government guarantees the fundamental rights of workers such as security of workers, worksite safety, correct solutions to trade disputes, and improvement of their living standard.

Now, the State constitution drawn with the basic principles at the National Convention by the delegates including the delegates of workers, has been approved with the votes of the great majority of the voters at the referendum.

In accordance with the new constitution, elections will be held in 2010 to form hluttaws (parliaments).

It is, therefore, required of the workers to work hard hand in hand with the people, employing the knowledge and experiences gained throughout the successive periods and evaluating the objective conditions for successful completion of the State's seven-step Road Map designed to build a peaceful, modern and developed nation.

On such an auspicious occasion of the Workers Day, I wish the entire workers, blue collar and white collar, a success in serving the national interest, working harder than ever in production and services sectors with physical and mental well-being. — MNA

Li-Gen Myint Swe of Ministry of Defence speaking at coordination meeting on Leading Committee for Beautifying and Upgrading Yangon City Meeting 7/2009. — MNA

Beautifying and upgrading of Yangon discussed

YANGON, 30 April—Leading Committee for Beautifying and Upgrading Yangon City held its meeting (7/2009) at the City Hall, here, yesterday.

Patron of the Leading Committee Lt-Gen Myint Swe of the Ministry of Defence attended the meeting.

In his speech on the occasion, Lt-Gen Myint Swe stressed that as Yangon is a commercial city, all committee members must spare no efforts in the process to make it become an international standard city as targeted.

Chairman of Yangon Division Peace and Development Council Commander of Yangon Command Brg-Gen Win Myint and Chairman of Yangon City Development Committee Mayor Brg-Gen Aung Thein Lin presented necessary reports.

Chairmen of working committees and officials concerned reported measures taken by their respective committees. Lt-Gen Myint Swe made necessary instruction and fulfilled the needs. — MNA

Mandalay Div enjoys... 

Patheingyi Township in Mandalay and Paung, Mon State, passing through Kyaukse and Meiktila districts.

During the tour of Kyaukse township, Lt-Gen Tha Aye met with local people in Thanywa Village-tract in Kyaukse Township and fulfilled the requirements for the agriculture, health and development sectors in the township. At the meeting, the commander donated cash to the fund of the Thanywa Station Hospital and presented sport gear to officials concerned for villages in the township.

Afterwards, Lt-Gen Tha Aye and party proceeded to Myogyi Dam project near Myogyi Village in Ywangan Township being implemented by the construction group-7 of the Ministry of Agriculture and Irrigation. At the briefing hall, the director of the construction group-7 reported on work on construction of the dam, facts about the dam and generating hydro power from the dam. He also reported on irrigation of water from Kengkham Dam to Zawgyi Dam through the 14-mile long canal.

After hearing reports, Lt-Gen Tha Aye called for timely completion of the dam to irrigate the Meiktila Plain and to crop fields sufficiently.

They also inspected the construction works of the dam. Upon completion, the dam will generate 135.70 million kilowatt hours and will irrigate about 30,000 acres in Meiktila Plain.

During the tour of Natogyi Township in Myingyan District, Lt-Gen Tha Aye met with local people and presented bio gas-powered batteries, fluorescents and sports gear to them. Afterwards, Lt-Gen Tha Aye and party went to the work site of the district-to-district linking Road No-1 at Mile Post No 14 and gave instructions to officials concerned.

MWEA to hold AGM on 8 May

YANGON, 30 April — The plenary meeting 2008-09 of Myanmar Women Entrepreneurs' Association will be held at the meeting hall of the association in MWEA Tower on Shwedagon Pagoda Road in Dagon Township here at 10 a.m. on 3 May.

The 14th annual general meeting of the association will be held at Ball Room of Sedona Hotel on Kaba Aye Pagoda Road at 9 a.m. on 8 May. The dinner will be hosted at the same venue at 6 p.m. the same day. Members are invited to attend the meeting and dinner without fail. — MNA
Inspection for safe consumption of pork and related products imported through border gateways, educative talks on animal health held

L&F Ministry: There has been no swine flu case in Myanmar

NAY PYI TAW, 30 April—Swine influenza has broken out in 27 countries from 17 to 29 April. So far, the swine flu has infected 2962 people and killed 160.

