Teachers responsible not only for educating students but also for inculcating them with a sense of morality and thirst for knowledge.

New school building opened, outstanding students awarded in TadaU Tsp

Chairman of Union Election Commission U Tin Aye speaks at the prize-presentation to outstanding students who matriculated with flying colours.

NAVPYI TAW, 5 Nov.—The opening ceremony of new school building of Apyinsanyar Basic Education Primary School in Meethwetaik village-tract in TadaU Township in Mandalay Region was held this morning.

Mandalay Region Minister for Social Affairs Dr New school building opened, outstanding students awarded in TadaU Tsp

Union Minister U Kyaw Hsan attends 7th ASEAN Ministers’ Meeting on Rural Development and Poverty Eradication

Chairman of Union Election Commission U Tin Aye, Union Minister for Education Dr Mya Aye, Region Chief Minister U Ye Myint and officials viewed (See page 5)

Union Minister for Information and for Culture U Kyaw Hsan at 7th ASEAN Ministers’ Meeting on Rural Development and Poverty Eradication.

Chairman of Union Election Commission U Tin Aye speaks at the prize-presentation to outstanding students who matriculated with flying colours.

NAVPYI TAW, 5 Nov.—Union Minister for Information and for Culture U Kyaw Hsan attended the 7th ASEAN Ministers’ Meeting on Rural Development and Poverty Eradication (AMMRDPE) held at Bandar Seri Begawan of Brunei Darussalam on 2 and 3 November and explained measures taken by Myanmar government for rural development and poverty alleviation in Myanmar.

The Union Minister said that Myanmar had adopted five-point rural development scheme along with two related programmes to be able to attain Millennium Development Goals (MDGs) of the United Nations from 2001 to 2010 and for national development. In addition, 24-region development project and border regions development works were implemented with a view to narrowing development gap between one region and another. Thanks to such works, the poverty rate of Myanmar had dropped to 26 per cent in 2010 from 32 per cent in 2005 according to integrated household living condition assessment (IHLCA) jointly implemented by the United Nations Development Programme (UNDP) and Myanmar. However, Myanmar did not get technical and financial assistance from World Bank, Asia Development Bank and similar international monetary organizations like other ASEAN nations due to sanctions of some big powers and thus had to work on its own with the strength of people. Despite those restrictions and obstacles, Myanmar people and government had vowed to continue implementing rural development and poverty alleviation scheme as a national duty. The new government is already undertaking rural development and poverty alleviation works in eight specific fields, having formed Rural...
Embark on cultivation of marketable rice

About 75 per cent of total sown acreage in Myanmar is fertile for cultivation of over 60 kinds of crops. Of them, paddy is staple food for Myanmar people. And it is also a strategic crop for Myanmar.

Over 70 years ago, Myanmar was the top rice exporter in the world. In some years, it exported over three million tons of rice. At present, over 17 million acres of land have been put under monsoon paddy and three million acres under summer paddy. In consequence, the nation has ability to produce over 1,500 million baskets of paddy yearly. As part of efforts not only for local food sufficiency but also for ensuring surplus rice, some areas transport their surplus rice for sales to other rice needy areas.

Vacant and virgin lands to be reclaimed as cultivable lands scatter around the nation. Over 200 dams and reservoirs are facilitated for agricultural purpose in the entire nation. The increase in irrigated sown acreage has contributed to the development of agricultural sector. However, Myanmar must expedite its efforts to export surplus rice meeting one million ton.

Most of rice Myanmar exports is none other than ordinary one. Price of rice calls for quality. Customer countries have shifted from ordinary rice to quality ones. As quality rice is much sought after, cultivation and export of quality rice should be top priority.

Nowadays, farmers are engaged in production of high-yield quality rice. Quality strains of seeds, better agricultural methods, agricultural loans, fertilizers and pesticides are to be provided to farmers in real time.

Farmers and companies must build trust between them to fulfill agricultural requirements, cultivate quality rice and directly penetrate into the market with momentum. Due to climate change, some exporter countries adopted plans to import rice. Thus, priority is to be given to seeking good price for Myanmar quality rice and extending the market.

Officials urged to supervise overloaded vehicles, maintain roads, bridges

Nay Pyi Taw, 5 Nov—Ayeyawady Region Minister for Transport U Than Tun met Chief Engineer U Soe Tint (Airport), General Manager U Htin Aung Kyaw and engineers of Public Works in Ayeyawady Region at the office of Superintending Engineer in Pathein on 2 November. The Region Minister instructed them to restrict the driving of vehicles with overloads and maintain roads and bridges.—MNA

Dress rehearsal of conveying sacred Buddha Tooth Relic held

Nay Pyi Taw, 5 Nov—A dress rehearsal of conveying sacred Buddha Tooth Relic from the People’s Republic of China to the Republic of the Union of Myanmar for the fourth time was held at Nay Pyi Taw Airport and Uppatasanti Pagoda, here, this morning. Patron of the Leading Committee for Conveying Sacred Buddha Tooth Relic Union Minister at the President Office U Thein Nyunt, members of the Leading Committee and subcommittees, departmental personnel, students, members of social organizations and religious associations. In line with the programme on dress rehearsal of conveying the Buddha Tooth Relic, service personnel, students, members of social organizations and religious associations participated in paying homage to the tooth relic before arrival of the aircraft carrying the tooth relic from China at Nay Pyi Taw Airport, in conveying the tooth relic from the aircraft to the decorated float via the palanquin and left the airport for Uppatasanti Pagoda.

The decorated float conveying the tooth relic carried by white elephant Nandawady went round the pagoda round the clock. Then, the celestial beings carried the tooth relic from the decorated float to the palanquin that headed for the Maha Manimaya Yadana Jade Buddha Image in the east ward in the cave of the pagoda.

After the dress rehearsal, the Patron of the Leading Committee the Union Minister and members of leading committee and subcommittee reviewed the conveyance of the sacred Buddha Tooth Relic programmes.

EP-2 Ministry concludes spoken and English proficiency course

Nay Pyi Taw, 5 Nov—The spoken and English proficiency course No. 9/2011 of the Ministry of Electric Power No. 2 concluded at the ministry, here, yesterday, with a closing address by Union Minister for Electric Power No. 2 U Khin Maung Soe. The Union Minister awarded the first prize winner staff officer Daw Khin Nwe Nwe Htay of Department of Electric Power, the second prize winner assistant engineer U Kyaw Thura of Myanma Electric Power Enterprise and the third prize winner junior engineer-2 U Myat Min Soe of Electricity Supply Enterprise.

Next, Director-General U Khin Maung Zaw of Department of Electric Power gave certificates to the trainee leader. Altogether 30 trainees took the course.

Mandalay Region Chief Minister receives India delegation

Nay Pyi Taw, 5 Nov—Mandalay Region Chief Minister U Ye Myint received an India delegation led by Mr. G.L. Goenka of Indo-Myanmar Chamber of Commerce (IMCC) of India at the office of Mandalay Region government in Mandalay yesterday.
**Six dead in northern Italy after flash floods**

**Milan, Italy, 5 Nov**—At least six people died and some others were missing on Friday in Genoa of northern Italy, after rivers burst their banks during heavy rainfall, local media reported.

