Four political objectives
- Stability of the State, community peace and tranquility, prevalence of law and order
- National reconsolidation
- Emergence of a new enduring State Constitution
- Building of a new modern developed nation in accordance with the new State Constitution

Four economic objectives
- Development of agriculture as the base and all-round development of other sectors of the economy as well
- Proper evolution of the market-oriented economic system
- Development of the economy inviting participation in terms of technical know-how and investments from sources inside the country and abroad
- The initiative to shape the national economy must be kept in the hands of the State and the national peoples

Four social objectives
- Uplift of the morale and morality of the entire nation
- Uplift of national prestige and integrity and preservation and safeguarding of cultural heritage and national character
- Uplift of dynamism of patriotic spirit
- Uplift of health, fitness and education standards of the entire nation

Kyangin-Pakokku railroad to link Ayeyawady west bank with delta, central Myanmar, northern Sagaing Div and Rakhine State

Prime Minister graces opening of Seikpyu-Yawchaung railroad

NAV Pyi Taw, 13 June —Seikpyu-Yawchaung section 22 miles in length of the Kyangin-Pakokku railroad project was commissioned into service at the railway station of Seikpyu in Pakokku District, Magway Division, yesterday morning, with an address by Prime Minister U Thein Sein.

The Prime Minister said as an important transport facility for the west bank of Ayeyawady River, Kyangin-Pakokku railroad will link Pathein the capital of Ayeyawady Division with Mandalay via Kyangin and the west bank in Magway Division.

From central Myanmar’s commercial capital of Mandalay, passengers may travel up to Kale in the north of Sagaing Division. Moreover, the facility will link Sittway the port city of Rakhine State via Mibu through the ongoing Mibu-An-Kyauktaw-Sittway railroad project. The government has been building transport network to link all regions of the whole Union as transport is important for regional and national progress.

Head of State Senior General Than Shwe in his guidance said, “Better transport supports social economy and also serves as an infrastructure for national unity”. In accord with the guidance, the government has been earmarking big budget in strategically setting up all kinds of transport infrastructures in the whole Union to overcome geographical barriers on self-reliant basis. The result is that the nation now has 3433 miles of railroads and 875 stations up from 1976 miles and 487 stations before 1988. In addition to upgrading the quality of coaches and wagons, the government is also setting up concrete sleeper factories.

At the same time, it is implementing more road transport projects covering inter village, township, district, region and state/division roads, Union highways and road networks as well as roads in

Ministry of Construction has built 3,175 small and large bridges, including Ayeyawady Bridge (Pakokku) and Ayeyawady Bridge (Malun) from 1988 to date.

**Take preventive measures against DHF**

Health is the greatest blessing for man. High health standard of the people is the prestige of the nation. Now, it rains a lot, and dengue hemorrhagic fever, malaria, diarrhea, cough and pneumonia may rare their ugly heads again. So, we should take preventive measures against those seasonal diseases. In particular, mosquito is the most prolific in the rainy season. Accordingly, we have to pay serious attention to prevention and control of DHF. If so, we can stay away from the diseases caused by mosquito.

* Aedes aegypti mosquitoes live everywhere, even in the regions at an altitude of 3000 feet. In general, they breed in clear water. They stay hiding in sites near people, and bite people in daytime. Mostly, under-15 children, especially between three and nine years suffer DHF. Now, DHF cases are found even among some adult people. DHF cases can occur, regardless of age and season.

* Mosquito repellent is to be sprayed in schools, as health care and preventive measures. Common symptoms of dengue hemorrhagic fever are high body temperature, body pains, serious illness, reddish spots on the skin, and bleeding inside body.

* The government has been stepping up health care services for uplift of the health and fitness, longevity and disease-free life of the entire people. In response, the people, on their part, should have to follow the directives issued occasionally by the Ministry of Health.

Two killed as five explosions rock Baghdad

BAGHDAD, 13 June—Five loud explosions within minutes of each other rocked the Iraqi capital Baghdad on Sunday, killing at least two people and wounding six others, an interior ministry official said.

The first blast came at around 2:50 pm (1150 GMT), with four more following in the next 15 minutes, a correspondent in the city said.

The official said the casualties were workers at the Iraq Central Bank in the Rasheed district of the capital.

Government figures showed that 337 people were killed in violence in May, the fourth time this year that the overall death toll has been higher when compared with the same month of 2009.

Sunday’s explosions came one day before the opening of the war-torn country’s second parliament since the US-led invasion that ousted dictator Saddam Hussein in 2003.

Iraq’s interior ministry said five loud explosions have rocked Baghdad, killing at least two people and wounding six others.—INTERNET

Roadside bomb kills six US soldiers in N Afghanistan

KUNDUZ, 13 June—Taleban outfit on Saturday claimed that a roadside bomb organized by militants struck an American tank, killing six soldiers in Afghanistan’s northern Kunduz Province.

A Taleban purported spokesman Zabiullah Mujahid in talks with media via telephone from undisclosed location said that the mine planted by militants hit a tank in Zahir city, the capital of Kunduz Province.

Mujahid claimed the incident took place at 2:15 pm and all the victims are American soldiers.

Poland wants NATO to plan an end to Afghan mission

WARSAW, 13 June—Poland’s prime minister says he wants NATO to develop a timetable to end its mission in Afghanistan.

Donald Tusk said Saturday that he plans to raise the issue at the alliance’s next summit in Lisbon, Portugal, in November.

His comments came after a Polish soldier was killed earlier in the day by a roadside bomb in Afghanistan. Poland has some 2,600 troops there, making it the seventh largest troop contributor to NATO’s mission.