There has been no case of H1N1 virus in pig in the regions where swine flu breaks out in humans, according to the news release of World Organization for Animal Health (OIE).

The Ministry of Livestock and Fisheries is carrying out necessary preventive measures against outbreak of swine flu virus in pigs of Myanmar. Immediately after receiving the news about the outbreak of swine flu in humans in Mexico, the Ministry of Livestock and Fisheries is releasing warnings to State/Division LBVDs and different levels of the Myanmar Livestock Breeding Federation, making field trips to check the health condition of animals at pig farms, performing the surveillance of virus and raising the bio-security.

News and information on knowledge about animal health are being announced to the people in time through dailies, radio and TV.

The inspection for safe consumption of pork and related products imported through border gateways and the educative talks on animal health are being held in States and Divisions.

The Ministry of Livestock and Fisheries issued news that so far there has been no case of swine flu infected to pigs in Myanmar.

Warning on Swine flu in Myanmar

1. News on swine flu in humans throughout the world
   (a) Outbreak of virus across the world: Swine influenza in humans is spreading from North America to South America, Europe, Asia and Australia from 17 to 29 April. The World Health Organization designated swine flu as pandemic alert level phase 5.
   (b) Nature of virus in swine flu: It is a new virus H1N1 combined with genes of virus from pigs, chicken and human influenza.

2. Point of view of World Organization for Animal Health (OIE)
   (a) According to the news released by the OIE on 28-4-2009, Swine influenza A (H1N1) that broke out in humans in North America was not infected from foods.
   (b) Up to now, it should not be called swine influenza because the virus H1N1 had not been found in pigs. The current virus should be called North American Influenza similar to the past epidemics of human influenza such as Spanish flu and Asian flu.
   (c) As there is no evidence of virus infection in pigs in the regions where swine flu breaks out, the World Organization for Animal Health (OIE) states that it is not necessary to limit the trade of pig and pork in the international market and the eating of pork or related products are not harmful to the consumers.

3. Nature of swine flu: Although serious illness can be found in pigs with virus infection of swine flu, there may be least causality. Such virus can be prevented at the breeding farms through the vaccines.

4. Common outbreak of swine disease in Myanmar: The common outbreak of virus in pigs is only classical swine fever, and so far, there has been no case of swine flu in Myanmar.

5. Attention to animal health: As swine flu may have the zoonosis infection between animals and humans, the pig breeders and sellers are to join hands with the Livestock Breeding and Veterinary Department, the Myanmar Livestock Breeding Federation, development affairs committees, and local authorities in taking preventive measures against the swine flu.

News and information on outbreak of swine flu released to people in time
Ministry of Health: There has been no swine flu case in Myanmar up to now

NAY PYI TAW, 30 April—Swine influenza has broken out since 17 April. So far, the swine flu infected more than 2,100 people and killed 159 in Mexico, and the virus has spread to 18 countries including Mexico.

Swine influenza may be transformed into global human flu. Since 25 April, the Ministry of Health has been taking preventive measures against the swine flu transmitting to humans.

The Ministry of Health has carried out preparedness measures against outbreak of Swine influenza A (H1N1) in Myanmar, made preparations for medical treatment, provided medicines and medical equipment and laboratory apparatuses to the hospitals and prepared the special patient wards at the hospitals for emergency use.

With regard to situations of outbreak of Swine Influenza, the preventive measures and dissemination of health knowledge are being released to the people through TV, radio and dailies in time.

Since 29 April, the visitors have been screened at airports, seaports and exits of borders.

Up to now, there has been no case of swine flu in Myanmar, according to the Ministry of Health.

MMCWA 19th annual meeting concludes

NAY PYI TAW, 30 April — Myanmar Maternal and Child Welfare Association concluded its 19th annual meeting at its office here this morning. It was attended by MMCWA President Daw Khin Saw Hnin, Vice-President Daw Aye Aye, CEC members and central council members, Chairpersons of State/Division Maternal and Child Welfare Supervisory Committees, Secretaries and joint-secretaries.

MMCWA President Daw Khin Saw Hnin presided over the annual meeting and Secretary Dr Daw Wai Wai Tha acted as MC and Joint-Secretary-2 Dr Daw Thein Thein Htay co-MC. Next, central council members gave suggestions on annual reports and papers of State/Division Maternal and Child Welfare Supervisory Committees.