Hundreds of houses and shops were flooded in Genoa, a coastal city in northern Italy. Motorways and railways in the area were closed, and the authorities said major roads and schools would remain closed on Saturday.

The civil protection agency urged residents to move to high ground as water rose and fire-fighters used rubber dinghies and divers to evacuate people.

Floods swept away some roads and bridges, while several small towns in Liguria region, whose capital is Genoa, remained cut off from the outside world.

---

**PKK rebel killed in clash in SE Turkey**

**Ankara, 5 Nov**—One member of the outlawed Kurdish Workers’ Party (PKK) was killed in a clash with the Turkish security forces in southeastern Turkey, said an official statement reaching here Saturday.

The clash between the Turkish security forces and the PKK militants took place late Friday in Eruh town of Siirt province and one village guard was wounded in the clash, said the statement issued by Siirt governor’s office.

The wounded village guard was taken to Sirt Military Hospital by helicopter for medical treatment, said the statement.

It added that the Turkish security forces had launched a large-scale operation in fight against the PKK rebels in the region.

The PKK has recently intensified attacks on Turkish troops, police and civilians. Turkish officials vowed to reciprocate with absolute determination.

Listed as a terrorist organization by Turkey, the United States and the European Union, the PKK took up arms in 1984 to create an ethnic homeland in southeastern Turkey. More than 40,000 people have been killed in conflicts involving the PKK during the past over two decades.—Xinhua

**Top commander of Colombia’s FARC group killed**

**Bogota, 5 Nov**—The Colombian government said Friday its military has killed Guillermo Leon Saenz Vargas, alias Alfonso Cano, the top commander of the rebel Revolutionary Armed Forces of Colombia (FARC).

Hailing the killing as an “very important news for Colombia and its people,” Defence Minister Juan Carlos Pinzon told a news conference that the FARC leader was killed during an operation mid-week.

Colombian government said its forces launched an operation in Cauca province, near the border with Ecuador.

The Colombian government confirmed Cano’s death, adding that his brother and wife were among the dead, the source said.  The house collapsed completely after the explosion, said the government.

Cano’s death was another major victory for the Colombian government in its fight against the FARC guerrillas, whose military chief Mono Jojoy was killed last year.

Last month, another key member of FARC, Jose Nefshin Umenza, who was handling most of the FARC’s drug-trafficking business in the Pacific area, died in an explosion in a rural part of the Buenaventura port city in southern Colombia.

The FARC, Colombia’s largest rebel group, has been at war with the state since its establishment in 1964.

---

**Two killed, 14 injured in Kaduna State**

**KADUNA, 5 Nov**—Nigeria’s police in northern Kaduna State said it had commenced investigations into the killing of two women by unknown gunmen at Zonkwa area of the state on Friday.

The reasons for the attacks have yet to be established.

State police spokes-

person Aminu Lawal confirmed the incident to reporters, saying some other worshippers were injured during the shooting and had been hospitalized.

He said the command had also deployed more policemen on patrol to restore law and order in the area.

Lawal said the police had launched a man-hunt for the suspected gunmen, while investigation into the shooting had commenced.

An eyewitness told Xinhua that the women were killed during a vigil in a church in the early hours of Friday, adding that 14 other persons who were injured during the attack were receiving treatment at St Francis Hospital, Zonkwa.

---

**Four killed in bomb attack on anti-Qaeda leader in north of Baghdad**

**Baghdad, 5 Nov**—Four people were killed and 11 injured Saturday in a bomb attack on the house of an anti-Qaida group leader in north of Baghdad, an Interior Ministry source said.

The attack took place in the early morning when gunmen planted four bombs in the house of a local leader of the Awakening Council group in the town of Taji, some 20 km north of Baghdad, killing four people and wounding 11 others, the source told Xinhua on condition of anonymity.

The group leader escaped the attack unharmed as he was not at home when the attack occurred, while his brother and wife were among the dead, the source said.

The house collapsed completely after the powerful blasts, which also caused severe damages to nearby houses, the source said, adding that many of the victims were from the neighbouring houses.

Iraqi security forces sealed off the scene and launched an investigation into the incident, he said.

The Awakening Council group, or Sahwa in Arabic, consists of armed groups, including some powerful anti-US Sunni insurgent groups which fought al-Qaida militants in the Sunni Arab areas after the US-led invasion of Iraq.—Xinhua

A second bomb exploded when police arrived at the scene, killing two policemen and wounding six others, the sources said. **Internet**
Chocolate wards off hunger, and maybe sunburn too

MONTREAL, 5 Nov—Scientists in Canada said that they plan to study whether eating dark chocolate not only satisfies sweet tooth cravings, but protects against sunburn as well. The study by researchers at Laval University in Quebec will monitor the effects of chocolate consumption on fair-skinned volunteers between the ages of 25 and 65, each of whom will be prevailed upon to eat three squares of chocolate per day for 12 weeks.

Earlier research in Germany and Britain has found that chemicals in chocolate called polyphenols increase blood flow close to the skin, which helps protect against ultraviolet rays, but those studies were too small in scale to be conclusive.

The scientists at Laval University’s Institute of Nutraceuticals and Functional Foods hope to confirm the link in a study of 60 people, about half of whom already have been recruited, they said.

Test subjects who have been fed chocolate are to be exposed to ultraviolet rays in a laboratory and their skin then checked for sun damage. A control group will be given a placebo. Scientists said the study will only include female participants so that researchers can control for the variability between the body’s natural hormones in men and women.—INTERNET

Veggie diet, exercise can prevent diabetes among Blacks

WASHINGTON, 5 Nov—A vegetarian diet and active physical activity could help reduce risk of diabetes in the black population, a new study has suggested.

The study found that following a vegetarian diet and exercising at least three times a week, significantly reduced the risk of diabetes in African Americans, who are twice as likely to be diagnosed with diabetes when compared to non-Hispanic whites.

“These findings are encouraging for preventing type 2 diabetes in the black population, which is more susceptible to the disease than other populations,” said Serena Tonstad, MD, a professor at Loma Linda University and lead author of the research.

In addition to being at a greater risk for developing diabetes, black persons in the US are also more likely to suffer from diabetes-related complications, such as end-stage renal disease and lower-extremity amputations, according to the US Department of Health and Human Services.

“A vegetarian diet may be a way to counteract the increased diabetes risk for the black population,” stated Dr Tonstad.

Dr Tonstad’s research found that, compared to non-vegetarian blacks, vegan blacks had a 70 percent reduced risk of diabetes, and lacto-ovo vegetarian blacks (those who consume dairy, but no meat) had a 53 percent reduced risk of diabetes.

Dr Tonstad said one explanation was the protection associated with foods typically consumed in higher amounts in a vegetarian diet.

Fruits and vegetables have a high fibre content, which may contribute to a decreased occurrence of type 2 diabetes.

In addition, whole grains and legumes (beans) have been shown to improve glycemic control and slow the rate of carbohydrate absorption and the risk of diabetes.

The study also showed that black participants who exercised three or more times a week, compared to once a week or never, had a 35 percent reduced risk of diabetes.

