State Counsellor attends final day events of 33rd ASEAN Summit, related summits

STATE Counsellor Daw Aung San Suu Kyi, who is attending the 33rd ASEAN Summit in Singapore attended the ASEAN-India Informal Breakfast Summit, 6th ASEAN-US Summit, 21st ASEAN +3 Summit, East Asia Summit Luncheon, 13th East Asia Summit, closing ceremony of 33rd ASEAN Summit and related summits and a ceremony to hand over 2019 ASEAN alternate chairmanship to Thailand yesterday.

The State Counsellor attended the ASEAN-India Informal Breakfast Summit held at the Suntec Expo Convention Center, Singapore at 8.30 a.m. local standard time.

Next, she attended the 6th ASEAN-US Summit and 21st ASEAN +3 Summit.

In the afternoon State Counsellor Daw Aung San Suu Kyi attended the East Asia Summit Luncheon and 13th East Asia Summit.

In the afternoon the State Counsellor attended the closing ceremony of the 33rd ASEAN Summit and related summits and a ceremony to hand over the ASEAN alternating chairmanship and a hammer representing the chairman’s job to the Prime Minister of Thailand General (retired) Prayut Chan-o-cha.

At the event 2018 ASEAN alternating chairman Singapore Prime Minister Mr. Lee Hsien Loong delivered a closing speech and then handed over the ASEAN alternating chairmanship for 2019 and a hammer representing the chairman’s job to the Prime Minister of Thailand General (retired) Prayut Chan-o-cha.

The ceremony came to a close after the Thai Prime Minister who is taking up the duty of ASEAN alternating chairmanship delivered a message of greeting.

The summits, closing ceremony and the ceremony to hand over the ASEAN chairmanship was attended by heads of state, heads of government and ministers from ASEAN countries of Brunei, Cambodia, Laos, Malaysia, Myanmar, Indonesia, the Philippines, Singapore, Thailand and Viet Nam, high ranking ASEAN officials, heads of state, heads of government, ministers and high ranking officials from ASEAN dialogue partner countries, ASEAN Secretary-General, ASEAN permanent representatives and officials. — MNA

Pyidaungsu Hluttaw discusses setting up new foreign economic relations ministry

THE Second Pyidaungsu Hluttaw’s tenth regular session held its second meeting at the Pyidaungsu Hluttaw meeting hall yesterday. At the meeting, Hluttaw representatives discussed the establishment of a new Ministry of Investment and Foreign Economic Relations, proposed by the President recently.

U Sein Win of Maubin constituency, Dr. Khun Win Than Aung of Kachin State constituency 11, Daw Cho Cho of Ottwin constituency, U Than Soe @ Than Soe (Economic) of Yangon Region constituency 4, Naw Chau Tin @ Dr. Arr Kar Moe of Kayin State constituency 7, U Khin Cho of Hlaingthwe constituency, U Zaw Hein of Taninthayi Region constituency 7, U Khin Myo Win of Taninthayi Region constituency 12, and U Kyaw Naing of Yangon Region constituency 12 discussed the setting up of a new ministry.

Afterwards, the Pyidaungsu Hluttaw Speaker announced union level organizations will deliberate on the suggestions made by Hluttaw representatives on 19 November, after which the decision of the Hluttaw will be obtained.

Appointment of U Myo Win as Judge of the Supreme Court of the Union

The Speaker next announced the Hluttaw’s agreement on the appointment of U Myo Win as the Judge of the Supreme Court of the Union. No objections were raised to his appointment.

Hluttaw agree on signing the ASEAN Agreement on E-Commerce

Afterwards, Daw Shwe Shwe Sein Latt of Bago Region constituency 3 and U Thant Sin Maung, said that the agreement was drawn up after several discussions with organisations and high-ranking officials and all ten countries of ASEAN had agreed on it. After discussions involving ministries and departments such as the Union Attorney General Office, the Central Bank of Myanmar, the Ministry of Commerce, the Ministry of Industry, the Ministry of International Cooperation, and the Ministry of Planning and Finance, the agreement was submitted to the economic committees and approved. It was then sent to the Pyidaungsu Hluttaw for its approval. Pyidaungsu Hluttaw Speaker announced the Hluttaw’s approval for the signing of the agreement after obtaining the decision of the Hluttaw.

US$ 24.3 million loan from NEDA

Following this, Deputy Minister for Planning and Finance U Maung Maung Win led a discussion on the Ministry of Construction and Kayin State Government’s obtaining a US$ 24.3 million loan from the Neighbouring Countries Economic Development Cooperation Agency (NEDA), Thailand, for the Greater Mekong Subregion East-West Economic Corridor Towns Development Project.

The Deputy Minister said Myawady Town is an important town for Myanmar-Thailand border trade, while Myawady-Kawkareik road was constructed to meet ASEAN standards, and Friendship Bridge 2 was opened. In future, trade and commerce is expected to develop more in Myawady, and thus the NEDA loan to develop towns along the Greater Mekong Subregion East-West Economic Corridor must be discussed and approved by the Pyidaungsu Hluttaw, he added.

Deputy Minister for Construction U Han Zaw also explained the loan, after which the Pyidaungsu Hluttaw Speaker said the matter will be discussed and decided in the Pyidaungsu Hluttaw meeting scheduled for the last week of this month. The Speaker then asked Hluttaw representatives who want to discuss the matter to submit their names.

Joint Bill Committee report on Bill amending the Sea Customs Act (2018)

Later, the Joint Bill Committee’s report on its findings and comments on a bill to amend the Sea Customs Act (2018) was read by the Committee’s Vice Chairman U Khin Maung Win. The Pyidaungsu Hluttaw Speaker asked Hluttaw representatives who want to table and debate the amendment motion to the bill to register their names.

Hluttaw discusses интерес-free Yuan 80-million loan from PRC

Hluttaw representatives also discussed the interest-free Yuan 80 million loan to Myanmar from the People’s Republic of China for purchase of passenger carriages, which was sent by the President for discussion.

The matter was discussed by Daw Cho Cho of Ottwin constituency, Daw Shwe Shwe Sein Latt of Bago Region constituency 3, Dr. Sai Hla Thein of Shanthakon constituency, U Win Maung of Magway Region constituency 6, U Aung Thike of Seikphyu constituency, U Naing Thila of Mon State constituency 7, U Tin Aung Tun of Magway Region constituency 5, U Mya Sein of Dagon Myothit (Seikkan) constituency, and U Than Soe @ Than Soe (Economic) of Yangon Region constituency 4.

The Speaker said union-level organisations are scheduled to discuss the matter in the Pyidaungsu Hluttaw on 19 November, after which a decision will be reached.—Lin Hmay (MNA) (Translated by Zaw Min)

Committees organizing Hluttaw sessions meet

A COORDINATION meeting (4/2018) of the Speaker of Pyithu Hluttaw and chairpersons and secretaries of committees was held at the Zabuthiri Hall of the Hluttaw building yesterday afternoon.

At the meeting, Pyithu Hluttaw Speaker U T Khun Myat said he would explain procedures that would be carried out in the Hluttaw to the chairmen of the Hluttaw’s committees and secretaries.

