Establishing the Federal Union

Establishing the Federal Union and achieving the democratic standards anticipated by the government will take time and can only be done step by step. However, our ultimate goal to establish a Democratic Federal Union is unwavering.

At the second meeting of the 21st Century Panglong (Union Peace Conference), an agreement was in fact reached on matters regarding the right to self-determination and the formulation of state constitutions. However, after reaching agreement, this had to be set aside. Just as non-secession is important, it is equally important to join hands together to build up a Federal Union.

Vice President U Myint Swe addresses opening ceremony of e-Government Forum 2018

VICE President U Myint Swe in his capacity as e-Government Steering Committee Chairman addressed the opening ceremony of e-Government Forum 2018, organized by the Myanmar Computer Federation, at MICT Park, Hline University campus, Yangon, yesterday morning.

Present at the opening ceremony were e-Government Steering Committee Vice-Chairman Union Minister for Transport and Communications U Thant Sin Maung, Union Minister for Labour, Immigration and Population U Thein Swe, Yangon Region Chief Minister U Phyo Min Thein, Deputy Minister for Transport and Communications U Tha Oo, regional ministers, Hluttaw representatives, ambassadors and diplomats, departmental heads, officials from e-Government Steering Committee, e-Government implementation committee and sub-committees, patrons, chairmen, vice-chairmen and members of Myanmar Computer Federation (MCF), Myanmar Computer Professionals Association (MCFA), Myanmar Computer Industry Association (MCIA), rectors and professors from computer universities, departmental officials, experts and invited guests.

MCF President U Khun Oo first delivered a message of greeting. Following this, the Vice President addressed the meeting and said it is a pleasure and an honor to speak at the e-Government Forum held under the theme of “Road to Digital Government” and to inform the people about establishing an e-Government that would be beneficial for the Myanmar people’s socio-economic development.

e-Government is a management system of government information and is a two-way communication, transferring of information and provision of service between government organizations, between government and business persons, between the government and the people using ICT (information and communications technology) that helps in conducting works quickly, correctly, efficiently and cheaply. As the government will have a better management system that is transparent once e-Government using ICT is firmly established, the people will also be able to do their work more quickly and easily. Furthermore, possible avenues of corruption will be reduced, resulting in the people having more trust and confidence in the government’s administrative system. Government will have to fully utilize the progressing technology to provide better and smoother service to the people continuously, said the Vice President.

For the successful implementation of an e-Government system in Myanmar, the Office of the President established the e-Government Steering Committee with executive order 14/2018 issued on 23 January 2018. The State Counsellor led the committee as patron and five key objectives were set for the committee. Likewise, the e-Government Implementation Working Committee is also formed with five objectives. The Working Committee chairman and vice-chairman are Union Minister for the Office of the Union Government and Union Minister for Transport and Communications.

On 12 June 2018, an e-ID system work committee was formed for the Steering Committee to implement its works successfully. In addition to this, eight sub-committees were formed under e-Government Implementation Working Committee. These were Management sub-committee; Basic infrastructure system, model and design sub-committee; Purchasing and government-private cooperation sub-committee; Human Resources sub-committee; Security sub-committee; Standard setting sub-committee; Research and development sub-committee and Information and international cooperation sub-committee.

At the e-Government Steering Committee meetings, instructions were made to draw up and enact law and rules related to e-ID system that are in line with the times, establishing and using Myanmar Unicode that is according to the International Standard Organization (ISO) norms all over the country as a standard, establishing of ICT institutes and conducting works that are in line with the times and the system will have to fully utilize the progressing technology to provide better and smoother service to the people continuously, said the Vice President.

To successfully implement e-Government system, in addition to setting and conducting long term processes, short term processes that provide QuickWin Services that are highly visible for the people in a short term also need to be systematically drawn up and conducted. Therefore, to support the implementation of e-Government, Myanmar e-Governance Master Plan was drawn up with funding support of Asia Development Bank (ADB), technical support of the Government of India and studying and comparing together with government departments, ministries, business owner groups, research organizations, local and international e-Government and ICT technology experts to benefit from the good experiences of the countries of the world.

e-Government system can be effectively and quickly implemented by using Public Private Partnership (PPP) system. It is required to identify and calculate priority works that can be quickly conducted with government funds and works to be conducted in cooperation with local companies. It is believed that only local companies can conduct the e-Government system continuously and in accordance with the law.

Personnel from central organizations, union ministerial departments, Nay Pyi Taw Council, State and Region governments assigned as Chief Information Officers are to strive hard toward accomplishing their duties and responsibilities in the transition to e-Government system. If they practically use what they have learnt while striving hard toward learning new subjects, the quality and service related to e-Government will be better and smoother, while their individual capabilities develop. They are urged to explain and familiarize the people they are providing service to the e-Government system. Only then can the e-Government system be implemented quickly and successfully.

According to the UN e-Government Survey 2018, e-Government Development Index (EGDI) of Myanmar increased from 169 in 2016 to 157 in 2016 due to the development of communication sector. The increase need to be in the actual work site as well as in the index level. That is why all are urged to work together toward the success of e-Government system in Myanmar by studying international experiences and best practices and acquire the good habit of overcoming the difficulties, said the Vice President.

The Vice President thanked the MCF and computer associations for participating under the direction of the e-Government Implementation Working Committee in the e-Government Forum, according to the guidance of e-Government Steering Committee.

While MCF and computer associations are to continuously suggest and support required technologies for the socio-economic development of the people in the country that to transparently connect the government and private sector works and work together toward successfully implementing the e-Government system, said the Vice President.

Next e-Government Steering Committee Chairman Union Minister for Transport and Communications U Thant Sin Maung explained about the status of setting policy guidelines and norms as contained in the relevant law; in the Myanmar e-Governance Master plan, status of setting up ICT infrastructures, arrangements made to provide e-service to the people with Application Software and status of the people using the service of the government easily.

Afterwards, the Vice President posed for a commemorative group photo with forum attendees.

The second part of the forum was then continued, where group discussions under the titles “National Strategy and Framework for Digital Government,” “Implementation Challenges and Opportunities for Local Industry,” “Role of Private Sector in e-Government” and “Experts discussion” were conducted. Yangon region minister for Kayin ethnic affairs Naw Pan Thinzar Myo, Directorate of Investment and Company Administration Director General U Aung Naing Oo, e-Government Steering Committee member MCF patrons U Thaung Tin and U Thein Oo, MCF President U Khun Oo, e-Government Basic infrastructure system, model and design sub-committee chairman U Soe Thein, MCIA patron U Tin Win Aung, invited guests and experts participated in the discussions. —MNA
State Counsellor arrives in Japan to attend 10th Mekong-Japan Summit

FROM PAGE 1

When they arrived at Bangkok at 8.30 am on their way to Japan, the delegation was welcomed by Myanmar Ambassador to Thailand U Myo Myint Than and wife, Military Attaché (Army, Navy and Air) Brig-Gen Khin Zaw and staff of the Myanmar Embassy in Bangkok.