Tusk said he wants NATO to work out “a possibly quick plan for ending the mission that should also be as precise as possible.” That message was echoed Saturday by Poland’s acting president, Bronislaw Komorowski, who is running in a presidential race June 20.—INTERNET

Roadside bomb wounds two German soldiers in N Afghan province

KABUL, 13 June—Two German service members were injured as a roadside bomb struck their vehicle in Afghanistan’s northern Kunduz province.

“The incident occurred at 9:40 am local time injuring two German soldiers,” Brigadier Webber told Xinhua.

Xinhua

An Afghan man receives treatment as his relatives help him at a local hospital after a suicide attack last night in Kundahar on 10 June, 2010. At least 40 people were killed and 77 injured by a suicide bomb attack on a packed wedding party in insurgency-plagued southern Afghanistan, officials said on Thursday.—INTERNET

Iraqi police say 12 killed in Baghdad bombings

BAGHDAD, 13 June—Iraqi security officials say a series of bomb blasts near the Central Bank of Iraq has killed 12 people and injured at least 25 others.

A Baghdad police officer and a Ministry of Interior official said the blasts Sunday from several roadside bombs may have been set to target bank employees as they were leaving work.

The police officer said the mid-afternoon bombs detonated over an eight-minute period, suggesting a coordinated attack.

Both officials spoke on condition of anonymity because they were not authorized to talk to the media.

Black smoke could be seen over central Baghdad’s skyline following the attack.—Xinhua

Afghan troops detain two militants including sub-commander

KABUL, 13 June—Afghan and NATO-led forces detained two Taleban militants including a sub-commander in Afghan southern Ghazi province Friday night, a statement of the alliance said Saturday.

“An Afghan-international security force captured a Taleban sub-commander and another individual suspected of insurgent activity in Ghazi province last night,” the statement added.

The arrested sub-commander, according to the statement, is responsible for planning and conducting operations against coalition forces, including improvised explosive device (IED) emplacement and intelligence gathering.

It did not identify the detained sub-commander.

The security force captured the individuals while searching a compound outside the village of Nowab Khanehdorha, Muqer district, after intelligence information confirmed insurgent activity. Taleban militants have yet to make comment.—Xinhua

Discovery in ‘pop’ science reveals the elegant, complex way bubbles burst

Bubble. When the interfacial bubble ruptures it uncovers a dimple on the water surface. The high curvature of this dimple causes a jet to form; since this jet does not have enough kinetic energy to be propelled into the atmosphere it returns to the interface. Yet, around the jet, there is a ring of smaller bubbles formed during the film retraction.

Adobe fixes ‘critical’ flash flaw

Adobe’s Flash software has become a favourite among hi-tech criminals.

NEW YORK, 13 June—Adobe has fixed a “critical” security flaw that had the potential to allow hackers to take control of affected computer systems.

The bug was first spotted in early June week following a small number of targeted attacks.

The security update is one in a bumper update package that fixes a total of 32 documented vulnerabilities.

Adobe’s Flash and Reader software have emerged as prime targets for hi-tech criminals in the past year. Users running Windows, Macintosh or Linux were all thought to be vulnerable to attack.

Security firm Websense said the flaw was being exploited via e-mails that prompted recipients to open booby-trapped websites seeded with malware.

ITV HD viewers miss England’s first World Cup goal

LONDON, 13 June—ITV has apologised to its HD channel viewers after a “transmission problem” caused them to miss England’s first World Cup goal.

Viewers did not see Steven Gerrard’s early World Cup goal.

Apple seeks iOS-4-ready, multitasking-enabled apps

NEW YORK, 13 June—A little more than a week ahead of the expected release of the latest version of the iPhone OS, Apple is opening the floodgates to applications that take advantage of the latest iOS 4 features. Topping the list, of course: multitasking. TechCrunch reports that Apple has fired off a series of e-mails to developers, inviting them to submit their iOS-4-compliant apps to the App Store for review before 21 June, the slated release date for the new OS.

Though the big new feature in iOS 4 is multitasking for third-party iPhone apps, the only apps that’ll be multitasking come 21 June are those that have already been updated with the proper code, as Pocket-lint pointed out in a recent post. So it could be “a very long time” before your favorite app is updated for iOS 4’s multitasking capabilities, Pocket-lint warns.

Well, perhaps, although TechCrunch counters that “it’s not that hard” to add the needed code to existing apps: Some of the most popular iPhone apps (including Pandora and Foursquare) were showing off their multitasking capabilities at the WWDC demo area after Steve Jobs’ iPhone keynote Monday.

ITV HD viewers miss England’s first World Cup goal

LONDON, 13 June—ITV has apologised to its HD channel viewers after a “transmission problem” caused them to miss England’s first World Cup goal.

Viewers did not see Steven Gerrard’s early strike against the USA.

Despite their early goal, England failed to win the game; some fans had to watch the game on the regular, non-HD channel.

Detailed martian scenes in new images from Mars orbiter

NEW YORK, 13 June—Six hundred recent observations of the Mars landscape from an orbiting telescopic camera include scenes of sinuous gullies, geometrical ridges and steep cliffs.

Each of the 600 newly released observations from the High Resolution Imaging Science Experiment (HiRISE) camera aboard NASA’s Mars Reconnaissance Orbiter covers an area of several square miles on Mars and reveals details as small as desks.

The HiRISE images taken from 5 April to 6 May, 2010, are now available on NASA’s Planetary Data System and the camera team’s website. The camera is one of six instruments on NASA’s Mars Reconnaissance Orbiter, which reached Mars in 2006.

