In future, large hydropower projects must be implemented successfully with domestic industrial products, national experts and national skilled workers only

Relocated villages from project area have been provided with all forms of aids including water, electric power, buildings and religious buildings

NAY PYI TAW, 24 Jan—Prime Minister U Thein Sein, accompanied by ministers, deputy ministers and heads of department, left Nay Pyi Taw by air and arrived at Nampaung Airport in Myitkyina, Kachin State, at 12.30 pm on 22 January. Together with Chairman of Kachin State Peace and Development Council Commander of Northern Command Brig-Gen Zeyar Aung and members, the Prime Minister flew to Myitsonye Hydropower Project near Tanphe Village, downstream the confluence of the rivers Maykha and Malikha, about 25 miles north of Myitkyina.

Minister for Electric Power No.1 U Zaw Min reported on ongoing hydropower projects in Kachin State, purposes of Myitsone Hydropower Project, historical background of the project, and facts about the project. Director-General of the Hydropower Implementation Department U Myint Zaw gave accounts of chosen sites for building stone-filled concrete bed of the dam and related structures, the programme to divert the river with three phases and terms, preparations for building spillway and hydropower plant, comparative study between heights of stone-filled concrete beds and installed generation capacities at the international level and that at the domestic level, arrangements for construction of Ayeyawady River-crossing bridge as part of Myitsonye Hydropower Project, and systematic relocation of the villages in the inundated area to Aungmyintha Model Village.

Four economic objectives

- Development of agriculture as the base and all-round development of other sectors of the economy as well
- Proper evolution of the market-oriented economic system
- Development of the economy inviting participation in terms of technical know-how and investments from sources inside the country and abroad
- The initiative to shape the national economy must be kept in the hands of the State and the national peoples

Four political objectives

- Stability of the State, community peace and tranquility, prevalence of law and order
- National reconsolidation
- Emergence of a new enduring State Constitution
- Building of a new modern developed nation in accord with the new State Constitution

Four social objectives

- Uplift of the morale and morality of the entire nation
- Uplift of national prestige and integrity and preservation and safeguarding of cultural heritage and national character
- Uplift of dynamism of patriotic spirit
- Uplift of health, fitness and education standards of the entire nation
Improve quality, character of Myanmar films

The ceremony to present Myanmar Motion Picture Outstanding Awards (Academy Awards) for 2009 took place at the open-air theater of City Hall in Nay Pyi Taw the other day. The Myanmar movies that were on in 2009 were scrutinized, and nine outstanding film stars and professionals were named academy award winners.

Myanmar film professionals had struggled for many periods starting from the pre-war period to improve Myanmar film industry. They have been taking part in movements with their artistic talent from the period of independence struggles to date to preserve and promote national prestige and integrity. So also today, they are still engaged in the duties of building a new nation with the art of film production.

To improve the quality and standard of the Myanmar film industry is crucial for the Myanmar film world. Films and TV series of the international community are improving in all aspects. Globally, films are shot with digital system and special effects in specially-designed settings and scenes.

So, Myanmar film stars, technicians and producers have to be serious about raising the standard of films by improving plots, themes, shots, costumes and performances.

Motion picture has great influence over the public. So, film artists and producers are to be well convinced of the fact that costumes, dialogues and performances should not be against Myanmar culture and traditions. They have to exert their performing art to the best of their ability to promote national character.

Now, films with pictures of higher resolution and better sound system are produced with the assistance of the government, and efforts of film professionals. They also have to keep working hard to produce films with strong themes and naturalism in order to meet the international level. Therefore, film professionals inclusive of the winners are duty-bound to work in harmony to improve the quality and character of Myanmar films.

UMFCCI officials meet foreign guests

YANGON, 24 Jan—A meeting between officials of the Union of Myanmar Federation of Chambers of Commerce and Industry and a two-member delegation led by Designated Representative Mr. Axel Neubert of Hanns Seidel Foundation was held at the office of the federation on 17 January. They held discussions on opportunities to work together towards industrial development, on-job training courses to be organized for human resources development, ongoing businesses and prospects of further cooperation. — MNA

MCDC meets for Mayor’s Cup Vegetables and Fruit Show and Contest

MANDALAY, 24 Jan—Mandalay City Development Committee met for holding 9th Mayor’s Cup Vegetable and Fruit Show-cum-contest at MCDC meeting hall on 10 January.

MCDC Chairman Mayor U Phone Zaw Han opened the meeting with an address. Officials submitted their reports on organizing the event successfully to the mayor whose concluding remarks brought the meeting to conclusion. — MCDC

Education, Living & Health Care Exhibition on 25-28 Feb

YANGON, 24 Jan—With the main sponsorship of Shine Construction, Jade Crown Organizing Group will organize Education, Living & Health Care Exhibition at Tatmadaw Convention Hall on U Wisara Road in Dagon Township, here, from 9 am to 5 pm daily from 25 to 28 February.

The exhibition is designed to take place on a grand scale with more than 100 booths of famous companies and services with sale-promotion programmes and special programmes.

Those wishing to stage booths in the exhibition may contact Jade Crown Organizing Group at No. 204 on 1st Floor, 39th Street (Central Block), Kyakktada Township (Ph: 01-7309 8593, 01-7313 8593, 09 8630 440). — MNA
Ahmadinejad hopes for more talks with world powers

Iranian President Mahmoud Ahmadinejad said on Sunday Iran hoped to resume talks with world powers on its nuclear programme, a day after discussions ended in stalemate with no clear agreement to meet again.

An Iranian official was quoted as saying Teheran could revive talks on a fuel exchange deal, moving some enrichment overseas. But he said only Russia need take part. French participation foreseen by an earlier tentative pact was unnecessary.

Two days of talks with the United States, France, Germany, China, Russia and Britain ended without progress on Saturday, with the group’s lead negotiator, the European Union’s Catherine Ashton, saying no further meeting was scheduled.

“If the other party is determined and committed to law, justice and respect, there is hope that in the next sessions good results would be achieved,” Ahmadinejad said in a speech.

Ahmadinejad spoke as if it were understood as it was understood the talks would resume.

“In the upcoming meetings there will be good agreements made, provided the two parties remain committed to the spirit of the talks,” he said in the televised speech to a crowd in the city of Rasht.—Reuters

Senior officer killed, 10 people wounded in Iraq’s violence

Baghdad, 24 Jan—An Iraqi senior officer was killed and ten people were wounded in separate bomb attacks in Baghdad and Salahuddin Province in north of Baghdad on Monday, the police said.

Iraqi army’s Brigadier General Thamir Hassan Saleh, who works at the office of Prime Minister Nuri al-Maliki, was killed when a roadside bomb went off near his car in Baghdad’s western district of Ghazaliyah, an Interior Ministry source told Xinhua on condition of anonymity.

A security man accompanying Saleh was wounded by the blast, which occurred in the morning while Saleh was heading to work, the source said. In a separate incident, a bomb planted at a parking lot for minibuses carrying passengers in Baghdad’s northwestern district of al-Shula, detonated and wounded five people, the source added.—Xinhua

Walmart shooting leaves two dead, two deputies hurt

PORT ORCHARD, 24 Jan—A shootout in front of a Walmart in Washington State left two people dead and two sheriff’s deputies wounded Sunday afternoon, a sheriff’s spokesman said.