Hluttaw committees are accountable to Hluttaw, and Hluttaw is also accountable to Hluttaw committees, he added.

Preparations were made to amend the rules, regulations, and bylaws of the Hluttaw Law in the meeting, said the Speaker.

He also informed the meeting that a calendar for Hluttaw meetings planning has been drawn to be able to carry out the Hluttaw’s works in time.

The Hluttaw also carried out to perform the development tasks, organizational set-up of Hluttaw and reformation.

“We are making efforts for improving capacity of Hluttaw representatives and Hluttaw committees, to keep them abreast of international Hluttaw,” the Speaker said.

“As for the Hluttaw’s committees, it is of great importance that they carry out their Parliamentary Oversight Function in line with the laws, regulations, and procedures prescribed by the Hluttaw,” he added.

Afterwards, the Pyithu Hluttaw Speaker heard explanations and led discussions on the meeting’s agenda.

The meeting was attended by Pyithu Hluttaw Deputy Speaker U Tun Tun Hein, chairmen and secretaries of Hluttaw committees, and staff from the Pyithu Hluttaw’s office.—MNA (Translated by Win Ko Ko Aung)
State Counsellor meets with Chinese Premier in S’pore

STATE Counsellor Daw Aung San Suu Kyi, who has been in Singapore to attend the 33rd ASEAN Summit and related Summits, held bilateral talks with Mr. Li Keqiang, Premier of the People’s Republic of China, on 15 November 2018 at the Suntec Expo Convention Centre at 1:45 pm yesterday.

During the meeting, the State Counsellor and the Premier exchanged views on promoting bilateral relations and cooperation, including education and human resources development, preparatory works for the repatriation of the displaced persons from Rakhine State and the peace process.

The Chinese Premier expressed that China supported the Myanmar Government’s Peace and National Reconciliation efforts and efforts to resolve the situation in Rakhine State and would continue to support Myanmar in the international arena.

The State Counsellor expressed appreciation to the Chinese government for the consistent support extended to the Myanmar Government for the peace process and the Rakhine State issue.—MNA

Union Ministers inspect repatriation readiness at reception centre

UNION Minister for Labour, Immigration and Population U Thein Swe, Union Minister for Social Welfare, Relief and Resettlement Dr. Win Myat Aye, Rakhine State Chief Minister U Nyi Pu, Deputy Ministers who are Chairmen of the Rakhine State work committees on receiving and resettlement of returnees, ministers from Rakhine State Government and departmental officials visited Taung Pyo Letwe Reception Centre yesterday, where they inspected the centre’s readiness to receive returnees. Deputy District Administrator U Ye Htoo and officials of the centre provided explanations about the activities of the centre.

Myanmar has been prepared to receive returnees since January 2018. The centre was ready to receive the first group of 2,250 returnees who were among the list sent by Bangladesh on 15 November.

Myanmar is prepared to receive the returnees. Once they return, arrangements were also made to provide humanitarian aid, to assist in their livelihoods, to give training for employment, education, health and to provide freedom of travel in accordance with the law, as well as a cash-for-work program through international cooperation.

 Later in the evening, Union Ministers U Thein Swe and Dr. Win Myat Aye, Rakhine State Chief Minister U Nyi Pu and Deputy Ministers who are Chairmen of the Rakhine State work committees on receiving and resettlement of returnees, met with the media at the Rakhine State government guest house.—MNA

Translated by Myat Thandar Aung

A DINNER was held in honor of members attending the 53rd meeting of the ASEAN Committee on Culture and Information (ASEAN-COCI) at the Royal Nay Pyi Taw Hotel at 7 pm yesterday.

The dinner was attended by the Union Minister for Religious Affairs and Culture, Thura U Aung Ko, Union Minister for Information, Dr. Pe Myint, Chairman of Nay Pyi Taw Council, Dr. Myo Aung, deputy ministers, departmental officials, officials of ASEAN-COCI from ASEAN countries, representatives from the ASEAN Secretary-General’s Office, and local ASEAN-COCI officials.

In his opening remarks, Union Minister Thura U Aung Ko said he strongly believes that the friendship between the member countries of ASEAN has a bright future.

The minister said the meetings of the ASEAN Sub-committee on Culture and the ASEAN Sub-committee on Information, both held on 13 November, and the 53rd meeting of ASEAN-COCI went off successfully. He said the efforts made by ASEAN-COCI leaders and representatives from the ASEAN Secretary-General’s Office were evident in yesterday’s meeting, and thanked all participants and the meeting’s Organisation Committee.

He said he wished to exchange visions and experiences at the dinner for putting member countries on the path to one ASEAN, one identity, and one community.

Next, the Union Minister and the chairman of the Nay Pyi Taw Council presented souvenirs to ASEAN leaders attending the 53rd meeting.

Dance troupes from the Ministry of Religious Affairs and Culture and the National University of Arts and Culture (Mandalay) performed traditional and regional dances at the dinner. —MNA (Translated by Myat Thandar Aung)
Review of the situation on the ground

Permanent Secretary U Myint Thu from MOFA answered questions from the media. He said the press conference aimed to explain the first phase of repatriation between Myanmar and Bangladesh, which begins today.

U Myint Thu said he attended the third Myanmar-Bangladesh Joint-Working Group meeting in Dhaka on 30 October. He said an agreement was made to repatriate 2,261 people as the first batch of returnees on 13 November.

He said the 2,261 people slated to return to Rakhine state were on a list of 8,032 people sent by Bangladesh and were scrutinized at the Home Affairs Ministry and local officials have also arrived at the Taung Pyo Letwe Reception Centre by road. He said Myanmar had completed preparations for their return.

The permanent secretary said that SWRR Union Minister Dr. Win Myat Aye had talked about his visit to the centres for repatriation and given information about them at a recent press conference in Yangon. Physical arrangements are complete on Myanmar’s side and the 2,261 returnees will be accepted starting 7am yesterday, said U Myint Thu.

He said officials are already in place at the Taung Pyo Letwe friendship bridge gate to welcome the returnees. The officials include Rakhine State’s Minister for Security and Border Affairs Col. Phone Tint, who is also the Joint-Chairman of the Working Committee for Repatriation of Displaced People, and Rakhine State’s Minister of Electricity, Industry, and Transportation Aung Kyaw Zan, said U Myint Thu.

He added that Union Ministers Dr. Win Myat Aye and U Thein Swe, Rakhine State Chief Minister U Nyi Pu, Deputy Minister U Soe Aung, and other officials have also arrived at the Taung Pyo Letwe Reception Centre.

Repatriation delayed

U Myint Thu said although preparations for receiving the returnees are complete, Bangladesh has still not sent any people. He offered his opinion that Bangladesh could not complete the physical arrangements thoroughly.

He said the list of 8,032 people was not filled out by the intended people themselves, and it is because of this that unnecessary delays are occurring.

U Myint Thu said he met with representatives of the displaced people in Kutupalong camp in Cox’s Bazar on 31 October. He also met with Hindu representatives and said there are 438 Hindu people there that wish to return as soon as possible.