Reality TV proves meaner than fiction

WASHINGTON, 13 June—Reality shows such as “American Idol” and “Apprentice” have almost no physical violence, but a new study suggests their rampant displays of name-calling and snarky gossiping still make for a much meaner TV-viewing experience compared with watching fictional TV shows.

The realistic portrayal of aggression on reality TV shows might even encourage viewers to imitate the non-physical aggression in real life, according to some theories. That verbal or relational aggression typically slips past TV-rating systems and media watchdog groups, which focus instead on condemning the physical violence of gunfights and fistfights.

“All of these reality shows would never receive a rating of violence or aggression from the current rating systems,” said Sarah Coyne, a psychologist at Brigham Young University in Provo, Utah, and lead researcher on the new study.

Verbal aggression includes direct taunts or insults. By contrast, relational aggression includes more indirect attacks on social status or relationships, such as anonymous gossip-mongering or threats to end a friendship.
Success of hepatitis C Drugs may depend on gene variant

BERN, 13 June—A genetic variant associated with poor response to treatment for hepatitis C infection has been identified by scientists.

The researchers analyzed the DNA of 1,362 hepatitis C patients and pinpointed the variant in those who failed to respond to treatment. The variant occurs in a gene called IL28B, which encodes for the antiviral cytokine (cell-signaling) interferon lambda.

The study was to be presented Saturday at the annual conference of the European Society of Human Genetics.

Current treatment for hepatitis C includes a combination of an interferon and the antiviral medication ribavirin. Side effects are common and can be so serious that some people have to take time off work.

Identifying hepatitis C patients with this genetic variant could spare them from suffering side effects from a treatment that will provide them with little benefit, said the scientists at the University of Lausanne in Switzerland in a news release from the European Society of Human Genetics.

The research may also help in the development of new treatments, they said.—INTERNET

Race against time to sanitize lead-epidemic hit Nigeria

DARETA, 13 June—Armed with hoes and shovels, men clad in protective suits carefully and steadily excavate a layer of soil contaminated with dangerous levels of lead around a homestead in northern Nigeria.

The farming village, one of six hit by a lead poisoning epidemic linked to illegal gold mining in northern Nigeria, has lost 61 children in recent weeks.

Foreign environmental experts aided by dozens of young men from the village have slowly started the painstaking exercise to clean up homes with grain sacks and heap it outside the mud huts awaiting disposal.

A supporter with his face painted like the South African flag takes a bite of a hot dog before the start of the opening ceremony of the 2010 FIFA World Cup on 11 June, 2010. Nutritionists in DARETA, 13 June—A new survey shows that the danger of scientific discoveries of links between specific genes and many chronic diseases might be providing the least healthy people with something they don’t need: an excuse for their medical woes.

“We wanted to know if people are going to use genetics as a way to kind of get off the hook, rather than change their behavior and be healthy,” explained study co-author Suzanne C. O’Neill, an assistant professor with the Cancer Control Program at Lombardi Comprehensive Cancer Center at Georgetown University in Washington, D.C. “But the bottom line is that most people aren’t doing that. It’s only when you look at people with a number of behavioral risk factors that you run into trouble,” she said.

“People, for example, who are smokers and have a poor diet and don’t exercise as much as they should. Those people are more likely to think that diseases are caused by genetics, and are not interested in information on behavioral change. —INTERNET

Diabetic Felix Alvarado-Lopez, 51, has his blood sugar level measured at the JWCH safety-net clinic in the center of skid row in downtown Los Angeles.

Mental decline from diabetes can start in middle age

NEW YORK, 13 June—Diabetes can lead to a decline in memory, thinking speed, and mental flexibility in middle age, but controlling the blood sugar disorder might prevent some of these effects, new research from the Netherlands suggests.

While the mental decline may be invisible to the individual, the fact that the drop-off starts accumulating in middle age puts diabetics at greater risk later on because of reduced “brain reserves.”

“Like a bicycle tire that’s been partially deflated — you’ll be OK riding around but if you develop another little leak you’ll be much closer to a flat tire much faster,” said Knopman, who was not involved in the Dutch study.

Astrid Nooyens and colleagues at the National Institute for Public Health and the Environment in the Netherlands examined the health records and mental acuity scores of more than 2,600 men and women between the ages of 45 and 70 who enrolled in a large ongoing study into lifestyle effects on health.—INTERNET

Lawn mowers a real safety hazard for kids

WASHINGTON, 13 June—A coalition of several major American health organizations has issued a cautionary advisory in an attempt to draw attention to the specific risks posed to children by lawn mower use.

The tip sheet, from the American Academy of Pediatrics, the American Society for Reconstructive Microsurgery, the American Society of Plastic Surgeons, the American Society of Maxillofacial Surgeons and the American Academy of Orthopaedic Surgeons, is meant to educate parents and children alike regarding the keys to lawn mower safety.

The following is a list of some of the rules that, when enforced, can help prevent injuries:

• Children younger than 12 should not operate any type of lawn mower. And the minimum age for using lawn mowers is 16.
• Children should never ride alongside adults as passengers on ride-on mowers, and should remain at a safe distance when adults mow the lawn.
China, Ireland seek to further cement ties

BEIJING, 13 June—China and Ireland on Sunday pledged to cement their relationship and expand cooperation.

The pledge came out of the meeting between Chinese Vice President Xi Jinping and Irish President Mary McAleese, who was here to attend the Shanghai World Expo’s Irish National Pavilion Day on 17 June.