Upon arrival at the Haneda Airport in Tokyo, the delegation led by State Counsellor Daw Aung San Suu Kyi was welcomed by Mr. Hiroto Izumi, Special Advisor to the Prime Minister of Japan, Japanese Ambassador to Myanmar Mr. Ichiro Maruyama, Myanmar Ambassador to Japan U Thurein Thant Zin, Myanmar military attaché Brig-Gen Saw Min and officials of the Myanmar Embassy. — MNA

Fifth Annual Union Level Multi-Stakeholder Review for MNCDD Project held in Nay Pyi Taw

AT THE Fifth Annual Union Level Multi-Stakeholder Review for the Myanmar National Community Driven Development (MNCDD) Project held at Myanmar International Convention Centre-II (MICC-II) in Nay Pyi Taw yesterday morning Union Minister for Agriculture, Livestock and Irrigation Dr. Aung Thu said urban development only is not enough in the country-wide development, as development of rural areas, where 70 per cent of population live, is the most important requirement.

The Union Minister continued and said that as an agriculture country, rural regions form the backbone of Myanmar’s development and as long as the backbone is straight and strong, the country will develop in an increasing momentum. That is why priority is given toward agriculture sector development with an aim for socio-economic development of the rural populace and basic infrastructure, mainly required for socio-economic development, is being established, said the Union Minister.

Transportation and access to electricity are the most required basic infrastructure, while it is the priority requirement of rural regions. Therefore, relevant departments are fulfilling these requirements, while rural populace themselves are supporting and participating with people-centered project. People-centered projects also fulfill the country’s economic policy aim of “achieving sustainable development through people-centered participation of all.” In the project villages, required basic social infrastructures are selected, implemented, managed and ownership taken by the people themselves from start to finish. Union level multi-stakeholder reviews were conducted yearly since the project was started. Year by year, implementation improves with experience gained, lessons learnt and challenges overcome from the reviews. To this year, 21,122 project sub-works were implemented in 12,011 villages with full quality and much benefit to the people. The outcomes from these implementations are the fruits of development being obtained by 7.1 million rural households.

As the effectiveness of these reviews was proven by the experience gained from past reviews, discussions are urged to be made in a constructive way for the success of the project and to benefit the people more.

Next World Bank Program Leader Mr. Mark Austin delivered a speech and Department of Rural Development Director-General U Khant Zaw explained briefly about people-centered project.

Afterwards, the Union Minister and officials presented awards to village tracts for their performances in the fifth year of the project and observed the photo records of the project works.

Attendees of the review then conducted discussions under various themes. After these discussions, the attendees were divided into groups and conducted group discussions. — MNA

MIC, JICA to hold Ayeyawady Region investment fair

THE Ayeyawady Region Investment Fair will be held at Yangon Airport, Pathein Township, Pathein City, from November 29 to December 1, 2018.

Ayeyawady Region Investment Fair is jointly held by Myanmar Investment Commission (MIC), Japan International Cooperation Agency (JICA) and Ayeyawady Region government.

At the event, officials from the government and leading people from private sector will hold panel discussions and keynote speeches. Also, they will present the findings of Ayeyawady Region Investment Opportunity Survey Booths of Pathein Industrial City, local industries and development projects will be displayed for potential investors. The fair will also conduct business-to-business matching between local entrepreneurs and foreign investors.

Additionally, there will be site visit tours on 1 December to destinations near Ngwe Saung Beach, Pathein Industrial City and Industrial Zone near Pathein and some potential investment areas.

Ayeyawady Region accounts for 28 per cent of the country’s rice production. Also, it can bring many investment opportunities as the region is rich in land, water resources and beautiful resorts.

The Directorate of Investment and Company Administration (DICA) is holding investment fairs in order to spur development more evenly among all states and regions. The DICA has been meeting both local and international investors to explain the latest developments, such as the recent enactment of the new Myanmar Investment Law and new opportunities available for investments.

According to the new Myanmar Investment Law, the investors who finance in undeveloped regions will be given tax exemption as an incentive. Moreover, regional and state investment committees have been granting permission to local and foreign enterprises which do not exceed an initial investment of Ks6 billion or US$ 5 million.

Experts from Thailand, Singapore, Malaysia conduct talks in Yangon Dental University

WITH an aim for a sustained development and dissemination of dental science, three experts from Thailand, Singapore and Malaysia conducted talks on dental subjects, under the arrangement of International Team for Implantology. The talks were attended by dental university teachers, post graduate students and interested persons. — MNA
Union Minister: food safety depends on unity of all supply chain stakeholders

By May Thet Hnin

ALL stakeholders in food supply chain need to come together in planning for food safety practices to create a quality life, said Dr. Myint Htwe, Union Minister for Health and Sports at a discussion under the titles “Moving Forward in Food Safety”, held at UMFFCCI office tower.

“Manufactures require to adopt good manufacturing practices as well as good storage practices. Also, they need to use quality raw materials. The ministry is raising campaigns for consumers’ awareness of food safety and promoting health literacy. Moreover, we are carrying out food safety measures in accordance with rules, regulations and guidelines. All stakeholders in food supply chain, including manufacturers, consumers and authorities, need to cooperate in this. The ministry has been assessing the market to set food safety standard and norms in order to ensure quality products in the market”, said the Union Minister.

The ministry alone cannot implement this. Concerted efforts need to be exerted by all stakeholders in food industry, including consumer associations, NGOs, CBOS and CSOs, the Union Minister added.

The event was hosted by Myanmar Food Processors and Exporters Association and supported by the Ministry of Agriculture, Livestock and Irrigation, the Ministry of Industry, the Ministry of Commerce, the Ministry of Health and Sports, Yangon Region government, Yangon City Development Committee, the Republic of the Union of Myanmar Federation of Chambers of Commerce and Industry, Myanmar Consumers Union, Food Science and Technology Association and Food Industries Association.

The discussion aims to bolster food export, distribute food products in compliance with national food law and regulations, raise awareness of food safety and effectuate SME development in food chain, protect from importation of substandard food products and disseminate food related-time information.

Officials from government side and chair of Myanmar Food Processors and Exporters Association delivered keynote speeches. Related officials explained policy, rules and regulations regarding food safety, seeking FDA certification for food processing businesses, including export and import, FDA laboratory services, food additive regulations, Good Agriculture Practices, post-harvest technology, labelling affixed on food products.

Myanmar Consumers Union, Food Science and Technology Association and Myanmar Food Processors and Exporters Association also discussed food safety related matters, such as technologies for assuring food quality and safety and uniformity of food safety measures in ASEAN countries.

Manufacturers play a vital role in food safety. Both responsibility and accountability are crucial in production. There is no responsibility for illegally imported goods, which can harm the public health. Therefore, the government should regulate this, said U Aye Win, chair of Myanmar Food Processors and Exporters Association.

The Consumer Protection Law was enacted in 2014. The National Food Law, enacted in 1997, needs to be amended. Prior to institution of labelling law, local products and imported goods are required labelling in Myanmar, according to June’s notification of the government. Details of that notification will be released within months.

High demand seen for Bago Region paddy

By May Thet Hnin

NEWLY-PRODUCED fresh paddy from northern Bago Region is in high demand, with daily purchase of 30,000 baskets, prompting Myanmar Rice Millers Association (MRMA) to call for effective combating illegal paddy export, said officials from MRMA.

“Even a single township can supply thousands of paddy baskets per day. More townships will be joining in the coming harvest season. Millers have to purchase tons of paddy. At that time, some paddies illegally flow out of the country through border trade routes. When that happens all the time, illegal export volume will reach to a peak level, which concerns us”, U Nay Lin Zin, general secretary of MRMA said.

