Strengthened national consolidation

Although land and water resources of the states and regions may vary according to their topography, measures will be taken to improve the various sectors of those regions such as economy, social affairs, education, health and transport. Only if development tasks are carried out to improve the transport, economy, health and education standards of those regions, will national consolidation be strengthened and Union Spirit be forged.

(Excerpts from President U Thein Sein’s speech delivered at Meeting (1/2011) of Central Committee for Progress of Border Areas and National Races on 23-4-2011)
PERSPECTIVES

Monday, 2 January, 2012

Liberty, unity, prosperity

Myanmar is a nation constituted with Union national races and is a human society on a basis of family spirit. National brethren have been residing in Myanmar in unity and amity through thick and thin up to now. In reviewing the history of the nation, Myanmar has been standing tall as an independent and sovereign nation and people on a grander scale among the global countries. Although Myanmar had lost its sovereignty due to aggressive wars of colonialists in the history, she can stand again as an independent and sovereign nation with the concerted efforts of the entire national people who bravely fought back the imperialists at the risk of their lives. Based on historical experiences, all the national brethren are to firmly uphold the singleness of non-disintegration of the Union, non-disintegration of national solidarity and perpetuation of sovereignty. As it is the aspiration of all citizens, it is necessary to constantly focus on the duties to be handed down to new generations.

While marching towards the new democratic nation, the united strength of all national brethren of the Union is essential for perpetuity of the independence. Thus, all national races are to live in the Union forever through thick and thin. All the people are to bear in mind that non-disintegration of the Union is a dire need for Myanmar established as a Union state; non-disintegration of national solidarity is an essential point for the nation; and perpetuation of sovereignty is valuable livelihood of all citizens. Only then will the independent nation and citizens fully enjoy the essence of peace, prosperity and liberty.

All national people are to join hands with the government in building new democratic nation. Emphasis is to be placed on flourishing of right democratic practices on a wider scale, prevalence of law and order, national reconciliation and ensuring perpetual peace. In fact, successful realizing of these main factors depends on strengthening of unity and prosperity.

The Excellent Yangon Expo 2012 opened

YANGON, 1 Jan—The opening ceremony of The Excellent Yangon Expo 2012 with Mobile & IT Zone was held at Tamadaw Convention Hall here this morning. The ceremony was attended by Yangon Mayor Yangon Region Minister for Development Affairs U Hla Myint. Chairman of Aung San University Board of Trustees Daw Khin Hnin Hla and Chairman of Great Father Land Construction & Decoration Co Ltd U Kyaw Myint formally opened the expo and viewed round the showrooms. The exhibition will be displayed from 9 am to 5 pm till 4 January. The Yangon mayor also attended the opening of Orchid Junction in front of Orchid Hotel in Pazundaung Township.

Union Sports Minister watches Inter-BES sports competitions

NAY PYI TAW, 1 Jan—Chairman of Myanmar National Sports Committee Union Minister for Sports U Tin Hsan this morning watched inter basic education school sports competitions for 2011-2012 academic year. First, the Union Minister watched the third-place match of Sepak Takraw tourney held at Nay Pyi Taw volleyball ground. In the match, Ayeyawady Region played against Mandalay Region. After viewing the track and field tournament at No.1 Nay Pyi Taw sports ground, he awarded the winners. Then, the Union Minister inspected the construction site of futsal football stadium and viewed the training of sportsmen at the Billiards Hall of Nay Pyi Taw Development Affairs Committee and left necessary instructions.

Later, the Union Minister inspected extension of stand at Ngalaik Dam and recreation centre for sports athletes. He then visited BMX bike race ground and inspected training.

Religious Affairs Dr Maung Maung Htay, officials and guests attended the ceremony.

At the ceremony, the Sayadaws gave sermons, the deputy minister supplicated on religious affairs, degrees were conferred on graduating monks and the congregation presented offerings.

Ygn Chief Minister among congregation at 17th Sasana Taxila Maha convocation

YANGON, 1 Jan—137 monks were conferred degrees at 17th Sasana Taxila Maha convocation which took place at State Pariyati Sasana University Convocation Hall in Mayangon Township in Yangon Region this afternoon. Chancellor of State Pariyati Sasana Universities Chairman of State Sangha Maha Nayaka Committee Abhidhaja Maharajataguru Abhidhaja Agga Maha Saddhamma Jotika Bhano Sayadaw Dr Bhaddanta Kumara Bhivansa, Sangha members, graduating monks, Yangon Region Chief Minister U Myint Swe and wife Daw Khin Thet Htay, Deputy Minister for

8,221 jade lots sold at mid-year gems emporium

NAY PYI TAW, 1 Jan—Mid-year Myanma Gems Emporium 2011 continued the 8th day today at Mani Yadan Jade Hall here. Beginning 8 am, local and foreign merchants studied and purchased jade lots through competitive bidding system and Managing Director U Tin Htan Swe of Myanmar Gems Enterprise, central committee members and officials supervised and fulfilled the requirements. At 10 am, Patron of the central committee for organizing the emporium Union Minister for Mines U Tin Htan Swe visited the emporium and looked round the sales of jade lots. A total of 8,221 lots of jade were sold today. As permission has been granted to export jewellery items and finished products by paying taxes after opening a one-stop service centre in Mandalay, local merchants are buying the products in competition with foreign merchants. The emporium continues up to 3 January and jade lots will be on sale through competitive bidding system.—MNA

Ayeyawady United FC holds up Community Shield

YANGON, 1 Jan—The MFF Community Shield Football Match to mark the opening of the 2012 MNL League Cup was held at Aung San Stadium in Yangon yesterday afternoon. Ayeyawady United FC routed Yangon Region U Myint Swe 7-5 in the match.

U-16 Futsal invitational tournament held in Hlinethaya

YANGON, 1 Jan—In commemoration of the 64th Anniversary Independence Day, the U-16 Futsal invitational tournament was held at Hlin Mingala Sports Ground on Hlin Mingala Road in Ward 13 of Hlinethaya Township on 24 December. Local authorities formally opened the tournament. Altogether 39 futsal teams are taking part in the tournament. The prizes will be awarded on 4 January.—Township IPRD

Take Fire Preventive Measures

Kyemon
Barack Obama on Saturday called for joint efforts to boost the US economic growth and improve social fairness in 2012.

“Last year has been a time of great challenge and great progress for our country,” Obama said in his weekly address, adding that “we began to see signs of economic recovery here at home, even as too many Americans are still struggling.”

Obama said 2012 will bring even more change.

And as we head into the New Year, I’m hopeful that we have what it takes to face that change and come out even stronger — to grow our economy, create more jobs, and strengthen the middle class,” said Obama while enjoying his vacation in Hawaii.

“As President, I promise to do everything I can to make America a place where hard work and responsibility are rewarded — one where everyone has a fair shot and everyone does their fair share,” he added.

Before joining his family in Hawaii for holiday, Obama signed 53 bipartisan two-month compromise stopgap measures to extend the payroll tax cut and federal jobless benefits into law, after wrapping up the latest chapter of partisan wrangling this year.

Play Taleban ringtones or you’ll be killed in Afghanistan!

KARAT, 1 Jan— Travellers often pop out their real SIM cards and replace them with ones containing insurgent-produced jingles.

Taleban ringtones include the titles ‘Teenager’, ‘Doomsday’ and ‘Suicide Bomber’.

Lyrics for Doomsday include, ‘Its Judgment Day for the Satan of the West the evening is blazing, blazing ...’

For Suicide Bomber, the song includes the words, ‘You went up into flames ... You burned like a moth, your hair, your martyrdom seeker ...’

Six bombs recovered from Pakistan blast site

ISLAMABAD, 1 Jan— Six bombs have been recovered from the site in Pakistan’s Quetta city where a car bombing took place Friday night killing at least 13 people, a media report said Saturday.

At least 21 other people were injured in the deadly blast that occurred around 7 pm on Arhab Karam Khan Road. The Balochistan Liberation Army took responsibility for the bombing.

A bomb disposal squad has reached the site to defuse the bombs, sources told Geo News Saturday.

While the Associated Press of Pakistan and Dawn News put the toll at 13, Geo News said 10 people were killed.

The explosion in the capital city of Balochistan province occurred outside the house of the son of former federal minister Naseer Mengal.

Mengal had served as oil minister during the tenure of former president Pervez Musharraf.

Intelligence sources put the number of the dead at 15. Seven among the dead were said to be guards of Shafiique Mengal, son of Naseer Mengal.

Security officials said Shafiique might have been the target of the attack.

Roadside bomb kills Pakistani soldier

ISLAMABAD, 1 Jan— A roadside bomb killed a Pakistani soldier in the troubled North Waziristan tribal region on Saturday, security sources said.