Possible causes for delay

The permanent secretary said the displaced people can be divided into three groups. The first group has people who wish to travel to a third country, such as Canada, from Bangladesh. This group may not have any desire to return to Myanmar, he said.

The second group has people who were involved in the ARSA terrorist attacks that occurred in 2016 and 2017, said U Myint Thu. He said these are the villagers who were recruited into ARSA to attack the army base. He said this group may not wish to return to Myanmar too.

The third group comprises of people who have homes and relatives left behind, own fields and fishing boats and have a business of their own. These people have the desire to return to Myanmar, said U Myint Thu.

He said applying pressure to those who do not wish to return won’t yield any results. Sending back people who wish to voluntarily return will start the repatriation process, he said.

Continued cooperation

U Myint Thu said they will cooperate with neighboring countries and mentioned that China had donated 1,110 houses in the last month while India donated 250 and Japan donated houses too. He mentioned that ASEAN countries have announced they will provide support in Northern Rakhine as well.

He said the AHA Centre in Indonesia offered an invitation to cooperate with Myanmar during the 33rd ASEAN Summit held in Singapore recently. He said they will accept the offer.

U Myint Thu said they are also working together with UNDP and UNHCR in line with the MoU signed with them on 6 June 2018. He said they have conducted two Rapid Needs Assessments in Northern Rakhine in September and October. He said they regularly hold technical working group meetings with UNDP and UNHCR and will continue cooperation processes.

He repeated himself and said the union ministers, Rakhine State Chief minister and other officials are already in place at the Taung Pyo Letwe Reception Centre for the repatriation process which begins today. He said they will follow the signed arrangement with Bangladesh and cooperate in the repatriation process. He said they will ensure the repatriation is voluntary, safe and dignified for the returnees.

He said he hopes the UNHCR does not operate in a hindering way regarding the repatriating of people who truly wish to return. He concluded by saying they will continue cooperating with Bangladesh in the repatriation process. He then replied to questions from the media.

Also attending the press conference were Permanent Secretary U Myo Myint Maung from the Ministry of Information, Director-General U Ko Ko Naing from the Ministry of Social Welfare, Relief and Resettlement, department officials, and local and foreign media members.

MOFA explains Rakhine repatriation

THE Ministry of Foreign Affairs held a press conference on the repatriation of displaced people from Bangladesh to Rakhine State in Nay Pyi Taw yesterday.

...although preparations for receiving the returnees are complete, Bangladesh has still not sent any people...Bangladesh could not complete the physical arrangements thoroughly.

– U Myint Thu, Permanent Secretary
Summit held to boost Myanmar- Singapore business ties

THE SAM Business Summit 2018 was held at the Lotte hotel in Yangon yesterday, with the aim of boosting Myanmar-Singapore business. The event was organized by the Singapore Association of Myanmar.

The summit was attended by U Thaung Tun, Union Minister for the Office of the Union Government and the Chairman of the Myanmar Investment Commission, Ms. Vanessa Chan, Singapore’s Ambassador to the Republic of the Union of Myanmar, and entrepreneurs from both countries.

“Myanmar is charting a new course to achieve sustainable and inclusive development. We have adopted the Myanmar Sustainable Development Plan, which can be seen as the roadmap for our transition. A number of reform measures – regulatory, institutional, and procedural – have been taken, and this has sparked more interest and foreign investment into the country,” said U Thaung Tun.

“With a fast-growing consumer market and industry sectors which require development, Myanmar is attracting large MNCs in a number of sectors including oil and gas, finance, construction, transport, logistics, telecommunications, and tourism. Myanmar’s economic potential is well-recognized, but we need to take proactive steps to secure investments,” he said.

“Not long ago, the Myanmar State Counsellor said there are many investment opportunities in Myanmar. The government is also making efforts to ensure ease of doing business. There is also a significant change in the economic sector. So, Singaporean businesses have to make responsible investments,” said Ms. Vanessa Chan.

“There have been very positive regulatory elements very recently. For instance, the lifting of restrictions on foreign banks and other reforms in the area of financial and economic regulation are very hopeful and can lead to strong and positive results in future.”

Businesses welcome CBM move allowing foreign banks to lend to local firms

By May Thet Hnin

LOCAL businesses have welcomed the Central Bank of Myanmar’s recent move to allow foreign banks to lend to local firms in kyats and US dollars.

“The move will benefit exporters and importers. If foreign banks can offer financial support to exporters, importers, and large companies, it can help small and medium enterprises gain greater access to funds from local banks,” said U Ye Min Aung, the Vice President of the Myanmar Federation of Chambers of Commerce and Industry.

Daw Toe Nandar Tin, Vice President of the Myanmar Fisheries Products Processors and Exporters Association, also welcomed the move by the CBM. She suggested that a project-wise loan system which does not require collateral, and is practiced internationally, would be preferable and adequate for most local firms to operate their businesses.

Most businesses are experiencing challenges at present in obtaining loans from local banks due to collateral and short suspension periods, she said adding, it is difficult for businesses to have access to long-term loans.

With the CBM allowing foreign banks to lend to local firms, companies will now have better access to funds, and the move may also help stabilize the exchange rate, said CBM Deputy Governor U Soe Thein at a press conference on 14 November.

“The participation of foreign banks in the banking sector can help stabilize the exchange rate with higher inflow of US dollars into the local currency market. They can supply much dollar and kyat liquidity to the market,” he said.

To level the field for foreign and domestic banks, the CBM issued a directive on 8 November, allowing 13 foreign banks which already have branches in the country to provide more banking services to local companies. With the move, the CBM aims to improve companies’ access to finance.

Foreign banks can now lend to local corporates in US and Myanmar currency, the CBM’s Deputy Governor said.

“Foreign banks can now provide only corporate banking services, but they are restricted from providing retail banking services and direct lending to the public. They are not allowed to accept immovable assets as collateral.

“We want them to prioritize dollar funding and support export-and-import finance in order to lead the growth of the economy. Local banks cannot meet foreign currency demands of local businesses. This being so, we want the foreign banks to inject dollar liquidity into the market,” said U Soe Thein.

Both local and foreign banks can submit their new financial services to the CBM for approval next week. The CBM will approve the financing services after a screening.

The 13 foreign banks permitted by the CBM to enter the domestic market are the MuFG Bank Ltd., the Oversea-Chinese Banking Corporation Ltd., the Sumitomo Mitsui Banking Corporation, the United Overseas Bank Limited, the Bangkok Bank Public Company Limited, the Industrial and Commercial Bank of China, the Malayan Banking Berhad-Maybank, the Mizuho Bank Limited, the Australia and New Zealand Banking Group Limited, the Jiont Stock Commercial Bank for Investment and Development of Vietnam (BIDV), the Shinhan Bank, the E.Sun Commercial Bank Limited, and the State Bank of India.
Bago Region government, MFF to discuss aquaculture in dams

By May Thet Hnin

The Bago Region government will conduct negotiations with the Myanmar Fisheries Federation (MFF) concerning fish farming in some dams in the region, following approval for the project from the region’s chief minister.