One of the dead was a man who shot at deputies, said Scott Wilson of the Kitsap County Sheriff’s Office. The other victim was a young woman who died after she was taken to a Tacoma hospital, he said. The deputies’ wounds did not appear life-threatening, Wilson said.

Details were sketchy Sunday evening, but the sheriff’s office received a call about a suspicious person at the store in Port Orchard, Wilson said. The man ran and started shooting when three deputies tried to talk to him, he said.—Internet

WikiLeaks man named ‘un-Australian’ of the year

SYDNEY, 24 Jan—WikiLeaks founder Julian Assange was named “un-Australian of the Year” by a men’s magazine on Monday for publishing thousands of leaked US diplomatic cables on his whistleblowing site.

Australian-born Assange edged out God, Denmark’s Princess Mary and Prime Minister Julia Gillard to take Australian lad’s title Zoo Weekly’s dubious award for promising to dump 250,000 secret memos on WikiLeaks.

“Dress it up any way you like but the WikiLeaks founder broke that famous rule ‘What goes in the memo stays in the memo’,” Zoo wrote.

“Don’t expect any buck’s night invites anytime soon Jules.”

Assange, 39, is on bail in Britain awaiting an extradition hearing. He is wanted in Sweden for questioning on sexual assault allegations.—Internet

Explosion kills 31 at Moscow airport

MOSCOW, 24 Jan—A explosion ripped through the arrivals hall at Moscow’s busiest airport on Monday, killing 31 people and wounding about 130. Health Ministry officials said.

The state RIA Novosti said the explosion may have been caused by a suicide bomber.

The Russkaya Sluzhba Novosti radio station cited a traveler, identified as Viktor, as saying he heard the bang outside the airport, where he was waiting for a car.

“There was an explosion, a bang. Then I saw a policeman covered in fragments of flesh and all bloody. He was shouting ‘I’ve survived! I’ve survived!’”

Workers sweep away debris after a bombing in Baghdad, Iraq, on 23 Jan, 2011. A flurry of morning bombs killed and wounded several across Baghdad Sunday, police said, in what one Iraqi official called an attempt to undermine security ahead of a much anticipated meeting of Arab heads of state in two months. Internet

A general view of Moscow’s Domodedovo airport is seen on Sunday, 26 Dec, 2010. Icy rain on Sunday shut down Moscow’s largest airport for nearly 15 hours, coated roads with ice and left more than 300,000 people and 14 hospitals without electricity.—INTERNET

Two car bombs aimed at Shi’ite pilgrims kill 18 in Iraq

BAGHDAD, 24 Jan—Two car bombs struck Shi’ite pilgrims Monday in an Iraqi holy city, killing at least 18 people as crowds massed for religious rituals marking the end of a 40-day mourning period for the Islamic sect’s most beloved saint.

The blasts in Karbala were the latest in nearly a week of attacks that have killed at least 159 people.

The first attack occurred about 7 am in a parking lot near busloads of pilgrims on the eastern outskirts of Karbala, 55 miles (90 kilometres) south of Baghdad. Police and hospital officials said that six pilgrims were killed and 34 people wounded in that attack.

More than four hours later, a second car bomb struck pilgrims on the southern edge of the city, killing at least 12 people, including 10 pilgrims and two soldiers, and wounding 21, the officials said.

Monday’s attacks followed a triple suicide bombing last week along two highways leading to Karbala that killed 56 and wounded at least 180 —mostly of them Shi’ite pilgrims. Internet
Nepal uses satellites to track rare tiger

KATHMANDU, 24 Jan—An injured wild tiger that strayed into a tourist resort in Nepal has been moved to a new home in the jungle and fitted with a satellite collar so its progress can be tracked, the government said.

The tiger, an adult male, was captured after it wandered into the resort on the outskirts of the Chitwan national park in southern Nepal, a major tourist attraction, and nursed back to health by park authorities.

It was then driven about 600 kilometres (400 miles) with a team of vets and conservationists in a specially constructed trailer to the remote jungles of Bardia in western Nepal, where it was released on Saturday. The tiger, named Namobuddha by park authorities, has been fitted with a special collar carrying a GPS tracking system that will allow scientists to monitor how well it adapts to its new home.

The government said the initiative, carried out with the help of experts from WWF, would also help to improve understanding of how the endangered animals behave in the wild.

Bark beetle infestation grows in Colorado, Wyoming

DENVER, 24 Jan—Tree-killing bark beetles decimated 550,000 acres of forests in Colorado and Wyoming last year, bringing the total area ravaged by the insects in both states to 4 million acres since 1996, the US Forest Service said on Sunday.

“The significance is that the trajectory is moving north and east into more visible and populated areas,” Janelle Smith, spokesperson for the US Forest Service, told Reuters.

Federal and state foresters just released their annual aerial survey of impacted lands across the two Rocky Mountain states. The main culprit is the mountain pine beetle responsible for infesting 400,000 acres in Colorado and southern Wyoming.

The voracious insects are moving into ponderosa pine forests from lodgepole pine stands along the Continental Divide, Smith said. The spruce beetle, more active in southern Colorado, attacked an additional 150,000 acres in 2010, the report noted. —Reuters

Nuclear cleanup plant questioned

SEATTLE, 24 Jan—A costly US environmental project, meant to deal with millions of gallons of nuclear waste, is over budget and faces technical and safety issues, critics say.

The Department of Energy is building a facility at the Hanford, Wash, nuclear reservation to clean up 53 million gallons of radioactive waste left over from 40 years of nuclear weapons production currently stored in aging, leaking tanks, but the cost estimates have nearly tripled to $12.2 billion and its builders have yet to settle some vexing problems with the design, The Seattle Times reported Sunday.

Some critics say they worry the final plant may be dangerous and will not be able to treat as much waste as expected, could pose environmental dangers, and might take billions of more dollars to get right. The plant is being built even though details of the final design have yet to be worked out, they say. The government’s own tests show equipment might fail or pipes might clog in parts of the facility so radioactive with nuclear waste no human or machine could ever get in and make repairs.

“We figured out how to put a man on the moon in 10 years using slide rules,” said Walt Tamosaitis, a high-level Hanford engineer who said he was removed from the project last year after raising safety concerns. “We can’t seem to get this right.” —Internet

Cellcom and Iway launch Internet system for cars

TEL AVIV, 24 Jan—Start-up Iway Mobile and Cellcom, Israel’s largest mobile phone operator, launched on Sunday a communications, Internet and entertainment system for the automobile.

While the Comodo Console will be sold first in February in Israel, where it will be marketed exclusively by Cellcom, Iway is in talks to sell the product to cellular operators in other countries over the next six months.

Iway founder and Chief Executive Danny Knafou said the first countries would likely be France, Russia and China.

“We are in talks with SFR, China Mobile and MTS,” Knafou told Reuters on the sidelines of a news conference.

The operating system is programmed for 20 languages, including Russian, Arabic and Chinese, and more will be added.

Comodo includes a 4.3 inch touchscreen, speakerphone, a rear camera to increase security when in reverse, a GPS antenna and a cellular modem for an always-on connection to the Internet via a 3G cellular network.