Another soldier was injured when a convoy of the security forces came under bomb attack in Datta Khel area of North Waziristan bordering Afghanistan, local TV Geo quoted security forces as saying.

Reports said the Improvised Explosive Device was detonated through a remote control when the convoy of the security forces was passing through the area.

The security forces imposed a curfew in the area after the attack and also launched a search operation to apprehend the perpetrators.

No group claimed responsibility for the attack.

The government has made a peace deal with the main Taleban group in North Waziristan led by Hafiz Gul Bahar, under which both sides will not attack each other.

Security sources say that there are splinter militant groups in North Waziristan who routinely carry out attacks on the security forces.

They say that fighters of Tehrik-e-Taliban Pakistan (TTP) are also taking shelter in parts of North Waziristan, who have fled the neighboring South Waziristan in the wake of major operations by the security forces in 2009.

Chinese, 5 Korean Presidents exchange new year greetings

BEIJING, 1 Jan—Chinese President Hu Jintao and his South Korean counterpart Lee Myung-bak exchanged new year greetings Sunday and announced the start of the “China-South Korea Friendly Exchange Year”.

In his message, Hu spoke positively of the relations between the two countries, saying that the two nations should seize the opportunity of the 20th anniversary of the establishment of the China-South Korea diplomatic relations, China is willing to work together with South Korea, by launching various exchange programmes, to further promote mutual understanding and friendship between the two peoples, deepen communication and cooperation in all sectors, and push for constant progress of the bilateral relationship, Hu said.

For his part, Lee said on the basis of the achievements accomplished over the two decades of the bilateral diplomatic ties, South Korea looks forward to joining hands with China to build a better future for the bilateral relationship.

KABUL, 1 Jan— Police arrested a Taleban commander in Afghan capital Kabul on Friday, a statement released by Kabul police said here on Saturday.

“With the hectic effort of police in the capital city Kabul, a Taleban commander namely Mawlawi Almas was captured in Kabul on Friday,” the statement emphasized.

The detained commander Almas was active in the northern Baghlan province, the short statement added.

Taleban militants fighting Afghan and NATO-led forces have yet to make comment.

Taleban commander detained in Kabul

KABUL, 1 Jan— Police arrested a Taleban commander in Afghan capital Kabul on Friday, a statement released by Kabul police said here on Saturday.

“With the hectic effort of police in the capital city Kabul, a Taleban commander namely Mawlawi Almas was captured in Kabul on Friday,” the statement emphasized.

The detained commander Almas was active in the northern Baghlan province, the short statement added.

Taleban militants fighting Afghan and NATO-led forces have yet to make comment.
MS may not be autoimmune disease

New York, 1 Jan—

Multiple sclerosis, long viewed as primarily an autoimmune disease, is not actually a disease of the immune system, a US researcher says. Dr Angelique of the John Jay College of Criminal Justice in New York suggests instead that MS is caused by faulty lipid metabolism—in many ways more similar to coronary atherosclerosis—hardening of the arteries—that is, other autoimmune diseases.

Considering MS as a metabolic disorder helps to explain many puzzling aspects of the disease, particularly why it strikes women more than men and why cases are on the rise worldwide, Corthals said. Multiple sclerosis is mainly characterized by inflammation followed by scarring of tissue called myelin, which insulates nerve tissue in the brain and spinal cord. Over time, this scarring can lead to profound neurological damage, but medical researchers have theorized that a runaway immune system is at fault, but no one has been able to fully explain what triggers the onset of the disease.

Corthals said the primary cause of MS can be traced to transcription factors in cell nuclei. They control the breakdown, and release of lipids — fats and similar compounds — throughout the body. Disruption of these proteins, known as peroxisome proliferator-activated receptors, causes a toxic byproduct of “bad” low-density lipoprotein cholesterol to form plaque on the affected tissue. The accumulation of plaque in turn triggers an immune response which ultimately leads to scarring. Corthals’ framework explains why MS is more prevalent in women.

“Men and women metabolize fats differently,” Corthals said. “In men, problems are more likely to occur in vascular tissue, why atherosclerosis is more prevalent in men. But women metabolize fat differently in relation to their reproductive role.”

The findings are published in The Quarterly Review of Biology.

Diet may help prevent brain shrinkage

Corvalis, 1 Jan—

Elderly people with higher levels of vitamins B, C, D and E, and omega-3 fatty acids in their blood are mentally sharper, US researchers say.

The study, published in the journal Neurology, also found the higher levels of vitamins and fish oils resulted in less brain shrinkage typical of Alzheimer’s disease, while “junk food” diets — trans-fats found in baked and fried foods, margarine, fast-food and other less-healthy dietary choices — produced just the opposite result.

Study co-author Maret Traber, a principal investigator at the Linus Pauling Institute at Oregon State University, and scientists from the Oregon Health and Science University in Portland, Ore, said the study involved 104 people, at an average age of 87, with no special risk factors for poor memory or mental activity.

The researchers tested for 30 different nutrient biomarkers in their blood, and 42 participants also had magnetic resonance imaging scans to measure their brain volume.

“The vitamins and nutrients you eat can create a wide range of fruits, and fish can be measured in blood biomarkers,” Traber said in a statement. “This findings are based on average people eating average American diets. If anyone right now is considering a New Year’s resolution to improve their diet, this would certainly give them another reason to eat more fruits and vegetables.”

Vitamin B12 may still help reduce stroke

LONDON, (Ontario), 1 Jan—

Vitamin B therapy still has a role to play in reducing the risk of stroke, US and Canadian researchers suggest. Dr David Spence of The University of Western Ontario and Dr Meir Stampfer of the Harvard School of Public Health said vitamin B therapy was once widely used to lower homocysteine levels.

Too much of this amino acid in the bloodstream was linked to increased stroke risk and heart attack, but several randomized trials found lowering homocysteine levels with B vitamins did not result in a cardiovascular benefit.

In fact, Spence, a scientist with the Robarts Research Institute at Western’s Schulich School of Medicine & Dentistry, found vitamin B therapy actually increased cardiovascular risk in patients with diabetic nephropathy.

Companies can foster or destroy innovation

ATHENS, (Greece), 1 Jan—

The International Monetary Fund in an official report said Greece’s financial situation is worse than previously thought.

With a new estimate on the country’s economic growth, the IMF said even a 50 percent write-off on Greek debt would be insufficient for Greece to avoid default. Ekathime- rini reported Saturday.

To dig Greece out of its financial trough requires either a deeper haircut or additional loans from Europe, an IMF official said. While the Greek economy stumbles, tax revenues have dropped. The previous goal was for Athens to collect $9 billion in taxes in December, January and February.

Without hitting its target on tax collection, the budget deficit is projected to reach 10 percent of the nation’s gross domestic product, missing another target, that of keeping the deficit below 9 percent of GDP.

There have been no reports of crashes, deaths or injuries, the company said. The recall involves 2012 Sonics produced at the Orion, Mich, assembly plant between 2 June and 21 Nov, the National Highway Transportation Safety Administration said on its Web site.

Companies can foster or destroy innovation

Noonville, 1 Jan—AUS researcher says innovation may mean less “thinking out of the box” and more setting up a company structure that overcomes constraints.

David Owens of Vanderbilt University’s Owen Graduate School of Management said business and other leaders need to understand exactly which constraints work against them in order to help create conditions that foster innovation rather than kill creativity.

“Constraints are the parameters within which you must work,” Owens said in a statement. “And a creative person that’s actually a blessing.”

Owens identified the six most common hurdles to innovation that companies encounter:

1. “Failures of innovation are failures of ideas, and to meet this challenge companies need to train people to use the tools and processes that help them “think differently” and enable them to become better at generating and recognizing good ideas.”

2. “A company’s social climate will determine whether an innovation succeeds.”

3. “The company or organization needs a strategy for innovation.”

4. “Innovation fails when a firm competing among a group of rivals in an industry fails to produce something customers want.”

5. “For an innovation to succeed, it has to be technologically feasible.”

6. “By learning to analyze these constraints in advance, turning from retrospective analysis to proactive strategy development, you can dramatically improve your chances of innovation success,” Owens said.

GM recalls Sonics to inspect brake pads

Detroit, 1 Jan—GM has announced the recall of 4,296 Chevrolet Sonics sold in the United States because of a potential problem with brake pads.

Company officials said they expect only a few of the vehicles to have defective brake pads, the Detroit Free Press reported. GM decided on the recall after a Sonic was found to have a brake pad during routine service.

“Constraints are the parameters within which you must work,” Owens said in a statement. “And a creative person that’s actually a blessing.”

Owens identified the six most common hurdles to innovation that companies encounter:

1. “Failures of innovation are failures of ideas, and to meet this challenge companies need to train people to use the tools and processes that help them “think differently” and enable them to become better at generating and recognizing good ideas.”

