Four political objectives
* Stability of the State, community peace and tranquility, prevalence of law and order
* National reconsolidation
* Emergence of a new and enduring State Constitution
* Building of a new modern developed nation in accord with the new State Constitution

Four economic objectives
* Development of agriculture as the base and all-round development of other sectors of the economy as well
* Proper evolution of the market-oriented economic system
* Development of the economy inviting participation in terms of technical know-how and investments from sources inside the country and abroad
* The initiative to shape the national economy must be kept in the hands of the State and the national peoples

Four social objectives
* Uplift of the morale and morality of the entire nation
* Uplift of national prestige and integrity and preservation and safeguarding of cultural heritage and national character
* Uplift of dynamic of patriotic spirit
* Uplift of health, fitness and education standards of the entire nation

True patriotism
* It is very important for everyone of the nation regardless of the place he lives to have strong Union Spirit.
* Only Union Spirit is the true patriotism all the nationalities will have to safeguard.

Senior General Than Shwe, wife Daw Kyaing Kyaing to pay State visit to PRC

NAY PYI TAW, 4 Sept — At the invitation of His Excellency Mr. Hu Jintao, President of the People’s Republic of China, Senior General Than Shwe, Chairman of the State Peace and Development Council of the Union of Myanmar, and wife Daw Kyaing Kyaing, will pay a State visit to the People’s Republic of China in the near future.— MNA

Advanced Insulator Factory (Chauk) opens in Chauk Township

NAY PYI TAW, 3 Sept—The opening ceremony for Advanced Insulator Factory (Chauk) of Myanma Ceramic Industries under the Ministry of Industry-1 took place at the newly opened factory today.

Minister for Industry-1 U Aung Thaung, Minister for Electric Power No. 2 U Khin Maung Myint, and Chairman of Magway Region Peace and Development Council U Phone Maw Shwe together with electrical engineers, district and township departmental officials of Magway Region, social organization members and responsible persons were present at the ceremony.

Chairman of Magway Region PDC U Phone Maw Shwe, Managing Director U Soe Yi of Myanma Ceramic Industries and Director U Yin Htwe of Unicom Trade & Travel Co Ltd formally opened the archway of the factory.

Ministers U Aung Thaung and U Khin Maung Myint first formally opened the factory, and they together with the Magway Region Chairman and officials later sprinkled scented water on the signboard and posed for documentary photo.

The ministers and party viewed production line of the factory.

(See page 8)
Boost production of goods meeting market demands

Infrastructures are being built for emergence of an industrialized country. Industrial zones are being established in order to develop both State-run and private-run industries. In addition, more and more factories and workshops are being built across the nation.

High-tech factories have been built in the respective industrial regions and they are producing multi-purpose diesel engines, heavy machinery, machine parts, turbines and generators. Meanwhile, a number of import-substitute factories are manufacturing household goods, consumer products and foodstuffs. New production techniques have been developed as a result of having built modern machinery factories and import-substitute factories in the industrial regions and zones. So, local people have enjoyed job opportunities, enabling themselves to contribute to regional progress.

Nowadays, emphasis is being placed on boosting production of export items and import-substitute products in the industrial sector. Therefore, each and every factory has to try to operate at full capacity. To do so, they are to constantly maintain the machinery and have enough raw materials.

Moreover, in producing machines and consumer goods, they must be good in terms of both quality and quantity. In the competitive market, it is important to manufacture quality products.

Indeed, the increasing number of modern factories and workshops in the industrial regions and zones bodes well for development of the industrial sector. So, all factories are to strive to exceed the production target, increase the income and produce goods so as to satisfy market demands.

Introduction and Implementation of Bar Code for Business Efficiency course conducted

YANGON, 3 Sept—The Union of Myanmar Federation of Chambers of Commerce and Industry and Department of Export Promotion, Ministry of Commerce of Thailand jointly conducted the Introduction and Implementation of Bar Code for Business Efficiency course at the UMFCCI Office, here, on 1 September morning.

The expert of Federation of Thai Industries of Thailand gave lectures on Bar Code System. A total of 120 trainees from UMFCCI and its member associations attended it.

Executive Director Mr Supapat Ongsangkoon of Department of Export Promotion presented completion certificates to the trainees.

Also present at the concluding ceremony were Vice-President of UMFCCI U Zaw Min Win and responsible persons and officials.

**NATO air raids kill civilians in Afghan**

**KABUL, 3 Sept—**Afghan government accused NATO-led troops of using airpower and killing civilians in northeast Takhar Province on Thursday and denounced it.

"President Hamid Karzai condemns air strikes that claimed the lives of civilians in Takhar Province today," a statement released by Presidential Palace said.

The statement also stressed that bombarding Afghan villages would not serve the war on terror except harming non-combatants. Ten people were killed as a meeting arranged by a parliamentary candidate Abdul Wahid Khurasani came under attack in northeastern Takhar Province on Thursday morning, spokesman for provincial administration Faiz Mohammad Tawhidi said. He also added that five persons including Khurasani sustained injuries in the incident.

Afghanistan’s second parliamentary elections since the fall of Taleban regime in late 2001 is scheduled for 18 September this year amid tight security as Taleban militants vowed to derail it.

**Four Taleban killed, suicide vests seized in southern Afghan Province**

**GHAZNI, 3 Sept—**Afghan security forces raided Taleban hideouts in southern Ghani Province killing four militants, provincial police chief Dilawar Zazai said on Thursday.

"The security forces stormed Taleban positions in Andar District late Wednesday night killing four rebels," Zazai told Xinhua.

There were no casualties on the troops, he stressed.

Meantime, he said that the militants fired a rocket hit a residential area as a result a civilian was killed.

In a related development, security forces detained five militants and seized suicide vests from their possessions on the same night on Wednesday night in provincial capital Ghazni City, the police further said.

Taleban militants who have intensified their activities are largely relying on suicide attacks and roadside bombings which often claim civilians’ life.—Xinhua

**Flood causes 1,710 death, 43 bn dollar loss in Pakistan**

**ISLAMABAD, 3 Sept—**The flash floods in Pakistan have left 1,710 people dead, millions homeless and caused a loss of over 43 billion US dollars, the government said on Thursday.