“Officials from the Bago Region Fisheries Federation attended a forum on development of fish and shrimp farming last month, and we submitted the benefits of aquaculture in dams to the region chief minister. We will iron out the details soon,” said U Gyi Ngwe, an executive member of the MFF.

Under the Freshwater Fisheries Law, the region and state have the power to approve fish farming in dams. Bago Region planned to initiate such a project under the incumbent government. Of the 40 dams in the region, 15 are available for aquaculture.

To implement the project, taxes will be imposed as per rates set by the Irrigation and Water Utilisation Management Department. The MFF and Bago Region Fisheries Department have submitted a detailed report to the Bago Region Government, and they will also organize investors, said U Gyi Ngwe.

“Fish farming in dams can help save costs. Production costs stand at around Ks2,000 per viss in fish farms, while it costs less than Ks1,000 to farm fish in dams. This project can bring about self-sufficiency, create jobs, and even cater to the export market if marketable fish are farmed. The Bago Region’s Chief Minister has also asked us to run processing activities, to help gross domestic product GDP growth,” he said.

According to a draft report drawn up by the MFF, the project will include cage and pen fish farming, involving net enclosures and cage culture. The draft also states that fish larvae are to be added to the dams and locals are to be permitted to harvest and sell them. River-spawning fish larvae of Rohu, carp species will be farmed at the dams, according to the draft.

“There was a six-month trial stage for aquaculture in some dams in Bago Region in the past 15 years, but it was limited by policy later on,” he said.

Mobile library brings books to Yathedaung, Rakhine State

A MOBILE library service was provided yesterday by the Yathedaung Township’s Information and Public Relations Department of the Ministry of Information to local communities in Yathedaung, Rakhine State. The mobile library visits villages in the township every Thursday.

“Local residents are weak in reading. We have to cultivate a love for reading among them. We will bring them books they want to read,” said Daw Aye Than Nu, a librarian with the Yathedaung Public Library.

Shwebo plans to grow 300,000 acres of summer paddy

The Shwebo District’s Department of Agriculture aims to cultivate nearly 300,000 acres of summer paddy in the district in Sagaing Region in the current financial year.

The department said it plans to rely on the Thaphanseik Dam to supply water to 269,608 acres of summer paddy farms in six townships in the district in the 2018-2019 FY. It will also use other sources of water for irrigation purposes. Thanks to the Thaphanseik Dam, the department successfully helped irrigate over 500,000 acres of monsoon paddy fields last season, officials said. As the main rice production area in upper Myanmar, Shwebo District cultivated a total of 201,379 acres of monsoon paddy and over 300,000 acres of summer paddy in the last 2017-2018 FY. It also grew about 76,470 acres of other crops.

Rice tops the list of Myanmar’s export items. The country exports rice, parboiled rice, sticky rice, and broken rice to over 40 countries, including its neighbouring countries, the Ivory Coast, Senegal and other African states, Singapore, Sri Lanka, Papua New Guinea, Russia, and some European states.

Between 1 April and 26 October this year, the country exported 1.2 million metric tons of rice to its trade partners. In the last 2017-2018 FY, the country earned US$1.13 billion from the export of 3.6 million metric tons of rice and broken rice. —Yaung Ni Tin Win (Translated by Khaing Thanda Lwin)

19,500 Yaba pills confiscated in Maungtaw

NAVY troops discovered 19,500 Yaba pills from a boat abandoned by several people in the Naf River in Maungtaw Township on 15 November.

The troops, while conducting patrol, found the suspicious boat with several people on board at 5:15 am and signaled them to stop for inspection.

“But, the people on the boat jumped into the river, swam away and managed to escape.—GNLM (Translated by JT)
Central Committee plans for 98th National Day in Nay Pyi Taw

THE Central Committee set up for planning the 98th National Day, to be observed this year, conducted a meeting at the Ministry of Education in Nay Pyi Taw yesterday. At the meeting, Central Committee Chairman and Union Minister for Education, Dr. Myo Thein Gyi, said six sub-committees have been formed to ensure the National Day is held successfully.

The theme of the 98th National Day is ‘all-round development of ethnic nations, and cooperation for Union peace’, the minister said adding, the theme has been approved at a Hluttaw meeting. Celebrations will be held in schools and townships, he said. The minister also urged that the National Day Message this year must incorporate the perpetuation and strengthening of nationalism, work for Union peace, all-round development of all ethnic nationalities, and emergence of a democratic federal union.

Next, the joint-secretary of the Central Committee, U Ko Lay Win, who is also director-general of the Basic Education Department, presented the report for the 97th National Day, which was held in 2017. This was followed by a report from the Central Committee secretary and director-general of the Educational Research, Planning, and Training Department, Dr. Win Tun, on arrangements approved by the Office of the Union Government for the celebrations this year. Later, Daw Mu Mu Aung, the deputy director-general of the Educational Research, Planning, and Training Department, presented a draft of the message to be delivered at the 98th National Day celebrations. Participants at the meeting made amendments to the draft message, and discussed their respective subcommittee’s tasks for the celebrations.

The Central Committee chair guided the discussions and then concluded the meeting with a closing speech.

The meeting was attended by the Central Committee vice-chair and Deputy Minister for Education, U Win Maw Tun, and committee members comprising officials from the ministries of Home Affairs, information, religious affairs and culture, health and sports, and education, and representatives from the Nay Pyi Taw Council. —MNA

Union AG holds coordination meeting with advocate generals, law officers

A FIFTH coordination meeting between the Union Attorney General and Advocate Generals of states and regions, and law officers was held at the ground floor meeting hall of the Union Attorney General’s Office yesterday afternoon.

At the meeting, Union Attorney General U Tun Tun Oo said the government is setting up policies to implement the amendments to the Constitution, which serves as the basic foundation for the rule of law, raising the socio-economic condition of the people, national reconciliation, internal peace, and the establishment of a democratic federal union.

“Law offices must lend their full support to make the government’s policies a success. As the State/Region Advocate Generals are members of the State/Region governments, they must provide necessary legal advice, according to the law, to their respective governments and departmental organisations. Care must be taken so that legal advice given by and prosecution work conducted by the Union Attorney General’s Office and all levels of law offices are true and correct,” he said.

“When prosecuting cases, papers filed by the police and the case files must be studied carefully, and laws related to the cases must be studied completely. In submitting the cases to the courts, information on witnesses, evidence, the law through which the case is being tried, and legal precedent should be included, and the work must be done speedily,” he said.

“Officials must deal with the public courteously, and take care to ensure court appointments are not missed. Amendments must be submitted and appeals must be made without exceeding the set deadlines,” he said.

“When conducting their work, law officers must uphold ethics and norms. They must carry out work without any corruption or bias. All officials must cooperate and participate in establishing the rule of law and spread of legal knowledge. States and regions must submit law-related information in a timely manner so that it can be included in the Myanmar Law Information system posted on the Union Attorney General’s website,” he said.

“To uphold and protect the rights and privileges of the people, law officers must strive towards becoming good public servants. They must be fair, unbiased, qualified, and work according to the law,” said the Union Attorney General.

