## INTRODUCTION

Amidst recent international interest in China's moves to secure resources throughout the world and recent events in Burma<sup>1</sup>, the international community has turned its attention to China's role in Burma. In September 2007, the violent suppression of a peaceful movement led by Buddhist monks in Burma following the military junta's decision to drastically raise fuel prices put the global spotlight on the political and economic relationships between China and neighboring resource-rich Burma.

EarthRights International (ERI) has identified at least 69 Chinese multinational corporations (MNCs) involved in at least 90 hydropower, oil and natural gas, and mining projects in Burma.<sup>2</sup> These recent findings build upon previous ERI research collected between May and August 2007 that identified 26 Chinese MNCs involved in 62 projects. These projects vary from small dams completed in the last two decades to planned oil and natural gas pipelines across Burma to southwest China. With no comprehensive information about these projects available in the public domain, the information included here has been pieced together from government statements, English and Chinese language news reports, and company press releases available on the internet. While concerned that details of the projects and their potential impacts have not been disclosed to affected communities of the general public, we hope that this information will stimulate additional discussion, research, and investigation into the involvement of Chinese MNCs in Burma.

Concerns over political repression in Burma have led many western governments to prohibit new trade with and investment in Burma, and have resulted in the departure of many western corporations from Burma; notable exceptions include Total of France and Chevron<sup>3</sup> of the United States. Meanwhile, as demand for energy pushes many Asian countries to look abroad for natural resources, Burma has been an attractive destination. India, Thailand, Korea, Singapore, and China are among the Asian countries with the largest investments in Burma's hydropower, oil and natural gas, and mining sectors.<sup>4</sup> Foreign direct investment (FDI) in Burma's oil and natural gas sectors, for example, more than tripled from 2006 to 2007, reaching US\$ 474.3 million, representing approximately 90% of all FDI in 2007.<sup>5</sup>

---

<sup>1</sup> In 1989, the military regime changed the name of the country from Burma to Myanmar, the historical, Burmese-language name. The name Myanmar is not accepted by most opposition groups, who believe that the regime lacks legitimacy to engage in any government function, including changing the name of the country. This opposition includes the democratically elected National League for Democracy, headed by Nobel Peace Prize winner Aung San Suu Kyi, who refers to the country as Burma. The United States refers to the country as Burma, while the United Nations refers to it as Myanmar.

<sup>2</sup> Research for all three sectors was compiled by conducting an English and Chinese language online media review. Full details are included in *Summary of Completed, Current and Planned Hydropower, Oil and Natural Gas, and Mining Projects in Burma with Chinese Involvement*.

<sup>3</sup> Chevron is exempt from United States sanctions in Burma because of a grandfather clause which permits the continuation of already existing projects. For more information, see EarthRights International. 2008. *The Human Cost of Energy: Chevron's Continuing Role in the Financing Oppression & Profiting from Human Rights Abuses in Military-Ruled Burma (Myanmar)*. <sup>5</sup> 'Foreign Investment in Myanmar Oil & Gas Sectors More Than Tripled Last Year.' *The Associated Press*, 30 June 2008. [http://www.irrawaddy.org/article2.php?art\\_id=13054](http://www.irrawaddy.org/article2.php?art_id=13054)

While China has embraced a foreign policy of non-interference in the internal affairs of other states, the line between business and politics in a country like Burma is blurred at best. In pursuit of Burma's natural resources, China has provided Burma with political support,<sup>6</sup> military armaments,<sup>7</sup> and financial support in the form of conditions-free loans.<sup>8</sup> Investments in Burma's energy sectors provide billions of US dollars in financial support to the military junta, which devotes at least 40% of its budget to military spending,<sup>9</sup> only slightly more than 1% on healthcare, and around 5% on public education.<sup>10</sup> These kinds of economic and political support for the current military regime constitute a concrete involvement in Burma's internal affairs.

The following is a brief introduction to and summary of the major completed, current and planned hydropower, oil and natural gas, and mining projects in Burma with Chinese involvement. All information is based on Chinese and English language media available on the internet and likely represents only a fraction of China's actual investment.

[http://www.pinr.com/report.php?ac=view\\_report&report\\_id=627&language\\_id=1](http://www.pinr.com/report.php?ac=view_report&report_id=627&language_id=1);

<sup>10</sup> The U.S. State Department reports that the budget of Burma's Ministry of Health in 2007 was 0.3% of Gross Domestic Product (GDP). Available at <http://www.state.gov/e/eeb/ifd/2007/80685.htm>. Burma's budget represents about 20-25% of Burma's GDP. This means that expenditures, as a percentage of the budget, are four to five times their percentage of GDP. In the case of health care, that means expenditures are about 1.2-1.5% of the budget. For more information, see EarthRights International. 2008. *The Human Cost of Energy: Chevron's Continuing Role in the Financing Oppression & Profiting from Human Rights Abuses in Military-Ruled Burma (Myanmar)*, p. 22-23. Available at <http://www.earthrights.org/publications>

## CHINA'S INTEREST IN BURMA

In 1954, the People's Republic of China and Burma signed a joint declaration on the Five Principles of Peaceful Coexistence, a political philosophy which has since then theoretically defined China's relations with Burma.<sup>11</sup> These five principles are (1) mutual respect for sovereignty and territorial integrity, (2) mutual non-aggression, (3) non-interference in each other's internal affairs, (4) equality and mutual benefit, and (5) peaceful coexistence in developing diplomatic relations and economic and cultural exchanges.<sup>12</sup> As a young nation-state, these five principles set precedents for both China's growing international presence, and the international community's influence in China's sometimes fragile internal social and political structures.