According to a survey report by Pakistan’s Federal Flood Commission (FFC) released on Thursday morning, at least 1,710 people died and another 2,632 were injured as the floodwater in the Indus River finally rushed into the Arabian Sea after ravaging the country for five weeks.

Chairing a federal cabinet meeting on Wednesday, Prime Minister Yousuf Raza Gilani said the economic losses inflicted by the floods were estimated at 43 billion dollars, almost equal to the expenditures incurred on the war on terror over the past nine years.

"The national economy is expected to grow four percent this year, but it might end up at 2.5 percent, causing massive job losses and affecting incomes of thousands of families," said Gilani.—Xinhua

**Four Miami airport concourses evacuated**

**MIAMI, 3 Sept—**A bomb squad investigated a report of a suspicious package after the police evacuated four of six concourses at Miami International Airport for several hours on the eve of the Labour Day travel period, an airport spokesman said on Friday.

Police bomb squad authorities went about 9:30 pm Thursday to a Customs area of Concourse E near an international arrivals area when the initial report came in, airport spokesman Greg Chin said.

He said between 100 to 200 passengers were evacuated while police investigated and that flights overnight were allowed to use parts of two concourses still open.

Miami-Dade Police and Fire Rescue vehicles are shown at the arrival level at Miami International Airport in Miami, early morning on 3 Sept, 2010. A spokesman for Miami International Airport said four of its six concourses have been evacuated as a police bomb squad investigates a report of a suspicious item. —Internet

**Boats are seen spraying water on an oil and gas platform on the Gulf of Mexico, off the coast of Louisiana on 2 Sept, 2010. —Reuters**

**New Orleans, 3 Sept—**An oil and gas platform operated by Mariner Energy burst into flames in the Gulf of Mexico on Thursday, but the crew of 13 escaped and there were no signs of an oil spill, the Coast Guard said.

The accident brought unwelcome attention to the offshore drilling industry as it is trying to roll back a six-month deepwater drilling moratorium imposed in the wake of the BP Plc Macondo well disaster, which killed 11 workers and poured 4.1 million barrels of oil into the Gulf.

As of late Thursday, there were no signs of a spill from the Mariner platform.—Reuters

**Indonesian volcano spews new burst of ash**

**TANAH KARO, 3 Sept—**An Indonesian volcano sent a new, powerful burst of hot ash high into the air early on Friday, violently shaking homes and trees along the slopes and sending panicked villagers scurrying back to safety.

"This was a big one!" said 37-year-old Anto Sembrining, who fled his coffee shop not far from the crater’s mouth, joining hundreds of others gathered near Mount Sinabung’s base.

"It shot up at least 3,000 metres (yards)."

The air was thick with the smell of sulfur and visibility was limited to just a few yards (metres).

Mount Sinabung erupted for the first time in four centuries on Sunday and Monday, catching many scientists off guard and forcing at least 30,000 people living along its fertile slopes in North Sumatra Province to be evacuated.—Internet

**NASA to launch mission to study sun at closer distance**

**Los Angeles, 3 Sept—**NASA is working on a plan to launch a mission to visit and study the sun closer than ever before, the Jet Propulsion Laboratory (JPL) announced on Thursday. The unprecedented project, named Solar Probe Plus, is slated to launch no later than 2018, according to the JPL. The small car-sized spacecraft will plunge directly into the sun’s atmosphere approximately 6.4 million kilometres (four million miles) from our star’s surface, the JPL said. As the spacecraft approaches the sun, its revolutionary carbon-composite heat shield must withstand temperatures exceeding about 1,400 degrees Celsius (2,550 degrees Fahrenheit) and blasts of intense radiation, the JPL said on its Web. The spacecraft will have an up-close and personal view of the sun, enabling scientists to better understand, characterize and forecast the radiation environment for future space explorers, according to the JPL.—Xinhua

**African livelihoods at risk as species threatened**

**Geneva, 3 Sept—**Millions of Africans may lose a key source of livelihoods as a fifth of freshwater African species are threatened with extinction, the updated Red List of endangered species showed on Thursday. Scientists conducting a survey on 5,167 African freshwater species found that some 21 percent of species of fish, molluscs, crabs, dragonflies and aquatic plants were at risk of becoming extinct, the International Union for the Conservation of Nature (IUCN) said in a statement.

Some 7.5 million people in sub-Saharan Africa are thought to depend on fisheries. In Lake Victoria, which stretches across Tanzania, Uganda and Kenya for instance, almost half 45 percent of 191 fish species studied were threatened with extinction or already extinct.

Jean-Christophe Vie, deputy head of the IUCN’s species programme also noted the importance of freshwater ecosystems.

“Freshwaters provide a home for a disproportionate level of the world’s biodiversity,” he said. “Although they cover just one percent of the planet’s surface, freshwater ecosystems are actually home to around seven percent of all species,” he added.—Internet

**Asteroid survey gathers mixed bag**

**Washington, 3 Sept—**A survey of near-Earth asteroids shows they come in a far wider variety of shapes, sizes and surfaces than previously thought, US researchers say.

The findings are based on infrared scanning of about 100 asteroids by NASA’s Spitzer Space Telescope. The study was reported Thursday.

The effort is part of a larger Spitzer telescope project to look at 700 near-Earth objects to identify their individual characteristics.

“These rocks are teaching us about the places they come from,” lead study author David Trilling of Northern Arizona University, Flagstaff, said. “It’s like studying pebbles in a stream bed to learn about the mountains they tumbled down.”

“Very little is known about the physical characteristics of the near-Earth population,” Trilling said.

“Our data will tell us more about the population, and how it changes from one object to the next. This information could be used to help plan possible future space missions to study a near-Earth object.”

The asteroids observed so far have a greater degree of diversity than expected, scientists say, indicating that they might have different origins.

Some might come from the main asteroid belt between Mars and Jupiter, and others could come from farther out in the solar system, they say.