Local low-grade paddy variety (Aumalta) is highly demanded. Fresh paddy fetches Ks650,000 per 100 baskets, whereas dried paddy is offered at around Ks750,000. Local millers cannot offer such a high price as they will surely not make profit in domestic market.

With excessive illegal paddy export, the country might face difficulties in reaching rice export target of 2.5 million tons in current fiscal year 2018-2019 tons, U Nay Lin Zin stressed.

Despite the country’s export restriction for paddy, China has demanded paddy at a good price for the past three years. Therefore, MRMA put forward its report to the Ministry of Commerce in 2017. Also, the government has instructed related officials to counter the illegal trade under the existing law. Nevertheless, that continues to happen, and asking millers to report again as those illegal trade might affect the revenue of the country in certain way, said U Nay Lin Zin.

Paddy can be freely traded within the country and so, its trading in the country’s territory cannot be regulated. This being so, there are many difficulties in tracking and tracing illicit paddy trade.

Illegal paddy export threatens milling operations, which might affect the whole supply chain, including rice mill jobs and rice products and related livestock industry. Local rice price will also rise in this situation. The growing illegal trade will affect maintaining public trust and the efficiencies of administrative mechanism. Additionally, that might lead to more problems in the value-added production industry, he added.

When monsoon paddy is harvested, merchants purchase them from Ayeawaddy, Yangon, Bago, Mandalay and Sagaing regions to send them to border market. This could drastically affect the whole agricultural supply chain, said U Tin Aung, deputy chair of MRMA.

“China might have their own particular reason for paddy purchase when they can buy rice as much as they want. We cannot know what specific reason of direct paddy purchase China has”, he continued.

The MRMA will report those difficulties again at the meeting between Private Sector Development Committee led by Vice President (1) and private entrepreneurs.
Union Minister attends closing of 69th session of UNHCR’s Executive Committee

UNION Minister for Social Welfare, Relief and Resettlement Dr Win Myat Aye attended the closing of 69th session of UNHCR’s Executive Committee in Geneva, Switzerland, yesterday.

Representatives of 14 countries attended the session, held from 1 to 5 October.

In his speech, Union Minister Dr Win Myat Aye briefed on consequences of the terrorist attacks in Rakhine State, returning to normalcy in the state, challenges for bringing about peaceful coexistence between the two different communities, works of the Union Enterprise for Humanitarian Assistance, Resettlement and Development in Rakhine State, implementing recommendations on Rakhine State, works done in accordance with the agreement between Bangladesh and Myanmar, cooperation with UNDP and UNHCR, establishment of the Independent Commission of Enquiry and efforts for accepting the returnees with human dignity.

Besides, the Union Minister held talks with leaders of the delegations to the session over cooperation for rehabilitation in Myanmar.

He also held talks with Mr. Gilles Carbonnier, Vice-President of the International Committee of the Red Cross, at the head of the ICRC in Geneva.

At the meeting, Union Minister Dr Win Myat Aye acknowledged the cooperation of the ICRC in Rakhine State through its Red Cross Movement after the terrorist attacks.

He also said that Myanmar is carrying out development works in Rakhine State in accordance with the policy of seeking solutions through negotiations and discussions leading to coexistence between different communities.

The Union Minister also stressed the importance of ensuring transparency in cooperation with local people and local social organizations to gain better results.

ICRC’s vice-president said he took pride in carrying out humanitarian activities in Myanmar, pledging that ICRC would continue its cooperation in giving aid to people not only in Rakhine but also in Kachin and Shan.

Mr. Gilles Carbonnier said ICRC would continue its efforts for reducing landmine incidents in Myanmar.

Union Minister Dr. Win Myat Aye also met with Mr. Antonio Vittorio, Director-General of the International Office for Migration (IOM) on 4 October in Geneva and expressed thanks for IOM’s assistance for disaster reducing efforts and damage and loss assessment during and after disasters.

Union Minister attends “The Bankers’ Perspective on Renewables” discussion

UNION MINISTER for Electricity and Energy U Win Khaing attended the “The Bankers’ Perspective on Renewables” discussion held at India Expo Centre, New Delhi, India yesterday morning.

Next, the Union Minister discussed with Adani Group on cooperating in electricity works.

Later in the afternoon, the Union Minister met with Minister of State (IC) for Power and New and Renewable Energy H.E. Mr Raj Kumar Singh and discussed bilateral cooperation and technical cooperation in renewable energy.

Independent Commission of Enquiry chairperson, members meet

AMBASSADOR Rosario Manalo, Independent Commission of Enquiry Chairperson, former Deputy Foreign Minister of the Philippines and former chair and current representative of the Philippines to CEDAW, Ambassador Kenzo Oshima, former Permanent Representative of Japan to the United Nations, former United Nations Undersecretary-General for Humanitarian Affairs and Emergency Relief Coordinator and Independent Commission of Enquiry member, U Mya Thein and Prof. Dr. Aung Tun Thet met and discussed at Sedona Hotel in Yangon yesterday morning.

The government formed the Independent Commission of Enquiry to address reconciliation, peace, stability and development in Rakhine State.

Union Minister attends closing of 69th session of UNHCR’s Executive Committee

UNION Minister for Social Welfare, Relief and Resettlement Dr Win Myat Aye attended the closing of 69th session of UNHCR’s Executive Committee in Nay Pyi Taw yesterday afternoon, where the Union Civil Service Board Chairman Dr Win Thein delivered a speech.

It was reported that this trade show will be held from 5 to 8 October. —MNA

Coord meeting held for Development of National Strategic Plan of the National Drug Control Policy

A COORDINATION meeting for Development of National Strategic Plan of the National Drug Control Policy was held at Shwe San Eain Hotel, Nay Pyi Taw, yesterday morning, Police Brigadier General Win Naing, Central Committee for Drug Abuse Control (CCDAC) joint secretary and head of Myanmar Anti-Drug Police Force, representatives from 10 groups under the Central Committee for Drug Abuse Control, senior officers from Myanmar Police Force, representatives from UNODC, experts and invited guests, totalling 55 attended the meeting.

At the meeting, Police Brigadier General Win Naing delivered the opening remarks, followed by group discussion on reducing production, alternative development, international collaboration, increasing research works, to be in accord with human rights, reducing consumption and health sector and timeline for National Strategic Plan to implement the National Drug Control Policy.

The coordination meeting came to a close after Police Brigadier General Win Naing delivered a closing speech. —MNA

Myanmar delegation to attend Asia Film Centre Roundtable in Busan, ROK

A FILM delegation left for the Republic of Korea yesterday to attend the Busan International Film Festival and Asia Film Centre Roundtable.

The three-member delegation is led by U Ye Naing, Director-General of the Information and Public Relations Department of the Ministry of Information.

AFC Roundtable is conducted by the Korean Film Council (KFC) with the aim of seeking ways for development of films in Asian countries and promoting exchange of culture among Asian countries as part of efforts for establishing Asian Film Centre.

Besides, members of the delegation including film expert Daw Swe Zin Htike will give presentation about efforts for development of film industry in Myanmar at the 2018 LINK of CINE-ASIA’s Rising Asia Session conducted by Busan Film Commission. —MNA
There are three vital organs in a state. They are the law-making organ, or parliament, the executive organ or government, and the judicial organ or the judiciary. As regards the term, “government,” Black’s Law Dictionary has explained in detail: “Governmen[t] is the structure of principles and rules defining the powers, duties, responsibilities, and organization is regulated.” The government “is the supremacy in a nation or a state.”