2. “A company’s social climate will determine whether an innovation succeeds.”

3. “The company or organization needs a strategy for innovation.”

4. “Innovation fails when a firm competing among a group of rivals in an industry fails to produce something customers want.”

5. “For an innovation to succeed, it has to be technologically feasible.”

6. “By learning to analyze these constraints in advance, turning from retrospective analysis to proactive strategy development, you can dramatically improve your chances of innovation success,” Owens said.
**India unveils statue of cosmonaut Gagarin**

**Mumbai, 1 Jan—** A statue of the world’s first cosmonaut, Yuri Gagarin, was unveiled Friday in Mumbai on the grounds of the Nehru Science Centre, centre officials said. Dignitaries attended the unveiling ceremony Friday included Russian Ambassador to India Alexander Kadakin, Russian General Consul in Mumbai Alexei Novikov and Mumbai Mayor Shradhada Jadhav.

“Gagarin is a man who is known and loved around the world, including India. He visited India and was in Bombay, as Mumbai was called then. Mumbai’s older generation still remembers his visit,” Kadakin, the director of the Nehru Science Centre, told RIA Novosti.

About 700,000 people visit the Science Centre each year, he said. “Interesting science, in space research, is very high in India. We are confident this bust of Gagarin will be an important attraction for our centre,” he said. The bust of Gagarin has been placed near the Science Centre’s main entrance. India already has another monument to Gagarin, located on the grounds of the Russian Science and Culture Centre in the southern city of Trivandrum.

**NASA probe circling the moon on New Year’s Eve**

**Los Angeles, 1 Jan—** As planet Earthrang in the new year, a different kind of countdown was happening at the moon. After a 3½-month journey, a NASA spacecraft flew over the moon’s south pole, fired its engine and dropped into orbit Saturday in the first of two back-to-back arrivals over the New Year’s weekend. Mission control at the NASA Jet Propulsion Laboratory erupted in cheers and applause after receiving confirmation that the probe was healthy and circling the moon. An engineer was seen on closed-circuit television blowing a noisemaker to herald the New Year’s Eve arrival. “Everything went just as we hoped. The burn was spot-on,” chief scientist Maria Zuber of the Massachusetts Institute of Technology said in a post-mission interview with The Associated Press.

The team toasted sparkling cider, but the celebration was brief. Despite the successful maneuver, the work was not over. Its twin still had to enter lunar orbit on New Year’s Day.

The Grail probes — short for Gravity Recovery and Interior Laboratory — have been circling independently toward their destination since launching in September aboard the same rocket on a mission to measure lunar gravity.

Hours before revelers in Times Square celebrated the New Year, Grail-A approached the moon and fired its engine for about 40 minutes to get captured into orbit. Deep space antennas in the California desert and Madrid tracked every move and fed real-time updates to ground controllers.

About 270 family members and friends of the mission team descended on the NASA campus to watch the launch unfold on a live feed. “This is great, a big relief,” deputy project scientist Sami Asmar told the jubilant crowd. Grail is the 110th mission to target the moon since the dawn of the Space Age including the six Apollo moon landings that put 12 astronauts on the surface. Despite the attention the moon has received, scientists don’t know everything about Earth’s nearest neighbour.

**Google Plus to have over 400 million users by the end of 2012**

**Washington, 1 Jan—** Google’s social networking site, Google Plus will have over 400 million users by the end of 2012, an American researcher has predicted.

“Based on the accelerated growth I’m seeing and all the deals and levers Google can still utilize, and the developer ecosystem that will be developed, I predict that 2012 is going to be a breakout year for Google Plus and that it will end next year with more than 400 million users,” The Daily Mail quoted Paul Allen, as saying.

Though Facebook users outnumber Google Plus subscribers by 400 million, the figure comes as a setback to CEO Mark Zuckerberg.

Allen pointed out that Google already has 62 million users, with a quarter of them signing up in December. He said 625,000 members are signing up to Google Plus daily partly due to Android devices, which facilitate registration and through power of word of mouth. According to Allen, “it may be the holidays, the TV commercials, the Android 4.2 upgrades, celebrity and brand appeal, or positive word of mouth, or a combination of all these factors!” that led to large number of users subscribing to the site in December. His research methodology is, however, not based on actual figures and is only a ‘guestimate’. He arrived at the data by tracking a list of unusual names in the US on the recruitment site Elance and noting the number of those people being Google Plus users as well.

**Designer behind Apple’s products knighted in UK**

**Los Angeles, 1 Jan—** Fans of the clean, inviting look of the iPhone, iPad and other blockbuster Apple products are legion, and that includes Queen Elizabeth II.

The British monarch has awarded a knighthood to Jonathan Paul Ive, a British citizen and head of Apple Inc.’s design team since the mid-90s.

Ive received an Order of the British Empire for services to design and enterprise. Ive is credited with helping the late Steve Jobs bring the consumer-electronics company back from the brink of financial ruin in the late 1990s with his whimsical design for the iMac computer, which originally came in bright colors. A titanium hand and shades dominated the PC world. He later helped transform Apple into the envy of Silicon Valley with the designs for the iPod, the iPhone and, most recently, the iPad.

**Verizon reverses on $2 fee for one-time payments**

**New York, 1 Jan—** After a customer backlash, Verizon Wireless on Friday dropped a plan to start charging $2 for every payment subscribers make over the phone or online with their credit or debit cards.

In a statement on its website Friday, the company said “customer feedback” prompted the decision to drop the “convenience fee” it wanted to introduce on 15 Jan.

Verizon wanted to steer people to electronic check payments, which are cheaper, and automatic credit card payments, which are more reliable.

A petition on Change.org against the fees had gathered more than 95,000 names by Friday afternoon, a day after Verizon, the country’s largest cellphone company, announced the fees.

The petition was set up by Molly Katchpole, who earlier this year started a successful campaign to make Bank of America drop a $5-per-month fee for debit-card payments.

Payment processors for power companies usually charge “convenience fees” of up to $5 for every payment made by phone or online, but cellphone companies haven’t taken the step yet.

The furor against Verizon hints that they may have to wait further.

Verizon Wireless serves 91 million phone and other devices on accounts that pay the company directly, and who may pay indirectly through other companies.

It’s a joint venture of Verizon Communications Inc. of New York and Vodafone Group PLC of Britain.
Vice-President Thiha Thura U Tin Aung Myint Oo meets...

(See page 1)

Minister Brig-Gen Kyaw Zan Myint, Deputy Minister for Social Welfare, Relief and Resettlement U Phone Swe, Deputy Education Minister U Ba Shwe, Deputy Health Minister Dr Win Myint, Nay Pyi Taw Council Member U Saw Hla and departmental heads, inspected the 340-ft long temporary bailey bridge in place of Shwechaung Bridge which was damaged due to natural disaster and site chosen for construction of 900-ft long new Shwechaung Bridge across Shwe Creek in Pakokku on 30 December evening.

The Union Construction Minister briefed the Vice-President on progress in construction of the bridge, Head of Magway Region Directorate of Water Resources and Improvement of River Systems under the Ministry of Transport U Ohn Han reported on works for measuring water way at the chosen site and the Vice-President left necessary instructions.

The Vice-President and party then inspected resettlement of flood victims at Aungchantha Ward and spoke words of encouragement to them.

The Vice-President met departmental personnel at district and township levels, townswelders, ward/village administrators and members of social organizations at Pyithaya Hall.

The Pakokku Township administrator and the deputy commissioner gave an account on area, location, population, amount of rain, fall, land resource, irrigation system and irrigated areas of farmland, target production of monsoon and summer paddy, cultivation and production of rice, cultivation of 10 major crops, rice sufficiency, livestock farming, meat and fish production, net production, service, export and trade value, per capita income, standard of basic and higher education, number of health care facilities and provision of health care service, supply of water to rural and urban regions by development of local and foreign experts suggested by the workshops on the fundamental needs for regional development and poverty alleviation project for its success.

Deputy Minister for Social Welfare, Relief and Resettlement U Phone Swe mentioned rural disaster prevention and rehabilitation works being undertaken by the SWRR Ministry and highlighted the need for wide issuance of advance warning of natural disasters and the people’s cooperation.

The Vice-President fulfilled the needs in education and health sectors and delivered an address, saying that he and his entourage were there to inaugurate Ayeyawady Bridge (Pakokku) which would set the record of longest bridge in Myanmar. On his tour, he inspected the site chosen for construction of new Shwechaung Bridge in place of flood-swept old one and new houses for flood victims.

He added that he was there to learn the conditions of the region from personnel and townswelders and to fulfill the requirements. He then revealed targets of education, health, agriculture, transportation, and economic plans and progress in implementation of them, pointing out the further requirements for regional development and emphasizing the accuracy of statistics.