The driver can listen to radio stations around the globe. —Reuters

Google prepping to test daily deals service

SAN FRANCISCO, 24 Jan—Google Inc is preparing to test a new prepaid coupon and offer service in a bid to better compete in the fast-growing market for local online advertising, the Wall Street Journal reported on Sunday.

The world’s top Internet search company is talking to small business owners to solicit their support for a test of an offers programme, the report said.

The effort is dubbed Google Offers, and was first reported by the blog Mashable. Google did not immediately respond to a request for a comment.

Google’s move comes in the wake of the company’s failed bid for startup discount-coupon sensation Groupon last year. Google offered $6 billion for Groupon but was rebuffed, according to several news outlets.

Groupon — called the fastest-growing Internet start-up in history — sends its members daily e-mails with about 200 discounts for goods and services. Its subscriber base is expected to grow to 25 million in 2011 from 13 million in 2010. A daily deal service would help Google make inroads into a local advertising market that is estimated to be worth $91 billion, analysts have said. —Reuters

BlackBerry programme may help RIM defend its turf

TORONTO, 24 Jan—Research In Motion aims to keep its dominance of the corporate smartphone market by enabling the BlackBerry to segregate a user’s personal data from work-related emails and other applications sponsored by employers.

A senior RIM executive says the company would soon introduce software that would effectively give users two phones in one. It’s part of RIM’s strategy to arrest a steady erosion of its leadership in the corporate segment as Apple’s iPhone and other consumer-friendly devices make inroads.

Many corporations are now allowing employees to use their own smartphones at work, forcing IT departments to manage confidential information on the iPhone and devices running on Google’s Android operating system.

But those devices are not equipped with the security and system features that have long given the BlackBerry an edge among corporations and other organizations that put a high value on confidentiality and control. —Reuters

### Some child hearing loss tied to virus in pregnancy

**New York, 24 Jan**—Hearing loss in a child may have links to a virus that Mom got while she was pregnant, according to a new study.

In kids that had some degree of hearing loss, about 9 percent also had cytomegalovirus (CMV) at birth, says a new study in the Archives of Otolaryngology-Head and Neck Surgery.

“(CMV) needs to be on the list of things we think about when we see a child with hearing loss,” said Dr. Stephanie Misono, an ear, nose and throat fellow at Vanderbilt University in Nashville, and lead author on the study.

CMV is a common virus that normally causes a harmless infection, although people with weakened immune systems can get sick from it. Infections can be avoided by washing your hands regularly especially after dealing with sick people and toddlers, who sometimes carry it, according to the Centers for Disease Control.

For women who are already infected when they become pregnant, the chances of passing it along to their children are quite small. It’s women who pick it up while pregnant who have a higher chance, according to the study, but it’s still quite unlikely that their babies will develop CMV-related hearing loss.

### Australia’s study finds obesity link to anxiety

**Canberra, 24 Jan**—An Australian study on Monday found people who were obese were more likely to report mental health problems.

The research was conducted by the Institute for Health and Social Science Research at the Rockhampton campus of Central Queensland University. Researchers collected data on the physical and mental health of more than 1,200 Queensland-based volunteers in Australia.

The study found older obese participants, those aged 45 to 54 years, were more likely to develop emotional problems that had affected their work or social activities, in comparison with their healthy and overweight peers.

They were also less likely to have felt calm and peaceful in the month prior to the study, thought it was not clear whether obesity was the cause or effect of their mental health problems.

“It’s one of those things we don’t quite understand; what comes first; the chicken or the egg type of thing,” Dietitians Association of Australia (DAA) spokesperson Lisa Renn told Australia Associated Press on Monday.

“If someone is obese they are going to have problems with their physical health, and poor physical health can lead issues with self esteem and body image and that increases anxiety and depression.

“The other side is those people who are suffering from anxiety and depression, they have a decreased ability to focus on their health and healthy eating and exercise.—Xinhua

### Rivers Tinto’s $3.9 billion bid

**Melbourne, 24 Jan**—The board of Africa-focused coal miner Riversdale, including a representative from top shareholder Tata Steel, unanimously backed a $3.9 billion takeover offer from Rio Tinto, Riversdale said on Monday.

Riversdale, coveted for its coking coal projects in Mozambique, said it was unaware of any other takeover offers in the works, even as an Indian State consortium said it had deferred to 27 January a decision whether to make a bid.

“As of today, no superior proposal has been received by Riversdale and the company is not aware of any party having an intention to make such a proposal,” Riversdale said in a statement after releasing its official response to Rio’s bid.—Reuters

### US energy giant Exxon said it planned to invest hundreds of millions of euros in Germany to tap what are estimated to be vast quantities of natural gas reserves, in an interview to be published Monday.—INTERNET

Radio commentators shot dead in S Philippines

MANILA, 24 Jan—A radio commentator from Palawan Province in southern Philippines was shot dead on Monday, police said.

The victim was later identified as Jerry Ortega, a commentator of the Radio Mindanao Network Palawan. Police spokesman Senior Superintendent Agrimero Cruz Jr said. Cruz told reports that the victim was dead on the spot after he was shot at around 10:30 am at San Pedro Village, Puerto Princesa City.

The suspect, identified as Marlon Didacama, was arrested. The police recovered caliber 45 pistol from the suspect. Puerto Princesa City Mayor Edward Hagedorn said Ortega received death threats through text messages before he was killed.

Investigation is ongoing, Cruz said. In a statement issued on Monday, the National Union of Journalists in the Philippines (NUJP) said, “Ortega is the 142nd journalist killed since 1986 when democracy was restored in the Philippines after Ferdinand Marcos was toppled.”

“If the killing is proven to be work-related, he would be the second to be murdered under President Noynoy Aquino. The first was radio reporter Miguel Belen of Irica, Camarines Sur,” the NUJP said.

Apple’s iPad enters Singapore classrooms

SINGAPORE, 24 Jan—If Oprah can do it, so can schools in Singapore.

Two schools in the wealthy city-state have begun handing out Apple iPads to students, relieving them of the need to carry satchels full of bulky text books and notes.

Nanyang Girls High School has spent $135,000 (about $100,000) to buy 150 iPads for 140 students and 10 teachers in a pilot project. Users connect to the Internet using the tablet, and download books and course material. They can take notes on the iPad, and use worksheets. “It’s much more convenient,” said 14-year-old Chloe Chen, sitting in a classroom with her iPad in front of her. “Teachers can just tell us to go to a website, and we can immediately go and do our work.”

Last year billionaire talk show host Oprah Winfrey gave staff at her magazine an iPad and a check for $10,000 each. Seah Hui Yong, dean of curriculum at Nanyang Girls school, said the iPad was chosen because it complemented a new method of teaching under which students are given more freedom to learn themselves, instead of relying solely on the teacher in traditional classrooms. “It’s not so much about the iPad,” she said, adding that if some other better device comes along, the school could switch.—Reuters

Discovery of arsenic bacterium microbe challenged by scientists

TAMPA, 24 Jan—The announcement in December 2010 that a group of US scientists had discovered a bacterium that eats and exists on arsenic is being challenged by a group of other prominent scientists.

Researchers working on a project that tested microorganisms taken from Mono Lake, California, found that a microbe from the samples taken from the body of water could both consume and grow by eating the toxic element arsenic. The research was funded by the National Aeronautics and Space Administration (NASA).