Central Council members urged more efforts in providing health, education, economic and social sectors for mothers and children and their families and this should be made as the future plan.

The president, the vice-president and party reviewed suggestions and those present made three resolutions and adopted 12 future work programmes. The meeting ended with concluding remarks of the president. — MNA

MMCWA passes 3 resolutions, adopts 12 future work programmes

NAY PYI TAW, 30 April — The 19th Annual Meeting of Myanmar Maternal and Child Welfare Association took place at the association office here on 28 and 29 April. After the meeting, three resolutions were passed and 12 future work programmes laid down.

Three resolutions
1. To follow the instructions of National Health Committee as a work guideline
2. To participate in preparedness and response measures against global human flu and in times of emergencies in collaboration with departments, local and international social organizations, intellectuals and intelligentsia and the people under the leadership of the State in accord with the motto of World Health Day 2009 “Save lives. Make hospitals safe in emergencies.”
3. To actively cooperate with government departments and the internal and international social organizations with the same aims in carrying out the tasks of the association.

Twelve future work programmes
1. To focus on rural areas and suburban areas in the drive for reducing mortality rate of pregnant women, infants and children under five.
2. To continue to turn out local auxiliary midwives and supervise for raising their quality.
3. To strive for enabling families to have the habit of increasing their knowledge of nutrition and cooking nutritious food
4. To take preventive measures against infectious diseases including malaria, TB, HIV/AIDS and bird flu, and to inform to nearest health care centres as quickly as possible if the diseases break out.
5. To place emphasis on educating the public about healthy living in order to prevent diseases.
6. To carry out sanitation tasks in families’ surrounding areas and to use clean water and fly-proof latrines in every house.
7. To grow herbal plants and provide family health care based on traditional medicine.
8. To create a healthy atmosphere for children and to establish garbage-, mosquito- and tobacco-free schools.
9. To extend education promotion tasks.
10. To open more pre-primary schools for all-round development of children, to ensure that all school-age children have education opportunities, that they complete primary education and that they get assistance to pursue middle and high school education.
11. To open more training courses on small loans and domestic training in order to increase family income.
12. To continue to turn out heads of ten households, to expedite health, education, social and economic tasks and to send lists of mortality rates by heads of ten households to nearest health centers. — MNA
Suspected suicide bomber attacks Ankara university

ANKARA, 30 April—A woman pretending to be a student detonated a bomb at an Ankara university during a visit by a former justice minister on Wednesday but no one was wounded, state news agency Anatolian said.

The woman, who was carrying explosives, approached former minister Hikmet Sami Turk as he visited the university, Anatolian said. The woman was detained and two separate explosives with fuses were found on her. Turk told NTV broadcaster the blast threat was hated by left-wing organizations for his policies when he was in office. Turk also said he had received death threats. “There has been a bomb attack, but it’s over now, we don’t know the details of the attack. We think it’s a suicide bomber,” a Bilkent University source, who declined to be named, told Reuters.

Police have recently warned of an escalation in attacks by the outlawed, separatist Kurdistan Workers’ Party (PKK) in Turkey. Separately, nine soldiers died in a bomb blast blamed on the PKK in southeast Turkey. MNA/Reuters

At least 13 shot dead in Azeri college shooting

BAKU, 30 April—A statement from the Azeri Health Ministry said 13 people had died in the shooting at the State Oil Academy in Baku, capital of the Muslim Caspian Sea state. Police said the “terrorists” had been neutralised, but it was unclear how many gunmen were involved.

Police closed access roads and special forces surrounded the building, a Reuters reporter said. Photographs showed pools of blood on the steps to the university and paramedics carrying out bodies in bags.

Baku ambulance service chief Mursal Gamidov said there was one gunman, a citizen of Georgia, who appeared to be a student of the academy. ANS said there appeared to be two gunmen. A student who asked not to be named told Reuters he also believed there were two attackers. “As far as I know there were two terrorists,” he said. “One of them committed suicide and another was arrested by police.”