Following economic reforms in the late 1970s, China adopted a more pragmatic foreign policy and, under the guidance of the Five Principles of Peaceful Coexistence, increased international economic and political exchanges in order to fuel economic and industrial development at home.<sup>13</sup> In doing so, China has opened itself to trade and investment around the world, including in controversial places like Burma and Sudan, under the belief that economic prosperity at home and abroad will lead to mutually beneficial political and social stability. Chinese foreign policy also generally holds that countries are entitled to determine their own social and political systems and development strategies as they see fit, without the intervention of other countries.<sup>14</sup> This preference for the use of soft power to achieve stability is characteristic of China's "peaceful rise" as a world power, and also reflects the internal changes China has experienced in the three decades since its own economic reforms.

As one of China's neighboring countries, Burma plays a strategic role in China's pursuit of regional economic, political and social stability. Moreover, Burma is geopolitically significant to China given its access to the Indian Ocean, and its extensive natural resources ranging from dense forests and untouched rivers to vast reserves of minerals, oil, and natural gas. The pursuit of such natural resources has become all the more important to China as its rapid industrialization and urbanization require an increasing amount of energy and raw materials. In particular, as China is now one of the world's top energy consumers,<sup>15</sup> Burma's oil and natural gas resources and the prospect of constructing dual pipelines from the Indian Ocean to carry imports of oil and natural gas from the Middle East, South America and Africa and avoid the dangerous Straits of Malacca<sup>16</sup> make Burma a particularly desirable partner in China's pursuit of energy security.

---

<sup>11</sup> One day prior to signing this agreement with Burma, Chinese Premier Zhou Enlai signed the 'Agreement between the People's Republic of China and the Republic of India on Trade and Intercourse between Tibet Region of China and India', in which the Five Principles of Peaceful Coexistence were first introduced. For more information, see 'China's Initiation of the Five Principles of Peaceful Coexistence.' *Ministry of Foreign Affairs of the People's Republic of China*, 17 November 2000.

Some Chinese MNCs defend their investments in Burma through the Five Principles of Peaceful Coexistence which draw a distinction between economic trade and politics. According to a spokesperson for China National Offshore Oil Co. (CNOOC), which has interests in several oil and natural gas blocks in Burma, "We, in the oil business, have no choice but to go to places with oil...a company is in business for profits, not for politics."<sup>17</sup> Such statements echo those made by western MNCs like Ivanhoe Mines,<sup>18</sup> Total,<sup>19</sup> and Chevron Corporation<sup>20</sup> who have come under sharp criticism for their role in Burma. For their part, these corporations have emphasized economics over politics and tout the benefits of their investment over any alleged negative impacts. At the same time, China's government has recently voiced increase concern about the situation in Burma, and has urged Burma's military leaders to "push forward a democracy process that is appropriate for the country",<sup>21</sup> while stressing that it is Burma's people who must decide Burma's future, not the international community.<sup>22</sup> From China's perspective, investment in Burma is mutually beneficial as it encourages economic development in both countries and promotes regional economic, political, and social stability.<sup>23</sup>

## HYDROPOWER

At least 45 Chinese MNCs have been involved in approximately 63 hydropower projects in Burma, including several related substation and transmission line projects. Of these hydropower projects, the largest is the 7,100 megawatt (MW) Tasang Dam on the Salween River,<sup>24</sup> which is to be integrated into the Asian Development Bank's Greater Mekong Sub-region Power Grid. A groundbreaking ceremony for the Tasang Dam was held in March 2007, and China Gezhouba Group Co. (CGGC) started preliminary construction shortly after.

China's involvement in the damming of the Salween River is not limited to the Tasang project. In 2006, Sinohydro signed a Memorandum of Understanding (MoU) with Burma for the US\$ 1 billion, 1,200 MW Hat Gyi Dam along the Thai border. In April 2007, Farsighted Group, now known as Hanergy Holding Group, and China Gold Water Resources Co. signed MoUs with Burma for an additional 2,400 MW hydropower project on the upper Salween, an area which Yunnan Power Grid Co. reportedly surveyed in 2006. In April 2008, Sinohydro, China Southern Power Grid Co., and China Three Gorges Project Co. signed a strategic cooperation framework agreement for the development of the hydropower potential of the Salween River.<sup>25</sup> Despite China's involvement in these large-scale dams on the Salween, most of the electricity is destined for export to neighboring Thailand.