The meeting was attended by the Deputy Attorney General, the State/Region Advocate Generals, the Permanent Secretary, Directors General, Deputy Directors General, Directors, and state/region law officers. The two-day coordination meeting will end 16 November. —MNA

Surviving the Information Age

As Antibiotic Resistance is related to all, it is addressed as most global threat
Professor Dr Hay Htet Tin

Multi Drug Resistance TB is the consequence of antibiotic resistance. It is difficult to cure such TB. Therefore, it is important to control the misuse of antibiotics.

Facilitator: Why are bacteria resistant to antibiotics? In general, and multiply, just three days, then the problem started. Again, the daily dosing is just for a week, but put the antibiotics for three weeks is overdo. Bacteria can change their structure so the antibiotic has no way to attach to the bacteria it is designed to kill. This is how repeated use of antibiotics can animal health and higher production but some uses are not needed. To use antibiotics just for growth enhancement with the aim of sending the meat to the market before it is ready to eat is dangerous because antibiotic resistance can affect human through these meat. The spread of animal excreta

Dr Min Thein Maw: Antibiotic resistance is very important matters. Some have knowledge for development of resistance. For example, the antibiotics exposed to bacteria must be less. Patients with too much in a hospital to be taken to Intensive Care Unit and in such cases, the antibiotics have to be put on. In such situations, we can prescribe antibiotics to patients. Therefore, awareness should be raised on antibiotic resistance and personal hygiene. Facilitator: To what level the antibiotic resistance is posing danger to Myanmar? Dr Professor Dr Hay Htet Tin: The social economic cost spent to cure the patient with antibiotic resistance is too much for the country. It will take more time to cure and some patients cannot resist the disease. Ordinary flu can be cured but antibiotic resistance cannot be cured normally. He has to take some expensive medicines. Be it any cure his disease but his gene will be resistant. Therefore it will be an endless circle. Antibiotic resistance is not only related to this patient only. The country loses human resource, health, and will be estimated. Therefore, infection is of utmost importance for the surroundings for the future.

Facilitator: Antibiotic resistance is a global threat to global health. What is the current situation world-wide?

Dr Stephen Paul Jone: Thank you very much for the crucial question. Antibiotic resistance can affect one country, big or small. It can also affect the hospitals as said by Professor Dr Hay Htet Tin. There are now in the world, diseases emerged from the hospital. It breaks out not only in the hospitals but also in other places. Misuse of antibiotics is the main culprit. It also reduces our capacity to provide public healthcare services. Multi Drug Resistance TB is the consequence of antibiotic resistance. It is difficult to cure such TB. Therefore, it is important to control the misuse of antibiotics.

OPINION

Time of its inception, the global networking phenomenon is par-adoxical. It needs individuals with the skills and capabilities to maintain the system, and we need to foster private-government agencies in townships across the country. We need not look out to the greatest number of audiences. It seems that Myanmar is a country that is dealing with a global threat. Myanmar as a developing country has also been encountering such problem. This dialogue is aimed at understanding what is addressed to the antibiotic resistance. When we refer to the national library, we must not focus on the physical structure and grandiose design for the building. We must be interested in setting up networks between the central news and information hubs and regional information centers and central departments can be emerged.

Face to face whose knowledge is very important matters. Some have knowledge for development of resistance. Facilitator: To what level the antibiotic resistance is posing danger to Myanmar? The social economic cost spent to cure the patient with antibiotic resistance is too much for the country. It will take more time to cure and some patients cannot resist the disease. Ordinary flu can be cured but antibiotic resistance cannot be cured normally. He has to take some expensive medicines. Be it any cure his disease but his gene will be resistant. Therefore it will be an endless circle. Antibiotic resistance is not only related to this patient only.

Union Minister for Information meets MMA Election Commission Chairman

UNION Minister for Information Dr. Pe Myint met with U Kyi Min Thein, the Election Commission Chairman of the Myanmar Music Association (MMA) at the guest hall of the Ministry of Information in Nay Pyi Taw yesterday morning.

The ministry wants music circles to work in unity and cooperate in the development of music, the Union Minister said adding, the ministry will extend its support to achieve this end.

At the meeting, Myanmar Radio and Television (MRTV) Director General U Myint Htwe explained how MRTV and musicians benefitted from one another. He also spoke on the current status of their cooperation.

Afterwards MMA Election Commission Chairman and members informed the minister about the recent election of 2018 executive members of MMA.

The Union Minister said the ministry wants to support and assist the development of music circles. He then discussed MMAs (Central) taking the lead in drawing up a new constitution, holding discussions with representatives from all levels of the music fraternity, and continuing the coordination and discussions with MMA (Central) and MMA Election Commission as well as music circles.

The meeting was also attended by Deputy Minister U Aung Hla Tun and other officials. — MNA ■ (Translated by Thandar Aung)

Brazil Embassy celebrates Brazil Day in Yangon

UNION Minister for Electricity and Energy U Win Khai ng attended the Brazil Day ceremony held in the residence of Brazil Ambassador to Myanmar at No. 112, Pan Haing Housing, Yangon yesterday evening.

The ceremony commenced with the playing of the national anthems of the Federative Republic of Brazil and the Republic of the Union of Myanmar.

Next, Ambassador of the Federative Republic of Brazil Mr. Antonio Jose Maria de Souza e Silva and Union Minister U Win Khai ng delivered messages of greetings.

Afterwards traditional dance of Brazil was performed and Ambassador and his wife hosted the guests with dinner.

Ambassadors and chargé d’affaires from foreign embassies, United Nations resident representatives and invited guests attended the event. — MNA ■ (Translated by Myat Thandar Aung)
ASEAN, Russia upgrade ties to strategic partnership

SINGAPORE — The Association of Southeast Asian Nations (ASEAN) and Russia agreed to lift their overall ties to a strategic partnership through closer cooperation on a mutually beneficial future relations based on equality so as to promote peace, stability, prosperity and sustainable development in the region. The two sides held their third summit on Wednesday with the attendance of Russian President Vladimir Putin. The two sides agreed to promote peace, security, stability and prosperity in the region by further deepening of relations, mutual trust and confidence, adding that they also should enhance economic cooperation amidst growing protectionism. They reaffirmed that international trade and investment are important drivers for sustainable economic growth and development, according to a joint statement late Wednesday. Russia in 2017 established its mission and dispatched an ambassador to ASEAN in Jakarta. Two-way trade between ASEAN and Russia surged by 33 percent last year and investment totaled over 25 billion US dollars. During Wednesday’s summit, the two sides also agreed to enhance cooperation in sectors including energy, agriculture, infrastructure science and technology. Established in 1967, ASEAN groups Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, the Philippines, Singapore, Thailand and Vietnam.}