He said the shooting started shortly after the bell rang for morning classes.—INTERNET

186 mln in US live with dangerous air pollution

WASHINGTON, 30 April—Six in 10 US residents—more than 186 million people—live in areas with dangerous levels of air pollution, the American Lung Association reported on Wednesday. The air in many US cities became dirtier last year, the association said in its annual “State of the Air” report. “Despite almost 40 years since the Clean Air Act passed in 1970, six in 10 Americans still live in dirty air areas, areas where the air is unhealthy to breathe,” the group’s Paul Billings said in a telephone interview.—MNA/Reuters

World can burn 25 pct of oil, coal “safely”: Study

WASHINGTON, 30 April—The world can burn only a quarter of proven reserves of oil, gas and coal to be confident of staying within safer climate limits, unless untested carbon fixes work, experts said on Wednesday.

Two studies published in the journal Nature, scientists honed the basis for urgent climate action as the world tries to map by the end of this year agreement on a new treaty to replace the Kyoto Protocol.

People could burn no more oil, gas and coal in their homes, cars and factories after 2024, at current rates, to limit to one in five the chance of exceeding 2 degrees Celsius warming worldwide, one article found.

Carbon emissions are rising at about 3 percent a year, although that rate is expected to fall temporarily as a result of the recession.

Without urgent action the climate problem could get out of hand, becoming very difficult or impossible to contain within safer limits, both studies found.

Fighting climate change will be expensive, for example to replace cheap fossil fuels with more costly, renewable energy.

Both Nature studies recommended that global emissions peak by 2020 or sooner. “Late and rapid reductions are risky, expensive and disruptive, and hence potentially politically infeasible,” both researchers said in a joint commentary in Nature.

The second study said that people could only emit another 500 billion tonnes of carbon for all time, which they would do in the next 40 years at current rates. That implied a 50 percent chance of exceeding 2 degrees.—INTERNET

Chrysler to file for bankruptcy

WASHINGTON, 30 April—Chrysler LLC is expected to file for bankruptcy Thursday in Manhattan bankruptcy court, according to sources with direct knowledge of the situation.

An administration official said earlier on Thursday that the automaker would proceed with Chapter 11 bankruptcy protection proceedings now that talks with debtholders have broken down.

Meanwhile a small group of hedge funds rejected a final opportunity to restructure auto maker Chrysler outside of bankruptcy in negotiations with the US Treasury, an Obama administration official said.

US officials had offered Chrysler’s secured lenders $2.25 billion in cash in exchange for forgiving their first lien debt, the official said.

“They failed to act in either their own economic interest or the national interest does not diminish the accomplishments made by Chrysler, Fiat and its stakeholders nor will it impede the new opportunity Chrysler now has to restructure and emerge stronger going forward,” the official said.

As of Thursday morning, Chrysler still had not gained the bondholder support it needs to move forward with a restructuring and avoiding the first-ever bankruptcy filing by a Big Three US automaker.—INTERNET

Danish wind firm Vestas cuts 1,900 jobs

COPENHAGEN, 30 April—The world’s biggest wind energy group, Vestas of Denmark, said on Tuesday it would cut 1,900 jobs in northern Europe due to slumping demand, and posted a 70 percent rise in first-quarter net profits. Vestas in a statement cited “over-capacity” in its northern European plants, which produce wind turbines for American markets, and said there was also not enough demand in Europe to match current production, making layoffs necessary.

The group said its net profits in the first quarter of 2009 were 56 million euros (73 million dollars), up 70 percent in volume and 44 percent in value compared with the same period last year, said Vietnam’s General Statistics Office on Tuesday.

According to Vietnam Food Association, Vietnam has signed contracts to export four million tons of rice out of the five million ton target this year.

Despite the rice export figure in the first months of this year showing positive signs for the local rice exporters amid the global economic downturn, export prices are declining, said the association.

The country’s rice in April was exported at 406.5 US dollars a ton on average, down 26 US dollars a ton over the same month last year. This price is likely to go down due to competitive prices of foreign rice producers like Thailand and India, said the association. The association is considering the proposal of exporting an additional 200,000 tons of rice this year to the government for approval, raising the total rice export volume to 5.2 million tons. —Internet

Venezuela seizes over 2,700 tons of illegal drug materials

CARACAS, 30 April—Venezuela this year has seized more than 2,700 tons of chemical materials used for producing illegal drugs, officials said on Monday.