When the announcement of the discovery was made on 2 Dec, 2010, overenthusiastic personnel claimed that the arsenic-eating microbe constituted a new form of life on Earth.

Yet “if you read the scientific paper, we never claim it to be so. It is a member of a well established genus, Halomonas, that we claim has the unusual ability to grow on arsenate instead of phosphate,” stated Dr Ronald C Orenland, who is a research scientist for the US Geological Survey.

BoK may raise its economic growth outlook for 2011

SEOUL, 24 Jan—South Korea’s central bank said on Monday it may upgrade the nation’s economic growth outlook for 2011, reflecting a more bullish sentiment for the US economic recovery.

The Bank of Korea (BoK) confirmed a local media report that the nation’s economic growth rate in 2011 would likely hover above the long-term trend rate of 4.5 percent.

South Korea’s actual gross domestic product (GDP) for this year is likely to exceed its long-term growth trend that the BoK earlier forecast, a BoK official told Xinhua.

The BoK, which had predicted the Asia’s fourth-largest economy will likely grow 4.5 percent this year, would have to reflect the upgraded US growth outlook now, the official said.

The US economy is widely expected to expand 3.0 percent this year, 0.6 percentage point higher than earlier forecast.—Xinhua

Pacific nations on cyclone alert

WELLINGTON, 24 Jan—Tropical Cyclone Wilma has hit American Samoa and triggered alerts in other island countries in the central South Pacific. Radio New Zealand International reported on Monday.

American Samoa’s Emergency Centre said the Category 1 storm has winds of up to 110 km/h and gusts in excess of 130 km/h. The storm has hit eastern villages, downing power lines, and is due to sweep over the western island of Tutuala.

So far there have been some landslides and debris on the road reported, as well as minor damage to some roofs and houses.

A marine warning said there was a hazardous surf up to 5 metres high throughout the storm, causing some flooding.

Pago Pago International Airport is still closed and it’s not clear when inter island flights can resume.—Xinhua

Middle Paunglaung Hydropower Project launched

NAY PYI TAW, 24 Jan — A ceremony to launch Middle Paunglaung Hydropower Project to be undertaken by Construction-1 of the Hydropower Implementation Department under the Ministry of Electric Power No.1 was held at the project site this morning. Deputy Minister for Electric Power No.1 U Myo Myint and HID Director-General U Myint Zaw formally opened the launching ceremony.

Next, Minister for Electric Power No.1 U Zaw Min formally unveiled the machinery to implement the project. Then, the minister and party inspected the sites chosen for construction of the power intake tunnel, designated dam and hydropower plant. The project site lies two miles upstream of Paunglaung Bridge on Yamein-Taunggyi inter-district road about 20 miles northeast of Pyinmana Township. Nay Pyi Taw Distinct. The dam is of concrete type with 272 feet in height and 100 megawatt installation capacity. It will generate 500 million kilowatt hours of electricity per year.

By Construction Minister inspects Ayeyawady Bridge (Yadanatheinga) construction project

NAY PYI TAW, 24 Jan — Deputy Minister for Construction U Tint Swe on 21 January inspected earthworks of Ayeyawady Bridge (Yadanatheinga) approach road (Kyaukmyaung bank) and pile construction.

Officials conducted the deputy minister around the site. The deputy minister also visited construction site of the approach road on Singu bank and viewed drilling 1.2 bored pile of 120 feet making 1.2 bored pile of 120 feet of Yangon Region this morning.

Upon completion of the Ayeyawady Bridge (Yadanatheinga) project, it will join Mandalay-Madaya-Bhamo-Miyitkyina Road at Singu on east bank of Ayeyawady River, making way to Mogok through Fottaw Junction and to Momeik through Twinge junction. The road will link Mandalay-Shwebo-Miyitkyina Road, Shwebo-KhinU-YeYe-Kalewa Road and Shwebo-Ayadaw-Monywa-Yargyi-Kalewa-Kalay Road through Nwenyein-Kyaukmyaung-Shwebo on the west bank which could be reached via Nga-Oh Junction.

The opening ceremony of ITF 14 & Under Asian Championships 2011 Group (2) Tennis Tournament in progress.

YANGON, 24 Jan — An opening of ITF 14 & Under Asian Championships 2011 Group (2) Tennis Tournament was held at Thetbyus Tennis Court in Mingala Taungnyunt Township, here, this morning. Vice-Chairman of Myanmar Olympic Committee (MOC) Patron of Myanmar Tennis Federation (MTF) Chairman of Yangon City Development Committee Mayor U Aung Thein Lin, Secretary of MOC Director-General of Sports and Physical Education Department U Thaung Htaiak and officials, Patron of MTF U Aung Zaw, President U Aung Maw Thein and executives, representative of ITF Mr Sunil Menon and guests.

The Director-General made an opening speech. The MTF president extended the greetings and the ITF representative explained the purpose of holding it. After that, the mayor, the director-general, U Zaw Zaw and U Aung Maw Thein opened it. Men’s (single) and women’s (single) events was followed. The event will go on tomorrow. Myanmar is hosting the tournament in which Bangladesh, Malaysia, Bhutan, Maldives, Nepal, Pakistan, Sri Lanka, Vietnam, Mongolia, Laos, Singapore, West Asian ITF team and Myanmar are taking part.

Labour Minister, Yangon Mayor attend opening of new concrete roads

YANGON, 24 Jan — Hailing the 64th Anniversary Union Day, newly concreted roads in Yangon were put into commission on 22 January. Minister for Labour U Aung Kyi and Chairman of Yangon City Development Committee Yangon Mayor U Aung Thein Lin attended the opening of concrete roads paved by the YCDC.

The minister and the mayor formally opened Kyaung Street, 1st, 2nd, 3rd, 4th and 5th lanes in Theinbyu railway Ward, Mingala Taungnyunt Township.

The minister and the mayor then attended the opening of 101st Street in Pohnmyaw Ward, 97th Street in Lukletye Ward, Thaha Ponnyakayi Dhammayon at 110th Street in Yedwingon Ward, Kyaung Street and Satsian 9th Street in Satsian Ward. They then inspected the condition of 2500-gallon-capacity water tank at No. 7 Basic Education High School.

The mayor attended the opening of 29th Street (Middle Block) in No. 7 Ward, Bo Sun Pek Street (Lower Block) and 8-inch diameter tube-well in No. 69 Ward of Pabedan Township.

Vice-Mayor attends road openings

NAY PYI TAW, 24 Jan — Vice-Chairman of Yangon City Development Committee Vice-Mayor U Maung Pa attended opening ceremonies of new concrete roads in Seikkyi-Khanaungto Township of Yangon Region this morning.

He inspected construction of road to be used as short-cut which will link Aung Mingala Lake and Aung Mingala Road for easy supply of water.

Rammar Chariot Micro Buses at discount prices in Mandalay Trade Fair

YANGON, 24 Jan — Rammar will sell out Chariot Micro Buses at discount prices at Trade Fair to be held in Mandalay City Hall from 28 to 31 January.

Famous brands of consumer goods and machines will display booths at the fair. Rammar has set the sale price of Grade-I Chariot Micro Bus at K 55m; Grade-II, K 50m and Grade-III K 45m at the exhibition, reducing K 8m than normal prices.