Lion Air: a deadly crash and a whole lot of questions for Boeing

WASHINGTON (United States) — Questions swirled Wednesday about how Boeing had failed to tell airlines and pilots about changes to an anti-stall system suspected in last month’s fatal crash in Indonesia. Investigators are examining whether the system, which is meant to prevent aircraft from stalling, was tied to the crash of Lion Air Flight 610. The Boeing 737-MAX plunged into the Java Sea on Oct 29, killing all 189 people aboard. The mid-range jet’s engines are heavier than those installed on prior versions, meaning the plane can stall under different conditions. Boeing made modifications to the anti-stall system without informing air carriers and their crews, according to the Allied Pilots Association. “We should have been informed,” said APA spokesman Dennis Tajer. “It is just silly.” “How this happened is definitely something which has to be resolved,” said Tajer, who pilots 737s himself. “Boeing will have to answer to that.” Failing to share all necessary information violates the aviation world’s “safety culture,” he said. Boeing did not respond to AFP requests for comment. On Tuesday, the aircraft manufacturer said it was focusing on cooperating with investigators. In a letter to pilots on November 10, the APA said Boeing’s recent “Emergency Airworthiness Directive” had not addressed the key question of incorrect readings from Angle of Attack sensors, which monitor the angle of an aircraft’s nose. The AOA “may be the causal system in the Lion Air incident,” Mike Michaelis, chairman of an APA safety committee, said in the letter. “Awareness is the key with all safety issues,” he said. “You are aware this anomaly may occur and there is a mitigation procedure.” —AFP

A string of natural disasters led Japanese consumers to stay away and halted factory operations. PHOTO: AFP

Japan economy shrinks in Q3 as natural disasters hit

TOKYO (Japan) — Japan’s economy shrank in the three months to September, official data showed Wednesday, after a string of natural disasters hit consumer spending and exports, and China’s slowing economy cast a shadow. Gross domestic product for the July-September period contracted 0.3 per cent from the previous quarter, reversing growth of 0.8 per cent in the April-June period, according to the government’s Cabinet Office. A number of natural disasters dampened personal consumption, company investment and exports, said Katsunori Kitakura, lead strategist at Sumitomo Mitsui Trust Asset Management. “Natural disasters forced consumers to stay indoors and halted factory operations, which led to a slowdown in production and investment activities,” he said in a commentary ahead of the data release. Japan was hit by several natural disasters this summer, including massive flooding in western regions due to torrential rains, a typhoon that inundated a major international airport, and an earthquake in the north that disrupted supply lines. The temporary closure of the Kansai International Airport led to a fall in tourism and overseas shipments, Kitakura said. Exports of goods and services were down 1.8 per cent from the April-June quarter, with private consumption slumping 0.1 percent and corporate investment in plants and equipment off 0.2 per cent. But Kitakura anticipated a rebound in the last quarter of the year thanks to a broadly solid global economy. “Going forward, we remain optimistic that the economy will improve. While we remain cautious on China-US trade, the global economy continues to show solid growth and exports should continue to rise,” he said. Kohei Iwahara, economist at Nomura Japan Securities, noted that one of the major drivers for the Japanese economy has been external factors like exports. “But the trade war uncertainties have begun to increase, we see some slowdown in Asia and that is gradually hitting Japan,” he told AFP. For the rest of the year, Iwahara said he was “cautiously optimistic” as the effects of the natural disasters will fade in the final quarter. Additionally, “the government could introduce a new fiscal stimulus package so that the economy will not fall apart and...they can hike the consumption tax next year,” he said. Japan has announced a long-delayed sales tax hike will go into effect in October 2019 to address the nation’s huge public debt, despite warnings it could hobble growth by dampening already lacklustre consumer spending. The point-of-sale tax will rise from eight percent to 10 per cent as the ageing and heavily indebted country battles to finance snowballing social security bills — especially medical fees. The last such move — in April 2014 — was blamed for tipping Japan into a brief recession. This time, Prime Minister Shinzo Abe believes he can avoid a sharp decline in consumer spending by introducing measures to cushion the blow, including plans to leave the sales tax on food unchanged. —AFP
Waste not: South Africa makes world’s first human urine brick

CAPE TOWN — One day, when nature calls, your urine could be put to better use than to be flushed down the loo.

Instead it could be a key ingredient in the construction of a greener office or new home.

In one of the latest innovations in the search for eco-friendly building materials, South African university researchers have created bricks using human urine.

The first of their kind in the world, the bio-bricks hold out the prospect of a sustainable alternative to standard clay and concrete bricks, they hope.

The prototypes have been “grown” from urine using a technique somewhat similar to the natural formation of seashells, taking six to eight days to form.

The groundbreaking invention is the brainchild of two University of Cape Town students and a lecturer.

With a grant from a government-run Water Research Council, the feasibility study was launched last year using synthetic urea. And then the study escalated to using human urine.

“I was always curious to know why don’t we use urine to do the same thing,” Dyllon Randall, the lecturer who supervised the research, told AFP.

“We basically made the first bio-brick from real urine,” Randall said.

“This process is amazing because essentially what we’ve done is we grew bricks at room temperature.”

The first three bricks are on display. They are grey weighty blocks and indistinguishable from any standard limestone.

Mould

Suzanne Lambert, a civil engineering Masters student, marvels at how the team copied “nature’s natural processes” to create a sustainable way of building.

“This process mimics the way coral is formed and the natural processes produce a cement,” she said.

Conventional bricks or clay-fired bricks are manufactured in kilns, where they are dried at 1,400 degrees Celsius (2,500 degrees Fahrenheit), a process that causes large emissions of carbon dioxide. In contrast, the bio-brick is “grown” through loose sand seeded with bacteria that produce an enzyme called urease.

The urea reacts with the urine in a urea to produce a cement-like compound that bonds with the sand. The product can be moulded into any shape and dried at ambient temperatures — no ovens, no greenhouse-gas emissions.

“We take something that is considered a waste stream such as urine and use it in a completely sustainable process,” said Randall.

And for those concerned about the odour of urine permeating from the walls, the good news is that the brick does not smell. The strong ammonia smell that comes from urine dissipates after a few days of drying.

Fellow researcher VukhetaMukhari said the strength of the brick can be tailored to specific building requirements but the ones they have produced so far are “as strong as common bricks you find on the market”.

Bio-bricks are already manufactured in the US, but they use synthetic forms of urine.

These, though, are the first to use natural human waste.

Will the bio-brick one day supplant standard clay or concrete counterparts?

The key factor is price, but at this very early stage of development there has been no attempt to research costs.

“We are still far from actually commercialising this as a full scale system,” Randall cautioned, but said there was plenty of scope for gains in efficiency.

“At the moment we need between 20 to 30 litres to make one standard brick. That does sound like a lot, but remember that about 90 per cent of urine is actually water,” said Randall.

“Are we looking at reducing the amount of urine we are requiring to make one brick, and I’m sure within the next few years we will have much better results” — AFP

MYANNA PORT AUTHORITY
HOLIDAY NOTICE

As the wharves, warehouse and chellan Offices of Yangon Port will be closed on the 21st NOVEMBER 2018 to 22nd NOVEMBER 2018 (Tazaung Taing Public Holiday), Loading, Unloading and delivery for Goods will be received on Payment as Holiday Fees.