The research is being published in the September issue of the Astronomical Journal.—Internet

**Technology**

**Shanghai takes lead in LED technology**

**Beijing, 3 Sept—**The Expo 2010 Shanghai is lighting up the new green potential of LED technology. More than one billion LED chips are producing about 80 percent of the indoor illumination for the pavilions, Expo officials said.

“The Expo Garden has become the largest demonstration of the latest LED lighting technology in China,” said Zhu Weihua, chief of the electronic information industry division with the Shanghai Municipal Commission of Economy and Informatization. “We hope the Expo can help promote the wider use of LED technology, especially in city landscape lighting and roadway lighting,” he said.

LED technology is considered the future because of its environmental friendliness and high efficiency. Though compact florescent bulbs also save energy compared to traditional incandescent bulbs, they contain toxic chemical mercury, said Wang Lizhong, general manager of Shanghai Sansi Electronic Engineering Co Ltd, one of China’s largest LED display system producers.

“If the compact florescent bulbs are not recycled properly, they can lead to heavy environmental pollution,” he said.

LED bulbs, however, will not pollute the environment, and consume 30 to 50 percent less power than traditional energy-saving bulbs, he said.

The technology has been included in the country’s medium- and long-term strategic plan for technological development, according to Zhu.

Shanghai has taken the lead in developing LED technology in the country by establishing a comparatively complete industrial chain, he said.—Internet

**Sony to expand service to compete with Apple’s iTunes**

**Beijing, 3 Sept—**Sony is to expand its new video and music streaming service Qriocity to compete with Apple’s iTunes, according to the Press Association on Friday.

The Japanese electronics giant said at the IFA Berlin show that it will expand its service to offer access to millions of songs and HD films.

Sony already has a market about 50 million users worldwide in its PlayStation network. Though it has a large distance to catch up with Apple’s iTunes which already has more than 10 billion downloaders, experts say it has a huge potential.

Its video and TV services are on huge demand this year and is to grow rapidly over the next year, with Amazon expected to participate in the competition soon.—Xinhua

Double hand transplant patient shows new hands

Dr Richard Edwards scratches his face with one of his new hands during a news conference at Jewish Hospital, in Louisville Thursday, 2 Sept, 2010. The 55-year-old chiropractor from Edmond, Okla, had his hands severely burned in a fire in 2006. Edwards says he can wiggle fingers on both his new hands. He was the nation’s third double hand transplant recipient.

INTERNET

Louisville, 3 Sept—The recipient of a rare double hand transplant says he feels “fantastic” and can wiggle fingers on both his new hands. Richard Edwards made his first appearance on Thursday, about a week after he underwent a nearly 18-hour transplant procedure at a hospital in Louisville. The 55-year-old chiropractor from Edmond, Okla, had his hands severely burned in a fire in 2006. Edwards was the nation’s third double hand transplant recipient. The surgery was performed at Jewish Hospital, the site of the world’s first successful hand transplant in 1999. Doctors say Edwards’ progress is ahead of other patients because they were able to route his existing nerves into the donor hands. Edwards lost seven fingers after his accident but retained most of his original hands, though they were badly burned.

Health

Health Tip: Coping with hives

Hives are the result of an allergic reaction. They typically go away without treatment, but can be an itchy nuisance.

The University of Maryland Medical Centre suggests how to deal with hives:

* Don’t let bath or shower water get too hot.
* Don’t wear tightly-fitting clothing, which can irritate the skin.
* Take an antihistamine to help reduce hives and their symptoms.
* Milder cases of hives may not need any treatment.
* Severe hives may need emergency treatment with epinephrine.

Bone drugs may double esophageal cancer risk

BEIJING, 3 Sept—People who take a kind of osteoporosis drug named bisphosphonates for more than half a decade may double the risk of getting esophageal cancer, according to a Reuters study on Friday.

An Oxford study published in the British Medical Journal showed that the research results are worrying, but doctors should not suggest the patients to immediately change the use of bisphosphonates, which can prevent the bone-weakening of the senior citizens.

Jane Green of Oxford’s Cancer Epidemiology Unit said although they were focusing on the worrying results, however, it is only the first such study with long-term follow up that has found such effect.

The researchers analyzed data from the UK GP research database on people over 40 years of age who had various kinds of cancer between 1995 and 2005.

The results showed that people with more prescriptions of bisphosphonates had nearly double the risk of esophageal cancer than people who had none prescriptions.

A previous study using the same database had found no link between bisphosphonates and esophageal cancer, while Green said their study had observed patients for the interval of times as twice as long.

Business

Oil lingers near $75 in Asia as stock markets gain

BANGKOK, 3 Sept—Oil prices lingered near $75 a barrel Friday in Asia, largely holding onto a big gain the day before as investors put a positive spin on US economic reports and Asian stock markets rose.

Benchmark oil for October delivery was down 30 cents at $74.72 a barrel at midday Bangkok time in electronic trading on the New York Mercantile Exchange. The contract rose $1.11 to settle at $75.02 on Thursday.

The Labour Department said first-time claims for unemployment benefits fell slightly last week, but are still above levels in a healthy economy.

The National Association of Realtors said the number of Americans who signed contracts to purchase previously owned homes rose 5.2 percent in July. That was 19 percent below the same month last year and home sales remain at the lowest level in more than a decade. One brighter spot: Factory orders rose 0.1 percent in July, indicating some industrial growth. The indicators were enough to spark more gains in Asian stock markets after a big jump on Thursday following a month of heavy selling amid evidence the global economic recovery is faltering. In other Nymex trading in October contracts, heating oil fell 0.84 cent to $2.054 a gallon and gasoline fell 0.63 cent to $1.915 a gallon. Natural gas for October delivery rose 1.9 cents to $3.77 per 1,000 cubic feet.

Nepal gov’t bans gold import

KATHMANDU, 3 Sept—Nepali government has imposed a ban on gold imports to deal with the mounting pressure such imports been exerting on the country’s foreign currency reserves.

“We have decided to completely bar the imports from Friday and the decision will remain in effect till further notice,” Ganesh Dhakal, joint-secretary at the Ministry of Commerce and Supplies (MoCS), told Friday’s Republica daily.