Ten designs of buses with gold, silver, white, blue and black colours and with stripes will be put on show. Buyers will not need to take time to enjoy the ride as the company may help them have the licence just in one day. Each customer may get one-year service warranty.

Those interested may contact Rammar at No (53/54), Setsaya U Tun Road, Shwepyitha Industrial Zone (4), Shwepyitha Township, Yangon (Ph: 618377, 618388; Fax: 618322; Email: rammarrcar@goldenland.com.mm and Website: www.rammrarautomobile.com.mm).
Minister U Zaw Min and the commander gave supplementary reports. For his part, the Prime Minister said that environmental conservation tasks are to be carried out effectively while not only Myitsone Hydropower Project but also all ongoing hydropower projects in Kachin State are being implemented. The projects are to meet the standards. National development has gathered momentum; so many other hydropower projects still remain to be implemented across the nation. It is therefore required to take over not only materials such as buildings and machines but also technologies in implementing projects that need high technologies. In future, similar projects must be implemented successfully with domestic industrial products, national experts and national skilled workers only.

Relocated villages from the project area have been provided with all forms of aids including water, electric power, buildings and religious buildings. It is still needed to encourage long-term businesses for local people. In the region, perennial trees such as teak, rubber plant, orange, mango and grapefruit grow well. Good foundations are to be laid for fulfillment of the basic needs of new generations of local people.

Previously, local people of various national races led a hard life. But, now they are in a position to have an easy life with fine residences, concrete roads, water supply and electric power supply. As a result, local people come to place more reliance on and trust in the project. All those engaging in the project have to exert Union Spirit in shouldering tasks.

Upon completion, the project will contribute regional development, which will help ensure prosperity of both Kachin State and the Union.

The Prime Minister presented a basket of fruit to Madam Zhang Xiaolu and Mr Li Guanghua.

From the view deck, the Prime Minister viewed the sites chosen for building the power plant and the main dam, and the current of the Ayeyawady River. Officials gave accounts of the conditions.

The Prime Minister posed for documentary photos with ministers and responsible persons. On arrival at the worksite of constructing the Ayeyawady River-spanning bridge of Myitsone Hydropower Project, the Prime Minister inspected the scale model of the bridge, the map of the worksite, and the driving of piers.

He visited Aungmyintha Model Village, and asked villagers about their education, health care and livelihoods, and cordially greeted them. (See page 9)
In future, large hydropower projects...

(from page 8)
When he arrived at the affiliated basic education high school of the village, the Prime Minister had cordial talks with the teachers and asked them about academic matters and programmes to train high school students.

In a motorcade, the Prime Minister inspected dwellings and roads of the model village.

The Prime Minister and entourage left the village by helicopter and arrived back in Myitkyina in the evening.

Myitsone Hydropower Project lies on the river Ayeyawady near Tanphe Village, about 4.3 miles downstream of the confluence. The Concrete Face Rockfill Dam (CFRD) type embankment is 4298 feet long and 458 feet high. On completion, the dam will be able to store 9,788 million acre feet of water. With an installed generation capacity of 6000 mega watts that is (8x750MGW), it will produce 29,400 million kilowatts hour a year.

The Prime Minister U Thein Sein visits Momauk General Hospital. — MNA

The Prime Minister U Thein Sein visits Momauk General Hospital. — MNA

The Hydropower Implementation Department, Asia World Co Ltd and CPI Yunnan International Power Investment Co Ltd of the People’s Republic of China have been implementing the project since 21 December 2009. The project term is estimated to be over nine years. So far, the project has been completed by 8.5 per cent. It is scheduled to be completed cent per cent by 2019.

On completion, Myitsone Hydropower Plant of CFRD type will be the world’s sixth highest of its kind. Its installed generation capacity is 750 megawatts a generator, which is the largest capacity of a generator. A bridge will be constructed over the river in parallel with the project, thus ensuring smooth transport for dwellers.

On the morning of 23 January, the Prime Minister left Myitkyina by air and arrived at Bhamo at 9.30 am. Then, he proceeded to

On arrival at Momauk General Hospital, the Prime Minister inspected the operation theater, medical store, delivery ward and labour room, and attended to the needs.

He held a meeting with township level depart-
In future, large hydropower projects...

(From page 9)

One arts and science university, one technological university and one university of computer sciences have been established in Bhamo, one of the 24 regions for special development for human resource development and enabling local youth to pursue higher education in their regions.

Local people are therefore encouraged to pursue education at the higher level. Teachers are to teach students self-discipline, moral conduct, and Union Spirit which is true patriotism.

Medical staff have to divide their tasks into two parts: to improve personal hygiene and to give treatment to the people in order that local people will lead a healthy life. In the process, they have to make trips down to the grassroots level to give health talks and disseminate disease control methods.

Now, the multiparty democracy general election has been held stably and successfully, which brings dignity to the nation.

The governing body to be formed in the sessions of forthcoming parliamentary sessions will take over administrative duties. In conclusion, he pointed out that which ever government is in office, it is required to put at the forefront Our Three Main National Causes: Non-disintegration of the Union, Non-disintegration of national solidarity, and Perpetuation of sovereignty.

The Prime Minister and members left Mombauk by helicopter to Bhamo. Then, arrived back here by air in the evening.

Fire preventive stations commence.

Yangon, 24 January—The opening of fire preventive course No.1/2011 for private filling stations was held at training and education section of No.1 Oil Refinery (Thanlyin) of Myanmar Petrochemical Enterprise under the Ministry of Energy this morning, with an address by Minister for Energy U Lun Tha. Managing Director of Myanmar Petroleum Products Enterprises explained the matters relating to the outbreaks of fire occurred in private filling stations. A total of 60 trainees from private companies are attending the two-week course. More new courses will continue to open the ceremony was also attended by manager of No.1 Oil Refinery (Thanlyin), responsible persons and owners of private filling stations.—MNA

UNIL-Opal (Lubricant) available at Automobile & Autoparts Expo 2011

Yangon, 24 January—Diamond Steel Co., Ltd displays UNIL-Opal Lubricants at Automobile & Autoparts Expo 2011 being held at Tatmadaw Convention Hall in Dagon Township, Yangon, from 21 to 24 January. CF4, CG4 and CH4 Lubricants are convenient for the cars that run on diesel and 5W30, 5W40, 10W30 and 10W40 grades 100% fully synthetic oil, for new cars. The brand has received recommendation from Mercedes Benz, Capella, Volvo and Cumin car companies. For more information, one may visit www.unil-opal.com and contact Head Office, Diamond Steel Co., Ltd (Ph:098621300, 095194396, 727898 and 727543); Tamway shop (Tax-free market), Sabei hostel (3), Room (6), compound of Kyakasan auto parts (Ph:400940 and 726869); Ko Thein Zaw and nephew (Bayintaung Market) (Ph:680614 and 682733); and auto parts shops in the Yangon Region.—MNA

Department of Medical Research ...

(From page 16)

Regarding the long-term plan, Director Dr Myat Phone Kyaw of the division said that they were also dealing with incidental cases that could take place in worksites; that several plans got underway to do research on poisoning by a broader scale; that then, they were dealing with casual poisoning cases; that they had a plan to deal with steady poisoning cases; and that in the long run, they would speed up tasks with more equipment.