Praising the “strategic view” of the Irish government in developing relations with China, Xi said the two countries should take a long-term view of the relationship in consideration of China-Europe relations and the international situation, respect each other and strengthen cooperation.

“China will work with Ireland to promote the continuous development of bilateral relations,” Xi said.

McAleese hailed the smooth development of Ireland-China relations, growing trade and cooperation between the two countries in the 30 years since the establishment of ties.

She said Ireland would continue to promote its Asia strategy with China at the core.

Xinhua

China’s auto prices rise in May

BEIJING, 13 June—Auto prices in China rose slightly year on year in May, according to sales statistics of 36 major cities released by the price monitoring center under the National Development and Reform Commission (NDRC) on Sunday.

In May, prices of the country’s domestically made automobiles edged up 1.04 percent year on year, but dropped 0.24 percent month on month, a statement posted on the NDRC website said.

Imported vehicle prices continue to climb in May, up 6.18 percent year on year and 2.44 percent month on month, according to the statement.

Last month, passenger vehicle prices rose 0.46 percent year on year but fell 0.73 percent from April this year.

In May, commercial vehicle prices rose 1.75 percent year on year and 0.41 percent month on month.

The NDRC price monitoring center predicted that, after much volatility, imported vehicle prices would stabilize.

Climbing stockpiles of domestically made automobiles may push auto prices down in the short run, but the price drop would not be huge given the recent decline in oil prices and the government’s preferential policies towards new energy vehicles, the center said.—Xinhua

New rules for Wall Street must clear final hurdles

WASHINGTON, 13 June—They are the sticking points that would gum up the Wall Street overhaul. From big banks’ exotic trades to the plastic in people’s wallets, it only take a few of the most contentious issues to unseat a careful political equilibrium as lawmakers try to blend House and Senate bills into a single rewrite of banking regulations.

The final measure, which President Barack Obama wants by July 4, is intended to prevent another financial crisis like the 2008 meltdown, which triggered a deep recession.

Although House and Senate versions emerged in the past two weeks, according to an analysis by Public Citizen and the Center for Responsive Politics, the Senate version is still weaker than the House bill. Frank, D-Mass., agreed to make the Senate bill the base, with some minor House modifications.

There’s momentum behind the Senate version. “Throughout this process you have seen a desire by members not wanting to be seen voting with the banks,” said Edward Mills, a financial policy analyst at FBR Capital markets.

The financial industry is no stranger to the lawmakers working on the legislation. At least 56 industry lobbyists have served on the personal staffs of the 43 Senate and House members who will have a hand in shaping the bill over the next two weeks, according to an analysis by Public Citizen and the Center for Responsive Politics, two government watchdogs.—Internet

Brazil to propose maintenance of global growth stimulus at G20 Summit

BRASILIA, 13 June—Brazil will propose that countries should maintain the growth stimulus plans and accelerate the establishment of mechanism to regulate financial markets at G20 Summit. Since there is debate on the current outlook for the global economy, Brazil sees the recovery still fragile, and it is important to continue boosting growth in all major economies in the context of the worsening crisis in Europe, said the Brazilian Foreign Ministry.—Xinhua
Workshop on development of Myanmar rice industry opens

YANGON, 13 June—Lt-Gen Myint Swe of the Ministry of Defence addressed the opening of a workshop on development of Myanmar rice industry. He further added the need to assist Myanmar to develop the rice industry and its products.

Commander of Yangon Command Maj-Gen Win Myint, Minister for Commerce U Tin Naing Thein, the president of UMFCCI, chairman and CEC members of MRIA and their congenial associations.

First, Lt-Gen Myint Swe stressed the need for highlighting the agricultural sector essential for national economy. Next, he and party viewed the activities of rice trading companies.

Next, the Commerce Minister and Industry-1 Minister U Aung Thaung made speeches. The chairman of MRIA discussed holding of the workshop. The Myanmar Agricultural Produce Trading managing director explained production of Myanmar rice, prices and flow of domestic rice.

Then, those present also took part the discussions. Then, the vice-chairman of MRIA made a concluding remark.

Samsung Electronics Mid Year 2010 Promotion held

YANGON, 13 June—The Samsung Electronics Mid Year 2010 Promotion took place at the Traders Hotel, here, yesterday.

Managing Director U Than Win Aung of AA Electronics Ltd explained sales of Samsung brand LED, LCD, Plasma and CRT TV at fair prices. He made clarifications on body, auto voltage, USB, 3HDMI.

Monsoon Special Sales to be held by Fuji Xerox

YANGON, 13 June—Organized by Concordia Int’l Co Ltd and Fortune International Co Ltd, monsoon special sales will be held at Central Hotel on Bogyoke Aung San Road here from 9 am to 6 pm beginning 16 through 19 June daily.

Fuji Xerox colour laser printers, multi-media copiers, toner cartridges will be on display in the programme with practical services of experienced staff to be able to use the equipments.

Those who buy Fuji Xerox copiers and printers may get special discount.

Energy Minister visits fuel stations

YANGON, 13 June—Minister for Energy U Lwin Thi visited Myawady Fuel Station No. 001 on Pyay Road in Insein Township and New Day Fuel Station at the corner of Bago and Bagaya Roads in Sanyangyoung Township today.

Myanma Petroleum Products Enterprise has privatized 261 fuel stations since 10 June 2010. The customers may buy fuel at any stations of their own choice.

ITE Pre-work Training concludes

Chairman of Thukha Su San Foreign Employment Agency U Chan Thar delivering speech.