The Vice-President noted that the global countries including Myanmar was facing climate change and natural disasters small or large, calling for awareness of climate change process and coordination with personnel and townswelders of regions concerned in taking preventive measures.

Looking at the urban-rural population ratio of today’s Myanmar, it could be seen that 70 per cent of the people were residing in rural areas, said the Vice-President, adding that the President himself was playing a leading role in rural development and poverty alleviation works launched all over the country.
THE NEW LIGHT OF MYANMAR Monday, 2 January, 2012

Vice-President Thiha Thura U Tin Aung Myint Oo meets...

(from page 6)

Observing Pakokku District, it could be seen that education, health and transporta-
tion sectors were improving and businesses and industries developing, leading to an increase in job opportunities, noted the Vice-President, calling for focus on reduction of poverty and enhancement of socio-economy of rural people with the assistance, encouragement and correct guidance of regional authori-
ties and civil servants.

The Vice-President continued to say that for rural development and poverty al-
leviation, the President had instructed to seek means to put the motto “one district, one product” into practice even if every village could not produce one particular product on industrial scale according to the motto “one village, one product”. Mainly, it should be targeted for in-
crease of per capita income of individual, underpinning the Vice-President.

In addition, the Vice-President said that it was targeted to produce 1500 million baskets of rice per year for food sufficiency of 60 million citizens of the country and even surplus can be produced today. However, the population would keep on growing and thus the target of 2000 million baskets of rice per acre was to be set for food security of about 100 million people.

Marching towards the goal of modern, developed nation, stability of the State plus economic growth is a must, stressed the Vice-President.

To achieve the stability of the State, the government had been focusing all its attention on creating eternal peace, endeavoring to bring armed conflicts among army units to an end.

The people were to lend a hand in ensuring stability and eternal peace in their home regions and the entire nation as well, urged the Vice-President.

The Vice-President added that the government had been constructing infra-
stuctures necessary for socio-
economic development and high living standard of the nation and the infrastructural development so far had been satisfactory. The government was also creating jobs for people and encouraging establishment of small and medium enterprises to reduce the poverty rate of the rural people.

The Vice-President then urged the people to cooperate with the government for rapid achievement of national stability and economic develop-
ment, adding that Hluttaw representatives elected by the people were discharging their respective duties in legisla-
tive, executive and judicial pillars in accordance with the constitution.

The Vice-President then called regional administrators and all the civil servants to exert efforts for the interests of the State and people in line with the new administrative mechanism.

The Vice-President then cordially with district/township level de-
partmental personnel and townsmen.

The Vice-President and party then visited Pakokku General Hospital where Union Construction Minister U Khin Maung Myint contributed cash to the medical fund of the hospital and provided patients with cash and kind.

The Vice-President in meeting with the medical superintendents, doctors and nurses of the hospital in-
structed provision of haemo-
dialysis by the government and doctors depending on the number of patients who are bitten snakes and who suffer kidney failure at Region’s State and district level hos-
titals and assigned the Min-
istry of Health to turn out specialists.

The Vice-President and party then proceeded to Thitthohtin Pagoda where the Vice-President offered flowers to the Buddha image and presented cash to the pagoda board of trustees. They then visited Swegwe Pagoda and presented cash to the pagoda board of trustees.

Kanyin Dam in Ingapu Township inaugurated as 10th facility in Ayeyawady Region

NAY PYI TAW, 1 Jan—A ceremony to inaugurate Kanyin Dam, built by Ministry of Agriculture and Irrigation, was held at the dam in Ingapu Township this morning, attended by Union Minister for Agricult-
ure and Irrigation U Myint Hlaing, Ayeyawady Region Chief Minister U Thein Aung, Speaker of Ayeyawady Region Hluttaw U Hsan Hsint, region minis-
ters, officials and local peo-
ple.

Speaking on the occa-
sion, the Union Minister said that as only when farmers can earn increased incomes, will the whole nation develop in harmony, the government is building a large number of dams and reservoirs for agricultural purpose. From 1988 to date, the nation has built 233 dams to irrigate 2.82 million acres of arable lands. It was the 108th facility of its kind in Ayeyawady Region, he added.

He said that the new government is undertaking eight tasks of rural develop-
ment and poverty alleviation as a national duty. Minis-
tries concerned, local authori-
ties and entrepreneurs are seeking the strong market for crops produced by farmers. Likewise, farmers are to use quality strains and agricultural inputs, apply good agriculture pattern and save cost of cultivation har-
moniously.

He urged the local people to maintain the dam for its durability and to carry on poverty alleviation.

The Region Chief Minister also made a speech. A local spoke words of thanks.

The Region Chief Minister and the Region Hluttaw Speaker formally opened the dam. The Union Minister unveiled the stone inscription.

The dam will irrigate 8000 acres of summer paddy and it was installed with two 2.5 megwatt generators to supply electricity to the re-
gion.

Kanyin Dam is of earthen type, and its embank-
ment is 194 feet high and 3750 feet long. The saddle dyke is 2850 feet long. The dam can store 148800 acre-
feet of water at full brim. Three conduits, four feet by six feet, is of RC type for benefiting 25000 acres of farmlands. Construction of the dam started in 2002-
2003.

The Union Minister and party participated in seeding of Paletha hybrid paddy strain 20 acres farmed by Kywezin Village in Ingapu Township.—MNA

UCSB Chairman attends course concluding ceremony

NAY PYI TAW, 1 Jan—Chairman of Union Civil Service Board U Kyaw Thi addressed concluding cer-
emony of refresher course No (44) for basic education teachers at Central Institute of Civil Service (Upper Myanmar) yesterday morn-
ing.

UCSB Member Dr Myint Aung, Mandalay Re-
gion Social Affairs Minister Dr Win Hlaing, officials and trainees attended the cer-
emony.

BEHS branch gets archway gate

HOPIN, 1 Jan.—The archway gate of Ywathitgyi Basic Education High School branch was opened in Hopin Township, Mohnyin District, on 18 December.

Officials and the wellwisher opened the archway.

The archway was built at a cost of K 5 million by wellwisher U Pay Tu Lay and family.—Township IPRD

Vocalist donates cash to orphanage

MEIKTILA, 1 Jan.—A ceremony to donate cash to funds of Orphanage Youth Development Paraitha School in Nyangnyae region of Meiktla was held at the school on 16 December.

Vocalist Dun donated K 2.8 million from his profession to the school. The vocalist wandered villages of Meiktla Township in performing singing entertainments. Among cash earned from the entertainments, he donated K 2.2 million to fund for construction of Kokkogon Village Pre-Primary School in Meiktla Township on 30 December.

Myawun Alyn
In legal affairs, a total of 15 laws have been enacted including promulgation of new laws and amending the old ones. Systematic plans are underway to be able to formulate new laws and amend old ones in accordance with changing conditions. Thanks to such legal reforms, people now can play bigger role in politics, economy, investment, trade, education, health and agricultural sector of the nation.

Likewise, in administration, the doctrine of Good Governance and Clean Government which places public interests at the fore is being put into practice step by step. As the administrative organs have direct contact with the people, the administrative mechanism is being built to be transparent, showing respect for the people. In addition, multifaceted reforms have been made in judicial system, lending credibility to judiciary.

Myanmar National Human Rights Commission has been formed with the aim of effectively protecting and promoting human rights of the people. Trustworthy experts for various social classes constituted the independent commission which will work cooperatively with international community including the United Nations Human Rights Commission and regional organizations, creating historic human rights records of the future nation and its people.

For two times, general amnesty has been granted for the prisoners who are serving their time for breach of existing laws, releasing over 20,000 prisoners. These prisoners now have a chance to play a part in building the new nation. Furthermore, there were over 40,000 prisoners who were committed to life imprisonment from death sentence and released on 1 year ahead of regular prison term. It is indeed a turning point not only for them but also for their family and friends.

The government is also endeavouring to make peace with ethnic armed groups for peace and stability of the nation. To be able to attain eternal peace, it has adopted different strategies based on objective conditions of the nation today and historical events, taking the different views of ethnic groups into full consideration. Of the 10 remaining ethnic armed groups big and small that still refuse to make peace, two groups have signed peace agreements at state level and are entering Union level peace negotiations. Two other groups also have reached state level peace agreement and are preparing for Union level peace talks. In addition, there have been contacts with other six groups, moving a step closer to eternal peace nationwide. It is obvious that the government is exerting efforts to create win-win situation through coordination and by building mutual trust and understanding for internal and external political stability.

Moreover, the government has been focusing its attention on social and economic reforms for development of the nation and betterment of socioeconomic life of the people. The government is reassessing monetary policy, financial policy, trade policy and investment policy and amending what should be amended dramatically for improvement of the overall economic structure of the nation. Especially, it's creating favorable conditions in investment field to attract more foreign investments, amending and eliminating existing investment laws and customs procedures while simplifying commercial procedures.