And in this modern age, there are essential ingredients of a democratically elected government or a good government, with clear guidelines. To mention just in essence, performing public service collectively to the country, and serving and safeguard the public interests, ensuring rule of law in the government’s functions and business; these are the essential ingredients of such a government. In a sense, there should be no nepotism, no cronyism, no over a man's will.” The greater the power, the more dangerous the abuse. The power, thus, is too wide a term to define in a single sense. If Power tends to corrupt, and absolute power corrupts absolutely. In this sense, “corruption” is depravity, perversion or fraud, an impairment of integrity, virtue or moral principle, especially the impairment of a public official’s duty by bribery. Corruption also is the act of doing something with the intent to give some advantage to one who is paid, there is one who gives and one who receives. Corruption in most cases has become a participatory venture which both the giver and the taker benefit. The only loser is the state.

Japan, Australia to hold foreign, defence ministers’ talks on Wednesday

TOKYO — The foreign and defence ministers of Japan and Australia will hold talks in Sydney next Wednesday to deepen security ties and cooperation over regional issues such as North Korea, Japan’s Foreign Ministry said Friday.

At the “two-plus-two” meeting, the countries are expected to discuss possible joint exercises by Japan’s Self-Defence Forces and the Australian military as well as how to respond to North Korea, which has been evading UN sanctions through ship-to-ship transfers of goods at sea.

From Japan, Foreign Minister Taro Kono and Defence Minister Takeshi Iwaya will attend the meeting.

After visiting Australia, Kono will travel on to East Timor and New Zealand to strengthen bilateral ties and seek co-ordination over regional issues in the Indo-Pacific region, according to the ministry. He will return to Japan on 16 October.

S Korea ex-president Lee jailed for 15 years over corruption

SEOUL — Former South Korean president Lee Myung-bak was jailed for 15 years for corruption Friday, becoming the latest of the country’s ex-leaders to be sent to prison.

The 76-year-old CEO-turned-president, who served from 2008 to 2013, was found guilty on charges including bribery and embezzlement and ordered to pay a fine of 13 billion won ($11.5 million) by the Seoul Central District Court.

“Bringing everything into consideration, heavy punishment for the accused is inevitable,” said a judge during the trial that was live televised.

Lee was not in attendance, citing ill-health.

The former South Korean leader was indicted in April on charges including bribery, embezzlement and abuse of power. —AFP

Toyota announces new recall of 2.4 million hybrid cars

TOKYO — Japanese car giant Toyota said Friday it is recalling more than 2.4 million hybrid cars over a fault that could cause crashes, just a month after another recall affecting hybrids.

The firm in September said it was recalling more than one million hybrid cars globally after uncovering a technical problem that could cause fires.

The latest recall affects several models of Toyota’s Prius and its Auris hybrid vehicles produced between October 2008 and November 2014, with more than a million of the affected cars in Japan.

Another 830,000 are in North America, 290,000 in Europe, 3,000 in China, and the rest in other parts of the world.

In a statement, Toyota said the cars involved in the recall had already been involved in previous recalls in 2014 and 2015, but “the remedy conducted then did not anticipate the new condition identified in this recall.”

The problem identified arises when the cars fail to enter “failsafe driving mode as intended.”

“If this occurs, the vehicle could lose power and stall. While power steering and braking would remain operational, a vehicle stall while driving at higher speeds could increase the risk of a crash,” Toyota said.

Japan’s transportation ministry said Toyota had reported three malfunctions locally related to the issue, but no accidents.

The car giant last month issued a recall for 1.03 million cars globally over an issue related to wiring that could cause fires in vehicles.

Toyota has sold more than 10 million hybrid gasoline-electric vehicles globally, including the Prius, since 1997.

In 2016, Toyota announced the recall of 3.37 million vehicles globally over problems with air bags and a fuel emission control unit. —AFP

Spanish cities grapple with invasion of electric scooters

MADRID — Cities across Spain are grappling with electric scooters that have popped up on sidewalks across the country, helping riders zip around but exacerbating drivers and pedestrians.

In Madrid public opinion is divided over the hundreds of electric scooters which California-based start-up Lime — partly owned by ride-hailing Uber and Google parent company Alphabet — has made available since mid-August.

Unlike schemes involving shared bicycles that typically must be left in docking stations, the scooters are dockless, leaving riders responsible for parking them out of the way. The next rider can find the nearest scooter with a smartphone app, unlock it and use it for a fee.

Similar electric scooter sharing programmes have been introduced in other European cities including Paris, Vienna and Zurich.

In Madrid, Lime’s scooters — which have already been used over 100,000 times — are tolerat-

ed by the left-wing city hall, intent on reducing pollution.

But the scooters are often left in places where they obstruct sidewalks — and their users often flout pedestrian or hog roads. Last month a video of two people, including a child, wearing masks while they raced along a highway near the Mediterranean port of Valencia on an electric scooter went viral.

“They don’t respect anything at all. We need rules. It’s crazy. They ride on lanes reserved for buses and taxis. They cross in front of cars,” Fernando Sobrino, a 59-year-old taxi driver, told AFP as he waited for passengers in the centre of Madrid.

Jose Manuell, a 55-year-old salesman, complained the scooters “ride on sidewalks without any control.”

“There is a risk of getting rear-ended by one as happened to me the other day,” he said as he made his way along the Gran Via, a busiest shopping street in central Madrid.

Dangerous and annoying

The arrival of the scooters in Madrid follows the introduction of a public electric bike share system in June 2014. Users of the scooters are delighted. “You move around faster; you can visit more areas, it’s relaxing and easy to use,” said Monica Rodriguez, 58, at Madrid’s bustling Retiro park.

She admitted, though, that the scooters can be annoying for people who are walking.

The introduction of this new form of transport caught big Spanish cities off guard. In Madrid, which is home to around 3.2 million people, there are no laws regulating the use of scooters.

Now the municipality plans to introduce a new mobility plan that will include rules for scooters.

The scenario was repeated in Valencia, which has an extensive network of bike lanes.

Lime deployed a fleet of scooters in the city in August without authorisation from city hall, which demands a licence for anyone who carries out a commercial activity on public roads.

Lime’s scooters were removed and the firm was slapped with a fine. It is now trying to convince Valencia city hall to allow it to pay a fee in exchange for an operating licence.

Lime’s representative in Spain, Alvaro Salvat, said he regrets the lack of specific laws for electric scooters in Madrid and most Spanish cities.

“We are the first to ask for them for our users, for residents, so we know where to go and where not to go,” he told AFP. —AFP

OSLO (Norway) — Congolese doctor Denis Mukwege and Yazidi campaigner Nadia Murad won the 2018 Nobel Peace Prize on Friday for their work in fighting sexual violence in conflicts around the world. The pair won the award “for their efforts to end the use of sexual violence as a weapon of war and armed conflict,” Nobel committee chairwoman Berit Reiss-Andersen said in unveiling the winners in Oslo. “A more peaceful world can only be achieved if women and their fundamental rights and security are recognised and protected in war,” she said.