YANGON, 13 June—Thukha Su San Foreign Employment Agency and Training School presented completion certificates to those who had finished ITE Pre-work training conducted by the agency at Park Royal Hotel on Alanya Pagoda Road here this afternoon.

The ITE training provides primary necessary trainings and pre-interview knowledge for those wishing to work in abroad.

Those interested may contact No. 77, Lower Pansodan Street, Kyauktada Township and No. 115, Myananda 77, Lower Pansodan Street, Kyauktada Township, here, Ph; 392233, 385758.

Japanese Govt. and JICA donate fire suits and breathing apparatus

YANGON, 13 June—Japanese Government and Japan International Cooperation Agency (JICA) donated three chemical fires suits and 50 sets of breathing apparatus to Fire Services Department of the Ministry of Social Welfare, Relief and Resettlement.

The minister spoke words of thanks at ceremony held at the department headquarters here yesterday.

The new light of myanmar
Kyangin-Pakokku railroad to link…

(from page 1) remote regions for progress of border areas.

Before 1988, there were 20,000 miles of earth roads and now there are over 70,000 miles. In constructing motor roads and bridges, the Ministry of Construction has built 3,175 small and large bridges, including Ayeyawady Bridge (Pakokku) and Ayeyawady Bridge (Malun) from 1988 to date.

By using those bridges, one can travel easily to all corners of the country, from Putao in the far north to Kawthoung at the southern tip and from easternmost cities to west Sittway in the western end. Those networks of roads and bridges have been built out of goodwill in accord with the guidance of the Head of State to enable all the national people, including the local people from the regions which lacked development due to difficult transport, to have easy access to all regions, thereby contributing to their education, health, social and economic sectors.

Such fruitful results have been achieved owing to the cooperative strength of the government, the people and the Tatmadaw so as to develop the State in parallel with other nations by overcoming all internal and external hardships and difficulties.

The strength of the nation lies within. So, it is necessary to try to stand on our own.

As the nation has already been blessed with natural resources, each and every citizen only needs to work hard for national development through national unity and strength.

Chairman of Sagaing Division Peace and Development Council Commander of North-West Command Maj-Gen Myint Soe said in his address that most motor roads and railroads are situated along east bank of Ayeyawady River according to topography of Myanmar where rivers and mountains run from north to south.

He continued to say that eastern regions of Ayeyawady have seen more developments in education, economic and social sectors than the western counterparts thanks to better road transportation.

He added that Ayeyawady River spanning bridges and Pathein-Monywa Road have been constructed by the Tatmadaw government in order to harmonize the development in all regions and Pathein-Pakokku railroad which was extended from Pathein-Kyangin railroad becomes a main railroad linking the existing Pakokku-Kale and Mandalay-Myitkyina railroads. The commander expressed thanks to staff of Myanma Railways under the Ministry of Rail Transportation for their concerted efforts to implement the construction of the railroad section within three years which started on 19-7-2007 and urged the local people to maintain the durability of the railroad.

Minister for Rail Transportation U Aung Min explained the construction project of Seikpyu-Yawchaung Railroad section that the construction of 320-mile Kyangin-Pakokku Railroad was divided into three sections – 110-mile Seikpyu-Yawchaung section of Kyangin-Pakokku Railroad Project.—MNA
Prime Minister U Thein Sein on board special train waving at local people on Seikpyu-Yawchaung railroad section.—MNA

Kyangin-Pakokku railroad to link...

(from page 8)

Kyangin-Thayet Railroad section, 100-mile Thayet-Pwintbyu Railroad section and 110-mile Pwintbyu-Pakokku Railroad section.

He added that the construction of Seikpyu-Yawchaung Railroad section with 54 bridges and six railway stations started on 19-5-2007. We went on to say that Nay Pyi Taw-based Nay Pyi Taw-Bagan, Nay Pyi Taw-Pyay, Nay Pyi Taw-Mandalay, Nay Pyi Taw-Shwenyaung, Nay Pyi Taw-Loikaw, Nay Pyi Taw-Chauk routes had been commissioned; that construction of 105 miles long Nay Pyi Taw-Tatkon-Pinlaung railroad linking directly between Nay Pyi Taw and Kayah State was constructed last May; that Taw and Kayah State was directly between Nay Pyi Taw-Pathein-Kyangin-Pakokku railroad, after completion of construction last May; that Myanmar Railway, Ministry of Transport, U Thein Sein ordered that the Ministry of Transport, U Thein Sein ordered that the construction work of the railroad section be started on 19-5-2007.

We went on to say that Nay Pyi Taw-based Nay Pyi Taw-Bagan, Nay Pyi Taw-Pyay, Nay Pyi Taw-Mandalay, Nay Pyi Taw-Shwenyaung, Nay Pyi Taw-Loikaw, Nay Pyi Taw-Chauk routes had been commissioned; that construction of 105 miles long Nay Pyi Taw-Tatkon-Pinlaung railroad linking directly between Nay Pyi Taw and Kayah State was constructed last May; that Taw and Kayah State was directly between Nay Pyi Taw-Pathein-Kyangin-Pakokku railroad, after completion of construction last May; that Myanmar Railway, Ministry of Transport, U Thein Sein ordered that the Ministry of Transport, U Thein Sein ordered that the construction work of the railroad section be started on 19-5-2007.