The study has been published in the October issue of Nutrition, Metabolism and Cardiovascular Diseases.

A staff member shows a recently discovered bronze wine vessel in Luoyang of central China’s Henan Province, on 29 Aug, 2011. An ancient tomb has been discovered in a construction area of a local hospital. Evidence shows the owner of the tomb lived in the Zhou Dynasty (1046 BC-771 BC), which means it enjoys some 3,000 years of history. The tomb was remain unrobbbed, and some bronze wares have been found in the tomb.—XINHUA

Vehicles plunge into river after bridge collapses in central China city

ZHENGZHOU, 5 Nov—At least four vehicles fell into the river after a bridge collapsed in a central Chinese city on Saturday morning, local authorities said.

No casualties have been reported so far. A bridge collapsed in the city of Xiangcheng in Henan Province at around 5 am after an overloaded sand truck drove onto it, said the city’s publicity bureau.

The bridge was built in the 1970s. Investigation into the cause of the accident is under way. —Xinhua
Chinese icebreaker leaves Tianjin for 28th Antarctic expedition

TIANJIN, 5 Nov—With hundreds of people waving their hands and saying goodbye, the Chinese icebreaker Xuelong, or “Snow Dragon”, left Tianjin on Thursday for the country’s 28th scientific expedition to Antarctica. The 220-member expedition team, including two scholars from Taipei, will carry out 31 scientific research tasks during the around-160-day trip.

The Antarctica survey telescope independently designed by Chinese researchers will be installed at Dome A, the continent’s highest point at 4,093 metres above sea level. According to the plan, Xuelong, an A2 class icebreaker capable of breaking ice 1.2 metres thick, will arrive at Zhongshan Station in early December and will reach Changcheng Station at the beginning of next year after having finished the first-stage work as well as an ocean survey. It plans to return to Zhongshan Station on 18 February, 2012 to carry out the second stage of work. The icebreaker is expected to leave Zhongshan Station on 10 March, 2012 and return to Shanghai about one month later, covering an estimated 31,000 nautical miles over the course of the expedition.

China launched its first expedition to the Antarctic in 1984 and has established three stations there, including Changcheng Station, Zhongshan Station and Kunlun Station.

SAN FRANCISCO, 5 Nov—Apple said on Tuesday that the iPhone 4S, the latest version of its hot-selling smartphone, would go on sale in more countries in Asia, Europe and Central America this month.

Apple said the iPhone 4S will be available on 11 November in Albania, Armenia, Bulgaria, El Salvador, Greece, Guatemala, Hong Kong, Malta, Montenegro, New Zealand, Panama, Poland, Portugal, Romania and South Korea. The iPhone 4S will be available for pre-order on 4 November except in Albania, El Salvador, Guatemala, Malta, Montenegro and Panama, it said.

Apple said the iPhone 4S will be available in more than 70 countries by the end of the year. The iPhone 4S was launched on 4 October, one day before Apple co-founder Steve Jobs died following a long battle with cancer.

Apple sold more than four million iPhone 4S models in its first three days on the market.—INTERNET

China to establish space lab around 2016

BEIJING, 5 Nov—China will complete the second step of its three-phase development strategy for its manned space programme by establishing its own space lab around 2016, a spokeswoman for China’s manned space programme said Thursday.

Spokeswoman Wu Ping made the remarks at a press conference here after the country’s unmanned spacecraft Shenzhou-8 and the space lab module Tiangong-1 successfully docked with each other at 1:36 am Thursday.

Through more than 10 years of efforts, China has made breakthroughs in key technologies and formed a set of design, production and experiment systems for the space station’s space docking, Wu said.

Flexible memory brings ‘bendable and attachable’ computers ‘closer to reality’

WASHINGTON, 5 Nov—Researchers at the Department of Materials Science and Engineering (KAIST) have developed a fully functional flexible memory, which has been a challenge in the realization of flexible electronics.

The team led by Professor Keon Jae Lee created the fully functional flexible non-volatile resistive random access memory (RRAM) where a memory cell can be randomly accessed, written, and erased on a plastic substrate.

Although several flexible memory materials have been reported, these devices could not overcome cell-to-cell interference due to their structural and material limitations. Now, Prof Lee’s research team has developed a fully functional flexible memory that is not affected by cell-to-cell interference.

They solved the cell-to-cell interference issue by integrating a memristor (a recently spotlighted memory material as next-generation memory elements) with a high-performance single-crystal silicon transistor on flexible substrates.

Utilizing these two advanced technologies, they successfully demonstrated that all memory functions in a matrix memory array worked perfectly.

“This result represents an exciting technology with the strong potential to realize all flexible electronic systems for the development of a freely bendable and attachable computer in the near future,” Prof Lee concluded. This result was published in the October online issue of the Nano Letters ACS journal.
Dancers from China Disabled People’s Performing Art Troupe perform in Yangon, Myanmar, on 3 Nov, 2011. The charity show titled “My Dream” under a China-Myanmar cultural exchange programme was held Thursday in Yangon, and will last until Friday. The earnings from the show will be donated to the disabled people in Myanmar.—XINHUA

John F Kennedy stole famous 1961 inaugural speech from his old headmaster

LONDON, 5 Nov—John F Kennedy stole quotes that came to be known as one of the most famous political speeches in history from his old headmaster, a new book has revealed.

The line ‘ask not what your country can do for you – ask what you can do for your country’ became the best-known quote of his 1961 inaugural address.

But according to the book, his former classmates had heard the line ‘time and time again’ in a similar form from their headmaster at Choate School in Connecticut, the Daily Mail reported.

He unearthed notes written by George St John, the President’s former headmaster at Choate School in Connecticut, which suggest he had been aware of the ‘ask not’ line for many years. The papers quote a Harvard College dean’s refrain: “As has often been said, the youth who loves his Alma Mater will always ask not ‘what can she do for me?’ but ‘what can I do for her?’”

The book also includes a reply to a questionnaire about JFK’s time at the school, sent to his former classmates when he was President.

One of the students wrote: “I boil every time I read or hear the ‘Ask not… etc’ exhortation as being original with Jack.”

It has been thought that the “Ask not…” speech was written with the input of Kennedy’s poetic speechwriter Theodore C Sorensen.—Internet

Over 100 killed in N Nigeria bomb attacks

DAMATURU, (Nigeria), 5 Nov—Officials at the Damaturu General Hospital told Xinhua that over 100 dead bodies were lying at the morgue as of Sunday noon.

The hospital officials said relatives of the deceased have been trooping to the hospital to identify the victims.

A press conference by the state Police Commissioner Sulaimon Lawal set for 12:00 local time was postponed, as the security operatives in the state were said to be making frantic efforts to curtail further attacks by the dreaded sect.

Gunmen suspected to be members of the Boko Haram on Friday launched bloody bomb attack late Friday in Damaturu, capital of northeast Yobe State.

Six bombs went off in different parts of the town, the main targets being the 360 Housing Estate, the 30,000 Housing Estate, and the main market area.

No venue change in Alaska weapons trial

ANCHORAGE, 5 Nov—A federal judge in Alaska has rejected a change of venue request in a weapons trial for militia leader Schaefer Cox.