Developing Dawei deep-sea port special economic zone, Kyaukpyu deep-sea port special economic zone and Thilawyspeacial economic zone projects and offering incentives to attract foreign direct investment, its striving to stimulate the economy. Consequently, FDI are about to come flooding in from Europe, Japan, Singapore, Korea, China and India. At FDI will bring inopportunities for domestic businesses and jobs, we will be able to overcome the hardship of working illegally abroad.

Likewise, the government is relaxing export import procedures and taxation regulations to grease the wheels of importation and exportation processes. The smooth and swift commercial activities and exportation process will then strengthen the national economy. Moreover, old pension rate of retirees and political pension rate have been adjusted in line with enacted laws. The increased pension rate has created broad smiles on over 815,000 retired civil servants and their families and relatives. Previously, the retirees had to tighten their belts living on a small amount of pension but now can lead a pleasant life even with affordability to donate due to increased pension rate.

Moreover, in accordance with the prescription in the constitution that says every possible assistance is to be given to people, farmers and workers to enhance their socioeconomic status, the government is implementing rural development and poverty alleviation scheme across the nation. The poverty rate of the nation has declined to 26 per cent from 32 per cent in around 2005 and it is targeted to decrease to 16 per cent in 2015, for which 8-point rural development and poverty alleviation plan is being widely implemented for rural people who constitute the 70 per cent of the population, setting the time frame from July, 2011 to 31 December, 2015. Works are in effective operation on the ground in cooperation with the rural people in 82 sub-townships of 330 townships all over the country. It's learnt that microcredit union laws in the process of formulation to help accelerate the works.

The government has initiated assistance for farmers in cooperation with the private sector to help them overcome such difficulties as need for agricultural input, production at a loss and slashed price for farm products. In addition, the government will make certain arrangements for farmers to be able to hand down permitted farms generation after generation in accordance with the laws.

Industrialization is a must on the road to prosperous future. Development of small and medium lies at the heart of industrialization process. Therefore, the government is introducing adjustment measures to facilitate the investment procedures for different scales of industries to gear up SME development. National alleviation workshop was organized to reform economic policies inclusive of currency exchange rate in line with the constitution and current time. The government has meticulously assessed the resolutions and suggestions and is seeking advice from international organizations.
Independence Day...

(from page 8)

monetary organizations for the change. It is so obvious that the government is carefully undertaking the reforms step by step in order not to harm the daily economic life of the nation and its people both in short and long run.

Currently, with the support of the public, the new government is doing whatever should be done in real time in accordance with international economic and monetary conditions and domestic economic climate. The government therefore is concentrating all its efforts on creating fair competitiveness in the market, equal rights for each individual, reduction of transactional costs, elimination of red-tape and amendment old ones in accordance with objective conditions of the nation in such programmes like environmental conservation. Today, Myanmar is entering into a new era and new system. The government and people are joining hands in building the modern, developed, new democratic nation. Relatively distinct reforms can be seen in political, economic and social areas, highlighting the democratization process of the nation. Especially, the nation and its people are making changes every single time and these changes are definitely of positive ones.

However, transitional period is prone to challenges and transitional process of Myanmar is no exception. Some challenges, we have overcome, some, we are yet to deal with because they encounter in the future. Nevertheless, it should not be forgotten that challenges go hand in hand with opportunities. It is important to surmount the challenges and grasp the opportunities.

In reality, our nation already has the constitution massively supported by the people, the government formed in accordance with the constitution, and interrelated parliaments acting as reciprocal monitoring bodies with judicial pillar standing separately as well. The fourth estate of the country, media have gradually become mature and developed. At such time, what is of most important is unity plus cooperation for common interests actually beneficial to the nation and its people setting aside the diversities. If so, it is not difficult to solve the challenges and seize the opportunities.

To repeat the introduction, independence is concerned with the present, past and future, of which the present time is the most important. Therefore, every single joint effort of the government and the people for building democratic new nation today means solidifying independence at the present time and safeguarding independence and sovereignty for their perpetual existence in the future.

Our country has mass ground for wealth if only we are united. Myanmar belongs to all Myanmar peoples. Every citizen has a responsibility to give a hand in protecting the nation in order not to lose the country in other word not to lose the independence and sovereignty.

Every citizen loves his own nation and his own land and wants his own nation and people to be able to enjoy prosperity. Every citizen wants to live in unity, harmony and amity. Every citizen desires his own land and community and aspires to a peaceful and prosperous society. This is the same wish of each and every citizen. So, all the people, taking it as present duty sharing the same wish, are to safeguard the independence in union as from this year’s Independence Day to the last day of the world so that the nation can stand tall among global counties now and forever.

Hailing the 64th Anniversary Independence Day

POEM:

For greater progress of Union

Now in tranquility our country
We have unity without any divisions
Blood’s thicker than water
Patriotism our noble foundation
Overtures we’ve made with sincerity
All towards the right path
Our brethren in harmony and union
We brace high winds and drive out enemies
Safeguarding nation our priority
Always in unity we are
For everlasting of independence
We join hands eternally
Cementing unity every moment
Let’s try our best friends
So that our Union be safe
And enjoying greater progress
All along its future course

funds of the monastery through President Nayaka Sayadaw Bhaddanta Jatila of Maha Wizayayama Monastery. At the Dhammayan, he presented K 200,000 each to 63 households. At Bawza Thukhakari Refectory, the Vice-President donated K 1 million each to the funds of Maha Wizayayama Monastery through Assistant Sayadaw Bhaddanta Pathinda and Khemathewun Monastery through Sayadaw Bhaddanta Patilavamsa.

In meeting with families of five members of the Fire Brigade who sacrificed lives in the fire explosion, he said that he took pride in performance of five members of Fire Brigade who sacrificed lives for the sake of the people. He expressed his condolence for demise of those members. He said that the Fire Brigade members who sacrificed live in fire fighting will be honoured deservedly. The State will provide assistance to the remaining families for their life as much as possible. He presented K 200,000 each to their families of five dead Fire Brigade members and 13 people.

At the donation ceremony, the Vice-President accepted K 5.2 million to be shared as K 50,000 each for 104 damaged houses, K 500 corrugated iron sheets worth K 6,350,245, 208 plain iron sheets worth K 240,154 and 77 viss of CI nails worth K 231,000, amounting to K 12,021,399 donated by Union Minister for SWRR U Aung Kyi.

He also accepted K 335 million donated by wellwishers including K 1.5 million each by Chairman of A-1 Construction Co Ltd, Chairman of Golden Flower Co Ltd U Aung Htwe, Chairman of Shweudaung Development Co Ltd U Aung Zaw Naing, Chairman of ACE Construction Group U San Ko Ko Tin Hsan, Chairman of Original Group Co Ltd U Sai Tha Thwin, Chairman of TZZM Construction Co Ltd U Thet Lin and Chairman of PMG Co Ltd U Tin Win, K 10 million each by Chairman of Carrier Ancon Co Ltd U Min Khin, Chairman of Myanmar Basco Net Co Ltd U Kyaw Moe Naing and Chairman of WEG Co Ltd U Win Naing, K 5 million by Shwe Thabye Co Ltd U Thein Win and K 4 million by Forever Group.

At Yangon General Hospital, the Vice-President and party heard reports on medical treatment provided to the injured patients from fire explosion at the hospital and giving health care services to them presented by Medical Superintendent Dr Than Win and specialists. The Vice-President gave instructions on special care for the patients.

At Hall Nos. 5 and 6 of Yangon General Hospital, intensive care unit, hall Nos 9 and 10, the Vice-President comforted Fire Brigade members and people injured in the fire explosion and one woman who injured in bomb blast at the public toilet in Kamayut Township and presented K 100,000 each to them.

On arrival at Neurosurgical Department, the Vice-President asked after Sayadaw Bhaddanta Panditça from Khemathewun Monastery injured in the fire explosion and donated K 100,000 to his fund. Then, he comforted wounded members of Fire Brigade and people and gave K 100,000 each to them.

At Kamayut BEHS No. 2, the Vice-President viewed cleaning of debris from the damaged school building by servicemen of regiments and units under Yangon Command and loss and damages. Later, he gave words of encouragement to teachers.

Headmistress Daw May Hla Yi reported on number of students and classrooms, arrangements for reopening of the school and loss and damages in the fire. Union Minister for Education Dr Mya Aye, Union Minister for Construction U Khin Maung Myint, Chief Minister U Myint Swe and Director-General U Aung Win of Department of Housing Settlement and Housing Development gave supplementary reports on reconstruction of school building. The Vice-President gave instructions on continuous learning of students and soonest reconstruction of the school building.