TRANSFERRING DISTRIBUTORS REGISTERED PESTICIDES

Distributor of the following pesticides, registered by BASF South African Limited is transferring from Golden Lion High Tech Agricultural Co., Ltd. To Aka Yar Zar Co., Ltd. Any objection regarding to this transfer can notify at Co-Secretary, Myanmare Pesticide Registration Board, Plant Protection Division, Bayintnaung Road, West Ygyen, Insein Township, Yangon within (14) days.

Marie Antoinette pendant fetches $36 million, shattering estimate

GENEVA (Switzerland)—A pearl and diamond pendant owned by Marie Antoinette before she was beheaded during the French Revolution sold for $36 million at an auction on Wednesday, shattering its pre-sale estimate of up to $2 million. The Sotheby’s auction at an ultra-luxurious hotel on the banks of Lake Geneva saw feverish bidding for a 10-piece collection owned by the ill-fated queen, featuring jewels unseen in public for two centuries.

The 10 items, which had been estimated to fetch a total of roughly $3 million, sold for a combined sum of nearly $43 million, Sotheby’s said.

A diamond brooch pegged to go for roughly $100,000 (700,000 euros) sold for $1.75 million, excluding fees, one of several pieces that brought in more than 20 times its estimated worth.

But the highlight was the pendant featuring an oval diamond and drop-shaped pearl, which Sotheby’s said went to an anonymous, private buyer, without giving further details.

Sotheby’s also said the pendant set a new record price for a pearl jewel sold at auction.

“Marie Antoinette’s pendant is simply irreplaceable and the price it fetched is about far more than the gem itself,” Eddie LeVian, the chief executive of jewelers Le Vian, said in a statement.

“It captures everyone’s imagination,” he added.

The auction at a luxury hotel in Geneva saw feverish bidding for a 10-piece collection owned by Marie Antoinette, featuring jewels unseen in public for two centuries. PHOTO: AFP

“This is the ultimate proof, if it was needed, that the world’s ultra high net worth individuals love rare, natural fancy coloured diamond and pearls jewels as investments, and especially those with royal provenance.”

Journey through Europe

Marie Antoinette’s treasures were the centrepieces of a sale featuring 100 jewels held by the Italian royal House of Bourbons-Parma. Sotheby’s, which had billed the event as one of the most important royal jewellery auctions in history, said the night did not disappoint. The 180 lots earned a total of $53.1 million — a performance that bested a previous record set in 1873 when Sotheby’s sold a collection of jewel’s once held by the queen’s lady-in-waiting, Madame Campan, Marie Antoinette spent an entire evening in the Tuileries Palace wrapping all her diamonds, rubies and pearls in cotton and enclosing them in a wooden chest.

They were sent to Brussels, governed by her sister Archduchess Marie-Christine, before being sent on to the French queen’s native Austria, and into the safe-keeping of her nephew, the emperor.—AFP

US cruise magnate’s collection fetches $323 million

NEW YORK—An astonishing collection of American 20th-century art amassed by pioneering travel entrepreneur and cruise magnate Barney Ebsworth sold in New York for a combined total of $323 million, Christie’s said Wednesday.

The jewel in the crown of the collection was the 1929 canvas “Chop Suey” by Edward Hopper, America’s most popular modernist, which sold for nearly $92 million on Tuesday evening.

The amount more than doubled Hopper’s previous auction record, $40.4 million paid in 2013 for “East Wind Over Weehawken,” and marked a staggering profit on the $180,000 Ebsworth paid for the work in 1973.

The combined sale of the entire Ebsworth collection, which took place as part of the bi-annual marquee art sales in the US financial capital, broke 24 auction records for different artists, Christie’s said.

Another leading light was Willem de Kooning’s 1955 “Woman as Landscape,” which sold for $68.9 million, also setting a new record at auction for the Dutch-born abstract expressionist.

Ebsworth died in April at the age of 83. He made a fortune in luxury travel after serving in the Army and being stationed in France, where he was a frequent visitor to the Louvre Museum, cultivating his love of art.—AFP

Puppet master from Chinese Taipei fights to save dying art

CHINESE TAIPEI—At 87 years old, a glove puppeteer Chen Hsi-huang from Chinese Taipei is the star of a new documentary which reflects his determination to revive the dying traditional craft and a late-life renaissance as a high-profile promoter of the art form.

The film, entitled “Father,” tells the story of how Chen pursued the craft in the shadow of his father, the legendary puppeteer Li Tian-hu, who drew huge audiences to his shows in the 1950-1970s and appeared in several movies. Also known as “Budaixi”, glove puppetry spread to Chinese Taipei in the 19th century from the southeastern Chinese province of Fujian and was mainly performed at religious and festive occasions, becoming a popular form of entertainment.

Puppeteers manoeuvre small glove dolls on ornate wooden stages to present historical and martial arts stories accompanied by live folk music. Chen said he values the traditional puppetry because it is characterised by subtle movements, with the puppeteer taking on all roles, from a young woman to an old man.

He first set up his own troupe at 23 years old but as business declined he was forced to shut shop at 40. He went on to teach the craft and continued to perform with other groups in Chinese Taipei and overseas. At the age of 79, motivated by his desire to stop the art form fading completely in the face of modern entertainment, he set up a new troupe and teaches puppetry at weekend classes as well as taking on apprentices.

“There were only two or three traditional troupes left,” he told AFP. “I used my name to open a new troupe because I didn’t want the traditional craft to disappear.”

Chen says he values the traditional puppetry because it is characterised by subtle movements. PHOTO: AFP

Next generation

Chen acknowledges the challenges facing the ancient craft, saying people have less time to spare to watch the shows. But he has taken heart from the positive response to the documentary which premiered in Chinese Taipei last month, directed by local filmmaker Yang Li-chou over a period of 10 years. “I was worried that people might not understand the film, but young people did, even if they hadn’t watched Budaixi before. They told me they liked it and that puppetry is awesome,” says Chen.

Chen’s current apprentice Chen Wei-you is part of a family troupe that runs around 150 puppet shows a year.

“My grandfather actually told me to find a better job but I chose this career because I am interested,” the 32-year-old told AFP. “Like the master, I don’t want the traditional puppetry to disappear,” he said.

Dozens of students of all ages attend Chen’s classes at the government-funded Puppetry Art Centre in Taipei every Saturday.

Student Hung Wei-heng, 10, said he was interested in learning puppetry because it was “very cool”. “I want to learn how to operate the puppets and to make the movements,” he said. Chinese Taipei authorities are trying to promote the traditional craft, organising an annual puppet festival in Yulin county.

Puppet fan Chiang Chi-feng, 41, attended the festival last month with a sense of nostalgia.

“Now that I have kids of my own, I bring them to temple fairs and watch outdoor puppet shows. They are experiencing what I experienced in my childhood,” he said.

Puppet master Chen vows to continue performing and teaching as long as he still has the strength. “I haven’t completed passing on the art so I can’t retire,” he said. —AFP
‘Super-Earth’ discovered orbiting Sun’s nearest star

PARIS (France)—A “super-Earth” has been discovered orbiting the closest single star to our Sun, scientists said Wednesday in a breakthrough that could shine a light on Earth’s nearest planetary neighbours.