Cox and co-defendants Coleman Barney and Lonnie Vernon are charged with possession of illegal weapons.

Barney’s attorney, Tim Dooley, requested the trial — scheduled to begin in spring 2012 — be moved from Anchorage to Fairbanks, where the alleged crime took place.

He said potential witnesses are closer to Fairbanks and said cultural differences between the two cities could prevent his client from getting a fair trial, the Fairbanks (Alaska) Daily News-Miner reported Tuesday.

US District Judge Robert J Bryan said Monday it was too early to know about the location of potential witnesses.

He said he prefers the better security the Anchorage courtroom offers.

“The plaintiff refers to various activities and veiled threats that reasonably raise security concerns,” he said.

WLS-TV, Chicago, reported the Chicago Department of Aviation said luggage was being unloaded in a ramp area when a battery packed in a suitcase exploded, authorities said.

BLY Platts, Chicago, reported the Chicago’s O’Hare International Airport suffered burns on his arm when a battery packed in a suitcase exploded.

The owner of the luggage was questioned.

“The biggest thing here is that [there was] no criminal activity. The public is not nor was in any danger,” Aviation Department Commissioner Rosemarie Andolino said. “It was an accidental issue. It’s an isolated issue. It’s being dealt with and business as usual.”

**Israel freezes UNESCO funding**

**Jerusalem, 5 Nov**—Israel would stop its USD 2 million in annual funding to the Unesco in the wake of a vote that admitted Palestine as a full member, Prime Minister Benjamin Netanyahu announced Thursday.

In a vote 31 Oct at the 193-member UN agency’s general conference in Paris, the Palestinian National Authority (PNA) got 107 votes for its membership bid, with 14 countries against it. A total of 52 countries abstained.

“Such moves do not advance peace, but rather push it further away. The only path to achieving peace is via direct negotiations without preconditions,” Netanyahu quoted Netanyahu as saying in a statement.

The prime minister directed relevant authorities to redirect the funding “towards other initiatives cooperating to achieve the same goals in the area”.

The US has also halved its USD 60 million financial contribution to the UN agency.

**Bees attack California woman, three dogs**

**Chula Vista, 5 Nov**—A swarm of bees attacked an elderly California woman and her three dogs, one of which died from an allergic reaction shortly after, a veterinarian said.

The 77-year-old woman was in the back yard of her Chula Vista house Tuesday afternoon when a few thousand bees began swarming, The San Diego Union-Tribune reported.

The woman was stung just a few times and paramedics determined she did not need to go to the hospital, Deputy Fire Chief Jim Garcia said, but her dogs weren’t so lucky.

A 12-year-old Dalmatian mix was stung more than 100 times and died of a seizure before arriving at Otay Pet Vets.

The other dogs, ages 8 and 14, were treated at the animal hospital.

“We removed stinger after stinger,” veterinarian Kevin Anderson said. “They are still improving, but they are not out of the woods yet.”

A private exterminator was called to take care of the bee hive in the woman’s yard.

**British ‘dead man’ caught in Australia**

**Sydney, 5 Nov**—A British man who allegedly faked his own death and made off with the life insurance payout has been arrested in Australia, police said Thursday. Hugo Jose Sanchez, 47, also known as Alfredo, was taken into Australian Federal Police custody overnight in Sydney, the force said, ending a six-year manhunt.

Sanchez and his wife Sophie allegedly faked his death to claim more than one million pounds (US$1.6 million) in life insurance in 2005, but the plot reportedly unravelled after his fingerprints were found on his own death certificate. She was arrested after returning to Britain for her sister’s wedding last September and was sentenced to two years in jail over the scheme.

The pair are not the first Britons to try to pull a scam — former teacher John Darwin made international headlines after faking his disappearance in a canoe off Harlepool in 2002 so his wife Anne could claim his life insurance.

Darwin turned up alive in 2007, five years after his alleged death and after the couple purchased property in Panama. They were each sentenced to six years’ imprisonment in 2008. In perhaps Britain’s best-known faked death, MP and former government minister John Hemming, who was eventually later revealed to have been a Communist spy, left a heap of his clothes on a Miami beach in 1974.

**Vehicle crash in southwest England kills several, injures 43**

**London, 5 Nov**—A serious crash involving 27 vehicles in southwest England on Friday night killed several people and injured 43, local police confirmed Saturday.

Police officers said the crash on the M5 near Taunton, Somerset, led to “one massive fireball” at the scene, killing “several people”, but specific number was yet clear. “The incident was very, very challenging,” said Anthony Bangham, Assistant Chief Constable of Avon and Somerset Police. “Most vehicles were well alight and most continued to burn for a considerable time.”

A fire service member said it was “the worst road traffic collision anyone can remember.” It was believed that the weather may have been a contributory factor in the crash, with witnesses saying that the place was shrouded in heavy fog at the time.

**IMF right forum to help Eurozone economies**

**Cannes, 5 Nov**—Even as the G20 is closely monitoring how the members of the Eurozone propose to resolve the crisis, India firmly believes the International Monetary Fund (IMF) is the right forum to extend the funds and monitor the progress.

“We strongly support the IMF playing its part in restoring stability in Europe,” Prime Minister Manmohan Singh to the G20 Summit Thursday, amid various proposals that were being examined, particularly for Greece.

“At the same time, the IMF must also keep in mind the liquidity requirements of developing countries, who are not at the centre of the crisis, but may nevertheless be adversely affected as innocent bystanders,” the prime minister added.

Briefing journalists after the first leg of summit meetings, Planning Commission Deputy Chairman Montek Singh Ahluwalia, also Mannmohan Singh’s main interlocutor, said India could help in resolving the Eurozone crisis but no formal request had yet been made.

Ahluwalia said India does welcome the European Financial Stability Facility, but it was still not clear how next they proposed to raise resources and from whom. In that, India feels IMF will be the right forum.

Ahluwalia said India, certainly, will not oppose any country from making a bilateral commitment towards resolving the Eurozone crisis. But this must also be looked in the context of just USD 250 billion available with IMF, including money needed by poor nations.

“Global financial systems do not work on accidental acts of generosity.”

Teachers responsible not only for educating...

(from page 1)

the school building and cordially greeted teachers and students.

The UEC chairman and officials visited TadaU Township People’s Hospital and viewed Toyota Hiace ambulance. The UEC chairman addressed the ceremony to award outstanding students, to hand over the new school building and ambulance and to fund TadaU Township Education Foundation held Basic Education High School in TadaU Township. He said democracy is taking shape in Myanmar with Hluttaw and the government formed with elected representatives. Upholding Our Three Main National Causes, strengths will have to be gathered in politics, economy and defence. To help the State keep abreast with world countries, it is needed to develop well-rounded human resources.

Every successive generation needs to vow to turn out brilliant human resources. Each and every citizen is to be equipped with civic duties. The prize presentation ceremony is held with the intention of developing appetite for competition and thirst for knowledge among the students.

While realizing free compulsory primary education, the State is adopted 30-year long-term basic education promotion plan. It is implementing 10 tasks with six five-year short-term plans. Teachers, parents and students are at the front to address challenges of 21st century.