Patron of the Myanmar Construction Entrepreneurs Association Union Minister U Khin Maung Myint handed over K 300 million donated by MCEA for reconstruction of school building to the Vice-President.

The association will take responsibilities for completion of construction tasks for school buildings.—MNA

Beer drinkers likelier to be in drunk driving deaths

WASHINGTON, 1 Jan—Beer drinkers are most likely to drive drunk and get involved in driving fatalities than wine or scotch drinkers, a new study has found.

In fact, the study found that states with higher wine consumption actually have fewer drunk driving deaths, Discovery News reported.

“Beer has the strongest link to traffic fatalities, then spirits, while wine has a negative impact on traffic fatalities,” said Bradley Rickard, assistant professor of economics and applied management at Cornell University.

“Wine is more likely to be consumed with food. That has an impact. We also suspect that there are different demographic groups that consume this alcohol.”

“May be the audience that consumes wine is less likely to drink and drive and be in a traffic accident,” he said. Rickard said he and his colleagues at Cornell were motivated by recent efforts to block the sale of wine in grocery stories.

Opponents said the greater availability of wine would actually result in more youth drinking, health problems and traffic deaths. Rickard says his study actually counters that final argument.

“Our results suggest that arguments against legislation that proposes to introduce wine into grocery stores for reasons related to traffic fatalities may be misguided,” the study stated.

Specifically, the conventional wisdom that alcoholic beverages with higher ethanol content are more dangerous in terms of traffic fatalities is not obvious in our simulation results,” he stated.

Rickard said restricting alcohol sales after 10 pm has the strongest negative pressure on drunk driving deaths. “We’re not advocating that people drink wine and then they are fine to drive. We’re just saying look over the last 25 years, it has been those states with higher rate of beer consumption have higher traffic fatalities,” Rickard added.

The study was published in this month’s Journal of the American Association of Wine Economists.

India launches relief operations for cyclone-hit areas as 42 people die

NEW DELHI, 1 Jan—The Indian authorities Saturday launched relief operations on a war-footing to bring back normalcy of life in the southern state of Tamil Nadu’s cyclone-battered Cuddalore district and adjacent Puducherry, a national territory, reported local media.

Meanwhile, the death toll from the severe storm Thane has mounted to 42, according to the Press Trust of India. Tamil Nadu Chief Minister Jayalalithaa said nine more people have died in rain related incidents, taking the toll to 42, following the severe cyclonic storm Thane that crossed the Tamil Nadu coast on Friday, according to the news agency.

She said five people were killed in the worst-affected Cuddalore district, three in Kancheepuram and one in Thiruvannamalai. She also announced a solutioan of 200,000 rupees (4,000 US dollars) each to those killed.

Thane, packed with wind speeds of about 135 km/h, killed 33 in Cuddalore and the Union territory of Puducherry, while leaving around 20,000 people homeless on Friday.

US airport evacuated after serviceman found carrying explosives in bag

HOUSTON, 1 Jan—An airport terminal in the US state of Texas was evacuated Saturday morning after a serviceman was found carrying explosives in his bag.

The man, a member of the US Armed Forces, was stopped at Midland International Airport when explosives were found in his carry-on luggage.

The checkpoint was closed for about one hour while officers investigated and removed the item, the statement said.

The man was detained by the FBI and was cooperating with investigators, according to reports.

Bed tester to insure her butt for 4 million pounds

Loeacan, 1 Jan—A hotel worker is all set to insure her derriere for 4 million pounds after landing a job to test the softness of guests’ beds.

Natalie Thomas, will check about 24 beds each day after being appointed director of bed bouncing for Premier Inn’s.

The 39-year-old was offered the job after she impressed with her ability to feel even the smallest bump or lump in a mattress.

She takes care of her prized bottom with regular moisturising and does not wear materials, such as denim jeans, which lessen sensitivity.

So important is her bottom that the firms is in talks to insurance it for 4 million pounds.

“I absolutely love my new job—it’s a dream come true,” the Daily Express quoted her as saying.

“While it can be fun bouncing on beds, I take my job very seriously as making sure every guest gets a good night’s sleep is of paramount importance to the hotel,” she added. Thomas and her team of helpers will travel thousands of miles a year across the UK, visiting the chain’s 602 hotels to test how comfortable the Inn’s 46,000 beds are.
Thinking of you on your birthday with good wishes for a year filled with happiness!!!

Happy Birthday
To
Capt. Aung Aung Myint (Listar)

Could hypersonic flight become a reality?

LORENZO, 1 Jan — When Concorde was decommissioned in 2003, supersonic air travel became a thing of the past. But work has begun on a passenger aircraft that could go further and faster — flying from Europe to Australia in four hours. Will it ever become a reality?

The European Space Agency’s goal is to create a hypersonic passenger plane, one that flies more than five times faster than the speed of sound and six times faster than a standard airliner.

It’s not the first time hypersonic flight has been attempted. In 1960, tests took place on the X-15 — half plane, half missile — which carried one pilot and flew for 90 seconds before its rocket fuel burnt out. Its creators thought it would herald a new era of high-speed civil aviation but more than 50 years later, a hypersonic passenger plane has yet to be tested or even built. Now a team led by the European Space Agency, known as Lapcat, are working on an aircraft called the A2, which could take up where the X-15 left off.

The technology involved in exceeding the speed of sound — Mach 1 — is extremely complex. “Mach number is the key,” says aerodynamics expert at Imperial College London, Paul Bruce. “When you go below Mach 1 — so flying slower than the speed of sound — and then transition to above Mach 1, the flow of physics completely changes. When you go to Mach 5 or 6 the laws start changing once again.” At hypersonic speeds, gasses and metals behave very differently. Airliner engines that work at subsonic speeds — about Mach 0.85 or 0.93 per hour — won’t work.

Mach numbers

* Mach number is the speed of an aircraft relative to the speed of sound passing through the air
* Mach 1 is the speed of sound — approximately 1,236 km/h, depending on various factors including temperature and altitude
* Mach 2 is twice the speed of sound, Mach 3 is three times the speed of sound and so on

China’s quality watchdog warns of safety risks of some Subaru vehicles

BEIJING, 1 Jan — China’s top quality regulator warned Friday of safety risks due to design flaws in the brake master cylinders of the imported Subaru Legacy and Outback vehicles produced by Japanese automaker Fuji Heavy Industries Ltd. The problem, which involved 7,133 imported vehicles on the Chinese mainland, could potentially result in traffic accidents as it prolongs cars’ stopping distance, the General Administration of Quality Supervision, Inspection and Quarantine said in a statement on its website.

The statement added the flaw had led to accidents shortly after the problematic vehicles were put on the market.

China holds mass end-of-year wedding for 92 couples

BEIJING, 1 Jan — China’s top quality regulator warned Friday of safety risks due to design flaws in the brake master cylinders of the imported Subaru Legacy and Outback vehicles produced by Japanese automaker Fuji Heavy Industries Ltd. The problem, which involved 7,133 imported vehicles on the Chinese mainland, could potentially result in traffic accidents as it prolongs cars’ stopping distance, the General Administration of Quality Supervision, Inspection and Quarantine said in a statement on its website.

The statement added the flaw had led to accidents shortly after the problematic vehicles were put on the market.

Seven dead, one injured in NE China car crash

HARBIN, 1 Jan — Seven people died and one was injured when two sedans collided around noon on Saturday in northeast China’s Heilongjiang Province, local police said.

Two cars with a total of eight people on board hit head-on in the city of Zhaodong at around 12:30 pm Saturday, leaving six dead at the scene.

Another person died on the way to hospital and one person was injured, municipal traffic police said.

Police are looking into the cause of the accident.

Peru holds mass end-of-year wedding for 92 couples

LIMA, 1 Jan — Peru’s capital, Lima, has held a mass wedding for 92 couples, the last group ceremony of the year. The brides and grooms, ranging in age from 18 to 74, were married in a ceremony conducted by the city’s mayor.

Mass weddings are becoming more popular in Peru — not least because they are far cheaper than individual ceremonies. “We fulfilled our desire to get married after living together for 34 years,” said Carmen Mercado, 64, who wed her partner, 74-year-old Jorge de la Cruz.

The couples paid some $10 (£6) for the joint ceremony, instead of the usual $142 (£95) fee in Lima.

The group took their vows and exchanged rings at the same time during Tuesday’s wedding.

Among the newly-weds were Edgar Pasapera, 19, and Luisa Viera, 18, who met in school.

People had tried to keep them apart, Edgar told Reuters.

“Thanks to God and the love we have for each other, we are still together. We already have a beautiful baby who was born a fortnight ago,” Lima Mayor Susana Villarán presided over the event.

“This is part of the city’s celebration of the end of the year,” said official Eva Revoredo who assisted with the ceremony.