Director of the National Office Against-Drugs (ONA) Nestor Reverol told reporters about the figures at the opening of the workshop “Mechanisms of Control and Full Use of Chemical Substances”, sponsored by the Inter-American Commission for Controlling Drug Abuse of the Organization of American States (OAS).

Reverol said the training of the staff is very important for Venezuela to stop the trafficking of illegal drug substances.

To the moment some 700 officers in the country are well-trained to identify these substances, he said.

India bans circulation of US DVDs without authorization

NEW DELHI, 30 April—India’s Delhi High Court has ruled that renting of imported American DVDs was against law, said the local Hindi daily Navbharat Times on Tuesday.

The court has ruled that if a movie rental shop buys CDs, DVDs or blue ray discs from American markets and puts in circulation in India, in form of renting or otherwise, it will make up a violation of law, according to the report.

The court said imported DVDs without authorization of the Indian censor board and copyrights documents cannot be circulated in public, although one can buy CDs or DVDs from other countries for personal viewing at home.

The US Hollywood firm Warner Bros. Entertainment has earlier filed a petition at the court requesting the ban of circulation of US DVDs in India, saying it violates the copyrights of American movie producers.

The court has ruled that screening rights of a movie are limited only to a particular country or area, so a movie which has been given screening rights in the US cannot be screened in India without authorization.
National book trading expo opens

BEIJING, 30 April—The eastern coastal city of Qingdao is hosting an auxiliary event to the 19th National Book Trading Expo in Jinan. Available at the book carnival are some 160 thousand titles from more than four hundred domestic publishers.

The Book Expo’s Qingdao branch is the largest ever show of its kind in the port city. The development of China’s publishing industry is presented through print publications, animation and video games, copyrights, and periodicals. On display are results of heavyweight projects like “The Complete Canon of Chinese Literature” and “Commentaries on Chinese Thinkers.” Also available are more accessible and affordable titles. Even better are the discounts.

Book buyer Zhong Wei said, “I haven’t added them up yet. These books cost about three thousand yuan. I believe. All of them are at discounted prices, mostly thirty to fifty percent. I never had such bargains at bookstores. I love classical literature, so I bought all these books.”

Many of the books deal with social sciences, literature and arts, and the 60-year history of the People’s Republic of China. Most evident is the increasing integration of traditional publishing operation with the new media.

S Korea lifts ban on stem cell research

SEOUl, 30 April—South Korea Wednesday conditionally lifted a ban on stem cell research using human eggs, three years after outlawing the practice because a scientist was found to have faked his work.

The national committee on bioethics said it agreed to approve a new research project if scientists meet certain conditions.

The committee banned such research in 2006 after Hwang Woo-Suk’s claims that he created the first human stem cells through cloning were ruled to be bogus. A team from Seoul’s Cha General Hospital had sought approval for its stem cell project using aborted human eggs to develop cures for grave human diseases.

“The hospital will be allowed to go ahead with its project if it meets four conditions,” a committee official told AFP. He said details would be announced later.

South Korean scientists have urged the government to allow embryonic stemcell research, especially after US President Barack Obama this year lifted a ban on federal funding for such research.

HK scientists developing rapid test for swine flu

BEIJING, 30 April—Hong Kong said Monday it has assigned a team of scientists to develop a test that will hopefully cut the time it takes to diagnose the new swine flu strain from a few days to a few hours.

Researchers in Hong Kong played a big role in discovering and determining how to treat SARS — a separate deadly virus that spread rapidly in 2003, killing more than 900 people. The island was the second hardest hit after mainland China.

Thomas Tsang, controller for Hong Kong’s Center for Health Protection, said the government and the territory’s universities are jointly developing the rapid swine flu test using genetic information on the virus from the World Health Organization. Such data is shared with designated flu laboratories worldwide.

“We will look at the information, including its genetic makeup, and we can produce a test correspondingly,” Tsang said in Hong Kong.

Roma’s Doni out for 3 months after knee operation

ROME, 30 April—AS Roma’s challenge for a top four Serie A finish and Champions League football has been hit after goalkeeper Doni was ruled out for three months with a knee injury.

Roma released a statement claiming the Brazilian needs an operation on the cartilage in his right knee, a process that usually requires three months of recuperation.