As a saying goes, “Good teacher turns out good pupils”, pupils can be brilliant only when the teachers are competent. Teachers are to be well-versed in what they teach to their students and should be continuously learning. Teachers are responsible not only for educating students but also for inculcating them with a sense of morality and thirst for knowledge. Teachers are to set an example to their students and always seek knowledge of various fields.

Parents are to play a supporting role for successful realization of such goals and objectives as promotion of national education and brighter future of every youth. Parents are to act in accordance with parental obligations of Myanmar traditions. As parents are very first teachers of their children, they are to nurture them to be good offspring who are educated and can even advance to international stage of education. Parents are to continuously monitor their offspring since childhood to become brilliant and morally good citizens.

In conclusion, he urged parents to monitor their offspring for national development and promised future of their offspring; teachers to train their students to become morally good and bright persons and to act as guiding stars to their students; outstanding students to try to safeguard interests of the community and the nation.

Next, the Union Education Minister and Mandalay Region Chief Minister made addresses. The UEC Chairman, Union Education Minister, Region Chief Minister and personnel awarded one six-distinction winners, two five-distinction winners, four four-distinction winners, seven three-distinction winners, four two-distinction winners and 23 one-distinction winners, the school that achieved best pass rate in TadaU Township and the school that turned out the most distinction winners.

Donor U Thet Tin Win handed over relevant documents of Pyinnnya Gonyi new school building to the Mandalay Region Education Officer. Next, a donor presented 30 sets of desk and chair and six sets of tables and chairs and one bench and one set of settee through the headmaster of Apyinsanya Basic Education Post Primary School.

U Hla Maung Shwe of Pyae Phyo Kyaw Co handed over relevant documents of ambulance for TadaU Township People’s Hospital to the township health officer who then explained establishment of TadaU Township Education Foundation. Then wellwishers donated cash assistance for the foundation through foundation Chairman Dr Kyaw Tin.

The UEC Chairman then cordially greeted the attendees.—MNA

(from page 1)
Development and Poverty Alleviation Central Committee and work committees and Union-level supporting committees, and region/ state level sub committees under the central committee and work committees. So, rural development and poverty alleviation works would be more effective.

The ASEAN Ministers reviewed the achievements of the Framework Action Plan on Rural Development and Poverty Eradication (2005-2010) and adopted the Framework Action Plan on Rural Development and Poverty Eradication (2011-2015) which outlines new strategic thrusts and concrete actions in five priorities of (a) sustainable rural development and rural economic growth, (b) food security and food sovereignty amidst climate change, (c) social protection and safety nets, (d) development of infrastructure and human resources in rural areas, (e) constituency building for rural development and poverty eradication. There are 12 work plans under the framework action plan and Myanmar will assume responsibility for development of techniques for weather-resistant agricultural production and dissemination of such techniques to rural peoples in ASEAN nations, which is the second work of the No.4 of the 12-point work plan.

The Union Minister, together with the ministers of ASEAN fellow countries, paid a courtesy call on Brunei King Sultan Haji Hassanal Bolkiah Muizzaddin Waddudalah. The Union Minister then visited the Myanmar Embassy and explained political and economic reforms and international relations, internal peace-making and information sector in Myanmar to Ambassador Thura U Thet Oo Maung and embassy staff.

Coord meeting for Telecommunication and IT Ministers Meeting, Senior Official Meeting held

NAY PYI TAW, 5 Nov—The 11th Telecommunication and IT Ministers Meeting-TELMIN and the 12th Telecommunication and IT Senior Official Meeting-TELSOM are to be hosted by ASEAN member countries once a year alphabetically. This year to observe the meetings is in turn for Myanmar. The second work coordination meeting of the Leading Committee for holding the meetings was held at Myanmar International Convention Centre, here, yesterday morning, with an address by Chairman of the Leading Committee Union Minister for Communications, Posts and Telegraphs U Thein Tun. In his address, the Union Minister said that the meeting will focus on implementation of aims of the ASEAN Master Plan-2015 by ASEAN countries; and apart from ASEAN member countries, dialogue partner countries will be invited to the meeting. The secretary of the leading committee director-general of Directorate of Telecommunications reported on arrangements for successfully holding the meeting. Deputy ministers and officials of subcommittees submitted reports on their respective sectors.

As concluding remarks, the Union Minister stressed the need to place emphasis on successfully holding the meeting at international level without any weak point and to make preparations for respective sectors.

Thai flood death toll reaches 446, two missing

BANGKOK, 5 Nov—A total of 446 people were confirmed dead and two people were missing in the floods that have inundated the upper part of the country for almost three months, the Disaster Prevention and Mitigation Department reported on Saturday.

Four more people were confirmed dead on Thursday in central province of Ayutthaya with 53 people killed. Flash floods were caused by the heavy monsoon “Nock-Ten” and overflow from several dams in upper part of the country since mid July.

On Saturday, floods still prevail in 25 of 77 provinces and are affecting about 3.2 million people from 1.2 million households. The floods have affected about 3.3 million households and about 10 million people in 64 of 77 provinces since 25 July.

70 main highways in 13 provinces are flooded and cannot be passed and some north-bound train routes were cancelled.—Xinhua

28 Venezuelan soldiers injured in grenade explosion

CARACAS, 5 Nov—Twenty-eight government troops were injured Friday after a grenade exploded during a drill in southwestern Venezuela, local press reported.

The accident took place at a navy unit in the southeastern district of Puerto Ayacucho in the state of Amazonas, believed to be caused by the mishandling of explosive devices by a group of young soldiers who were recently recruited.

The majority of the injured soldiers were taken to Jose Gregorio Her-nandez Hospital in Puerto Ayacucho, while four seriously injured soldiers were airlifted to Caracas, capital of the country, for special treatment.

The hospital’s assistant manager Luis Torres said that all the injured soldiers were in stable condition except for the four sent to the capital.—Xinhua
Malaria much older than human race!

WASHINGTON, 5 Nov—Malaria is not only native to the New World, but was present long before humans existed and the disease has evolved through birds and monkeys, a new study has found.

The researchers from Oregon State University conducted the study of insect specimens preserved in amber. The study makes it clear that these pathogens have existed for at least 100 million years, and suggests that efforts to conquer them will be an uphill battle against such formidable and adaptive foes. "Amber tells us that these diseases have been here for many millions of years, have co-evolved with their hosts and move readily from one species to another," George Poinar, one of the world’s leading experts on the study of fossils in this semi-precious stone, said.

“Malaria is one of the greatest insect-borne killers in human history, and more than one million people a year are still dying from it. "But the evolutionary record suggests it can easily change its protein coat in response to vertebrate immune reactions. That’s why it’s always becoming resistant to drugs, and efforts to create vaccines will be very difficult," he added.

The study has been published in the American Entomologist.

Soon, new material for air cleaner filters to capture influenza viruses

WASHINGTON, 5 Nov—Scientists have now come up with a new material that teams up with the fiber in face masks, air conditioning and air cleaning filters to capture flu viruses before they can get into people’s eyes, noses and mouths and cause infection.

Xuebing Li, Peixing Wu and colleagues explain that in an average year, influenza kills almost 300,000 people and sickens millions more worldwide.