The 1,420 MW Shweli I, II, III Cascade, in Shan State near the Chinese border, has also received significant Chinese support. Yunnan Machinery & Equipment Import & Export Co. (YMEC) began work on the Shweli I Hydropower Plant in February 2004 and, following Burma's inability to secure funding,<sup>26</sup> joined with Yunnan Huaneng Lancang River Hydropower Development Co. and Yunnan Power Grid Co. to create the Yunnan Joint Power Development Co. (YUPD) in August 2006.<sup>27</sup>

State Peace and Development Council Chairman Than Shwe greets Chinese representatives at the Shweli I Site

<sup>27</sup> '中国在缅甸投资的首个水电项目成功截流 (China's First Hydropower Investment in Burma Successfully Dammed).' *China Electricity Council*, 13 December 2006. <http://www.cec.org.cn/news/showc.asp?id=92488>; For more information regarding the Shweli Cascade see Palaung Youth Network Group. 2007. *Under the Boot*. Available in English and Chinese at <http://www.salweenwatch.org/brn.html>

A few months later, YUPD assumed an 80% share in the project after creating the Shweli River I Power Station Co. together with Burma, turned the Shweli I dam into a Build-Operate-Transfer (BOT) project, and increased the installed capacity from 400 to 600 MW.<sup>28</sup> At least two Sinohydro subsidiaries have provided construction services for the project, and Sichuan Machinery & Equipment Import & Export Co. and Ningbo Huyong Electric Power Material Co. have signed US\$ multimillion contracts for electricity transmission cables and towers.<sup>29</sup> The Shweli I Hydropower Plant is slated for completion by June 2009, and was half complete as of May 2007.

In Kachin State, several Chinese MNCs are involved in the construction of seven large dams along the N'Mai Hka, Mali Hka, and Irrawaddy River, with a combined installed capacity of 13,360 MW.<sup>30</sup> In 2007, China Power Investment Co. signed agreements with Burmese authorities to finance all seven dams, as well as with China Southern Power Grid Co. Yunnan Machinery & Equipment Import & Export Co. (YMEC) signed an MoU with Burma's Ministry of Electric Power in 2006 to develop the hydropower potential of the N'Mai Hka; however details about this arrangement remain unclear. Changjiang Institute of Surveying, Planning, Design & Research has also completed a feasibility study at the confluence of the N'Mai Hka and Mali Hka, and China CAMC Engineering Co. has been involved in the surveying and implementation of hydropower projects in the region.

The 790 MW Yeywa Dam in Mandalay Division, which began construction in 2006, is also being financed and constructed by several Chinese MNCs, including China Gezhouba Group Co., Sinohydro, China International Trust and Investment Co. (CITIC) Technology Co., China National Electric Equipment Co., China National Heavy Machinery Co., and Hunan Savoo Oversea Water and Electric Engineering Co. Additional financial backing for the project is being provided by the China EXIM Bank.

In addition to the Yeywa, Shweli and Hat Gyi projects, Sinohydro – China's largest dam company – and its subsidiaries have been involved in the Kun, Kyauk, Mone, Nam Hkam Hka, Paunglaung, Tarpein I, Thapansaik, and Zawgyi I Dams. As with the Yeywa project, both CITIC and China EXIM Bank provided investment and financial backing for the Thapansaik Dam.

The Yunnan Machinery & Equipment Import & Export Co. (YMEC) has been one of the most active Chinese companies in Burma's hydropower sector. Since the 1990s, YMEC has been involved in more than 25 projects of varying size, including the Ching Hkran, Chinshwehaw, Dattawgyaing, Hopin, Kunhein, Kunlon, Kyaing Ton, Kyaukme, Laiva, Mepan, Nam Hkam Hka, Nam Myaw, Nam Wop, Nancho, Paunglaung, Upper Paunglaung, Shweli I, II, III Cascade, Watwon, Zaungtu, Zawgyi I and II, Zichaung, and N'Mai Hka River hydropower projects, as well as the Rangoon Dagon Substation. The extent of YMEC involvement in these projects, several of which are completed, is unclear, but appears to involve construction and some financing.

## OIL AND NATURAL GAS

At least 16 Chinese MNCs have been involved in 21 onshore and offshore oil and natural gas projects in Burma, including all three major Chinese oil and natural gas companies Sinopec, China National Petroleum Corporation (CNPC), Sinopec, and China National Offshore Oil Corporation (CNOOC). In August 2007, the Burmese junta confirmed the sale of natural gas from the lucrative Shwe gas fields off the Arakan State coast to PetroChina, at a lower price than other competitors, thus clarifying China's influence in Burma's natural gas sector.<sup>31</sup>

CNPC survey team at onshore L Block, Arakan State

PetroChina and parent CNPC have signed additional MoUs with the Burmese government-owned Myanmar Oil & Gas Enterprise (MOGE) for a total of five offshore natural gas blocks in Arakan State. CNOOC and subsidiaries China National Oil & Gas Development Co. (CNOOC) and China Oilfield Services Limited (COSL) have signed MoUs for exploration and production at six Arakan blocks. CNOOC's participation in two of these six blocks comes as part of a Sino-Singaporean consortium created together with China Huanqiu Contracting & Engineering Co. and Golden Aaron Pte. Both Sinopec and PetroChina reportedly conducted exploration off the Arakan coast in 2006 and 2007.<sup>32</sup>

Beyond the Arakan blocks, CNPC has been active to varying degrees in the planning and exploration of several onshore blocks, including Tuyintaung RSF-2, Gwogyo-Ngashandaung RSF-3, Tetma IOR-3, IOR-4, Indaw-Yenan C-1, and Shwebo-Monywa C-2. Sinopec has also conducted exploration at the onshore Block D in Sagaing and Magwe Divisions, while CNOOC and its subsidiaries have been involved, both independently and as part of the Sino-Singaporean Consortium, in the M-2, M-3, M-4 and M-10 offshore blocks in the Gulf of Moattama as well as Indaw-Yenan C-1, and Shwebo-Monywa C-2.