Officials stated that MoCS took such a decision mainly on request from the central bank, as soaring imports of the yellow metal continued to put pressure on the country’s foreign currency reserves.

Nepal has been suffering a huge trade deficit, mainly due to multifold increments in imports compared to exports. Propelled by widening trade deficit along with slowing growth in remittances, the balance of payments has been in negative territory also since the first quarter of last fiscal year.

While a rapid rise in gold imports was one of the factors behind this state of affairs, Nepal Rastra Bank, the central bank of the country, despite controlling its supply, has been facing a tough time bringing the situation under control.

**S Korea’s Kia to recall 35,000 cars in US**

**SEOUL, 3 Sept—**South Korea’s second largest carmaker Kia Motors said Friday it is recalling about 35,000 vehicles sold in the United States due to faulty wiring in interior lights that could cause fires.

On Tuesday the company said it would recall about 18,000 vehicles sold domestically because of the same problem.

Most vehicles subject to the US recall were made in South Korea except for the Sorento R, which was produced at Kia’s factory in the US state of Georgia, a company spokesman said.

The US recall affects about 24,000 Soul hatchbacks produced between September 2009 and June this year and some 11,000 Sorento sport utility vehicles made in the same period.

No accidents or injuries due to the defective wiring have been reported.

**Australian aerospace research to save lives**

**BRISBANE, 3 Sept—**Newly-opened Australian aerospace centre in Brisbane, capital city of Queensland, becomes a research base for developing cost-saving and potential life-saving technologies, according to Australian Associated Press.

The Australian Research Centre for Aerospace Automation (ARCAA), officially opened on Friday by Queensland State Treasurer Andrew Fraser, will work into new technologies to prevent mid-air collision and develop new ways of using pilotless aircraft to fight bush-fires.

The centre is a collaboration between the Queensland University of Technology and the Australian Commonwealth Scientific and Industrial Research Organization (CSIRO).

While unmanned aerial vehicles will be a major focus at the centre, developing safer flight-test technologies such as automated mid-air collision avoidance will also be a key task.

**KRUGER NATIONAL PARK IS THE LARGEST GAME RESERVE IN SOUTH AFRICA**

**KATMANDU, 3 Sept—**Nepal is making provision for the protection of red panda, one of endangered animals in the world, the National News Agency RSS reported on Friday.

A seminar was organized here Thursday aimed at garnering suggestions from the stakeholders so as to formulate policy on the sustainable conservation of the red panda. The seminar to continue for five days is participated in by 50 environmentalists, conservationists and the stakeholders from various countries including Germany, the Netherlands, Belgium, the United States, Bhutan and India.

Member secretary of the National Nature Conservation Trust Juddha Bahadur Gurung said the seminar was organized to collect suggestions for formulating strategies to protect and increase red panda population. He expressed his belief that such seminar held for the first time in the country will be fruitful in protecting the endangered animal.

According to the report, the red panda is found in various 17 conservation areas in upper hilly and mountainous regions at an altitude above 1,700 meters in Nepal.

According to conservationists, there are some 315 red pandas in Nepal. The endangered animal lives on bamboo leaves and finds the rough-leaved shrubs comfortable for habitat.

The cold breeze blew through Taungthaman Lake, leaving wavelets on its surface. Tourists were captivated by spectacular U Pein Bridge, which played a part in Taungthaman history.

Taungthaman Lake and U Pein Bridge stand as tourist attraction for globe-trotters to Myanmar.

As we stepped on U Pein Bridge, we saw groups of local and international holiday-makers. The structure of the bridge, strength of pillars and bridge construction techniques of ancient Myanmars is worth of study.

Construction of U Pein Bridge began in 1211 ME and finished in 1213 ME. As the bridge was constructed under the supervision of Clerk U Pein of the town administration, it was named U Pein Bridge. The bridge is 7.8 furlongs long and made up of 1,086 pillars and about 482 spans. It has four resthouses. At present, Research, National Museum and Library Department assumes responsibility for maintenance of U Pein Bridge.

The bridge is ideal of bridge construction techniques of Myanmar dating back to some 800 years ago, and quality of Myanmar teak. It is safe to say that U Pein Bridge stands as one of tourist destinations to every globe-trotter who visits Mandalay.

When my thoughts turned back from the past, I found myself standing next to a group of Spanish tourists. When asked her feelings about the bridge, Cynthia, who came from Madrid, said “It is my first time to U Pein Bridge. There is no man-made wooden bridge in my country, not even in the past. I admire goodwill and deeds of picture. Nowadays, global nations are seeking ways and means to attract the attention of tourists. But in Myanmar, ancient buildings and architecture features remain in abundance. The bridge is under careful hands, maintaining its original shape and beauty.

The scene of tourists observing the bridge with enthusiasm, groups of globe-trotters taking documentary photos and researchers observing pillars of the bridge further lends colour to beauty and historical values of U Pein Bridge spanning over Taungthaman Lake.

Electoral process course conducted in Haka Township

NAY PYI TAW, 3 Sept — The opening of Electoral process course (4/2010) was held at No (1) Basic Education High School in Haka on 1 September. Members of Chin State Election Subcommission Chairman U Hwe Huh addressed the opening ceremony. Member of State Subcommission Staff Officer U Ngwaw Zawun of State Development Affairs Committee and Member of Township Subcommission U David Shwe lectured on construction of polling booth and electoral process.

The course is being attended by 140 polling station officers from six wards and 30 village-tracts of the township.

H&T Minister meets hotel managers

NAY PYI TAW, 3 Sept — Minister for Hotels and Tourism U Soe Naing met with managers and officials of hotels in Nay Pyi Taw Hotel Zone today. He called for continued implementation of construction of hotels and development tasks, meeting set standard, completion on schedule and greening of hotels’ environs.

The best time to plant a tree was 20 years ago.
Second best time is now.
Nay Pyi Taw BEHS No. 14 gets new school building

NAY PYI TAW, 3 Sept — The opening of a new school building for Basic Education High School No. 14 was held in conjunction with the ceremony to hand over documents related to the building and donation ceremony followed.