Astronomers studied Barnard’s Star, a red dwarf just six light years away—practically in our back garden, galactically speaking—and noticed the presence of a “frozen, dimly lit world” at least 3.2 times heavier than Earth. The planet, known for now as Barnard’s Star b, is the second nearest to Earth outside the solar system and orbits its host star once every 233 days.

“It’s important because it’s really our nextdoor neighbour and we like to meet our neighbours in general,” Ignasi Ribas, from Catalonia’s Institute of Space Sciences, told AFP. The team of 25 young engineers from our customers,” Binay Raut, CEO of the company, told AFP. The team of 25 young engineers

But since Barnard’s Star is a red dwarf, a small and cooling star probably about twice as old as the Sun, it produces relatively little light making it hard to discern any bodies in its orbit.

To find Barnard’s Star b, Ribas and the team studied more than 20 years’ worth of observations from seven separate instruments. They then used a phenomenon known as the Doppler effect to track the impact of its gravitational pull on its parent star. Astronomers can use this technique to measure a planet’s velocity and, therefore, mass.

“We have all worked very hard on this breakthrough,” said Guillem Anglada Escude, from London’s Queen Mary University, who co-authored the study published in the journal Nature.

AI brings both benefits and challenges to banking: Fed senior official

WASHINGTON—The application of artificial intelligence (AI) tools in banking industry could bring benefits and challenges to consumers, bankers and regulators, U.S. Federal Reserve (Fed) Governor Lael Brainard said on Tuesday.

Speaking at a public event in the state of Pennsylvania, Brainard noted that AI could bring a more inclusive way in credit-scoring, which may result in lower prices and faster process for the consumers. “Banks and other financial service providers are using AI to develop credit-scoring models that take into account factors beyond the usual metrics,” said Brainard.

“There is substantial interest in the potential for those new models to allow more consumers on the margins of the current credit system to improve their credit standing, at potentially lower cost,” he said.

“AI also has the potential to allow creditors to more accurately model and price risk, and to bring greater speed to decisions,” said Brainard. However, Brainard warned that AI approaches are not free of bias for consumers because the algorithms and models reflect the goals and perspectives of the developers.

“As a result, AI tools can reflect or ‘learn’ the biases of the society in which they were created,” Brainard said.

For banking firms that employ AI as their new tools, Brainard expected that their back-office operations, such as advanced models for capital optimization, model risk management, stress testing, and market impact analysis would benefit from the new AI tools. According to Brainard, AI approaches could also be applied to trading and investment strategies. Moreover, AI advancements could also take off some risks for the banks and financial service providers.

Brainard also highlighted some challenges that AI may bring to the fraud prevention and cybersecurity, especially when the AI power falls into the wrong hands. “The wide availability of AI’s building blocks means that phishers and fraudsters have access to best-in-class technologies to build AI tools that are powerful and adaptable,” said Brainard.

While most phishing attacks against consumers lacked personalization likely due to the high cost, Brainard warned that AI tools could be used to make internet fraud and phishing highly personalized at a lower cost in the future.

Facing such new challenges, Brainard said that supervised institutions will also need tools that are just as powerful and adaptable as the threats that they are designed to face. “It may be that AI is the best tool to fight AI,” said Brainard.

Brainard also noted that many AI tools and models may deliver analysis, conclusions, or decisions that are hard to explain. “Depending on what algorithms are used, it is possible that no one, including the algorithm’s creators, can easily explain why the model generated the results that it did,” said Brainard.

Speaking of Fed’s regulatory view on the AI approaches, Brainard said that AI presents regulators with a responsibility to act with thoroughness and perspective in carrying out their mandates.

“The AI tool should be subject to appropriate controls,” said Brainard, “including how the AI tool is used in practice and not just how it is built.”—Xinhua
Nay Thway Oo clinches second at International Billiards Championship final

NAY THWAY OO clinched second at International Billiards and Snooker Championship 2018 in Yangon after he was beaten 6-2 by India’s Pankaj Advani in the final of the championship.

Earlier in the semifinal, Nay Thway had defeated multiple world champion Mike Russell 5-2 and Pankaj Advani knocked out former world champion David Causier 5-0.

Myanmar Billiards & Snooker Federation (MBSF) hosted the World Billiards and Snooker Championship 2018 at the Grand Mercure Hotel in Yangon.

Myanmar hosted the championship for the first time and many renowned players from different countries were on the list of the billiards event. A total of 9 players from Myanmar are also participating in the Long Point event and its final match will be taking place on 18 November. Snooker events will be held till 19 November.—Htin Paw Win (Kamagyut) (Translated by Win Ko Ko Aung)

Kayah to fight Mandalay for championship trophy in final of MFF 100 PLUS U-14 Cup

KAYAH will fight Mandalay for a championship trophy in the final of MFF 100 PLUS U-14 Cup on the turf of National Football Academy in Yangon on 17 November.

MFF 100 PLUS U-14 Cup was jointly organized by Myanmar Football Federation (MFF) and 100 Plus.

The MFF 100 PLUS U-14 Cup commenced on November 3. Two matches per day were held. Four teams advanced to the quarter-finals.

Ayeyawady, Shan (East), Kayin, Kayah, Rakhine, Shan (South), Mandalay and Bago advanced to the knock-out stage respectively.

Out of them, Shan (East), Kayah, Shan (South) and Mandalay moved forward to the semifinals. Kayah reached the final stage after winning Shan (East) in the semifinal with 2-1. Mandalay reached the final stage after winning over Shan (South) in the semifinal with 5-1.—Htut Htut (Twantay)

Myanmar head coach believes Myanmar must win Laos

MYANMAR head coach Mr Antoine Hey said he believed Myanmar must see a further win over Laos in the away match of AFF Suzuki Cup 2018. Myanmar got a bright start to its debut home match against Cambodia 4-1 at Mandalay Thiri Stadium on 12 November.

“We are participating in AFF Suzuki Cup 2018 through an ambitious spirit. We are now placing attention to the away match against Laos. We ought not to underestimate the play form of the opponents Laos in spite of the latter facing two defeats, but they have home advantages. They are hungry for home victory,” said Mr Antoine Hey.

“We must try not to be careless in the match against Laos. This match is of great importance for us. If we win this match, our hope of reaching the seminal will brighten. We need to obtain full points before meeting with two powerhouse teams. Even if we win over Laos, we will have to mend our weak points as part of preparation for next games.

We will try to start a game with best form, said Mr Antoine Hey. Myanmar left for Laos by air on 13 November and has started training starting from 14 November.

Myanmar will meet Laos for the second time. In the first time, Myanmar won over Laos with 4-2 in 1996.—Htut Htut (Twantay)

Kayah, Rakhine secure championship trophies in Inter Region and State Cricket Tournament 2018

KAYAH secured a championship trophy winning Yangon in the final match of the Men’s Inter Region and State Cricket Tournament 2018 in Wunna Theikdi’s Training Ground-3 in Nay Pyi Taw on 14 November.

Similarly, Rakhine State grasped a championship trophy winning Yangon in the final match of the Women’s Inter Region and State Cricket Tournament 2018 in the same venue on the same day.