In addition to fossil fuel exploration, CNPC and Sinopec have spearheaded the construction of parallel oil and natural gas pipelines, which would stretch for more than 2,380 km from Burma's Arakan coast to China's southwestern cities of Kunming and/or Chongqing. Sinopec has already signed an over US\$ 1 billion contract for the construction of the oil pipeline, and CNPC has signed an MoU with MOGE for a detailed assessment of the potential construction of a crude oil terminal off the coast of Arakan State. The pipelines and the crude oil terminal would facilitate China's import of oil and natural gas from the Middle East, South America and Africa, as well as increase the efficiency of China's oil and gas imports by providing an alternative to the problematic Straits of Malacca, which are plagued by piracy.

<sup>31</sup> For more information about the Shwe natural gas block, see Shwe Gas Movement. 2006. *Supply & Command: Natural Gas in Western Burma Set to Entrench Military Rule*; & Arakan Oil Watch. *The Shwe Gas Bulletin*. Both available at [www.shwe.org](http://www.shwe.org).

<sup>32</sup> For more information regarding China's oil and natural gas activities in Arakan State contact Arakan Oil Watch, which is currently preparing a report about this issue, at [Arakan\\_OW@yahoo.com](mailto:Arakan_OW@yahoo.com)

## MINING

China's involvement in Burma's mining sector is difficult to assess, as many mining projects are small scale – therefore less visible, attracting less publicity – and they are often located in remote areas where access is restricted by the military or obstructed by difficult terrain. The Kachin Development Networking Group and the Lahu National Development Organization have in recent years published on-the-ground research indicating that the Chinese companies Northern Star, Sea Sun Star, and the Standing Company Limited are involved in numerous small scale mining projects in Kachin and Shan States.<sup>33</sup>

*The Namtu-Bawtwin Mine, Shan State.*

In addition to these projects, ERI has found evidence of involvement of 10 Chinese MNCs in 6 major mining projects over the last five years. The largest, the Tagaung Taung nickel deposit, in Mandalay Division, is majority controlled by China Nonferrous Metal Mining Co. and represents an investment of US\$600 million for 40 million tons of nickel ore. In 2007, China's National Reform and Development Council approved the project, and Burma's Ministry of Mines accepted the completed feasibility study. China EXIM Bank and China Development Bank are providing financial support, and China Nonferrous Engineering & Research Institute is helping design the project together with Canadian-based Hatch. The Tagaung Taung project is touted as "one of the greatest collaborative efforts in the history of Sino-Burmese mining," having received "the highest levels of attention from Burmese and Chinese government leaders."<sup>34</sup>

Kingbao (Jinbao) Mining Co. has also signed agreements with the Ministry of Mining No. 3 to conduct exploration and feasibility studies at the Mwetaung nickel deposit in Chin State that contains proven nickel reserves in excess of 10 million tons. Kingbao (Jinbao) Mining Co. is a joint subsidiary of Gold Mountain (Hong Kong) International Mining Co. and Wanbao Mining Co., both of which control 50% of the company. Gold Mountain (Hong Kong) International Mining Co. is itself a wholly-owned subsidiary of Zijing Mining Co., while Wanbao Mining Co. is a wholly-owned subsidiary of China North Industries (NORINCO).

Other major mining projects on queue for development include the Letpadaung copper deposit, which is the third deposit of the Monywa Copper Project in Monywa, Sagaing Division. Reports from March 2006 announced China Nonferrous Metal Mining Co.'s ownership of the Letpadaung deposit, which could mean the company now owns a stake in the joint venture between Ivanhoe Mines of Canada and the Myanmar Ministry of Mines.<sup>35</sup> The Mount Popa

<sup>35</sup> In February 2007, Ivanhoe Mines reported that due to requirements of its partnership with Rio Tinto in Mongolia, the company transferred all of its assets in Burma to an independent trust. Ivanhoe Mines. 2007. *Fact File: The Monywa Copper Project*. Available at <http://www.ivanhoemines.com/i/pdf/Monywa-Fact-File.pdf>

Pozzolan Mine in Mandalay Division is also on queue; this project involves the Jiangsu Pengfei Group Co. and was announced in 2007. Yunnan Machinery & Equipment Export & Import Co. has signed several agreements with Burma's Ministry of Mines for the Namtu-Bawtwin Mineral Deposit in Shan State, and is also currently in negotiations for additional exploration and exploitation at the site. Last, the Tigyt coal fired power plant and mine in Shan State is being undertaken by China National Heavy Machinery Co., which has also worked on the Kun, Kabaung and Yeywa Hydropower Plants.

All of this activity follows a 2001 MoU between the Burmese mining authorities and the Chinese Ministry of Land Resources regarding the promotion of exploration and investment in Burmese mining and mineral resources.<sup>36</sup>

## **HYDROPOWER**

### **CHIN STATE**

#### **Laiva (0.6 MW) (Falam Township)**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) undertook this project in 1992.<sup>1</sup>

### **KACHIN STATE**

#### **In the Region of the N'Mai Hka, Mali Hka & Irrawaddy**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) signed an MoU with the Ministry of Electric Power in 2006 to develop the hydropower potential of the N'Mai Hka, however.<sup>2</sup>

China CAMC (Construction & Agricultural Machinery Import & Export Corporation) Engineering Co. met with Burmese representatives in Guilin, Guangxi in November 2006 to discuss the surveying and implementation of hydropower projects at the confluence of these rivers.<sup>3</sup>