Bank Holiday

All Banks will be closed on 4th January (Wednesday) 2012. Independence Day, being Public Holiday, Under the Negotiable Instruments Act, Central Bank of Myanmar.

4,000-year-old cypress tree survives move

X’IAN, 1 Jan — An ancient cypress tree has shown signs of growth after it was transplanted during the spring in northwest China’s Shaanxi Province, according to local gardening experts. New branches of the tree have emerged after nine months of preservation and maintenance. The tree, which is said to have a history of over 4,000 years, according to local villagers of Huangleung county, had to be removed in order for the construction of a water-control project, or else it would have been submerged.

In November 2009, the preliminary process of the transplantation began, according to Wang Chumee, head of the county’s publicity department. About nine months later, the experts considered it an appropriate time to transplant when the newly-grown capillary roots, which are vital to the root system, had formed. On 28 March, with the help of giant cranes, trucks, and a soil ball to protect its roots, the ancient tree, which weighs 450 tons, was moved to its new home 2.5 km away from its original location.

An ice statue is seen at the opening ceremony of the first Zhanbei ice and snow festival in Zhanbei County of north China’s Hebei Province, on 30 Dec, 2011. The first Zhanbei ice and snow festival kicked off here on Friday. The festival is scheduled to open until March 16, 2012 and a series of ice and snow-related games and events will be held during the festival.

Seven dead, one injured in NE China car crash

HARBIN, 1 Jan — Seven people died and one was injured when two sedans collided around noon on Saturday in northeast China’s Heilongjiang Province, local police said.

Two cars with a total of eight people on board hit head-on in the city of Zhaodong at around 12:30 pm Saturday, leaving six dead at the scene.

“This is part of the city’s celebration of the end of the year,” said official Eva Revoredo who assisted with the ceremony.
List of likely 2012 ‘top words’ released

A US language group has released its annual global survey of words and phrases it says are likely to dominate word usage and creation in 2012.

In its 12th annual general survey of the English language, Global Language Monitor said terms such as CERN, Kate, China, the Olympics and those relating to the US elections and end-of-world scenarios will be foremost next year.

“The year 2012 looks to be a vibrant year for the English language with word creation again driven by events both scheduled and unanticipated,” Paul JJ Payack, president and chief word analyst of GLM said.

“Typically there is an ‘end-of-the-world’ scenario every few years that impacts the English language; this year we will see no fewer than three including the Mayan Apocalypse and the Solar Max,” he said.

Austin, Texas-based GLM ranked words from throughout the English-speaking world, with an estimated 1.83 billion speakers, analyzing the Internet, blogosphere, the top 75,000 print and electronic global media and social media sources.

Global Language Monitor determined “occupy” was the Top Word, “Arab Spring” the Top Phrase, and Steve Jobs the Top Name of 2011 in its survey. “Catherine, the Duchess of Cambridge, will compete with the London Olympics, the economic surge of China, various activities involving the CERN atom smasher, and the US presidential election for Top Word honors, though we always allow for word creation generated from unexpected events such as Hurricane Katrina in 2005 or the Japanese ‘tsunami disaster’ of 2011,” Payack said.

Jennifer Lopez sets sail in luxurious yacht with toyboy lover for New Year in Miami

LONDON, 1 Jan—Jennifer Lopez, who whisked away her toyboy lover Casper Smart on several trips around the world in the past two months, has now set sail with him on a luxurious yacht in Miami.

The 42-year-old singer looked ready for a relaxing break, showing off her famous curves in a green halterneck dress, the Daily Mail reported.

She appeared to have pared down her usually made-up look in favour of a bare-faced completion and tied her brunette locks back into a casual bun.

The 24-year-old back-up dancer looked like the cat that cream as he boarded the ship, Smart looked more intrigued in the conversation he was having on the phone. Lopez's twins Max and Emme also appeared to have joined the couple, with the nanny seen holding the singer’s three-year-old daughter.

The couple were pictured out on the boat with their three-year-old daughter.

An internet source as saying.

Jennifer Aniston’s beauty secrets revealed!

WELLINGTON, 1 Jan—Jennifer Aniston has always been an example of impeccable style and hardly ever gets it wrong with her looks, both on and off screen.

Turnout, the actress has been a range of beauty products that help her maintain her sweethearth looks.

Being a hair straightener devotee, Aniston relies on Kerastase Ciment Thermique to protect her hair. Her thermo-activated reconstructing milk has been designed specifically for moisture-rich and light reflecting Laura Mercier Secret Concealer.

The actress is also a fan of Dr Hauschka products and uses mascara and lip balm from this brand.—Internet

Santa’s sleigh tangles with jet fighter

A Maryland couple say a tableau showing a crash between Santa’s sleigh and a Cold War-era plane pilot by Scrooge is on display at their St Michaels farm.

The scene depicts the aftereffects of a midair collision between Santa’s sleigh and a Lockheed F-104 Starfighter from the fictitious Chimpanzee cooking for Santa’s sleigh full of toys.

There’s a sign on a fence proclaiming, “Oops!” “It’s a happy thing,” Tom Blair said.

“I meant for it to be humorous and non-offensive,” Blair reported.

I probably didn’t even read what was on the card,” Hans said. “We were constantly pulling jokes on one another.”

Since then, the card has changed places every year, even as Kelly, who worked for the US Forest Service, moved all over the United States, the Tyler (Texas) Morning Telegraph reported.

Inside the card is a list of years and where the card was sent that year, along with short notes as the friends updated each other on the happenings in their lives.

Jennifer Stewart buys two guitars for Robert Pattinson

LOS ANGELES, 1 Jan—Actress Kristen Stewart has bought two vintage guitars worth USD 12,000 for her boyfriend, actor Robert Pattinson. The 21-year-old actress bought the instruments from Norman’s Rare Guitars in Los Angeles, reports femalefirst.co.uk.

Shop owner Norman Harris revealed that Stewart picked up a 1959 Fender Jazzmaster and a 1947 K and L F-1 Lap Steel for Pattinson, who is a keen musician.—Internet

Selen Gomez

Selena Gomez paid parents’ rent with first TV wages

LONDON, 1 Jan—Selena Gomez has revealed that she had used her first wages from ‘Wizards of Waverly Place’ to pay her parents’ rent.

The Disney actress’ family had moved from their native Texas to Los Angeles to support her blossoming showbiz career.

The 19-year-old revealed that when she landed her first starring role in Austin, Texas-based GLM ranked words from throughout the English-speaking world, with an estimated 1.83 billion speakers, analyzing the Internet, blogosphere, the top 75,000 print and electronic global media and social media sources.

Global Language Monitor determined “occupy” was the Top Word, “Arab Spring” the Top Phrase, and Steve Jobs the Top Name of 2011 in its survey. “Catherine, the Duchess of Cambridge, will compete with the London Olympics, the economic surge of China, various activities involving the CERN atom smasher, and the US presidential election for Top Word honors, though we always allow for word creation generated from unexpected events such as Hurricane Katrina in 2005 or the Japanese ‘tsunami disaster’ of 2011,” Payack said.

The 19-year-old, who was recently named Sexiest Woman Alive by People magazine, is said to have grown close to the “Avatar” actress while working together in upcoming movie “The Words”.

“They are very happy. They are totally dating,” contactmusic.com quoted a source as saying.

Cooper was previously linked to Renee Zellweger, Jennifer Lopez and Olivia Wilde. Internet

James replaces sacked Aguirre as Zaragoza boss

MADRID, 1 Jan—Real Zaragoza have appointed former Sevilla coach Manuel ‘Manolo’ Jimenez to replace Javier Aguirre, who was sacked this week following a poor run that left them bottom of La Liga.

‘Real Zaragoza have concluded the hiring of Manuel Jimenez until the end of the season,’ Zaragoza said on their website (www.realzaragoza.com).

Clarke, McIlroy honoured by Queen after major wins

LONDON, 1 Jan—Northern Irish golf stars Darren Clarke and Rory McIlroy are among the sports figures honoured by Queen Elizabeth II in her New Year list, after claiming their first major titles.

The 43-year-old Clarke was made an Officer of the Order of the British Empire. The second-youngest golfer to win the Open, Clarke lifted the claret jug at the end of the season, ‘It is a great honour and a fantastic way to end a great year. I am very proud for me and my family,’ Clarke said.

He pointed to the spot, waved a flag and received the medal from the Queen before a cheering crowd. ‘I will try our hardest for him in the future,’ Clarke said.

Substitute striker finally broke the deadlock in the first half, the Netherlands forward scored more goals for the club than anyone else in the Premier League.

Andy Murray appoints Ivan Lendl as his new coach

Murray pulled out of December's ATP World Tour Finals with a groin injury

LONDON, 1 Jan—Britain’s Andy Murray has appointed former world number one Ivan Lendl to take over as his new full-time coach.