Next, a local spoke words of thanks for construction of the railroad section. The Prime Minister then cordially greeted those present at the opening ceremony of the railroad section. Li-Gen Tha Aye of the Ministry of Defence, Commander Maj-Gen Myint Soe, Minister for Construction U Khin Maung Myint, Minister for Electric Power No. 1 U Zaw Min, Minister for Rail Transportation U Aung Min, Chairman of Magway Division Peace and Development Council Col Phone Maw Shwe cut a ribbon to open the ceremony. Afterwards, the Prime Minister and party together with attendees posed for a documentary photo. The Prime Minister then unveiled the stone plaque and sprinkled scented water on it. Lt-Gen Tha Aye, Commander Maj-Gen Myint Soe and ministers also sprinkled scented water on the stone plaque.

Prime Minister U Thein Sein... (from page 16)

railroads on both sides of the bridge and 60 per cent completion, arrangements being made for running of trains to pass the bridge as it is completed, earthwork of the approach railroad to Ayeyawady Bridge (Sinkhan) and arrangements for laying rail tracks.

After attending to the needs, Prime Minister U Thein Sein gave instructions on systematic use of construction materials such as fuel and cement, applying of experienced in construction of the bridge to meet the set standards, taking care of heavy construction tasks with spending of large sum of money, priority to be made for the construction tasks based on climate and flow of river and efforts to be made for timely completion of the project with high quality.

The Prime Minister viewed progress of the project on both sides and looked into task being carried out for construction of the approach road on Letpanchepaw bank. Construction of Ayeyawady Bridge (Pakokku) was started on 15 December 2009. It will be rail-cum-road facility. The length of the motorway will be 13,465 feet and the railroad, 19,457 feet. The main bridge will be 11,431 feet long. The bridge will have 28 feet wide two-lane motorway, 14 feet wide area for the railroad and three feet and three inches wide pedestrian way on either side.

The foundation of the bridge and lower structure will be of reinforced concrete bored pile and RC posts. The upper structure of the bridge will be of steel frame. The bridge can withstand up to 60-ton loads. Plans are underway to complete the bridge in 2010-2011 financial year.—MNA

Russia celebrates state holiday

MOSCOW, 13 June—Russia is celebrating its national day (Russia Day) on Friday.

Paiko named the countries coming for the E-Nine meeting as India, Pakistan, Indonesia, Mexico, Egypt, Bangladesh, Brazil and China.

He said the meeting was aimed at sharing best practices between member-countries, whose populations were mostly illiterate on ways of providing adult and non-formal education for such citizens.

The executive secretary said the countries met in 1993 in Bali, Indonesia, with the aim of providing assistance to those who were out of school, especially women and exploring ways of developing member nations.

Paiko said it was the first time the meeting was coming to Africa and that the Federal Ministry of Development Commission for Mass Education Jibrin Paiko disclosed this to a news conference in Abuja on Friday.

New Zealand seeing more foreign student enrollment

WELLINGTON, 13 June—The number of foreign students studying in New Zealand has risen for the first time in six years.

New Zealand Ministry of Education figures show that 10,167 international students were enrolled for new semester starting from 1 March, posting 4 percent up from last year.

Half the enrolled students are at schools in Auckland, mostly in secondary schools. The Secondaries Principals Association said the increase means schools would have more money available for teaching.

Education providers have also carried more intense marketing and promotion in countries such as China, India, Vietnam, Thailand, South Korea, Malaysia, North America, Brazil and Germany over the previous 12 months which is also a major factor in the increased numbers. —Xinhua

Canada grilled over “half-baked fake lake” at G20

Huntsville region north of the city where leaders are set to meet for the G8 summit.

Tight security means most of the 3,000 accredited reporters will get nowhere near the area. The G20 summit will be held in Toronto — on the shores of Lake Ontario — right after the G8 gathering.

“We have a government here that has to create an artificial lake when Canada has more lakes than just about any other country in the world. It is the taxpayers who are going to end up at the bottom of the fake lake,” said Jack Layton, leader of the left-leaning New Democrats.

Plumber helps wife deliver baby on bathroom floor

A Michigan plumber, who makes his living working in bathrooms, has brought a life into the world in one.

Thirty-eight-year-old Brian Hines helped his wife, Andrea, deliver their son, the 7 pound, 1 1/2 ounce David Michael Lee Hines, on the bathroom floor of their Oakland County home on Tuesday.

The dad told The Oakland Press of Pontiac they did not rush to a hospital when the contractions began because their first child, Alexander, had taken hours to arrive. David took just seven minutes.

Himalayan climate impacts ‘cannot be generalised’

COPENHAGEN, 13 June — Melting glaciers in the Himalayas will have varying impacts on the region’s five major river basins, a study says. Changes to the flow of meltwater as a result of global warming is likely to have a “severe” impact on food security in some areas, say scientists. Yet people living elsewhere are likely to see food productivity increase, they added in a paper published in Science. Overall, the food security of 4.5% of 1.4bn people in the region is threatened, the researchers conclude.

More than 1.4bn people depend on water from the Indus, Ganges, Brahmaputra, Yangtze and Yellow rivers. “We show that meltwater is extremely important in the Indus basin and important for Friday and Brahmaputra basin, but only plays a modest role for the Ganges, Yangtze and Yellow rivers,” the team from the Netherlands wrote.

The Brahmaputra and Indus basins are most susceptible to reductions of flow, threatening the food security of an estimated 60m people.—Internet

Nurses fired for posting about patients on Facebook

SAN DIEGO, 13 June—Five nurses who work at Tri-City Medical Center in Oceanside were fired for allegedly discussing patient cases on Facebook.