One a doctor, the other a former Islamic State sex slave, both have come to represent the struggle against a global scourge which goes well beyond any single conflict, as the #MeToo movement has shown. The prize was announced as #MeToo marks its first anniversary after a year in which allegations of sexual abuse, rape and harassment have toppled dozens of powerful men.

By recognising the pair’s work, the Nobel committee has placed a spotlight on the use of sexual violence in war as a global problem.

‘Weapon of mass destruction’

Mukwege, 63, was recognised for two decades of work to help women recover from the violence and trauma of rape in the war-torn eastern Democratic Republic of Congo. Women, children and even babies just a few months old, Mukwege has treated thousands of victims of rape at Panzi hospital which he founded in 1999 in South Kivu. Known as “Doctor Miracle”, he is an outspoken critic of the abuse of women during war who has described rape as “a weapon of mass destruction”.

“Denis Mukwege is the foremost, most unifying symbol, both nationally and internationally, of the struggle to end sexual violence in war and armed conflicts,” Reiss-Andersen said.

Alongside Mukwege, the committee honoured Murad, a 25-year-old Iraqi woman from the Yazidi community who in 2014 was kidnapped by Islamic State militants and endured three months as a sex slave before managing to escape.

She was one of thousands of Yazidi women and girls who were abducted, raped and brutalised by jihadists during their assault that year on the Kurdish-speaking minority, which the United Nations has described as genocide. Her nightmare began when the jihadists stormed her village in northern Iraq in August 2014. From there she was taken to Mosul where she was repeatedly gang-raped, tortured and beaten.

“The first thing they did was force us to convert to Islam”, she told AFP two years ago. “After conversion, they did whatever they wanted.” After her escape, she quickly became a figurehead for efforts to protect the Yazidi community and was later named a UN ambassador for victims of human trafficking. The Nobel committee said Murad had shown “uncommon courage” in recounting her own sufferings and speaking up on behalf of other victims. “She refused to accept the social codes that require women to remain silent and ashamed of the abuses to which they have been subjected.”

‘Personal security at risk’

Both Mukwege and Murad had “put their personal security at risk” by focusing attention on and combating such war crimes, Reiss-Andersen said.

“Denis Mukwege is the helper who has devoted his life to defending these victims. Nadia Murad is the witness who tells of the abuses perpetrated against her and others. Each of them in their own way has helped to give greater visibility to war-time sexual violence, so that the perpetrators can be held accountable.” Whether in Africa or the Middle East, rape has been used against hundreds of thousands of people, either as a weapon of war or tool in the oppression of minorities. Sexual violence as a weapon of war has been going on for centuries, but it was only recently acknowledged as a crime against humanity with the UN’s adoption in 2008 of Resolution 1820.

And the #MeToo movement, which rose up a year ago following allegations of rape, sexual abuse and harassment against Hollywood director Harvey Weinstein and has since swept the globe, has also had a very sobering effect. “#MeToo and war crimes is not quite the same thing. But they do however, have that in common: that it is important to see the suffering of women, to see the abuses and to achieve that it is important that women leave the concept of shame and speak out,” said Reiss-Andersen.

It was a #MeToo scandal that prompted the Swedish Academy to postpone this year’s Literature Prize for the first time in 70 years. Mukwege and Murad will share the prestigious prize of a gold medal, a diploma and a cheque for nine million Swedish kronor — almost $1 million or 862,000 euros.

The award will be presented at a ceremony in Oslo on December 10, the anniversary of the death of prize creator Alfred Nobel, a Swedish philanthropist and scientist who died in 1896.

— AFP

Earlier predictions for the Nobel Peace Prize

OSLO (Norway) — The bookies’ odds point towards the Koreans, or Donald Trump. The experts are betting on the fight against sexual violence or defenders of the press. But all speculation ends Friday when the Nobel Peace Prize is unveiled in Oslo.

At 0900 GMT, the annual Nobel prize-giving week reaches its peak as the five-member Norwegian committee ends the guessing game by announcing this year’s winner.

And anticipation is likely to be heightened after the postponement of this year’s Literature Prize for the first time in 70 years over a rape scandal that came to light as part of the MeToo movement which took off exactly a year ago.

This year, a total of 331 individuals and organisations were nominated for the prestigious peace award, almost a record number.

But with the list a closely guarded secret, guessing who might be a contender is largely a game of chance.

Among the bookmakers, the choice was largely unanimous with North Korean leader Kim Jong Un and his South Korean counterpart Moon Jae-in front-runners for the prize for their efforts at rapprochement between the two nations.

But choosing Kim may be a step too far for the Norwegian committee, given the UN’s damning verdict on North Korea’s “long-standing and ongoing systematic, widespread and gross violations of human rights”.

Another unexpected favourite is Donald Trump, who at 7-1 is one of three frontrunners flagged by online bookies Betsson, with the odds suggesting the bombastic American president is 10 times more likely to win than figures like France’s Emmanuel Macron or Russia’s Vladimir Putin.

Taking a step back from the international spotlight, several Nobel experts see the prize honouring those involved in the fight against sexual violence at a time when the aftershocks of the MeToo movement are still making waves around the globe.

A top contender would likely be Congolese gynaecologist Denis Mukwege, better known as “Doctor Miracle”, who has spent two decades helping women recover from the violence and trauma of rape in war-torn eastern Democratic Republic of Congo.

Another possible laureate is Nadia Murad, a 25-year-old Yazidi woman who was kidnapped by Islamic State militants in 2014 and endured three months as a sex slave before managing to escape — AFP
Indonesia raises death toll from quake, tsunami to 1,558

PALU (Indonesia) — Indonesia said Friday the death toll from a powerful earthquake and tsunami that struck the central Indonesian island of Sulawesi a week ago has risen to 1,558.

As rescue and recovery efforts continue, the National Disaster Mitigation Agency said 113 others remain missing, with the number of people displaced following the magnitude 7.5 quake and ensuing tsunami unchanged at 70,621.

Palu, the capital of Central Sulawesi province, and the nearby coastal town of Donggala are two of the worst-hit areas where most of the deaths have occurred after bearing the brunt of the tsunami waves up to 3 meters high.

As many locals desperately wait for basic supplies and other kinds of help, national police said Thursday evening that 42 people have been arrested for allegedly looting minimizing, shops or vehicles carrying humanitarian assistance.

Indonesia sits in one of the world’s most active seismic regions in which a large number of earthquakes and volcanic eruptions occur. — Kyodo News

Australia farmers welcome rain relief amid severe drought

SYDNEY — Farmers in drought-stricken parts of Australia are celebrating after the heavens opened up this week, inundating parched lands with more than a month’s rain in one day following the country’s driest September on record.

Eastern Australia has been suffering from an extended dry period — in some regions stretching across several years — leaving farmers struggling to keep their sheep and cattle alive with dwindling supplies of feed.

A trough system moving across New South Wales state in the southeast of the vast continent since Wednesday has brought wild weather, including heavy rain, to bone-dry towns including Broken Hill and Dubbo.

“A lot of New South Wales is in drought so getting rain anywhere is quite good,” Bureau of Meteorology forecaster Chua Zhi-Weng told AFP.

The outback town of Broken Hill received 34.2 millimetres (1.35 inches) of rain on Wednesday, above the October monthly average of 24.2 millimetres and more than what they had received in the previous nine months.