Lendl won eight Grand Slam titles, will start work immediately. Murray said: ‘Andy’s impact on the game is unquestionable and he brings experience and knowledge that few others have, particularly in major tournaments.’

Lendl won 94 ATP Tour titles in a career that spanned 16 years. He came from two sets to love down to win the French Open final against John McEnroe in 1984 to claim his first Grand Slam and, after winning the 1985 US Open, he remained as the world’s top ranked player for 156 consecutive weeks.

On becoming Murray’s coach, Lendl said: ‘I am really excited to have the opportunity to work with Andy. He is a unique talent and I look forward to trying to help him reach his goals.’

The Scot will begin his bid for a 22nd ATP World Tour title at the Brisbane hard court tournament.

Van Persie sends Arsenal back to 4th with QPR win

LONDON, 1 Jan—Robin van Persie lifted Arsenal back into the Premier League’s top four on Saturday by clinching a 1-0 victory over Queens Park Rangers.

The Dutch star netted the winner with a second-half header, restoring his side’s two-goal lead in the 61st minute.

In his first half of more than 60,000 inside Emirates Stadium. The lack of ruthlessness, provided a reminder of why manager Arsene Wenger has turned to signing former striker Thierry Henry on a two-month loan from the New York Red Bulls. The striker, who scored a club-record 226 goals in eight years at Arsenal between 1999-2007, was in the ground to assess the players who he will soon be rejoining.

Mavericks sign Chinese star Yi for one year

BEIJING, 1 Jan—The Dallas Mavericks is set to sign free agent forward Yi Jianlian on a one-year deal, according to an ESPN report on Sunday.

The 24-year-old Chinese averaged 5.6 points and 3.9 rebounds with Washington last season. His best season came in 2009-2010 when Yi averaged 12.0 points and 7.2 rebounds with New Jersey.

Drogba's 150th goal in vain for Chelsea

Will try our hardest for him to be available for the Fort- mOUTH game (in the FA Cup on Jan. 8)." Before the match with Villa, the superstitious Drogba said his 150th goal could be a late ‘Christmas present for the fans’ but de- feat left Chelsea supporters winced with both jeers echoing around Stamford Bridge after the final whistle. Chelsea’s title hopes now seem over after they dropped to fifth in the table, 11 points adrift of leaders Manchester City. Drogba’s future at Stamford Bridge is also un- certain after Villas-Boas said talks over a contract exten- sion had not been resolved.

Ed Moses backs Dai Greene for gold at London 2012

BEIJING, 1 Jan—Ed Moses backs Dai Greene for gold at London 2012. The 25-year-old British Olympic and World champion Dai Greene cannot win Olympic gold in London if he is not distracted from his preparations. However, the race was one of the slowest in World Championship history and Moses warned Welshman Greene, who has a personal best of 47.88 seconds, that conditions will be very different in London next summer.

Novak Djokovic beats David Ferrer to win Abu Dhabi exhibition

AGU DHABI, 1 Jan—Novak Djokovic beat David Ferrer 6-2 6-1 to win the World Tennis Championship exhibition in Abu Dhabi. World number one Djokovic followed up his semi-final win over Roger Federer to claim the $250,000 ($161,000) prize.

Djokovic will now prepare for the defence of his Australian Open title. The tournament starts in Mel- bourne on 16 January. Easi- lier, Spaniard’s world num- ber two Rafael Nadal beat Federer 6-1 7-5 in the third-fourth place play-off. Ferrer, who beat Nadal in the semi-finals, had his serve broken five times by Djokovic and went 3-0 down in each set before succumbing to de- feat. Djokovic finished the match with consecutive aces and said it was not impossible to repeat his tremendous feats from 2011 in the com- ing twelve months. ‘I think, yes. Nothing is impossible, if you believe. I think the cru-
Rural development discussed

MANNUNG, 1 Jan.—A meeting on rural development and poverty alleviation was held at the hall of Manunung Township General Administration Department on 1 December. Work committees for township rural development and poverty alleviation participated in their respective sectors. The Rakshine State Minister for Finance and Revenue gave instructions on rural development.

Premier League-Last-gasp

Sunderland Stun Man City

SUNDERLAND, 1 Jan.—Ji Dong-Won scored with the last kick of the game as Sunderland grabbed an astonishing 1-0 Premier League win against Manchester City at the Stadium of Light. The home side had withstood a second-half battering, before catching City on the break in the 93rd minute.

Ji, who was offside, rounded Joe Hart before coolly slotting into the empty net to deliver a mighty sucker punch and send manager Martin O’Neill into a wild, leaping celebration. The result means City failed to extend their lead at the top of the table - they remain level on points with Manchester United, who were shocked 3-2 by Blackburn on New Year’s Eve.

It has been a miserable week for City, who were held to a goalless draw by West Bromwich Albion on Boxing Day. Sunderland have won three of their five games under O’Neill’s stewardship, all thanks to late winners, and are up to 13th in the table. Roberto Mancini made six changes from the side that drew at The Hawthorns, naming David Silva and Sergio Aguero among the substitutes and leaving Mario Balotelli out of the squad altogether.—Internet
YANGON, 1 Jan—Vice-President of the Republic of the Union of Myanmar Dr Sai Mauk Kham this morning inspected loss and damages in outbreak of fire in Kutohseik Ward in Mingala Taungnyunt Township, here, and comforted fire victims at the relief camp and patients injured in explosion at the hospital. He presented cash assistance to them and inspected loss in the fire at Basic Education High School No. 2 in Kamayut Township.

Accompanied by Union Minister for Construction U Khin Maung Myint, Union Minister for Labour and for Social Welfare, Relief and Resettlement U Aung Kyi, Union Minister for Transport U Nyan Tun Aung, Union Minister for Immigration and Population U Khin Yi, Union Minister for Hotels and Tourism and for Sports U Tun Hsan, Union Minister for Education Dr Mya Aye, Union Minister for Health Dr Pe Thet Khin, Yangon Region Chief Minister U Myint Swe, region ministers and officials, the Vice-President arrived at the land razed by fire at Myittamon warehouse group on Kutohseik Road in Kutohseik Ward of Mingala Taungnyunt Township. Union Minister for SWRR U Aung Kyi and Yangon Region Chief Minister U Myint Swe reported on outbreak of fire and loss and damages.

Managing Director U Cho Than Maung of Myanma Port Authority reported on layout of the warehouses and explosion in fire with the use of charts and Commander of Lower Myanmar Criminal Investigation Department Police Col Maung Nyein of Myanmar Police Force on explosion and blazing of warehouses. The Vice-President gave necessary instructions.

At the relief camp in Mingala Taungnyunt BEHS No. 7, the Vice-President and party comforted the fire victims and provided necessary assistance for them. He presented K 200,000 each to 161 households.

The Vice-President, the Union ministers and officials also gave rucksack, school textbooks, two school uniforms and K 20,000 each to 171 students of fire victim families. At Maha Wirayayama Monastery in Yagyaw Monastery of Pathein Nyunt Ward where the relief camp is being opened, they inspected rice, edible oil, blankets, garments and foodstuffs to be provided to the fire victims.

Next, the Vice-President inspected cash donation and relief supplies donated by wellwishers and health care services provided by the special medical team of Directorate of Medical Services, specialist team of Ministry of Health and Phyo Cetana health care group.

Vice-President Dr Sai Mauk Kham presents school stationery and cash assistance to fire victim students at Mingala Taungnyunt BEHS No. 7.—MNA

Hailing the 64th Anniversary Independence Day

Independence Day and present duty

Every citizen loves his own nation and his own land and wants his own nation and people to be able to enjoy prosperity. Every citizen wants to live in unity, harmony and amity. Every citizen adores his own land and community and aspires to a peaceful and prosperous society.

Kyaw Ye Min

Poem:

For greater progress of Union

Now in tranquility our country
We have unity without any divisions
Blood’s thicker than water
Patriotism our noble foundation

Rovers bring in Button
Saunders thanks Spurs for keeper deal

David Button: Joining Doncaster on loan for a month from Tottenham.

David Button, 22-year-old had been on loan with League One side Leyton Orient but was recalled to White Hart Lane and will now be stepping up to Championship level with Rovers.

It will be the 12th loan spell of Button’s career, having previously spent time with the likes of Crewe, Shrewsbury and Plymouth Argyle.

Rovers boss Dean Saunders has moved to bring in Button after losing Carl Ikeme and Neil Sullivan to injury.

“With Carl Ikeme and Neil Sullivan both injured and having operations, we have been looking to bring in a keeper for the last month,” Saunders told the club’s official website.

“David is a good 6’3” experienced, young keeper who has played up to England U20 level and in the Football League. I would like to thank Daniel Levy, Harry Redknapp and Tony Parks for allowing him to come here for the next month on loan, for free.”—Internet