“We recently identified an incident involving hospital employees who used social media to post their personal discussions concerning hospital patients,” said Larry Anderson, Tri-City CEO. Anderson said that no patient names, photos or identifying information was posted. Max Carbuccia of the California Nurses Association said if any information was shared it was to seek advice.

Back in 2007, five nurses, three secretaries and two technicians were under investigation at the same hospital when one of the individuals used their cell-phone cameras to photograph at least one patients x-ray, and the rest either viewed or disseminated it.—INTERNET

Arrests after body parts found

GRANTS PASS, 13 June — Police arrested a woman in California and her son in Oregon after body parts belonging to the woman’s husband washed up on the banks of the Sacramento River, police said on Friday. A severed leg, torso, arms and a severed head had been found on the bank since November.

The Sutter County, California, sheriff’s office said 57-year-old Lela McDonald was arrested on Thursday at her home in Grants Pass, Oregon. Both are charged with being accessories to a criminal act and destruction of evidence. Armond Morris, her son, 39-year-old Michael Gold, was also arrested on Thursday at his home in Grants Pass, Oregon. Both are charged with removal of a body without the authority of a coroner.—INTERNET

Allergies may see plane peanut ban

WASHINGTON, 13 June — The US Government is considering whether to ban peanuts from being served on board commercial airlines. The US Transportation Department said concerns from travellers with peanut allergies prompted a call for public comment last week on whether the snack should be regulated by requiring peanut-free zones on planes or an outright ban. Advocates say restrictions would ease the fears of an estimated 1.8 million Americans with peanut allergies, which can be life-threatening. In Georgia, the top US peanut-producing state, farmers are already farming. Armond Morris, chairman of the Georgia Peanut Commission, said growers feel they’re being singled out in over 200 lawsuits months.

Five killed, 2 injured in traffic accidents in Cambodia

Phnom Penh, 13 June—Five people were killed and two others injured in three consecutive traffic accidents at the same place in Cambodia’s north western province of Banteay Meanchey, a local police officer said Saturday.

Keo Bunyouen, district police chief of Preah Net Preah, said the three accidents happened at 7:40 pm on Friday, leaving five people dead and two others injured.

He said the first accident caused by a motorbike with three people on board hitting a bicycle, leaving two people dead and two others injured; while the second accident happened soon after a truck crashed a police car that was parking nearby the first accident site.

While villagers were crowded at the accident site, another motorbike driver accidentally hit the truck nearby and he died later in hospital, Keo Bunyouen said.

On Thursday, three people were killed and 12 others injured in a car accident in Cambodia’s northeastern province of Kompong Cham.

Cambodia has been alarmed with traffic accidents in recent years.

Last year, Cambodia recorded the death toll of 1,717 people by traffic accidents across the country, and it said the country had lost 248 million US dollars from these accidents.

Four women among 6 killed in accident in Pakistan

Lahore, 13 June—At least six people were killed, including four women, and another three were critically injured, as two vehicles collided head-on amid dust storm in east Pakistan’s Punjab province on Friday evening, local police said.

The incident took place 30 kilometers from Jhang area when a tractor-trolley rammed into an oil tanker due to bad weather, witnesses said.

The injured have been rushed to nearby hospital.

Malaysia drops tsunami advisory

Kuala Lumpur, 13 June—The Malaysian Meteorological Department has dropped the tsunami advisory it issued earlier Sunday after a strong earthquake took place in Nicobar Islands, India.

The department posted the latest update on its official website at 7:10 am Malaysian time, saying that there was no tsunami threat to Malaysia arising from the strong quake.

According to the department, a strong earthquake measuring 7.2 on the Richter scale took place in Nicobar Islands, India, at 3.26 am Malaysian time.

Another moderate earthquake that measured 5.4 on the Richter scale struck Nicobar Islands at 6:44 am Malaysian time.

The department said that this will be the final information it issued for the event unless there are further developments.

Another tsunami advisory it issued earlier Sunday for Bangladesh except the coast facing the Nicobar Islands has been rescinded.

Two killed in Austria glider crash

Vienna, 13 June—Two people were killed when their glider crashed on Saturday noon in the Austrian state of Carinthia, authorities said.

The glider crashed at noon in a forest near the Glainach military training area in Ferlach of Klagenfurt-land, the southernmost urban community of Austria.

The plane was being flown by two Austrian citizens, a flying instructor and his student, said a police spokesman.

Eyewitness said explosion was heard and the two-seated plane could have lost one of its wings before the crash.

Slovenia beat 10-man Algeria 1-0

POLOKWANE, 13 June—Robert Koren scored a late goal on Sunday to give Slovenia a 1-0 win over 10-man Algeria and first place in Group C of the World Cup, ahead of the United States and England.

The Slovenian captain struck a long-range shot that Algeria goalkeeper Fawzi Chaouchi misjudged and allowed to bounce into the net off his arm in the 79th minute.

It was the first-ever World Cup victory for Slovenia, the smallest nation in the tournament with a population of around 2 million. The Balkan country lost all three of its group matches in the 2002 tournament.

Algeria substitute Abdelkader Ghezzal was sent off in the 72nd, picking up a second yellow card for handling the ball inside the Slovenian penalty area. Algeria twice came close in the first half when Nadir Belhadj's 25-yard free kick forced Slovenia goalkeeper Samir Handanovic to stretch and push the ball over the crossbar, and defender Rafik Halliche headed just wide.