Roma currently sit sixth in Serie A, six points behind fourth-placed Fiorentina, who threshed them 4-1 last weekend, with just five matches remaining.

United edges Arsenal in Champions League

MANCHES-
ter, 30 April—Sir Alex Ferguson has warned his Manchester United side that they still have it all to do in their Champions League semi-final second leg against Arsenal next week, after United’s narrow 1-0 first leg victory at Old Trafford.—INTERNET

Murray out of Rome Tennis as Federer, Nadal cruise

ROME, 30 April—World number four Andy Murray was the major casualty on the third day of the ATP Rome clay court Masters on Wednesday as top two seeds Rafael Nadal and Roger Federer breezed into the third round.

Qualifier Juan Monaco dumped fourth seed Murray out of the second round following an epic three-set match that lasted two hours, 40 minutes. The Argentine clay specialist made a mockery of his number 58 world ranking to come through 1-6, 6-3, 7-5 against an out-of-sorts Murray, whose dreadful Rome record continued.—INTERNET

Tennis ace Jankovic stroll into second round

STUTTGART, 30 April—Defending champion Jelena Jankovic needed just over an hour to breeze past Slovakian teenager Dominika Cibulkova 6-1, 6-1 on Wednesday and book her place in the second round of Stuttgart’s WTA tournament.

Having finished last year as world number one, Jankovic has dropped to fourth in the WTA rankings but the 24-year-old had no problems against her first round opponent as she bids to defend her title here on clay.

“I have struggled for form recently and it is important to enjoy my tennis and I enjoyed that today,” said Jankovic, “I expected a tough match, because in the past she has given me trouble”—INTERNET

O’Neill keen on Old Firm joining EPL

BIRMINGHAM, 30 April—Martin O’Neill added his backing on Wednesday to plans for Scottish giants Celtic and Rangers to play in the English Premier League.

Bolton chairman Phil Gartside has put forward proposals which would see the Premier League create a second division, including the Old Firm: Aston Villa manager Martin O’Neill, who won three Scottish titles and three Scottish FA Cups while in charge of Celtic from 2000 to 2005, believes such a move would be mutually beneficial to both of the Glasgow clubs and the EPL.

“My personal thought is that Celtic and Rangers would enhance the Barclays Premier League,” he told Aston Villa TV, the club’s own television station. “Glasgow is a phenomenal football city. Celtic house 60,000 fans and Rangers house 50,000 fans every game. I’m not sure about Rangers but I know Celtic’s capacity could go from 60,000 to 80,000 over night, without a doubt.—INTERNET

Bremen no problem for Jol as Hamburg eye Euro crown

BREMEN, 30 April—Hamburg coach Martin Jol is relishing facing Bundesliga rivals Werder Bremen in Thursday’s UEFA Cup semi-final despite the heart-break of losing to them on penalties in the German Cup last week.

Goalkeeper Tim Wiese was Bremen’s hero in Hamburg when he broke home fans’ hearts with three consecutive saves in the penalty shoot-out to hand his side a 3-1 victory on spot kicks in the German Cup semi-final. And with Hamburg fourth in the Bundesliga, while Bremen languish in 10th, Jol is not bothered by last week’s cup defeat at the hands of Bremen or the 2-0 upset at Dortmund in the league last Saturday.

Barcelona slam Chelsea tactics after draw

BARCELONA, 30 April—Barcelona coach Pep Guardiola reacted angrily at what he saw as the referee’s leniency towards English side Chelsea’s physical approach in their 0-0 Champions League semi-final first leg match.

Chelsea went away with mission accomplished after they stood firm against a barrage from Barcelona at the Camp Nou and become the first side this season in the competition to stop Barca from scoring at home. As expected Barca took the game to Chelsea and enjoyed the vast majority of the possession but they were unable to find a way through to goal for the first time at home this season in the competition.

Pet Cech made a couple of important blocks from Samuel Eto’o and substitute Alexandre Hleb but too often they were restricted to strikes from distance.”It is difficult to play against a team which doesn’t want to play football,” stormed 37-year-old Guardiola, who has worked wonders with the side since replacing the sacked Frank Rijkaard for this season.