China Southern Power Grid Co. (CSG) and China Power Investment Co. (CPI) signed a cooperation agreement in May 2007 to jointly develop the hydropower potential of the N'Mai Hka, Mali Hka and Irrawaddy River.<sup>4</sup>

China Datang Yantan Hydropower Development Co. and Shenzhen Menglong Import & Export Co. signed agreements for the major repairs of a 60 MW dam in northern Kachin State in October 2007.<sup>5</sup>

#### **Chibwe (Chibwi) (2000 MW), N'Mai Hka (Chibwe Township)**

China Power Investment Co. (CPI) signed an MoU for the construction of this dam in May 2007.<sup>6</sup>

#### **Chibwe Nge (Chibwi Nge) (99 MW), Chibwe Creek (Chibwe Township)**

China Power Investment Group Co. (CPI) and Burma's Ministry of Electric Power No. 1 signed a contract in February 2008 for the construction and supply of power generating equipment for this hydropower plant, which will provide energy for the construction of the Myitsone and other dams on the N'Mai Hka, Mali Hka and Irrawaddy River.<sup>7</sup> The feasibility study, conducted by Chinese and Burmese teams, is expected to be complete by the end of 2008.<sup>8</sup>

Changjiang Institute of Surveying, Planning & Design Research and subsidiary Changjiang Geotechnical Engineering Co. undertook surveying and examination services in early 2008.<sup>9</sup>

China Gezhouba Group Co. (CGGC) signed agreements with China Power Investment Group Co. (CPI) in 2008 for the construction of earth and metal structures as well as the installation of power generating equipment over a period of 32 months.<sup>10</sup>

#### **Ching Hkran (Chying Hkran) (2.52 MW) (Ching Hkran Village, Myitkyina Township)**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) undertook this project in 1991.<sup>11</sup> On 11 July 2006 this dam was destroyed following heavy rain storms.<sup>12</sup>

#### **Hopin (1.26 MW), (Monyin Township)**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) undertook this project in 1990.<sup>13</sup>

#### **Khaunglanphu (1700 MW), N'Mai Hka (Khaunglanphu Township)**

China Power Investment Co. (CPI) signed an MoU with the Ministry of Electric Power in May 2007.<sup>14</sup>

#### **Laiza (1560 MW), N'Mai Hka (Sumprabum Township)**

China Power Investment Co. (CPI) signed an MoU with the Ministry of Electric Power in May 2007.<sup>15</sup>

#### **Lakin (1400 MW), N'Mai Hka (Chibwe Township)**

China Power Investment Co. (CPI) signed an MoU with the Ministry of Electric Power in May 2007.<sup>16</sup>

#### **Myitsone (3600 MW), Irrawaddy Confluence**

China Power Investment Co. (CPI) signed an MoU with the Ministry of Electric Power 1 in December 2006.<sup>17</sup> In January 2007, Burma's Ministry of Electric Power No. 1 held a meeting with CPI and China's National Development & Reform Council to discuss investment issues for the Myitsone Dam.<sup>18</sup> In April 2007, both CPI and the Chinese Embassy to Burma announced that dam construction on the Irrawaddy Confluence had begun ahead of schedule.<sup>19</sup>

Changjiang Institute of Surveying, Planning, Design & Research has completed a 5 month feasibility study at the Myitsone site.<sup>20</sup>

### **Nam Hkam Hka (5 MW), (Potao Township)**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) undertook this project in 1992.<sup>21</sup>

Sinohydro's 14<sup>th</sup> Engineering Bureau lists this as an international project which it has undertaken, presumably by providing construction services.<sup>22</sup>

### **Pashe (1600 MW), N'Mai Hka (Chibwe Township)**

China Power Investment Co. (CPI) signed an MoU with the Ministry of Electric Power in May 2007.<sup>23</sup>

### **Phizaw (1500 MW), N'Mai Hka (Khaunglanphu Township)**

China Power Investment Co. (CPI) signed an MoU with the Ministry of Electric Power in May 2007.<sup>24</sup>

### **Tarpein I (240 MW), Tarpein River (Dawphoneyan Township)**

Central China Power Grid Co. signed an agreement for cooperation in September 2006.<sup>25</sup>

Sinohydro's 14<sup>th</sup> Engineering Bureau and the Dali Sub-bureau of Sinohydro's 14<sup>th</sup> Engineering Bureau were present during the December 2007 opening ceremony.<sup>26</sup> The dam is expected to come online by September 2008, with construction completed by June 2010.<sup>27</sup> Sinohydro reports state that financial investment for this project has been provided by China Datang Group Co., Central China Power Grid International Economic & Trade Co., and Jiangxi Water Programming & Design Institute.<sup>28</sup>

China Datang Group Co. acquired a controlling stake in March 2008 with an investment of CNY 1.6 billion for the Tarpein I Dam.<sup>29</sup>

### **Tarpein II (168 MW), Tarpein River (Dawphoneyan Township)**

Central China Power Grid Co. discussed construction for this project with the Ministries of Electric Power No.1 and No.2 after a 2006 meeting on the progress of the Tarpein I project 9 km upstream.<sup>30</sup>

## **KAREN STATE**

### **Hat Gyi (1200 MW), Salween River**

Sinohydro signed a US\$ 1 billion MoU in conjunction with Thai EGAT and Burma for this project in June 2006.<sup>31</sup> Originally Sinohydro had a 40% stake in the project, while EGAT had at least 50%, leaving Burma with the remainder, however official Sinohydro reports from March 2008 state that Sinohydro became the controlling stakeholder following a meeting with EGAT's president.<sup>32</sup>