Slovenia faces the US next while Algeria travels to Cape Town to take on England.—INTERNET

A late goal from Robert Koren handed Slovenia their first-ever FIFA World Cup victory as well as the top spot in Group C as they beat 10-man Algeria 1-0 in Polokwane.—INTERNET

Soft goal gives US 1-1 tie against England

RUSTENBURG, 13 June—England’s players couldn’t get off the field fast enough. The Americans lingered to savor the night. They walked to the end of Royal Bafokeng Stadium where thousands of red, white and blue-clad fans were waving the Stars and Stripes and cheering their heads off.

Try convincing the US team and its fans there wasn’t a winner in the 1-1 draw with mighty England.

“We’ll take more out of a draw than they will,” said US goalkeeper Tim Howard, the man of the match. “They’re going to feel like they should have won the game.”

Facing the Three Lions in the World Cup for the first time in 60 years, the United States rallied and then hung on for an instant boost in confidence that they could advance to the second round.

Clint Dempsey became only the second American to score in two World Cups, getting the tying goal in the 40th minute on a blunder by goalkeeper Robert Green. Howard made six saves in his World Cup debut, withstanding a second-half barrage by Wayne Rooney and his celebrated teammates.—INTERNET

Appiah says Ghana will be on song against Serbia

PRETORIA, 13 June—Ghana captain Stephen Appiah insisted his team will be playing the right beat when they begin their World Cup campaign against Serbia at the Loftus Versfeld stadium here on Sunday.

The Ghana players broke into song at the end of their last training session on Saturday ahead of their first Group D clash and Appiah says that’s all part of their preparation as Africans.—INTERNET

Ghana penalty edges 10-man Serbia

POLOKWANE, 13 June—Ghana’s hopes of reaching the World Cup second round received a huge boost here yesterday as they beat Serbia 1-0 in their opening Group D match.

An 84th-minute penalty by Asamoah Gyan was enough to take the three points after it was awarded by Argentinian referee Hector Baldassini for handball against Zdravko Kuzmanovic.

Serbia, who lost all three matches in 2006 under the banner of Serbia and Montenegro, had been up against it when Aleksandar Lukovic was sent-off for a second bookable offence in the 74th minute.—INTERNET

Preview matches on Netherland Vs Denmark;
Japan Vs Cameroon and Italy Vs Paraguay on 14 June

YANGON, 13 June—World ranking 4 Netherland, one of the champion favourites in 2010 World Cup and world ranking Denmark 36 are going to play their match of Group-E of the 2010 World Cup in Soccer City in South Africa on 14 June.

Netherland Vs Denmark

Both teams encountered five times after 1991 and Netherland won three matches and two draws but Denmark had three failures and two draws in their head-to-head position. In comparison with the strength of the players and skills, there is a large gap between Netherland and Denmark. Netherland are much better than Denmark in defence, midfield and attack. Denmark will find difficulty in penetrating into the defence of Denmark. If the backs are brought to Netherland, Netherland will win over Denmark by a wide margin.

Head-to-Head Position

22-6-1992 Holland2-1 Denmark Friendly Match
18-8-1999 Denmark 0-0 Holland Friendly Match
16-6-2000 Denmark 0-3 Holland Confederation Cup
10-11-2001 Denmark 1-1 Holland Friendly Match
29-5-2008 Holland 1-0 Denmark Friendly Match

Japan Vs Cameroon

World ranking 45 Japan and world ranking 19 Cameroon will play their Group-E of the 2010 World Cup in Free State in South Africa on 14 June.

Both teams faced in three matches in their head-to-head potisition in 2001, 2003 and 2007 and Japan won two matches and one draw whereas Cameroon had two losses and one draw. In comparison with the players and skills, Cameroon are better than Japan. Japan will surely struggle in its group and it is not easy to reach the play-off stage. Cameroon have a lot of prolific players in its lineup. This match is supposed that Cameroon will win or draw but not lose to its opponent Japan. If the fortune stands by Cameroon, it will whitewash the opponent.

Defending champion world ranking 5 Italy and world ranking 31 Paraguay will play their Group-F match of the 2010 World Cup in Cape Town in South Africa on 14 June.

Both teams played two times in their head-to-head position in 1950 and 1998 and Italy won both matches. The recent friendly results of Italy are not encouraging and so are Paraguay. Italy’s stylish play is not so satisfactory in the group matches but if Italy reaches beyond the group stage, it can cause trouble to every opponents. Italy is organized with well-experienced players but the players are older than other teams. Paraguay have well-qualified attackers but lack of defence. This match is likely to finish in a draw.

Head-to-Head Position

2-6-2001 Paraguay 0-2 Italy Confederation Cup
19-11-2003 Paraguay 0-0 Italy Friendly Match
22-8-2007 Paraguay 2-0 Italy Friendly Match

Head-to-Head Position

2-7-1950 Italy 2-0 Paraguay World Cup
22-4-1998 Italy 3-1 Paraguay Friendly Match

Jennifer Aniston wants to bring “Friends” to big screen

BEIJING, 13 June—Television and film actress Courtney Cox said her former “Friends” costar Jennifer Aniston is planning a film about a reunion of the cast of the popular American sitcom, Entertainment.com reports.

Cox told reporters that Aniston generated the idea when she saw the success of Home Box Office’s film version of “Sex and the City.” The second “Sex and the City” film this year reinforced Anniston’s decision to make a “Friends” reunion film, the report said.

Although Aniston has many great ideas for making the film, the project will not be easy to pull off. Cox said that unlike “Sex and the City” which reinforced Anniston’s decision to make a film about a reunion of the cast of the popular American sitcom, Entertainment.com reports.

Jennifer Aniston wants to bring “Friends” to big screen.