Under the Poisoning Control Division are four sections: the Pharmaceutical Poisoning Section, the Chemical Poisoning Section, the Biological Poisoning Section, and the Radiotoxic Poisoning Section, apart from the Poisoning Information Room and the Poisoning Laboratory.

At the department, a pamphlet says that if a person wants to know about reproductive health, he may dial 01-375565 from 10 am to 3 PM on office days. Senior Research Officer/Head of the Central Social Medical Research Division under the Department of Medical Research (Lower Myanmar) Dr Ko Ko Zaw said that most questions were about childless marriage, and the second most common questions were about birth-spacing methods, followed by sexual questions; that according to feedbacks, telephone conversations were beneficial to the questionnaires; and that on average, during the period of over 400 days, they received nearly 1500 calls.

He continued to say that they ensured if a person wants to know about reproductive health, he or she could visit the Poisoning Information Room and they could give treatment to the people; that the most common questions were about the reproductive health, they gave health education, made consultation, and informing a suitable medical expert who they should go see for treatment.

Now, the Department of Medical Research (Lower Myanmar) is working closely with the Department of Health in dealing reproduction issues. And they have a plan to reply to e-mail and online questions.

In response to the plans the Ministry of Health is implementing to widen the scope of public knowledge of health care, the people, on their part, should take healthy habits.

Boeing says ‘immature’ technology behind 787 delay

RIYADH, 24 Jan—Boeing said on Sunday that the use of “immature” technology caused delays in the delivery of its 787 Dreamliner passenger jet, a project almost three years behind schedule.

“Some of the technology was not as mature as it should have been and we put a global supply chain together without thinking through some of the consequences,” Jim Albaugh, president and chief executive of Boeing Commercial Airplanes, said at a forum in the Saudi Capital.

“When you put immature technology in your supply chain and don’t supply adequate oversight, you have issues and that is what we had,” he added at the annual Global Competitiveness Forum. But he expressed confidence in the aircraft even if production is nearly three years behind schedule.

“It is going to be a magnificent airplane and will be 20 percent more efficient than the airplanes it is replacing,” he said. Boeing said last week it would delay the delivery of its first 787 unit from February to the third quarter of 2011.

China, Australia cooperate to reduce pollution in China’s largest freshwater lake

NANCHANG, 24 Jan — Chinese and Australian scientists are working together to reduce pollution in China’s largest freshwater lake, the Poyang Lake in east China’s Jiangxi Province. The joint drive is being carried out under a scientific cooperation programme signed between the Jiangxi Provincial Water Conservancy Research Institute and the Commonwealth Scientific and Industrial Research Organization (CSIRO) in Australia, said Li Rongfang, president of the Chinese institute, Sunday.

Scientists from the two sides will endeavor to reduce pollution in the Poyang Lake and recycle those nutrient elements, such as nitrogen and phosphorus, Li said. The programme will last for three years with an estimated investment of 8 million yuan (1.2 million US dollars), he said. Related scientific studies have started last month, he added.

The Poyang Lake covers 3,583 square km with an average water depth of 8.4 metres. It is fed by five rivers in Jiangxi and empties into the lower reaches of the Yangtze, China’s longest river. Due to fast economic development in recent years, the freshwater lake has been faced with the threat of industrial and agricultural waste water pollution.

Father of 13 says he ‘loves them all with a passion’

LONDON, 24 Jan — This week a study revealed that one in eight UK children rarely or never see their father. So can one man have 13 children by eight different partners, have married six times and still be a good father? Well, ask Steve Ginger.

“I try to be a good dad,” says the 49-year-old, who lives in a Bedfordshire village along with wife number six and three of his four stepchildren.

A sign by his front door warns that trespassers will be shot, and from behind the house comes the howl of a huge dog. Steve’s arms are covered in tattoos, his face is pierced and he has a build that made him a prison boxing champion.

But when he sits down with a roll-up cigarette to talk about his many children, a gentler person emerges.

“Kids are there for life, like a dog. You’ve got to look after them,” he says.

He gamely tries to remember when some of his offspring were born. “Birthdays… I’m absolutely terrible with birthdays, I must admit.” He turns to his 16-year-old stepson Rees for help, but none comes.

S Korean shipbuilder rolls out anti-piracy system

SEOUL, 24 Jan—South Korea’s Samsung Heavy Industries has rolled out a system to help ships detect and fend off pirates, after the recent hijacking of a South Korean freighter near Somalia alarmed shippers.

The nation’s third-largest shipbuilder on Sunday said the new anti-piracy system detects smaller boats in the vicinity often undetected under existing marine radar systems and issues an automatic alert when approached.

“The alert is issued when an approaching vessel does not respond to usual ship-to-ship radio communications or shows unusual navigating patterns and speed,” the company spokesman said.

The system allows sailors in a navigation room to remotely control water cannons on the ship’s deck that can up to 70 metres (230 feet) when pirates attempt to climb aboard.

“That way, crew will be safe from potential shooting attacks from pirates when firing the water cannons,” said the spokesman, adding the system is applicable to most existing ships.

Drug reduces lung cancer deaths, Swiss study finds

Geneva, 24 Jan — Drugs used to treat breast cancer may also be useful in tackling lung cancer, according to research in Switzerland. The study, published in The Cancer Journal, showed that anti-oestrogens reduced the number of deaths from lung cancer.

The authors said the research, if backed up, could have substantial implications for clinical practice. Cancer Research UK warned that large scale clinical trials were needed before any conclusions could be made. Hormones have long been associated with some forms of cancer.

Tamoxifen, which cancels out the sex hormone oestrogen, was first used to fight breast cancer more than 40 years ago.

Some studies have shown that increasing levels of oestrogen, through hormone replacement therapy, increase the risk of lung cancer. — Internet

Two forms of world’s ‘newest’ cat, the Sunda leopard

London, 24 Jan — The “newest” cat species described to science, the Sunda clouded leopard, actually exists in two distinct forms, scientists have confirmed. This big cat is so enigmatic that researchers only realized it was a new species — distinct from clouded leopards existing elsewhere in Asia — in 2007. The first footage of the cat in the wild to make public was only one minute long. Now a genetic analysis has confirmed that the cat comes in two forms, one living in Sumatra, the other on Borneo. Clouded leopards are the most elusive of all the big cats, which include lions, tigers, jaguars, snow leopards and normal spotted leopards.

Living across south-east Asia, into China and India, the leopards have larger cloud-like spots than ordinary leopards. Until 2006, all clouded leopards were thought to belong to a single species. However, genetic studies revealed that there are actually two quite distinct clouded leopard species.

As well as the better known clouded leopard living on the Asian mainland (Neofelis nebula), scientists determined that a separate clouded leopard species lives on the islands of Borneo and Sumatra. — Internet

Opticians say coloured lenses are a risk to sight

London, 24 Jan — A trend for wearing coloured contact lenses inspired by the pop singer Lady Gaga could damage people’s eyes, opticians warn. Teenagers have taken to wearing circle contact lenses, which make the eyes look bigger, after the New Yorker wore them in her video for the song ‘Bad Romance’.