### **Thaukyegat I (150 MW), Thaukyayka (Day Loh) River, (Tantabin Township, Pegu Division)**

Changjiang Institute of Surveying, Planning & Design Research list this dam on its website as an international hydropower project that was undertaken together with Asia World Co.<sup>33</sup>

### **Thaukyegat II (120 MW), Thaukyayka (Day Loh) River**

The Dali Sub-bureau of Sinohydro's 14 Engineering Bureau signed an agreement with Asia World Co. to provide construction services for a diversion tunnel between May 2008 and February 2009.<sup>34</sup>

## **MAGWAY DIVISION**

### **Buywa (60 MW), Mone Creek (Bu Village, Sidoktaya Township)**

Guangdong New Technology Import Export Zhuhai Co. signed a letter of intent with the Ministry of Agriculture and Irrigation in 2004 for this US\$ 20 million project 13 miles upstream from the Mone Creek dam.<sup>35</sup>

### **Kyeon Kyeewa (75 MW), Mone Creek (Pwintbyu Township)**

Guangdong New Technology Import Export Zhuhai Co. signed a EU€ 13 million agreement with the Ministry of Electric Power in 2006 for the construction of the Kyeon Kyeewa Hydropower Project.<sup>36</sup> This project was inspired by the feasibility study conducted for the Mone Creek Hydropower Plant.<sup>37</sup>

### **Mone Creek (75 MW), Mone Creek (Sidoktaya Township)**

China International Trust & Investment Co. (CITIC) Technology Co. undertook this project together with US\$ 32 million supplied by China EXIM Bank.<sup>38</sup> The main dam at the Mone Creek Hydropower Plant, operational since December 2004, is 61 m high and 1,317 m long with a holding capacity sufficient to irrigate 108,000 acres of land.<sup>39</sup>

Sinohydro's 1<sup>st</sup> Engineering Bureau assisted with the installation of power generators for RMB 34 million, and in November 2000 Sinohydro signed maintenance contracts for this hydropower plant.<sup>40</sup> In November 2004 the first turbine generator passed a 72 hour operation test, and the dam was expected to enter commercial production by November 2005.<sup>41</sup>

## **MANDALAY DIVISION**

### **Dattawgyaing (Kyaukse Township)**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) discussed this project with Burmese representatives at a November 2006 meeting in Guilin, Guangxi.<sup>42</sup> In November 2007, YMEC signed a contract with the Ministry of Electric Power No.1 to supply equipment for this project.<sup>43</sup>

### **Nancho (40 MW), Nancho Creek (Pynmanah Township)**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) discussed this project with Burmese representatives at a November 2006 meeting in Guilin, Guangxi.<sup>44</sup> In April 2008, YMEC and Kunming Electric Machinery Co. (KEM) signed an agreement to supply two 20 MW hydroturbine generators and additional related machinery for this project.<sup>45</sup>

### **Paunglaung (280 MW) (Pynmana Township)**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) signed a contract for this project in 1998.<sup>46</sup> YMEC's description of the 131 m high, 945 m long Paunglaung project states that the US\$ 170 million was provided by the Chinese government on a seller's credit basis, and construction services were provided by CHECC Kunming Hydroelectric Investigation Design & Research Institute and Sinohydro's 14<sup>th</sup> Engineering Bureau.<sup>47</sup>

Ningbo Huyong Electric Power Material Co. built 230 kV steel power transmission towers for the Paunglaung project under an agreement with Burma's State Power Industry Ministry.<sup>48</sup>

Sinohydro's 14<sup>th</sup> Engineering Bureau secured bids in 2002 and 2004 for the installation of power generating equipment and machinery for the hydropower plant, and by late 2004, three of the four 70 MW generators were online.<sup>49</sup> This Chinese financed and built project is currently functional.<sup>50</sup>

### **Upper Paunglaung (140 MW)**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) signed an US\$ 80 million agreement with Burma to supply two 70 MW turbines and additional machinery for this project located 24 km upstream from the Paunglaung Dam.<sup>51</sup>

### **Watwon (0.5 MW) (Pyin Oo Lwin Township)**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) signed a contract with the Ministry of Electric Power No. 1 in November 2007 to supply equipment for the repair of this project.<sup>52</sup> This hydropower plant has two 0.25 MW turbines that were installed in the 1930s.<sup>53</sup>

### **Yeywa (790 MW), Myitnge River (Kyaukse Township)**

A consortium created by China International Trust & Investment Co. (CITIC) Technology Co. and Sinohydro International signed engineering, procurement and construction contracts with the Ministry of Electric Power in 2004 for a total value of US\$ 126 million.<sup>54</sup> These contracts included a supply of four 197.5 MW hydro-turbine generators, transformers, and other mechanical equipment, and China EXIM Bank offered to provide financial credit.<sup>55</sup> In November 2006, CITIC Technology Co. met with Burmese Prime Minister Soe Win to discuss the hydraulic steel structure.<sup>56</sup>

China Gezhouba Group Co. (CGGC) signed a US\$ 46,320,000 agreement in 2006 to undertake major construction efforts for this dam over a period of 46 months.<sup>57</sup> Construction phases I, II, V, VII and