“Forty-one millimetres! It’s bloody great to see. I’ve lost my words,” one farmer near the outback town of Menindee, which received some 50 millimetres in one day, told the Australian Broadcasting Corporation.

“It doesn’t matter how old you are, rain brings people joy,” another farmer told the ABC.

In the state’s central-west, towns battling the dry such as Dubbo received 45 millimetres of rain on Thursday.

Further north in the inland regions of Queensland state, graziers welcomed the arrival of storms that gave their fields a much-needed drenching.

Despite the wet conditions, meteorologists said more rain was needed in the coming weeks and months to break the drought.

“We do need some more follow-up rain to overcome the deficit that’s been built up over the time we haven’t had enough rain,” Chua added.

The wet season in NSW began on Monday that rainfall in September was “very much below average nationally, and particularly low across the southern mainland”.

“The year-to-date has also been exceptionally dry over the mainland southeast, with significant rainfall deficiencies continuing to affect large areas of eastern Australia at timescales out to around two years duration,” the bureau added.

Farmers will also get little comfort from the weather bureau’s forecast of a drier and particular low across the cultural heartland in mid-September.

Australia hit by M5.2 quake, biggest since deadly September temblor

SAPPORO — An earthquake with an estimated magnitude of 5.2 jolted Hokkaido on Friday morning, the biggest since a deadly temblor that rocked Japan’s northernmost main island about a month ago, the Japan Meteorological Agency said.

The 8.38 am quake, which occurred in a southern part of the island at a depth of around 30 kilometers, registered lower 5 on the Japanese seismic intensity scale of 7 in the towns of Atsuma and Mukawa, the agency said.

No one was injured in Atsuma and Mukawa, though a woman in her 30s sustained an injury in Sapporo, which recorded 3 on the intensity scale, after a shelf collapsed at her home, according to a local fire department.

No tsunami was seen after the quake. Hokkaido Electric Power Co. said it found no abnormality at its nuclear and coal-fired power plants in the prefecture.

Friday’s temblor was the biggest since the magnitude 6.7 quake on 6 September that claimed the lives of 41 and caused a prefecture-wide blackout. More than 10,000 buildings were damaged and hundreds of residents were still staying at evacuation centers as of Friday.

Yasuhiro Tsuzuki, a 72-year-old woman in Atsuma, said the quake reminded her of one in September. “I was gradually finding emotional closure but it broke my heart,” she said.

“The jolt is believed to be part of seismic activities linked to the earthquake last month. More quakes are expected for a while so I want people to ensure their furniture is securely fixed,” said Toshiyuki Matsumori, head of the agency’s earthquake and tsunami monitoring division.

At a press conference on Friday, the agency called on residents to be prepared for about a week for potential quakes with an intensity of 4 or higher.

It also urged residents to brace for heavy rain and mudslides as another typhoon is expected to approach Hokkaido on Sunday.

The Ground Self-Defense Force said it has detected no fresh landslides in an aerial survey by helicopter over the town of Atsuma.

Although the quake temporarily suspended the operation of a shinkansen bullet train and local trains, New Chitose Airport was unaffected, according to Hokkaido Railway Co. and the transport ministry.

Pressure on Duterte as Philippine inflation jumps

MANILA — Philippine inflation jumped to an almost 10-year high in September, data showed Friday, putting pressure on President Rodrigo Duterte to act as the cost of food and fuel hit the country’s poor in the pocket.

Consumer prices have risen every month this year, with food surging further after Typhoon Mangkhut, the world’s most powerful storm in 2018, smashed into the country’s northern agricultural heartland in mid-September.

Increases have been powered by a collision of factors including Duterte’s massive spending on a broad infrastructure building effort, climbing oil prices and weak farm output.

Consumer price increases accelerated to 6.7 percent, from 6.4 percent in August, in the steepest climb since February 2009, the Philippine Statistics Authority said.

“We understand that many are feeling the hit of a faster inflation rate, particularly those who toil so hard just to keep up,” Duterte’s economics team said.

The tens of millions who get by on less than $2 per day in the Philippines have been especially hard hit by the increase.

The government has boosted imports of rice, the national cereal staple, following shortages but authorities acknowledged Friday that grain prices remain “elevated” due to the typhoon.

Analyst Astro del Castillo told AFP the problem “will not be solved overnight” because some factors are beyond the government’s control, such as oil prices. Global crude prices are sitting at a four-year high around $85 and there are warnings they could break $100.

However, del Castillo said the people expect the president to do something about it.

“You’ve seen the (opinion) surveys. The people would like inflation to be the government’s top priority,” he added. — AFP
Charity urges aid for sinking cities

PARIS — Governments must provide “major” investment in flood risk reduction to save coastal cities around the world, a charity said Friday, as rising seas and sinking urban areas pose unprecedented threats to millions of homes.

Cities such as Jakarta — which is sinking 23 centimetres (0.8 feet) each year — Bangkok, Houston and Shanghai risk being inundated within decades as a mixture of poor planning, megastorms and higher tides wreaks havoc.

London-based charity Christian Aid studied eight coastal cities around the world that are sinking, potentially compounding the misery that rising sea levels will inflict on inhabitants.

“The impacts of climate change will be seen across the world and as you saw this summer we had a very warm northern hemisphere, very abnormally so,” Kat Kramer, global climate lead at Christian Aid, told AFP.

“Many of the big cities in the developing world are extraordinarily vulnerable to climate change which is why it’s very important that they are given support to adapt and build resilience.”

“Lives are already being lost through extreme weather events,” Kramer added.

The call coincides with the release next week of a major United Nations report expected to urge governments to drastically increase their efforts to limit global temperature rises.

The Intergovernmental Panel on Climate Change will examine the effect of global warming of 1.5 degrees Celsius (2.7 degrees Fahrenheit) above preindustrial levels.

That is the most ambitious target that nations signed up to in the 2015 Paris treaty on climate change, which aims to limit temperature increases to “well below 2°C” by the end of the century.

‘Natural measures’

But even keeping the world within that temperature range will have a catastrophic impact on coastal cities, with some studies showing a 2°C increase could raise global sea levels by up to half a metre.

Thursday’s paper picked out Jakarta, Bangkok, Lagos, Manila, Dharma, Shanghai, Houston and London — home to a combined 100 million people — as particularly at risk.

The charity highlighted a host of local factors that contribute to sinking, the majority manmade.

In Jakarta, a city of 10 million people that sits on a confluence of 13 rivers, half the population lacks access to piped water, so many dig illegal wells to extract groundwater.

This puts greater pressure on the soil, which doesn’t get replenished as it should by rainfall as nearly all of the city is covered in asphalt and concrete.

In Houston, efforts to provide a growing population with drinking water have also caused land to sink — an effect made worse by sea level rises and storm surges.

Kramer said large infrastructure such as sea walls or London’s Thames Barrier could help mitigate the damage, but also urged governments to preserve nature’s own defences.

“Something noticeable with the Asian tsunami (2004) of was that areas that had their mangroves intact had greater resilience to that kind of storm surge,” she said.

“There are many ways that natural measures can help if they are left intact.” — AFP

Wind turbines contribute to climate change

WASHINGTON — Wind turbines, designed as an alternative to fossil fuels, still contribute to climate change due to the way they redistribute heat and moisture in the atmosphere, according to a study published on Thursday.