The constant emergence of new strains of virus that shrug off vaccines and anti-influenza medications has led to an urgent need for new ways of battling this modern-day scourge.

So the scientists sought a new approach, using a substance termed chitosan made from ground shrimp shells.

The scientists combined chitosan with substances that the flu virus attaches to in order to infect cells.

They found that this new version of chitosan ideal for attaching to fibers of face masks and air filters was highly effective in capturing flu virus.

The material could become an important addition to vaccinations, anti-influenza medications, and other measures in battling flu, they suggest. The report has been published in ACS’ journal Biomacromolecules.

Largest bear that roamed Earth 5 million years ago had strongest bite of all

LONDON, 5 Nov—The largest bear that ever lived on the earth, the Agrotherium africanum, also had the strongest bite, a new study has found.

Dr Stephen Wroe and his team from the University of Newcastle, Australia used CT scanners to create 3-D images of bear skulls and scanned six species, ranging from a giant panda to a reconstructed fossil of A africanum.

Reconstructions of the skull of the carnivore, which became extinct almost five million years ago, showed researchers that it was well adapted to resist the forces involved in eating large prey and exerted the highest bite force.

“Our analyses show that Agrotherium africanum had an enormously powerful bite - considerably greater than for the largest of living big cats, or any living bear," the BBC quoted Wroe as saying.

“Our analyses show that it had the most powerful bite of any known terrestrial mammal determined thus far,” he said.

The study has been published in the Journal of Zoology.

Fruit fly intestine may help put breaks on aging

WASHINGTON, 5 Nov—The intestines of fruit flies may hold secret to the fountain of youth and serve as a target for drugs or other therapies to put the breaks on aging and age-related diseases, a new study has suggested.

Scientists at the Salk institute of Biological Studies have found that modifying a gene known as PGC-1, which is also found in human DNA, in the intestinal stem cells of fruit flies delayed the aging of their intestines and extended their lifespan by as much as 50 percent.

“Fruit flies and humans have a lot more in common than most people think,” Newsise quoted Leanne Jones, a lead scientist on the project as saying. “There is a tremendous amount of similarity between a human small intestine and the fruit fly intestine,” she said. Jones and her colleagues used genetic engineering techniques to boost the activity of the fruit fly equivalent of the PGC-1 gene.

They found that boosting the activity of dPGC-1, the fruit fly version of the gene, resulted in greater numbers of mitochondria and more energy-production in flies—he same phe-nomenon seen in organisms on calorie restricted diets.

When the activity of the gene was accelerated in stem and progenitor cells of the intestine, which serve to replenish intestinal tissues, these cellular changes correspond with better health and longer lifespan. The flies lived between 20 to 50 percent longer, depending on the method and extent to which the activity of the gene was altered.

20 missing as cargo ship sinks off N Philippines

MANILA, 5 Nov—Philippine authorities are now conducting search and rescue operations for 20 crew members of a Panamanian cargo vessel that sank off northern province of Ilocos, coast guard spokesman said on Saturday.

Lieutenant Commander Algier Ri-cafrente said that a ship and two helicopters have been sent off Cape Bojedor, Burgos town in Ilocos Norte province where MV Oceanic Union reportedly sank on Saturday night. The cargo vessel came from Shanghai, China’s leading port, and was supposed to go to Subic port in northern Philippine province of Zambales.

Klimt painting fetches $40.4m

NEW YORK, 5 Nov—A 1915 Gustav Klimt landscape, touted by the Nazis and recently returned to the owner's grandson, has sold for $40.4m (£25.4m) at a New York auction. Litzberg on the Attersee was returned to Georges Jorisch, 83, by Salzburg's Museum of Modern Arts in July. Other highlights of the Sotheby's impressionist and modern art sale included Picasso oil painting L'Aubade, which sold for $23m (£14.5m). David Normam, of Sotheby's, said the market had "really roared back".

Litzberg on the Attersee, a painting of a lake in western Austria, was originally owned by Austrian iron magnate Viktor Zackerkandl before being passed on to his sister, Amanda Redlich, when he died in 1927. She was deported in 1941 and never heard of again. Her art collection was seized by the Nazis and sold off. Auction records were set for French impressionist Gustave Caillebotte, whose Le pont d'Argenteuil et la Seine fetched $9.3m (£5.8m), and Russian-born Art Deco painter Tamara de Lempicka, whose Le reve (Rafaela sur fond vert) sold for $8.5m (£5.3m).

Changes to the world's time scale debated

LONDON, 5 Nov — Time, as we know it, could soon be in for a radical change. This week, scientists at the Royal Society are discussing whether we need to come up with a new definition of the world's time scale: Coordinated Universal Time (UTC). And the main issue up for debate is the leap second -- and whether we should abolish it. The leap second came into existence in 1972. It is added to keep the time-scale based on atomic clocks in phase with the time-scale that is based on the Earth's rotation.

The reason for this is that while atomic clocks, which use the vibrations in atoms to count the seconds, are incredibly accurate, the Earth is not such a reliable time-keeper thanks to a slight wobble as it spins on its axis. Rory McEvoy, curator of horology at the UK's Royal Observatory in Paris's 14th arrondissement, explained: "Since the 1920s, it has been known, and previously suspected, that the motion of the Earth is not quite as constant as we'd first thought. This means that time based on atomic clocks are much better at keeping time than the Earth." [Internet]

Greenhouse gases rise by highest amount on record

LONDON, 5 Nov—The global output of heat-trapping carbon dioxide jumped by the biggest amount on record, the US Department of Energy calculated, a sign of how feeble the world's efforts are at slowing man-made global warming. The new figures for 2010 mean that levels of greenhouse gases are higher than the worst case scenario outlined by climate experts just four years ago.

"The more we talk about the need to control emissions, the more we do," said John Reilly, co-director of MIT's Joint Program on the Science and Policy of Global Change. The world pumped about 564 million more tons (512 million metric tons) of carbon into the air in 2010 than it did in 2009. [Internet]

Abuse of painkiller reaches 'epidemic' levels in US

NEW YORK, 5 Nov—Abuse of prescription painkiller have reached "epidemic" levels in the US, a government report says.

There are "fascinating", but should be taken with a bit of caution. The study, published in Nature, focused on what are known as "senescent cells". They stop dividing into new cells and have an important role in preventing tumours from progressing. These cells are cleared out by the immune system, but their numbers build up with time. The researchers estimated that around 10% of cells are senescent in very old people.

Scientists at the Mayo Clinic, in the US, devised a way to kill all senescent cells in genetically engineered mice. The animals would age far more quickly than normal, and when they were given a drug, the senescent cells would die. The researchers looked at three symptoms of old age: formation of cataracts in the eye; the wasting away of muscle tissue; and the loss of fat deposits under the skin, which keep it smooth. [Internet]

Homeless woman's child dies in street birth

PARIS, 5 Nov—A woman who lost her child while giving birth on the streets of an affluent district of Paris has caused soul-searching over France's treatment of its homeless.