They achieve their effect by covering part of the white area of the eye, the sclera, which ophthalmologists warn could cause allergies, scarring and infection, risking blindness. Circle lenses come in a variety of colours such as bright pink and red, and can be bought from foreign websites for around 27 euro.

Popular with teenage girls and women in their twenties, they imitate the round, oversized eyes of Japanese anime characters. Dr James Salz, an ophthalmology professor at the University of Southern California, said: “There are bound to be complications from the way they’re being dispensed.” Dr Salz said: “Kids are going online and buying them like they’re an earring or a nose ring.” — Internet

Mischief the horse rescued from Hampshire swimming pool

Hampshire, 24 Jan — A four-year-old horse had to be pulled from a swimming pool by rescue crews after becoming stuck. The animal, aptly named Mischief, became trapped after it wandered on to a plastic covering over the pool outside a neighbour’s home.

Firefighters were called to the village of Godshill, near Fordingbridge, just before 1000 GMT. A vet was called to sedate the 14-hand animal to enable crews to pull it to safety. Watch manager Jim Green, of Hampshire Fire and Rescue Service, said Mischief was now safe and back with its owner. “Any animal, small or large, that is trapped or in distress can be potentially dangerous,” he added. “It is important to try and keep the animal calm, keep humans away, and request the immediate attendance of animal rescue and service specialists to rescue the animal, rather than attempting to do so themselves.” — Internet

**Ads coming to airport’s bathroom mirrors**

Adverting giant Clear Channel Outdoor said video and still advertisements are coming to the restroom mirrors at Chicago’s O’Hare International Airport.

Clear Channel said it is teaming with North Carolina firm Mirrus to install 150 of the advertising mirrors in the airport’s restrooms during the coming three months, the Chicago Tribune reported on Friday.

Mirrus Founder Brian Reid said the mirrors will display advertisements on the entire surface when no one is standing in front of them and the ads will shrink into a corner when someone approaches the sink.

“We won’t say it’s guaranteed to have a person’s undivided attention,” Reid said, “but it’s pretty darn close.”

**‘Wonder’ cat recovers, seeks new home**

Florida’s Cat Protection Society is trying to find a home for a cat with limited eyesight named for blind singer Stevie Wonder.

The Eustis-based feline rescue organization said Wonder the 10-week-old cat was given a 50 percent chance of survival when he was found shortly after Christmas with scabbed-over eyes and an upper-respiratory system infection, the Orlando Sentinel reported Friday.

“We named him ‘Wonder’ for Stevie Wonder, but also because he was constantly making me remark ‘I wonder how he’s getting on that ball or getting on that box or doing that?’” Lois Lanius, president of the Cat Protection Society in Eustis, said. “He’s the size of your hand with no (eye) globes and yet he’s a normal cat.”

Workers at the society said they initially thought Wonder was fully blind, but they discovered his retinas were still attached and he can see shadows and light differences. Lanius said workers are hoping someone will come forward to adopt the feline.

**‘The King’s Speech’ top film at producer awards**

LOS ANGELES, 24 Jan—“The King’s Speech” claimed the crown for best film at the Producers Guild of America Awards on Saturday, knocking off Golden Globes best drama winner and presumed Oscar front-runner “The Social Network.”

The film also beat out nominees “127 Hours,” “True Grit,” “Toy Story 3,” “The Kids Are All Right,” “The King’s Speech,” “The Fighter,” “The Social Network,” “127 Hours,” “True Grit,” and “The Social Network” for best picture.

**Music industry takes to the digital cloud**

A man visits a stand of the music world’s largest annual trade fair, MIDEM on its opening day at the Palais des Festivals, in Cannes, southeastern France.—INTERNET

CANNES, 24 Jan—Music is taking to the clouds after Sony said it is expanding its cloud-based digital Music Unlimited service around Europe to enable fans to access music on their digital devices.

After being launched in the United States, Britain and Ireland, Sony’s “Music Unlimited powered by Qriocity” service, is being extended to France, Germany, Spain and Italy, Sony said in an announcement to coincide with Sunday’s opening of the MIDEM music industry convention on the Riviera.

The subscription service will be competing with a fast-growing number of free and paying music streaming services that include Spotify, Pandora, Last.fm, Groove Shark and We7. Cloud-based services differ from the music streaming services that download onto a computer by allowing users to house all their music on a remote server (or cloud) as well as giving them access to millions of tracks.—INTERNET

**Teen stabs man over stinky feet remark**

A drunken Washington State teen convicted of stabbing a young man who accused her of having stinky feet must complete a writing assignment while in prison.

Dallas Smith, 18, pleaded guilty to second-degree assault with a knife for stabbing Willy Simpson, 19, at a 7 Sept party after Simpson teased Smith about having smelly feet, The Herald of Everett, Wash, reported.

Smith was sentenced to 15 months in prison Friday by Snohomish County Superior Court Judge David Kutz who also gave her the unusual assignment of completing a six-page research paper on how the excessive drinking of alcohol can destroy lives.

Her deadline is May 2012. “Let me be absolutely clear: This case is not about smelly feet,” the judge said.

“It is about binge drinking and (the) criminal behaviour that did flow from that.” The stabbing occurred at a Monroe, Wash, party at which an intoxicated Smith removed her shoes and attempted unsuccessfully to do a back flip off a deck, The Herald reported.

**Natalie Portman romantic comedy leads box office**

LOS ANGELES, 24 Jan—Natalie Portman, already riding high during awards season with “Black Swan,” took the No 1 spot at the North American box office on Sunday for the first time in five years with her romantic comedy debut.

“No Strings Attached,” in which she co-stars with Ashton Kutcher, sold about $20.3 million worth of tickets across the United States and Canada during the three days beginning 21 January, distributor Paramount Pictures said.

The opening exceeded the modest expectations of the Viacom Inc unit which said the film cost just $25 million to make. Portman and Kutcher play friends who enter into a sexual relationship with the titular proviso. Complications ensue.—Reuters

**Ballack returns as Leverkusen go second**

**BERLIN, 24 Jan—** Michael Ballack returned from injury on Sunday as Bayer Leverkusen went second in the Bundesliga with a 3-1 win at bottom side Moenchengladbach to trim Dortmund’s lead at the top by 11 points. German captain Ballack made a low-key return after suffering a fractured leg which had kept him out since September and he came off the bench with just over half an hour remaining, just before Gladbach pulled a goal back. The 34-year-old put in a few telling passes as he looks to play his way back into the Germany team which faces Italy in a friendly in Dortmund on February 9. “If you have been out for so long, you burn to play again,” said Ballack. “I was lucky because I came on when we were 2-0 up, so there was room to go forward. We didn’t begin well, but we turned it around.” Top place is gone for us and everyone else, Dortmund are too far ahead.”

**Riskiest decisions pay off, says Madrid man Mourinho**

**MADRID, 24 Jan—** Real Madrid coach Jose Mourinho admitted his team selection gamble in the crucial clash against Real Mallorca was a high-risk strategy. Real edged a 1-0 win to stay four points behind Barcelona with French striker Karim Benzema grabbing the only goal to end a week when his lacklustre performances had caused friction between Mourinho and general manager Jorge Valdano. But it was a poor first half on Sunday and an unhappy Mourinho responded with a double substitution with Xabi Alonso and Mesut Ozil coming on for Fernando Gago and Kaka. “My decisions were risky, but I allowed the midfielders who will play in Sevilla (in the midweek Spanish Cup semi-final against the holders) to rest tonight,” said Mourinho.