Researchers from Harvard University found that powering the entire United States with wind energy would cause a 0.54 degree Celsius ground temperature rise in the area where the turbines were located, and a 0.24°C increase across the continental United States. “Wind beats coal by any environmental measure, but that doesn’t mean that its impacts are negligible,” said David Keith, an engineering and public policy professor and senior author of the study, published in Joule. By comparison, the average global temperature has risen by approximately one degree since the end of the 19th century. The Paris climate accord, meanwhile, calls upon countries to limit temperature increases to between 1.5°C to 2°C to avoid serious environmental consequences. Previous studies have also examined the impact of wind turbines on climate change. One recent study, published in the journal Science, concluded that covering an area of the Sahara desert with wind turbines would affect local temperature, rainfall, and in turn, vegetation.

The Harvard researchers said that installing solar panels would have an impact around 10 times smaller than wind turbines for the same energy generation rate.— AFP

Old and new art worlds meet at London Frieze

LONDON (United Kingdom) — The art world descended on London this week for the Frieze Art Fair, with over 160 top international galleries making their pitch to dealers, artists and assorted eccentrics.

Alongside the US and European powerhouses are scores of galleries from outside the traditional hubs of the industry, flexing their increasing muscle on the world stage.

“The presence of non-western art is very strongly felt across the fair,” Shanaan Jhaveri, a curator at New York’s Metropolitan Museum of Art, told AFP on Thursday.

“There is a gradual shift that is taking place, there is growing integration of non-western work.”

The event at Regent’s Park in London comprises the main Frieze, which focuses on contemporary works, Frieze Masters, which showcases more traditional art, and Frieze Sculpture – with over 1,000 artists on display in total. The event attracts dealers with looking for the next masterpiece or breakthrough artist, but also tens of thousands of champagne-drinking enthusiasts, giving it a festival feel.

Top New York galleries including Gagosian, David Zwirner and 47 Canal all have booths at the event, along with London’s White Cube and Victoria Miro.

They rub shoulders with galleries from India, China, Mexico, South Africa and Guatemala, among other countries, reflecting the rise of artists and buyers in those markets. Among the works on display are US artist Josh Kline’s “Unemployed Journalist”, which explores the rise of automation and its possible effect on middle-class employment. The work is a 3D printed mannequin of a middle-aged reporter wrapped up in a plastic bag slumped on the floor.

Mumbai’s Project 88 gallery, which has helped boost Indian art at Frieze over the past 10 years, has works from five artists, including Sandeep Mukherjee’s “Tree Skin” — six aluminium panels molded into an organic tree-like form. Gallery owner Bree Goswami told AFP that London’s “unique history” with India meant that Frieze was the ideal place to show off their works. Non-western artists are broadening the event’s horizons. “Each region in the non-west has its own economy; or community or ecosystem,” Jhaveri said. “They operate within those, so their perspectives are different, their relationship to scale — literally and metaphorically — is different as well. “You see that variation — the use of material, the concerns they are engaged with, which are manifold,” he added. — AFP

Asia’s stars grace the red carpet at Busan Film Festival

BUSAN (South Korea) — The looming threat of Typhoon Kong-Rey failed to cloud a glittering opening to the 23rd Busan International Film Festival (BIFF) Thursday, with a parade of the region’s brightest stars gracing the red carpet.

South Korean K-pop singer-turned-actress Choi Soo-young was joined at the festival’s opening gala by the likes of Hong Kong actress Sammi Cheng, here with the drama “First Night Nerves”, and China’s Zhao Tao, who stars in the latest Jia Zhangke feature “Ash is Purest White”.

Veteran Japanese composer and pianist Ryuichi Sakamoto, in town to collect the Asian Film Centre over the next 48 hours, as the stormfront was projected to close in on the South Korean coast over the next 48 hours. After being downgraded from Super Typhoon status on Thursday, organisers hoped the storm would weaken further as it moved north.

Regardless, the local weather bureau has suggested there was an 80 to 90 percent chance of a direct hit on Busan, with winds of up to 110 kilometres per hour (68 mph) and heavy rain.

Meet-the-public events scheduled for the city’s Haedong Yonggungsa temple on Thursday, featuring the likes of local star Moon So-ri, have been moved under cover at the Busan Film Centre over the next few days, with memories of the havoc wrought by Typhoon Chaba in 2016 still fresh in the minds of authorities.

The petition was on Thursday launched a petition in support of the proposal, backed by the national midwifery association. The petition was submitted by the local midwifery association.

The petition was on Thursday signed by 100,000 people. It sets out to demand that the Finnish government should take action to protect breastfeeding mothers from being driven out of public places.

A petition has been launched in support of Finnish demands for legislation to protect breastfeeding mothers from being driven out of public places. — AFP

Finns demand legal right to breastfeed in public

HELSINKI (Finland) — Finnish health officials are demanding a law to protect breastfeeding mothers from being driven out of public places, including restaurants and coffee shops, in one of western Europe’s most gender equal nations.

The public health authority (THL) called last year for new legislation securing women’s rights to nurse a child anywhere in public across Finland.

Now campaigners have launched a petition in support of the proposal, backed by the national midwifery association. The petition was on Thursday signed by 100,000 people.

It sets out to demand that the Finnish government should take action to protect breastfeeding mothers from being driven out of public places.

Scientists zero in on cause of unusual Indonesian disaster

JAKARTA — Almost a week after a quake-tsunami wreaked devastation in central Indonesia, scientists are zeroing in on what they believe caused the highly unusual natural disaster.

The 7.5 magnitude earthquake hit off Sulawesi island Friday and sent destructive waves charging into the coast, reducing buildings in Palu to rubble and sweeping people to their deaths.

The city was not regarded as being at high-risk of a tsunami and was left grossly unprepared for the catastrophe, which has so far claimed more than 1,400 lives with hundreds more injured and missing. Now experts are piecing together the unlikely chain of events which laid waste to Palu.

“The quake was a sideways — rather than vertical — movement of tectonic plates, seen as unlikely to generate a tsunami.

But after sifting through mounds of data, scientists believe that the powerful tremor occurred over the vast length of a fault line, triggering underwater landslides that caused the tidal waves.

“This is an earthquake that is not the standard mechanism to generate a tsunami,” Costas Synolakis, director of the University of Southern California’s Tsunami Research Center, told AFP.

“It’s fairly rare.”

When the monster waves did roll in, their force was intensified as they rushed down a narrow bay into Palu.

In recent years Sumatra has been the main focus of authorities’ concern when it comes to tsunamis as Aceh, on the island’s northern tip, was devastated by a deadly quake-triggered tsunami in 2004.

Officials fear another major quake and tsunami are inevitable at some point on the highly volatile fault line off the island’s west coast, meaning there was greater vigilance towards the threat than in Sulawesi.

Apart from a handful of tsunami experts, few seemed worried that the fault line that cut through Palu would produce a tsunami, particularly as it is what is known as a “strike-slip” fault, where tectonic plates move sideways.

In the Aceh tsunami and the majority of others, destructive waves were generated by a violent upward thrust of the Earth’s crust, not a sideways movement.

But such was the force of the quake off Sulawesi and the aftershocks that followed, one or more underwater landslides are believed to have occurred that displaced huge quantities of water and sent waves barrelling into the coast.

‘Have to learn from this’

“There is reasonable confidence that this tsunami was triggered at least partially by a landslide,” Adam Switzer, a tsunami expert from Nanyang Technological University’s Earth Observatory of Singapore, told AFP.