## **PEGU DIVISION**

### **Kapaung (30 MW) (Taungoo Township)**

In September 2006, China National Heavy Machinery Co. (CHMC) was invited by Burma's Ministry of Electric Power 1 to undertake construction at the Kapaung Dam.<sup>70</sup> CHMC reports that as of April 2007 the initial phase of construction has been completed,<sup>71</sup> and in July 2007 the last of six shipments of construction materials worth US\$ 55.64 million was sent from China to Burma, which was in keeping with the goal of bringing the power plant online by October 2007.<sup>72</sup> As of September 2007, more than 86% of construction has been completed,<sup>73</sup> and in March 2008 technicians from CHMC attended the opening ceremony for the reservoir.<sup>74</sup> The hydropower plant is currently operational.<sup>75</sup>

China National Electric Equipment Co. (CNEEC) met with Burmese representatives in November 2006 to discuss the delivery of electrical and mechanical equipment for this project.<sup>76</sup> In March 2008 technicians from CNEEC attended the opening ceremony for the reservoir.<sup>77</sup>

Hunan Savoo Oversea Water & Electric Engineering Co. provided metal structures.<sup>78</sup>

### **Kun (Kunchaung) (60 MW), Sittaung River (Phyu Township)**

China National Heavy Machinery Co. (CHMC) signed contracts with the Ministry of Electric Power on March 24, 2004 for three 20 MW generators as well as metal structures.<sup>79</sup> In May 2004, CHMC signed a contract with Tianjin ALSTROM for the supply of three 22 MW Francis turbine generators,<sup>80</sup> as well as a design contract with Guangxi Electric Power Industry Investigation Design & Research Institute.<sup>81</sup> CHMC reports suggest that the Kun Hydropower Plant should be completed and operational by December 2008.<sup>82</sup>

Sinohydro's 1<sup>st</sup> Engineering Bureau signed contracts worth RMB 12 million with China National Electric Equipment Co. (CNEEC) for metal structure construction.<sup>83</sup> In December 2006, Sinohydro's 1<sup>st</sup> Engineering Bureau has signed two additional contracts worth RMB 26.66 million with China National Heavy Machinery Co. (CHMC) for building materials and installation.<sup>84</sup>

China CAMC (Construction & Agricultural Machinery Import & Export Corporation) Engineering Co. completed a feasibility study in the 1990s.<sup>85</sup>

### **Kyauk**

Sinohydro's 14<sup>th</sup> Engineering Bureau lists this as an international project which it has undertaken, presumably by providing construction services; however, additional information remains vague.<sup>86</sup>

### **Kyauk Naga (75 MW), Shwegyin River (Shwegyin Township)**

China Gezhouba Group Co. (CGGC) reports that it signed a contract with the SPDC to supply and install machinery and power-generating equipment in September 2007.<sup>87</sup>

### **Phyu (20 MW), Phyu River (Phyu Township)**

China Gezhouba Group Co. (CGGC) signed a contract in January 2007 for two sets of hydraulic generating units as well as all electrical and mechanical equipment, with a supply time of 21 months.<sup>88</sup>

### **Thaukyegat (150 MW), Thaukyayka (Day Loh) River**

See *Thaukyegat (150 MW) in Karen State*

### **Yenwe (25 MW), Yenwe Creek (Kyaukdagah Township)**

Hunan Savoo Oversea Water & Electric Engineering Co. provided a building plan for this plant which was to open in January 2007, pending the arrival of turbines from China.<sup>89</sup> The 1,050 foot long 251 foot high earth dam was inaugurated in early February 2007.<sup>90</sup>

China National Electric Equipment Co. (CNEEC) met with Burmese representatives in November 2006 to discuss the delivery of electrical and mechanical equipment for this project.<sup>91</sup>

China International Trust & Investment Co. (CITIC) Technology Co. met with Burmese Prime Minister Soe Win in November 2006 to discuss matters relating to the penstock and tunnel lining.<sup>92</sup>

### **Tasang (7100 MW), Salween River**

China Gezhouba Group Co. (CGGC) signed an MoU with the Tasang Hydropower Co. in March 2007 for the construction of two 1200m long, 8m in diameter diversion tunnels.<sup>123</sup> In November 2007, CGGC acquired a 51% stake in the Tasang Dam, leaving Thai MDX with a 24% stake and Burma's Department of Hydropower Implementation with a 25% stake.<sup>124</sup> In January 2008, an unnamed Chinese company set up sixty 17-30 yard long pillars on both banks of the Salween River at the Tasang site.<sup>125</sup> A ground-breaking ceremony was held in March 2007<sup>126</sup> and construction supposedly began in April 2007, while some media claim that construction has been put on hold indefinitely.<sup>127</sup>

### **Upper Thanlwin (2400 MW), Salween River**

In April 2007, Than Shwe urged that the Upper Thanlwin project be implemented as soon as possible and, in May 2007, Chinese technicians conducted a feasibility study for this project which is expected to be completed in 2008.<sup>128</sup> No decision had been made on whether to expand the Upper Thanlwin project into two dams between the towns of Konekyan and Kunlon, as the original MoU did not specify quantity of dams and the companies involved have not disclosed their intentions.<sup>129</sup>

Yunnan Power Grid Co. and CHECC Mid-South Design & Research Institute surveyed a 147 km section of the upper Salween River in December 2006.<sup>130</sup>

Hanergy Holding Group (formerly China Farsighted Investment Group) signed an MoU with Burma on 5 April 2007.<sup>131</sup>