**Football’s hat-trick hitmen light up Europe**

**PARIS, 24 Jan—** Manchester United’s Dimitar Berbatov led a European parade of hat-trick hitmen that included Arsenal’s Robin van Persie, Mario Gomez of Bayern Munich and Sevilla’s Luiz Fabiano.Bulgarian star Berbatov bagged his third hat-trick of the season in the 5-0 Old Trafford demolition of Birmingham to take his tally to 18 goals and keep United clear at the top of the Premier League.

**Manchester United’s Bulgarian striker Dimitar Berbatov (L) scores his second goal during the English Premier League football match between Manchester United and Birmingham City at Old Trafford in Manchester north-west England on 22 Jan, 2011.**—INTERNET

His impressive contribution also extended United’s 21-game unbeaten run since the season began. “Dimitar is getting up towards that 20-goal mark, which is going to be important for us,” United manager Sir Alex Ferguson said. Berbatov’s hat-trick saw him equal Ruud van Nistelrooy’s club record from the 2002-2003 season by scoring three hat-tricks in a season.

He is also only two hat-tricks away from the Premier League record of five scored in a season by Alan Shearer in 1995-1996. The all-time record is held by Dennis Law, who struck seven in the old First Division in 1963-64.

**Zvonareva races into tennis quarters**

**MELBOURNE, 24 Jan—** Second seeded Russian Vera Zvonareva overcame a slow start to ease past Ivetta Benesova of the Czech Republic 6-4, 6-1 and move into the quarter-finals of the Australian Open on Monday. Zvonareva was broken early in the first set and the lead after quarter of an hour through Dejan Stankovic.

**Hoffenheim loan Ba to West Ham**

**BERLIN, 24 Jan—** Hoffenheim’s want-away Senegal striker Demba Ba is set to join Premier League side West Ham United on loan until the end of the season, the Bundesliga club said Sunday. The 25-year-old fell out with Hoffenheim recently when he refused to attend a training camp, but a transfer to Stoke City fell through last weekend when he failed the medical examination. Ba is now set to join West Ham on a short-term deal, Hoffenheim manager Ernst Tanner confirmed.

**“Nothing has been signed, but everything points to the fact that he will go on loan at West Ham,”** said Tanner. Ba passed the medical on Saturday and the deal is due to be finalised soon. Hoffenheim are still hoping to recruit Liverpool’s Dutch striker Ryan Babel as a potential replacement. **—INTERNET**

**Inter lose perfect Leonardo record, Milan stay top**

**ROME, 24 Jan—** Udinese ended Leonardo’s perfect record since taking over as Inter Milan coach with a 3-1 win over the Italian champions while city rivals Milan retained their four-point lead at the top. Inter, aiming for a sixth straight win since the Brazilian’s arrival in the San Siro dugout, took the lead after quarter of an hour through Dejan Stankovic. Udinese then stunned Inter with goals from Cristian Zapata and Antonio Di Natale — his 15th of the season — to go into the break 2-1 up, with Maurizio Domizzi adding a third midway through the second half. Inter remain in fifth place on 35 points but are nine adrift of leaders AC Milan who edged Cesena 2-0 in Sunday’s late game.

**Cook wins season-opening Mitsubishi**

**KAUPULEU-KONA, 24 Jan—** It was a run that John Cook had never experienced in his long, successful career. Cook birdied five straight holes after the turn to win the Champions Tour’s season-opening Mitsubishi Electric Championship on Sunday, shooting a second straight 8-under 64 for a two-stroke victory over Tom Lehman.

“I’ve hit some runs of birdsies but never on Sunday on the back side to win a championship,” Cook said. The 53-year-old Cook had five birdies in his bogey-free round for a 22-under 194 total and his second straight victory. He finished last season with a successful title defense in the Charles Schwab Cup Championship.
Six guerillas, two soldiers die in latest combat in Colombia

BOGOTA, 24 Jan—At least six guerillas and two Colombian soldiers died in a combat in a rural area of western Cauca Province, the Colombian Army said in a statement on Sunday.

The combat began on Friday with “joint operations carried out by the National Army and the Colombian Air Forces in the municipalities of western Cauca Province, the Colombian Army said in a statement on Sunday. Six members” of the rebel Revolutionary Armed Forces of Colombia (FARC) were killed, 12 were injured and four went missing, “all from the Armed Forces of Colombia (FARC) were killed, 12 of the Colombian Air Forces in the municipalities of operations carried out by the National Army and FARC,” the Army statement said in a statement on Sunday.

Minimum temperature on 24-1-2011 was 62°F. Relative humidity at (09:30) hours MST on 24-1-2011 was (60%).

Rainfall on 24-1-2011 was (Nil) at Mingaladon, Kaba-Aye and Central Yangon. Total rainfall since 1-1-2011 was (1.97) inches at Mingaladon, (1.42) inches at Kaba-Aye and (2.95) inches at Central Yangon. Maximum wind speed at Yangon (Kaba-Aye) was (4) mph from Northeast at (15:30) hours MST on 23-1-2011.

Bay Influence: Weather is partly cloudy in the Andaman Sea and South Bay and generally fair elsewhere in the Bay of Bengal.

Forecast valid until evening of the 25th January 2011: Light rain are likely to be isolated in Kachin and Mon States and Taninthayi Region and weather will be generally fair in the remaining States and Regions. Degree of certainty is (60%).

State of the sea: Seas will be moderate in Myanmar waters.

Outlook for subsequent two days: Likelihood of continuation of isolated light rain in the extreme southern Myanmar areas.

Forecast for Nay Pyi Taw and neighbouring areas for 25-1-2011: Generally fair weather.

Forecast for Mandalay and neighbouring area for 25-1-2011: Generally fair weather.
Only with stability and peace will the nation develop

Department of Medical Research (Lower Myanmar) at the service of people
The Department of Medical Research (Lower Myanmar) is on the move with the programs it has laid down and has a plan to scale up its operations to provide better health care to the people. As part of the drive, the medical institution is available round the clock to reply to telephone questions about poisoning and reproductive health. Anyone wishing to learn about poisoning may dial 01-379480 during office hours or 09-8021910 beyond office hours.

Deputy Director Dr Khin Chit of the National Poisoning Control Division of the Department of Medical Research said to the Kyemon Daily that most of the questions were about accidentally taking wrong medicines; that in such a case, they had to ask how much dose and what medicine a patient had taken and explain consequences of overdose of a particular medicine and particular types of medicines which can be taken together or not, if a person had accidentally taken particular types of medicines which cannot be taken together, they had to suggest that the patient take the medicine, the time and the dose they had prescribed; that they also asked what forms of pains a patient was suffering; that if they thought the patient needed to go to a hospital, they gave him advice, and if the case was not serious, they suggested that the patient go see the family doctor.

She added that if compared with its infancy, the National Poisoning Control Division had to reply to more questions about poisoning; that at that time, it had received some 100 phone calls for questions about poisoning a year. But, then, the number was up to 400 to 500 a year; that the phone calls included those from hospitals; and that anyone wishing to know poisoning, dosage of medicines, and hazardous chemicals might deal with the department.