Minister U Thein Nyunt spoke on the occasion. Minister Dr Chan Nyin presented 654 sets of school uniform to teachers and students and Minister U Thein Nyunt, stationery, 1040 dozens of note books and 295 dozens of pencils to students.

Next, Managing Director U Thet Lin of T.Z.T.M Construction Company presented three sets of computers and school furniture for the school.

Secretary U Kan Chun of the supervisory committee handed over documents related to the building to Director-General U Aye Lwin of No (2) Department of Basic Education.

Afterwards, the headmistress spoke words of thanks.

Minister U Thein Nyunt, Mayor U Thein Nyunt and Minister for Education Dr Chan Nyin presided over the ceremony to hand over documents related to the building and donation ceremony.

Also present were PBANRDA Deputy Minister U Aung Myo Min, Deputy Minister for Science and Technology U Kyaw Soe and officials, NayPyiTaw District and township level departmental officials, teachers and students and local people.

Secretary U Kan Chun of Supervisory Committee for Special Development Project, Director-General U Aye Lwin of No (2) Department of Basic Education and member of Nay Pyi Taw Development Committee U Myo Aung formally opened the new school building.

Next, Minister U Thein Nyunt unveiled the signboard of the school. Then Ministers U Thein Nyunt and Dr Chan Nyien and guests sprinkled scented water on it.

Afterwards, the ceremony to hand over documents related to the building and donation ceremony followed.

After the ceremony, the ministers and guests visited computer room, audio room, science lab and library and viewed learning of students.

Nay Pyi Taw Basic Education High School No. 14 is situated in Shwekyarpin Ward, Zabuthiri Township, Nay Pyi Taw District. The two-storey main building is 272 feet long and 216 feet wide. The headmistress’ residence and eight-room teacher hostel were also built in the compound.

Valuable motor road...

(from page 16) Assistant Engineer U Aung Ko Oo explained conditions of the road section in Nay Pyi Taw District to us. Kintha-Koegway road section is 18 feet wide asphalt road. It is in good condition. Assistant Engineer Daw Than Thaw Sae U Htay Hlaing joined us at Koegway (Waterfall) camp and they conducted us round the Pinlaung Road. We passed Longhoto Village at the 13th mile, Lethse Village at the 15th mile and Ayedin Village at the 18th mile.

The national races residing in the villages peacefully are engaged in cultivation of banana and turmeric plants. At Taungkya Village, we visited the hot spring and left for Leinli Village.

AE Daw Than Thaw Sae U Htay Hlaing and Lethse Village is 19 miles long. The longer section of Nay Pyi Taw-Pinlaung Road starts from Kintha-Koegway junction at mile post No. 271/4 Kintha and joins at mile post No. 44/0 on Aungpan-Pinlaung-Moebye-Loikaw Road near Yinhmi Village.

Along Nay Pyi Taw-Pinlaung-Pinlaung Road, we passed Koegway, Yaybu, Yayaye, Khwayhmi, Paunglaung, Ledin and Hnyay creeks that originate from the mountain ranges. The road is a reliable transport facility linking Shan State, Kayah State and Nay Pyi Taw District.

In the past, the local national races bartered their goods among them. At present, they can transport domestic products to other regions. Along the road, we saw green forest and bamboo groves. The local people grow groundnut, sesame, wheat and maize in addition to paddy. Moreover, they plan tea, potato and banana.

Thanks to Nay Pyi Taw-Pyinmana-Taungwinyi Road and accessible to Rakhine State.

Actually, Nay Pyi Taw-Pyinmana-Taungwinyi-Taungwinyi Road and accessible to Rakhine State.

Air France-KLM is considering setting up a "low-cost" domestic carrier to meet intense competition in the French market from budget rivals, company sources said on Thursday.

The new airline, dubbed "Air France Express," could be established next year with bases in the southern cities of Marseille, Nice and Toulouse if an agreement can be reached with unions, the sources said. Air France-KLM which already operates a low-cost unit, Transavia, declined to comment.

"Studies are underway to find some way to fight the 'low-cost' airlines. Among ideas being considered, is setting up a new entity within Air France-KLM," one of the sources said, asking not to be named. "The idea would be to base some pilots in Marseille, Nice and Toulouse and to do like easyJet — avoid having aircraft overnighting away from their operating base," the source added.

Earl weakens but still powerful as it passes NC

BUXTON, 3 Sept—The last ferry left for the mainland and coastal residents hunkered down at home as Hurricane Earl closed in with 105 mph winds early Friday on North Carolina’s dangerously exposed Outer Banks, the first and perhaps most destructive stop on the storm’s projected journey up the Eastern Seaboard.

The hurricane’s squalls began to lash the long ribbon of barrier islands. Gusts above 40 mph made signs shake and the heavy rain fall sideways in Buxton, the southeasternmost tip of the Outer Banks.

Hurricane Earl’s winds were slowing, from 140 mph early on Thursday, but still at Category 2 strength. Forecasters warned that it remained powerful, with hurricane-force winds of 74 mph or more extending 70 miles from its center and tropical storm-force winds of at least 35 mph reaching more than 200 miles out.

"It’s interesting to me to just see what Mother Nature can do," said Jay Lopez, 36, of Frisco, as Nature can do,” said Jay Lopez, 36, of Frisco, as the wind howled through Buxton. Federal, state and local authorities were waiting for daybreak to begin patrolling the coast to check for damage.

Wildfires in south Russia kill four

MOSCOW, 3 Sept—Wildfires in Russia’s southern Volgograd and Saratov regions have killed four and injured 14, an official from the Emergency Situations Ministry said on Friday.

The fires threatened more than 15,000 houses, destroyed more than 500 houses and left over 1000 people homeless, the official said.

"Unfavourable weather conditions - high air temperatures and strong winds - caused wildfires in six districts of the Volgograd and Saratov regions. The fires threatened more than 15,000 houses," Pavel Popov, a deputy minister, was quoted by Itar-Tass news agency as saying.

According to Popov, more than 3,000 people and 300 firefighting equipment, including aircraft, were involved in firefighting operations.