Martin Jol (right), head coach of German first division football club Hamburg SV, gives instructions to his players during a training session.—INTERNET

A different look for Tiger, Phil at Quail Hollow

CHARLOTTESVILLE, 30 April—A bank’s name in the tournament title isn’t the only thing missing at Quail Hollow. That thick rough lining the fairways is gone, too. “There’s definitely a different setup,” said Jim Furyk, a past winner of what is now the Quail Hollow Championship. “We’ve come here a lot of times where the rough has been very deep, thick. It’s been a huge premium on accuracy. And the rough is very low this year, as low as I’ve ever seen it, and probably as low as I’ve seen it in almost any tour event I’ve ever played, outside of Harbourtown.

“Obviously, it’s a different style.”

The PGA Tour has been looking for variety in the way it sets up a golf course, and the staff had a surprise for the Quail Hollow Championship. The rough has been cut at 2 inches, so instead of players having to take a mighty hack out of the thick grass with hopes of reaching the green, they now can get a little more creative with their options.—INTERNET

Invisibility cloak edges closer

WASHINGTON, 30 April—Unlike previous such “cloaks”, the new work does not employ metals, which introduce losses of light and result in imperfect cloaking.

Because the approach can be scaled down further in size, researchers say this is a major step towards a cloak that would work for visible light.

One of the research teams describes its miniature “carpet cloak” in the journal Nature Materials. This “carpet” design was based on a theory first described by John Pendry, from Imperial College London, in 2008.

Michal Lipson and her team at Cornell University demonstrated a cloak based on the concept. Xiang Zhang, professor of mechanical engineering at the University of California, Berkeley, led the other team.

This is not the first time an invisibility cloak has been made, but previous designs have used metals, whereas the carpet cloak is built using a dielectric - or insulating material - which absorbs far less light. Metals introduce a lot of loss, or reduce the light intensity,” said Professor Zhang. This loss can leave a darkened spot in the place of the cloaked object. So using silicon, a material that absorbs very little light, is a “big step forward,” he says.—Internet

Government of the Union of Myanmar
Ministry of Home Affairs
Announcement (1/2009)
Nay Pyi Taw, 7th Waxing of Kason 1371 ME
(30 April 2009)

BLC, related organizations declared unlawful associations

1. The Chairman of the State Peace and Development Council believes and assumes that the objectives and acts of the Burma Lawyers’ Council and its members, and related organizations and persons are hurtful to the rule of law in the Union of Myanmar, stability of the State and community peace.

2. According to Section 16 of Unlawful Associations Act, the Chairman of the State Peace and Development Council hereby announces in line with Section 15 (2) of Unlawful Associations Act that the above-mentioned organization and related organizations are unlawful associations.

By order,
Maj-Gen Maung Oo
Minister
Ministry of Home Affairs

Myanmar Railways to complete nationwide railroad network

The Myanmar Railways under the Ministry of Rail Transportation is spreading its wings locally. It is heartening to know that the Myanmar Railways is constructing new railroads across the nation for the comfort and convenience of the people in the transport sector. The area on the west bank of the Ayeyawady River has seen a railroad that stretches to Pakokku through Pathein, Hinthada and Kyangin. The construction of 320 miles long Kyangin-Pakokku Railroad is ongoing now. On 22 March 2009, Okshitpin-Kanma section of the railroad was put into commission. As a result, there has been smooth transport between one region and another. The government is trying to improve the transport sector by constructing a large number of roads, railroads and bridges throughout the country including border areas, spending huge funds to overcome the geographical barriers to transport in compliance with the guidance given by Head of State Senior General Than Shwe saying that smooth transport not only raised the living standard of the people but also served as a fundamental factor for fortifying the unity of national brethren.

Myanmar tops group with unbeaten run in AFC qualifier

YANGON, 30 April—The third day’s football matches of AFC Challenge Cup qualifier for 2009 continued in Bangabandhu stadium, Dhaka this evening. Myanmar won over Cambodia with 1-0 in the group-A. The match ended with a goalless draw in the first half. However, Yazar Win Thaing broke the deadlock at the stoppage time of the second half. Myanmar tops in the group-A with three wins in three matches on nine points and advancing a spot in AFC Challenge Cup qualifier. Myanmar team will arrive back on 2 May morning.—MNA