“It’s very unlikely the earthquake alone could generate a tsunami of that size.”

Even before the tsunami hit, the quake and the aftershocks that followed caused widespread devastation along the Sulawesi coast, with many buildings left in ruins and huge cracks ripped in roads. — AFP

Astronauts return to Earth from ISS amid US-Russia tensions

ASTANA (Kazakhstan) — Two American astronauts and a Russian cosmonaut returned to Earth Thursday wrapping up a six-month mission at the International Space Station as tensions between Washington and Moscow threaten a rare area of cooperation.

NASA astronauts Drew Feustel and Ricky Arnold and Oleg Artemyev of Roscosmos touched down on steppe land southeast of the Kazakh town of Dzhezkazgan at the expected time of 1145 GMT.

The landing is the first since Russian space chief Dimitri Rogozin bemoaned “problems” in the Russian space agency’s cooperation with NASA that he attributed to interference from unnamed American officials this week.

The outspoken official also said Russian investigators believed a small hole that appeared in a Russian space craft docked at the orbiting station in August at the orbiting station in August was made deliberately.

Feustel invoked Hollywood comedy actor Jack Black’s character Nacho Libre as he tweeted farewell to life on the space station. — AFP

Russia to create Moon-linked transport system

KOLOYEV (Moscow Region) — Russia will build a permanently working transport system in 6-7 years that will be able to reach the Moon, Russia’s State Space Corporation Roscosmos Chief Dmitry Rogozin said on Thursday.

“Today the Russian Federation has the sole space transport system so far. We have carrier rockets and manned spacecraft. Ballistics specialists of the Energia Rocket and Space Corporation have made calculations of our possibilities. In about 6-7 years, we will be able, using already the Angara-A5 rocket, in case that it blasts off from the Vostochny spaceport beginning from 2023-2024, we will be able, even using the current manned spacecraft, to ensure the permanently operating transport system capable of reaching the Moon and working in the lunar orbit,” the Roscosmos chief said.

So far, Americans are planning their expedition without having the necessary spacecraft, Rogozin said. — AFP

NASA on Wednesday expressed doubts over the theory that the hole was the result of sabotage.

The ISS is one of the few areas of light Russia-US cooperation that remains unaffected by the crisis in ties, including after Washington’s sanctions against Russia over Ukraine and other crises.

Earlier the ISS hosted the usual emotional goodbyes as the returning trio left Alexander Gerst of the European Space Agency, NASA’s Serena Auñón-Chancellor and Roscosmos’ Sergey Prokopyev waiting for the next three-person crew’s arrival. The next launch from the Baikonur Cosmodrome in Kazakhstan is scheduled for next Thursday.

Deschamps unfazed by mounting Pogba-Mourinho feud

PARIS (France) — France coach Didier Deschamps insisted Thursday he was not concerned by escalating tensions between Paul Pogba and Manchester United boss Jose Mourinho after he named his latest squad ahead of games against Iceland and Germany.

Pogba told reporters he was “not allowed” to talk as he passed through the post-match mixed zone interview area following United’s 0-0 draw with Valencia in the Champions League on Tuesday for a 0-0 draw against Valencia in the Champions League.

“It was the latest episode in an increasingly tense atmosphere at the club, where a growing rift between Pogba and Mourinho saw the France international stripped of the vice-captaincy last week.

“I’m not worried at all,” Deschamps said.

“Everything is clear with Paul. He knows each time why he’s here and what I expect from him.”

United are languishing down in 10th place in the Premier League after seven matches, and suffered a shock defeat by second-tier Derby County in the League Cup last week.

Pogba, a key member of France’s World Cup-winning side in Russia, also appeared to get under Mourinho’s skin after their recent draw with Wolves by saying United should attack more.

“There’s what’s happening at their clubs but that doesn’t just depend on them,” said Deschamps.

“You can’t separate individual performance from a team performance with certain clubs who can go through a spell where results aren’t as good.

“That goes for all the players. You have to take that into consideration, but the set-up is different when they join us in the France squad.” — AFP

Arsenal avoid Qarabag slip-up as Celtic fall in Austria

Paris (France) — Unai Emery’s Arsenal cruised to a 3-0 victory away to Azeri champions Qarabag in the Europa League on Thursday, while Celtic slumped to a 3-1 defeat against Red Bull Salzburg.

Sokratis bundled in a Nacho Monreal header on four minutes in Baku, with Arsenal academy graduate Emile Smith Rowe and French youngster Matteo Guendouzi also scoring their first goals for the club.

The Gunners extended their winning run to eight matches and lead Sport Lisbon on goal difference at the top of Group E, after the Portuguese side snatched a 2-1 win in Ukraine with two late goals against Vorskla Poltava.

Arsenal’s Armenian midfielder Henrikh Mkhitaryan did not make the trip to Azerbaijan due to diplomatic tensions between the country and his homeland.

Ousmane Edouard fired Celtic ahead after just two minutes in Austria, but a brace from Munas Dabbur and a goal from Japanese forward Takumi Minamino gave Salzburg a second win in two Group B matches.

Celtic lost James Forrest to a straight red card after he upended Andreas Ulmer in the area, with Dabbur converting the resulting penalty to condemn Brendan Rodgers’ side.

Seven-time European champions AC Milan recovered from a goal down at home to Olympiakos to claim a 3-1 victory in Group F, as Patrick Cutrone scored twice either side of a Gonzalo Higuain effort.

Steven Gerrard’s Rangers are in action at home to Rapid Vienna in the later round of games, while Chelsea host Hungarian outfit Vidi at Stamford Bridge. — AFP

Mourinho should stay at Manchester United, says Giggs

LONDON (United Kingdom) — Wales boss Ryan Giggs said on Thursday that Jose Mourinho should remain as Manchester United manager despite the mounting crisis at the club.

Mourinho is under increasing pressure at Old Trafford after a 3-1 defeat against Valencia in the Champions League.

“I said that last time: where do they go?” Giggs said when asked about United at a press conference to announce his Wales squad for matches against Spain and Ireland on Thursday.

“My stance hasn’t changed. United are going through a tough time at the moment. But change now and you will be in the same position in a year or two years quite possibly.”

Giggs has included Gareth Bale in his Wales squad even though the forward missed Real Madrid’s midweek Champions League defeat through injury.

The 25-man squad also includes Arsenal midfielder Aaron Ramsey, who was given special dispensation to miss his side’s Europa League appointment with Qarabag on Thursday as his wife is expecting twins.

Speaking about Bale, Giggs said: “He had a little groin strain. The scan has come back clear and he expects to play on the weekend.”

Giggs does not expect Ramsey’s contract stand-off with Arsenal to harm his Wales form.

“What I have seen is a fantastic professional. I expect the same,” said Giggs. — AFP

Napoli charged by UEFA after fans set off flares in Liverpool game

NAPLES (Italy) — Napoli have been charged by UEFA after fans set off flares during the team’s 1-0 win over Liverpool in the Champions League in Naples.

Lorenzo Insigne’s late winner sent Carlo Ancelotti’s side top of Group C after two games, one point ahead of Paris Saint-Germain and Liverpool.

But on Thursday the Italian side were charged by European football’s governing body for breaching disciplinary regulations, with fans allegedly setting off flares in the home end. — AFP