A spokesman for the regional emergencies administration said the fire situation was under control so far.
14 cops killed in Colombia ambush, rebels blamed

BOGOTA, 3 Sept—Suspected leftist rebels killed 14 police officers and wounded seven in an ambush of a five-truck convoy in southern Colombia, a police commander said Thursday.

Elsewhere in the country, two separate mine blasts on Wednesday and Thursday killed four soldiers and wounded six more, authorities reported. The police casualties were among 45 carabineros — all in their 20s — who were on patrol on Wednesday evening when attackers detonated roadside bombs then opened fire, police Gen Santiago Parra told The Associated Press by telephone from the nearby Provincial capital of Florencia. Police had initially reported five dead but Parra said a rescue mission found nine more bodies later on Thursday. He blamed the attack in the municipality of Doncello on the Revolutionary Armed Forces of Colombia, or FARC, the Western Hemisphere’s last remaining rebel army.

It has been at war with the state since 1964 and, though weakened in recent years by Colombia’s US-backed military, has in recent months stepped up hit-and-run attacks. The ambush happened not far from an area the size of Switzerland that the government ceded to the FARC from 1999 to 2002 for a peace dialogue that failed.—INTERNET

Three dead in plane crash off San Francisco Bay

Soldiers stand on the roof of a home during routine patrols in Medellin, Colombia on 1 Sept, 2010.—INTERNET

REDWOOD SHORES, 3 Sept—A small plane that crashed into a shallow lagoon off San Francisco Bay on Thursday, killing three people, belonged to the founder of a local steel company who was believed to be among the dead.

An employee of RE Borrmann’s Steel Co says the twin-engine Beechcraft Queen Air was owned by company founder 92-year-old Robert Borrmann.

Employee Charlene Marshall says Borrmann, the pilot and a woman were believed to have been on the 1961-model plane that crashed a mile after taking off from San Carlos airport.

Singapore Airlines curbs crew’s Facebook musings

A couple sits in the departure lounge at Changi airport in Singapore. Singapore Airlines has banned its flight attendants from discussing work-related matters on social networking websites, after some cabin crew were found to have disclosed confidential job issues on Facebook, company officials said.

“Our staff may of course have a blog or Facebook and Twitter account like any other member of the public,” an airline spokeswoman told AFP.

“But our policy is clear that they must not comment on work matters about business or customers, so as to protect proprietary information as well as the privacy of other staff and our customers.”

Singapore Airlines (SIA) has directed its flight attendants to avoid discussing work-related matters on Facebook and other social networking websites, company officials said Thursday.

The image-conscious airline, which is consistently ranked by passengers as one of the world’s best, took action after some cabin crew were found to have discussed confidential job issues on Facebook.

The Straits Times newspaper reported Thursday that some crew members got warning letters for grumbling about duty rosters, passengers, and their bosses and colleagues on Facebook.

“Our staff may of course have a blog or Facebook and Twitter account like any other member of the public,” an airline spokeswoman told AFP.

“But our policy is clear that they must not comment on work matters about business or customers, so as to protect proprietary information as well as the privacy of other staff and our customers.”

The World Health Organization (WHO) representative in the state Isa Adamu disclosed this to reporters in Damaturu, the state capital on Wednesday.

“Gastroenteritis is caused by an infection, which is usually viral.

The official said the disease is registered in the 17 local government areas with the highest casualties of 10 deaths in Guja, eight in Gulani and five in Potiskum local government areas.

Internet

KUALA LUMPUR, 3 Sept—A Malaysian man pleaded guilty to wildlife smuggling after his bag bursting with 95 live boa constrictors broke open on a luggage conveyor belt at Kuala Lumpur International Airport, an official said Friday.

Keng Liang “Anson” Wong, 52, who was previously convicted of wildlife trafficking in the United States, was charged Wednesday in a district court with exporting the endangered boa without a permit, said Shamsuddin Osman, an official with Malaysia’s wildlife department.

The offence that carries a penalty of up to seven years in prison and a fine, Shamsuddin said.

Wong was arrested on 26 Aug after airport authorities found the boa constrictors, together with a few other snakes and a turtle, when his bag broke open on a luggage conveyor belt. Wong was transiting from Malaysia’s northern Penang state to Indonesia’s capital Jakarta. The court will reconvene Monday pending Wong’s appointment of a lawyer, Shamsuddin said.

He said the criminal charges involve the boas only, because the other animals are not listed as endangered. All of the animals are alive and under the care of wildlife officials, Shamsuddin said.

Police quiz woman as bodies of babies found
AMSTERDAM, 3 Sept — A Dutch woman was being investigated for murder last night after the bodies of three babies were discovered in the second infanticide case in the Netherlands in a month.

Police searched the home of the 41-year-old woman, named as Anita C, after she visited hospital complaining of abdominal pains and was found to have recently given birth.
The body of the first baby was found in a garden shed at her home in Geleen, 200km (124 miles) south-east of Amsterdam, earlier this week.

Two more were found buried in the garden.

Amazon river level in Peru at 40-year-low
LIMA, 3 Sept — The Amazon river has dropped to its lowest level in 40 years in north-eastern Peru, causing severe economic disruption in a region where it is the main transport route.
At least six large boats have been stranded near the port city of Iquitos.
The low water level is the result of a prolonged spell of dry weather, Peru’s national meteorological office said. The river is expected to fall further before the rainy season begins next month.

Can home cooking be hazardous to your health?
ATLANTA, 3 Sept — Could your kitchen at home pass a restaurant inspection? New research suggests that at least one in seven home kitchens would flunk the kind of health inspection commonly administered to restaurants. The small study from California’s Los Angeles County found that only 61 percent of home kitchens would get an A or B if put through the rigors of a restaurant inspection. At least 14 percent would fail — not even getting a C. “I would say if they got below a C, I’m not sure I would like them to invite me to dinner,” said Dr Jonathan Fielding, director of the Los Angeles County Department of Public Health. In comparison, nearly all Los Angeles County restaurants — 98 percent — get A or B scores each year.