Anna (38), a former lab technician and recovering drug addict, was eight months' pregnant when her contractions started in the tent she shared with her husband, Miloud, pitched on Rue de l'Observatoire in Paris's 14th arrondissement. Her makeshift home was a stone's throw from their Port Royal Saint Vincent de Paul maternity clinic and Cochin hospital. [Internet]
Drunk man stowed away in van

California police said a 19-year-old man who took his grandmother to see his incarcerated father found a drunken man in the vehicle on the way home. Sacramento police said the man and his grandmother visited the Sacramento County Jail Tuesday and left the van unlocked while they were inside. KTTL-TV, Sacramento, reported Thursday.

The pair stopped to eat on the way home and once they were out of the vehicle the man revealed he had seen someone in the back of the vehicle and did not say anything while driving to keep his grandmother from panicking. Police said officers found Steve Bosick, 54, drunk and asleep in the back of the vehicle.

Rattlesnakes slither into college building

Officials at Weber State University in Utah said four rattlesnakes have slithered into a building in separate incidents during the past week.

Weber State University spokesman John Kowalewski said the snakes were found on separate days in different areas of the Receiving and Distribution Building, KSTU-TV, Salt Lake City, reported Thursday.

“This is the first time we’ve heard of rattlesnakes inside one of the buildings. With the change in the weather and it getting cold, the snakes are coming down the nearby hillside and finding a warm place, they think, for winter,” Kowalewski said. Experts said the snakes were likely heading for nearby hills to hibernate and got side-tracked when they found the building in their way.

Lindsay Lohan could lose half-a-million dollar deal due to jail sentence

WASHINGTON, 5 Nov—Lindsay Lohan could lose her half-a-million dollar deal as the face of Philipp Plein’s 2012 campaign due to the prison sentence she has to undergo for violating her probation.

Judge Stephanie Sautner has sentenced Lohan to 30 days in jail and community service in L.A. along with a strict timeline on completing the remainder of her probation, which includes psychotherapy sessions.

However, sources say she is supposed to make an appearance in Dusseldorf, Germany on 15 November, which would mean violation of probation terms leading to 270 days in jail.

“I don’t know how this is all going to play out. But if she doesn’t make the designated appearances, she is going to lose a whole bunch of money,” Fox News quoted the source as saying.—Internet

Amy Winehouse kept alcohol addiction hidden from mum

LONDON, 5 Nov—Tragic singer Amy Winehouse was so ashamed of her alcohol addiction that she refused to drink in front of her mother Janis Winehouse.

“She never drank in front of me. She loved and respected her family too much for that,” the Sun quoted Janis as saying. When Amy died at her London home in July, she was five times over the drink-drive limit.

“I think Amy felt she was invincible,” Janis added. “Alcohol addiction seemed to creep up on her and then just took her by surprise. She could go for weeks without a drink but then she’d fall off the wagon,” she added. Janis, 56, who is divorced from Amy’s dad Mitch, saw her the day before she died.

“She didn’t seem drunk or tipsy - she was normal and coherent,” Janis said. “There was absolutely nothing which left me worried about her. I had no inkling that I would never see her again,” she added.

Drew Barrymore most overpaid actor

LOS ANGELES, 5 Nov—Drew Barrymore has been named the most overpaid actor in Hollywood by Forbes magazine.

Barrymore tops Forbes 2011 list of Hollywood’s Most Overpaid Actors list with a return average of 40 percent for every dollar movie studios spend on her.

The 36-year-old’s films have failed to rake in moolah at the box office in the past five years. “Everybody’s Fine” earned only USD 16 million globally and “Lucky You” brought in only USD 8 million.

The second position went to Eddie Murphy. He returns USD 2.70 for every dollar spent on him. Will Farrell is at the third position with a return average of USD 3.50, reports aceshowbiz.com.

Reese Witherspoon and Denzel Washington wrapped up the top five with return averages of USD 3.55 and USD 4.25 respectively.

Deer crashes into Idaho elementary school

The principal of an Idaho elementary school said the building custodian arrived for work to find a deer had crashed through a glass door into the building.

Principal Don Haisley of Hemingway Elementary School in Ketchum said the custodian arrived at 5:30 am Monday and found the deer had crashed through a glass door and was still inside the building, KTVB-TV, Boise, reported Thursday. Haisley said the deer managed to butt a hole in a wall and damaged two doors but did not appear to be injured.

The principal said he did not know how much the damage would cost to repair. The deer left on its own when the custodian opened a door for it.

**Aston Villa rallies to beat Norwich 3-2**

BIRMINGHAM, 5 Nov—England striker Darren Bent scored twice as Villa rallied to beat Norwich 3-2 in the Premier League on Saturday.

Aston Villa’s Darren Bent, left, controls the ball past Norwich City’s Russell Martin during the English Premier League soccer match at Villa Park, Birmingham, England, 5 Nov, 2011.—INTERNET

Stroke partner Gabriel Agbonlahor set up both of Bent’s goals and scored one himself.

Norwich took the lead at Villa Park through a powerful free kick from Anthony Pilkington in the 26th minute after defender Alan Hutton brought down Grant Holt.

After half an hour Bent brought Villa level, forcing the ball over the line after a pass from Agbonlahor.

In the 48th, put Villa ahead again after a mix-up between Kyle Naughton and Norwich goalkeeper John Ruddy.

Naughton’s back pass was slightly short but Ruddy still looked favorite to get the ball only for Agbonlahor to win the challenge and slip the ball into an empty net for his fifth goal of the season.

**Liverpool, Swansea draw 0-0**

LIVERPOOL, 5 Nov—Liverpool extended its unbeaten run to eight matches in all competitions in a 0-0 draw with Swansea, which finished its first visit to Anfield in 21 years with only its second away point in the English Premier League on Saturday.

Liverpool striker Andy Carroll missed an easy chance in front of goal when he side-footed against the crossbar in the seventh minute.

The home side had plenty of other chances, but Swansea goalkeeper Michael Vorm was up to the task. Vorm also kept a clean sheet at Anfield last weekend and Swansea goalkeeper Gerhard Tremmel also had plenty of other chances, but his side was unable to get past the Villa defense.

**Liverpool’s Andy Carroll (L) challenges Swansea City’s Ashley Williams (R) during their English Premier League soccer match at Anfield in Liverpool, northern England 5 Nov, 2011.**—INTERNET

The game was never a classic but the Magpies were able to hold off the Swans, who were without their top scorer with a hamstring injury.

Djokovic, Federer advance to Swiss Indoors semis

BASLE, 5 Nov—Novak Djokovic fought back after losing the first set to beat Marcus Baghdatis 2-6, 6-2, 6-3 in the Swiss Indoors quarterfinals on Friday. The top-ranked Serb stayed on course to meet hometown favorite Roger Federer in the final for a third straight year after the defending champion beat American Andy Roddick 6-3, 6-2. Djokovic had his serve broken twice early on before recovering to seal a victory that improved his record against Baghdatis to 6-0 and raised his overall 2011 record to 67-3.