Seven-and-a-half-month old Tanisha Overbeeke smiles while resting on top of a leaf of the Victoria Amazonica at the Rotterdam Blijdorp Zoo on 1 Sept, 2010. Children could be photographed on top of the leaf, under the condition that they do not weigh more than 15 kg (33 lbs). The Victoria Amazonica blooms over two nights producing flowers that are white on the first night, which then turn pinkish-red by the second night. Its leaf could have a diameter of up to two-and-a-half meters.

**UK man made up to $36K per year begging**

A British man who posed as homeless and earned up to $36,038 per year while collecting government benefits was sentenced to pay a $154 fine.

Daniel Terry, 31, who received $123 in weekly government assistance, pleaded guilty to a charge of begging after admitting to using a sleeping bag and a blanket to imply to passersby in Lincoln, England, that he was homeless, the Daily Mail reported on Thursday. Terry, who was arrested last month during a crackdown on area vagrancy, was found to not be homeless and admitted to police that he collected up to $77 on a weekday and up to $154 per day on weekends.

**Mexico to go digital by 2015**

MEXICO CITY, 3 Sept—Mexico will change from analog to digital television by 2015 to promote competition and help convergence with telephone and Internet services, President Felipe Calderon said on Thursday.

“This transition will be made possible with the participation of more providers and television signals,” Calderon said in his annual address at Mexico City’s National Palace. The move, introduced by presidential decree, would begin next year.

Calderon did not say which type of digital television service would be used in Mexico to go digital by 2015.

**Tran presents ‘Norwegian Wood’ at Venice film festival**

VENICE, 3 Sept—The pacing, the blowing wind, the music and other atmospheres all helped create the tension in “Norwegian Wood,” says Tran Anh Hung, presenting the haunting movie at the Venice film festival.

Based on a best-selling novel by Japanese author Haruki Murakami, the story of love, sexuality and loss mainly through suicide is set in Japan in the volatile 1960s.

“The film is rich in physical variation,” the Vietnamese-born Tran said, discussing scenes in which the lead character Watanabe (Kenichi Matsuyama)-facing around an apartment with the troubled Naoko (Rinko Kikuchi), and later tries to keep up with her in a green field.

Watanabe falls in love with Naoko despite her imbalance over losing her sister and boyfriend to suicide. While promising to wait for Naoko until she overcomes the trauma at a special sanatorium, Watanabe gets deeply involved with another woman, Midori (Kiko Mizuhara), tumbling into romantic confusion.

**Two arrested in bird thefts**

Police in suburban Chicago said they arrested two people believed to be involved in a series of exotic-bird thefts at area pet stores.

The man, whose name was not released, and Rebecca Cozzi, 40, were detained on Wednesday along with another man and woman, who are being questioned in the case, when a manager at the Petland store in Wheaton recognized them from released security camera footage from a Tuesday robbery at a Petland at Naperville, the Naperville (Ill.) Sun reported on Thursday.

**Appeals court sets hearing in Jackson estate case**

LOS ANGELES, 3 Sept—An appeals court has scheduled a hearing for lawyers for the father of Michael Jackson to argue that he deserves a role in decisions involving his son’s multimillion dollar estate. The Second District Court of Appeal said Thursday the appeal by Joe Jackson would be heard on 6 Oct.

In November, the elder Jackson challenged a ruling by a state judge that the estate would be run by attorney John Branca and music executive and family friend John McClain. The men had been designated in the singer’s 2002 will to administer his estate. The will omitted Joe Jackson in effect denying him any stipend or decision-making authority.

**Two arrested after 2 days on 6-inch ledge in Mont**

Two young goats wandered onto the thin ledge of a railroad bridge and spent nearly two days high above the ground until rescuers in a towering cherry picker plucked them from their perch, hungry but safe.

The rescue occurred Wednesday 60 feet above a little-trafficked rural roadway in southern Montana between Billings and Roundup, after a caller told the Rimrock Humane Society the goats were stranded on the 6-inch ledge.

The young female animals weighing 25 and 35 pounds mostly stayed on the angled ledge, even though there was a wider surface area on a pillar just a few feet away.

**‘Gone with the Wind’ child actress dies at 76**

FORT BRAGG, 3 Sept—Cammie King Conlon, the former child actress who portrayed the doomed Midori (Kikko Mizuhara), tumbling into romantic confusion.

Fort Bragg home on California’s north coast, said friend Bruce Lewis. Her son, Matthew Ned Conlon, was by her side.

Conlon was picked to play the small, but pivotal role of Bonnie Blue Butler in the 1939 Civil War epic at age 4. Her character’s death in a fall from a pony irrevocably damages Rhett and Scarlett’s tumultuous marriage.

Conlon also voiced the young doe Faline in Walt Disney’s “Bambi” three years later. It would be her final film role.

**Mourinho unhappy with lack of strikers at Real**

Rome, 3 Sept — Real Madrid coach Jose Mourinho has hit out at his club for not backing him in the transfer market and leaving him short up front. Despite boasting attacking resources including Cristiano Ronaldo, Kaka, Gonzalo Higuain and Karim Benzema, Mourinho told Thursday’s "La Gazzetta dello Sport" that he wanted more. "As coaches we’re always unsatisfied, we always want more and for that reason I’m with those who ask for new signings," he said. "Even if each person does it in his own way, some more.

Bayern Munich striker the record of 15 set by credit, is just one short of World Cup goals to his country and with 14 already won 101 caps for World Cup in Brazil in Thursday he wants to Miroslav Klose said on "Mares, is hoping to take the field for the Los Angeles Don, is hoping to take the position of strikers at Real Madrid’s Portuguese coach Jose Mourinho introverted, others more aggressive. "At Madrid I wanted another striker, Higuain and Benzema are not enough." But he admitted that buying players is never easy when in charge of a big team as selling clubs inflate their prices. — Internet

**Beckham targets 11 September return**

Los Angeles, 3 Sept — David Beckham, sidelined since March with a torn achilles tendon, is hoping to take the place of strikers at Real Madrid. Beckham said in an article posted on the Major League Soccer team’s website, "I’ll keep my fingers crossed and hopefully I’ll get on the field for 15-20 minutes. That’s what I’m looking at." — Internet

**Evergreen Klose aims to play at 2014 World Cup**

Brussels, 3 Sept—On the eve of Germany’s opening Euro 2012 qualifier, Germany striker Miroslav Klose said on Thursday he wants to play on until the next World Cup in Brazil in 2014. The 32-year-old has already won 101 caps for his country and with 14 World Cup goals to his credit, it is just one short of the record of 15 set by Brazil’s Ronaldo. "I think I can still play for a few more years at a high level," said the Bayern Munich striker with Germany set to face Belgium in Brussels on Friday in their first Euro 2012 qualifier in Group A. — Internet

**Woods looks to keep going at FedEx Cup**

Norton, 3 Sept — A chart of FedEx Cup standings at the Deutsche Bank Championship showed Tiger Woods at the top, not unusual considering he was won the cup and its $10 million prize every year he has played. This chart was different. It listed the 10 players who are on the bubble at the TPC Boston, starting with Woods at No 65 through Josh Teater at No 75. — Internet

**We must cope with pressure, Gerrard tells stars**

England’s Steven Gerrard (L) and Glen Johnson participate in a team training session at Wembley Stadium in west London on 2 September. — Internet

Watford, 3 Sept — Steven Gerrard has told his England team-mates they have to be strong enough to cope with the pressure of playing for their country in the aftermath of a dismal World Cup. Gerrard knows it is vital England make a positive start to the Euro 2012 qualifying campaign, which kicks off against Bulgaria at Wembly on Friday, to quell the growing calls for a coach Fabio Capello to be sacked and restore some belief to an under-fire squad. Several England players were booed during the friendly win over Hungary last month as fans showed their frustration at the team’s underachievements. — Internet

**Capello: I’ve learned lessons from World Cup flop**

Watford, 3 Sept — Fabio Capello insists he has learned enough from England’s World Cup flop to make changes he believes will put his team back on track as long as they play without fear. Capello’s side host Bulgaria in their opening Euro 2012 qualifier at Wembly on Friday with their woeful effort at the World Cup still fresh in the memory. The fixture is fraught with difficulties for Capello as he tries to avoid the kind of embarrassing result which would lead to renewed calls for his head from the increasingly vitriolic English media. Capello knows the knives are out after the poor showing in South Africa, but he is convinced he can recapture the positive results England produced during World Cup qualifying if his players don’t let the negativity become a distraction. — Internet

**European coaches give thumbs up to extra linesmen**

Nyvø, 3 Sept — Top European club coaches on Thursday welcomed the experiment with two extra assistant referees in the Champions League this season. "The controversial thing was always going to be technical aids but I think (UEFA president) Michel Platini was brilliant on this issue," said Liverpool coach Roy Hodgson after a meeting between 17 elite European coaches at European football’s governing body. UEFA decided this summer to carry on with a trial of two extra linesmen it began with Europa League matches last season, expanding it to the Champions League for two years mainly to keep track of goalmouth incidents. "It’s better to have three pairs of eyes than one pair of eyes," Manchester United coach Sir Alex Ferguson commented after the meeting. UEFA technical director Andy Roxburgh said coaches preferred the experiment to technical aids. — Internet

**Buffon omitted from Juve Europa list**

Rome, 3 Sept—Italy goalkeeper Gianluigi Buffon has been left out of Juventus’ 25-man Europa League squad. Buffon is currently recovering following surgery on his back after suffering a herniated disc during the World Cup in South Africa. Juve named three goal-keepers in their list: Alex Storari, Alex Manninger and youngster Marco Costantino. Other players to miss out on the list are new signings Fabio Quagliarella and Alberto Aquilani having already played for Napoli and Liverpool respectively in the competition. — Internet

**Federer, Wozniacki lead US Open stars into third round**

New York, 3 Sept—Roger Federer and Caroline Wozniacki cruised into the third round of the US Open while Maria Sharapova, Novak Djokovic and Robin Soderling showed they are title contenders as well. Swiss second seed Federer, seeking his 17th Grand Slam crown and a seventh consecutive trip to the US Open final, beat Germany’s 104th-ranked Andreas Beck 6-3, 6-4, 6-3 in one hour and 41 minutes at Arthur Ashe Stadium on Thursday.

Five-time US Open champion Federer will face 109th-ranked Paul-Henri Mathieu to decide a fourth-round berth on the Flushing Meadows hardcourts. “It’s the perfect start,” Federer said. — Internet

**Caroline Wozniacki of Denmark prepares to serve to Kai-Lung Chang of Taipei during their women’s singles 2nd round match of the 2010 US Open at the USTA Billie Jean King National Tennis Centre in New York.**

Russia, EU to establish defence coordination group

MOSCOW, 3 Sept — Russian and the European Union (EU) are going to set up a joint defence and security coordination working group, the chief of the Russian Armed Forces General Staff, Gen. Nikolai Makarov, said on Friday.

During a meeting with Chairman of the EU Military Committee Hakan Syren, who is on a visit to Russia, the two sides held a detailed dialogue, shared opinions on European security and outlined the future steps, “including the establishment of a joint working group that would help to plan joint actions thoroughly.” RIA Novosti news agency quoted Makarov as saying.

Only with stability and peace will the nation develop
Only with stability and peace will democratization process be successful

Anarchy begets anarchy, not democracy
Riots beget riots, not democracy
Democracy can be introduced only through constitution

People’s Desire

- We favour peace and stability
- We favour development
- We oppose unrest and violence
- Wipe out those inciting unrest and violence

VOA, BBC-sowing hatred among the people
RFA, DVB-generating public outrage
Do not allow ourselves to be swayed by killer broadcasts designed to cause troubles

Valuable motor road bridging east and west regions of Myanmar

The government is building roads and bridges that have access to all the regions of the Union.
The road from Pyinmana Township of Nay Pyi Taw District to Pinlaung Township of Shan State (South) is under construction. The project includes expanding the road and shoulders, digging drains on both sides and reconstruction of Leinli Bridge on it.

Under the arrangement of Deputy Chief Engineer U Thein Zaw of Road Special Group-13 of Public Works, we the Kyemon news crew left Pyinmana Township of Nay Pyi Taw District for Kintha-Koegway road section.