The US Open, Wimbleden and Australian Open champion will play 32nd-ranked Kei Nishikori of Japan in Saturday’s semifinals. Nishikori beat Mikhail Kukushkin of Kazakhstan, 6-4, 5-7, 6-4 in a match that featured 13 breaks of serve. Federer will play his 2008 Beijing Olympics gold medal-winning doubles partner Stanislas Wawrinka. The Swiss No. 2 ousted past Florian Mayer of Germany 6-2, 6-2. In beating Roddick at Basel for the fourth time, Federer improved to 21-2 against the 2003 US Open winner. He cruised after breaking Roddick’s serve to lead 5-3 in the first set.—INTERNET

**Van Persie leads Arsenal to 3-0 win over West Brom**

LONDON, 5 Nov—Robin van Persie scored his 11th league goal of the season and set up two others to help Arsenal beat West Bromwich Albion 3-0 for a fourth straight win in the Premier League.

The Dutch striker opened the scoring from close range in the 22nd minute after Theo Walcott’s shot had been parried by goalkeeper Ben Foster. Van Persie cut the ball back for defender Thomas Vermaelen to score the second goal in the 39th and then provided the pass for Mikel Arteta to complete the scoring in the 79th.—INTERNET

**Newcastle United’s Ryan Taylor, celebrates his goal during their English Premier League soccer match against Everton at St James’ Park, Newcastle, England, Saturday, 5 Nov, 2011.—INTERNET**

John Heitinga’s own-goal had put the home side ahead in the 12th.

Jack Rodwell got a goal back for Everton in first-half injury time but, despite losing Yohan Cabaye and Sylvain Marveaux to injury, Newcastle held out in the second half to maintain the Premier League’s best defensive record.

The Magpies have conceded just eight goals.—INTERNET

**Everton 1, Newcastle United 2**

NEWCASTLE, 5 Nov—Ryan Taylor’s spectacular shot from the edge of the area earned Newcastle a 2-1 win over Everton on Saturday that preserved the Magpies’ unbeaten start to the Premier League season.

Taylor’s dipping half-volley in the 29th minute proved to be the difference between the sides and took Newcastle to 25 points from 11 matches.

Taylor’s goal made it 2-0 after John Heitinga’s own-goal had put the home side ahead in the 12th.

Jack Rodwell got a goal back for Everton in first-half injury time but, despite losing Yohan Cabaye and Sylvain Marveaux to injury, Newcastle held out in the second half to maintain the Premier League’s best defensive record.

**Ferguson celebrates 25th anniversary with win**

LONDON, 5 Nov—Alex Ferguson celebrated 25 years as Manchester United’s manager as his team beat Sunderland 1-0 at Old Trafford on Saturday although the occasion overshadowed United’s less than glittering performance.

Former United defender Wes Brown, on his first return to Old Trafford since leaving in the summer, put the ball into his own net just before halftime and the three points lifted United back into second place in the Premier League.

The game was never a classic but United did enough to win on the day that chief executive David Gill announced the north stand at Old Trafford had been renamed the “Sir Alex Ferguson Stand” and that a statue of the 61-year-old Scot was being commissioned to mark his achievements for the club since he took over on 6 Nov, 1986.

**BLACKBURN 0 - 1 CHELSEA**

LONDON, 5 Nov—Frank Lampard’s sixth league goal of the season secured Chelsea victory as Blackburn’s troubles continued. Andre Villas-Boas’s side had lost their previous two league matches - but Lampard headed in Branislav Ivanovic’s clever cross.

Blackburn fans hired a plane to fly over Ewood Park with a banner calling for manager Steve Kean’s dismissal. And the pressure increased on Kean after misses by Yakubu and Grant Hanley, while Gael Givet hit the bar.

Blackburn only had themselves to blame for failing to secure at least a point against a Chelsea side which struggled to get going until the second half.—INTERNET

**Ferguson has brought 37 trophies to Old Trafford and, although they are not leading the title race now, they are in contention for a 13th championship since 1993, after moving to within two points of leaders Manchester City who were playing at Queens Park Rangers in a match kicking off at 1730 GMT.**

“I thought we were anxious but in the second half we improved, although the last 15 minutes was torture,” Ferguson told Sky Sports.

Jacobson leads by 2 shots in final WGC at Shanghai

SHANGHAI, 5 Nov—Starting the third round with the lead, Fredrik Jacobson kept his mistakes to a minimum, knocked in long birdie puts on consecutive holes and wound up with a 5-under 67 and a two-shot lead. It still wasn’t enough to shake a world-class leaderboard at the HSBC Championship.

The final World Golf Championship of the year is living up to its billing.

"Everyone is going to be pumped up because it’s a great leaderboard going into the final round," Louis Oosthuizen said. "I think everyone wants that title, so you are going to see some good golf." It already has been a treat in many ways over three rounds at Sheshan International.

Jacobson broke by two shots the 54-hole tournament record and was at 16-under 200 as he tries to win for the second time this year. As soft as it has been, this is no time to play conservatively.

Two shots behind was Oosthuizen, a British Open Championship, Tour Championship and a World Golf Championship. Despite growing controversy of his caddie, top, line up for the putt on the 16th green during the third round of the HSBC Champions golf tournament in Shanghai, China Saturday, 5 Nov, 2011.}

One Stop Service Centre for polished jade items export opened in Mandalay

**NAY PYI TAW, 5 Nov** — One Stop Service Centre for exporting value-added polished jade from Sagaing and Mandalay Regions was opened at Myanmar Gems Entrepreneurs Association (Mandalay Branch) yesterday.

The opening ceremony was attended by Union Minister for Mines U Thein Htaik, Mandalay Region Chief Minister U Ye Myint, the Region Minister for Forest and Mines, officials and guests.

The chief minister and Vice-Chairman of MGEA U Yon Mu and Vice-chairman of Gems Entrepreneurs Association (Mandalay Branch) U Myint Han formally opened the ceremony.

Afterwards, the Union Minister unveiled the signboard of the One Stop Service Centre and looked into the functions of the centre.

After viewing tasks of One Stop Service Centre, the Union Minister and the Region Chief Minister heard the reports of officials. The Union Minister gave necessary instructions.—MNA

Union S & T Minister attends opening of Refresher Course for faculty members of Technological Universities, Colleges and Institutes

**NAY PYI TAW, 5 Nov** — During this academic year, a total of 93000 students are undergoing engineering and computer courses at 44 Technological Universities, Colleges and Institutes and 25 Universities of Computer Studies under the Ministry of Science and Technology.

In his address at the opening of Refresher Course for faculty members of Technological Universities, Colleges and Institutes at Technological University (Yangon) yesterday, Union Minister for Science and Technology U Aye Myint said that the ministry is striving for promotion of the quality of courses and enhancement of capacity of the graduates to be proficient in their subjects and called on trainees to try hard in their studies as the aim of the opening of this course is to enhance the ability of faculty members to be able to nurture engineering graduates who have theoretical knowledge and practical experience and perform academic tasks—lecture, practical and tutorial and monthly tests—in accord with the curriculum.

Also present at the opening ceremony were Yangon Region Chief Minister U Myint Swe, region ministers, the director-general of Technical and Vocational Education Department, rectors of Technological Universities and University of Computer Studies, pro-rectors, professors and 522 faculty members.

Next, the Union minister viewed round lecture and practical rooms and library at the university.

Similarly, the opening of Refresher Course was held at the convocation of Technological University (Mandalay) on 3 November with an address by Deputy Minister for Science and Technology Dr Ko Ko Oo.—MNA