China Gold Water Resources Co. signed an MoU with Burma on 5 April 2007.<sup>132</sup>

China Hydropower Engineering Consulting Group Co. (CHECC), CHECC Kunming Hydroelectric Investigation Design & Research Institute (KHIDI), and China Hanergy Holding Group (formerly China Farsighted Investment Group) met in Beijing in March 2008 to discuss the feasibility of the Kunlon Dam, on the mainstream of the Salween River approximately 25 km from the Chinese border at Qingshuihe Port.<sup>133</sup> The Department of Commerce of Yunnan Province reports that KHIDI signed agreements with Burma's Ministry of Electric Power for US\$ 5,270,000 in September 2007.<sup>134</sup>

Sinohydro, China Southern Power Grid Co., and China Three Gorges Project Co. signed a strategic cooperation framework agreement for the development of the Salween River's hydropower resources at Sinohydro's headquarters in April 2008.<sup>135</sup>

### **Zawgyi I (18 MW), Zawgyi Creek (Yaksawk Township)**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) undertook this run-of-the-river project in 1992.<sup>136</sup> In November 2007, YMEC representatives signed equipment supply contracts with the Ministry of Electric Power No. 1.<sup>137</sup>

Sinohydro's 14<sup>th</sup> Engineering Bureau lists this as an international project which it has undertaken, presumably by providing construction services.<sup>138</sup>

### **Zawgyi II (12 MW), Zawgyi Creek**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) undertook the installation of the gate and penstock in 1990,<sup>139</sup> and supplied the intake structure, filter, sluices and pressurized steel pipes for this dam that was inaugurated in March 2000.<sup>140</sup>

China Shanghai Corporation for Foreign Economic & Technological Co-operation (SFECO) provided two 6.4 MW generator units and accessorial equipment between July 1997 and October 1998.<sup>141</sup>

## **SUBSTATIONS & TRANSMISSION LINES**

### **Belin-Meikhtila-Taungtwingyi-Monywa**

Central China Power Grid Co. signed agreements with the Ministry of Electric Power worth US\$ 58.4 million in December 2006 for the expansion of an existing 230 kV substation, the construction of eight new 230 kV transformation substations, and two 230 kV, 340 km long transmission lines.<sup>142</sup> Construction began in July 2004.<sup>143</sup>

### **Belin Substation (Kyaukse Township, Mandalay Division)**

Central China Power Grid International Economic & Trade Co. signed a contract with the Ministry of Electric Power in January 2007 to supply equipment for a substation in Belin.<sup>144</sup>

### **Kengtawng Transmission Line (Shan State)**

Zhejiang Orient Holding Group signed a US\$ 4.56 million contract with the Hydroelectric Power Department under the Ministry of Electric Power in 2005 to provide 132 kV cables and electrical equipment.<sup>145</sup> Electricity will be supplied to Loilem, Langkho, Taunggyi and the national grid.<sup>146</sup>

### **Mongsan Substation (Shan State)**

Central China Power Grid International Economic & Trade Co. signed a contract with the Ministry of Electric Power in January 2007 to supply equipment for a substation in Mongsan.<sup>147</sup>

### **Myaungdagar-Hlaingthagar-Yekyi**

Central China Power Grid International Economic & Trade Co. signed contracts in March 2004 for the expansion of the Myaungdagar 230 kV transformation substation, the construction of the Hlaingthagar 230 kV transformation substation, the construction of the Yekyi 230 kV transformation substation, and the construction of two (one 160 km and one 40 km) 230 kV split single loop transmission lines, with at least 90% of materials coming from China.<sup>148</sup>

### **Rangoon Dagon Substation (Rangoon Division)**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) started this 6,800 kV project in 1993.<sup>149</sup>

### **Rangoon-Yegy (Rangoon Division)**

Central China Power Grid Co. (CCPGC) and subsidiary Central China Power Grid International Economic & Trade Co. signed agreements with Burma worth US\$ 16.1 million in March 2004 for the construction of a 230 kV transformation substation and a 230 kV transmission line.<sup>150</sup>

### **Shweli I Substation & Transmission Lines (Shan State)**

Central China Power Grid International Economic & Trade Co. signed a contract with the Ministry of Electric Power in 2007 to supply equipment for a substation at the Shweli site.<sup>151</sup>

China Southern Power Grid Co. reports that in March 2007, Yunnan Electric Power Design Institute completed a feasibility study for a 220 kV transmission cable that would link the Shweli I site with hydropower projects on the Niyou River, a tributary of the Jinsha River, in China's Yunnan Province.<sup>152</sup>

## OIL & NATURAL GAS

### ARAKAN STATE

PetroChina has conducted exploration in some offshore regions of Arakan State.

China Oilfield Services Limited (COSL), a subsidiary of China National Offshore Oil Co. (CNOOC), signed a US\$ 46 million contract for offshore exploration at one of Daewoo's locations.<sup>1</sup> Reports from January 2007 claim that drilling has begun.<sup>2</sup>

#### **A-1 Block (Offshore)**

China National Petroleum Co. (CNPC) and Hong Kong-based subsidiary PetroChina signed an MoU with Myanmar Oil & Gas Enterprise for the purchase of natural gas in late 2005.<sup>3</sup> CNPC has a 60% stake in the deal and PetroChina has a 40% stake.<sup>4</sup>

China National Petroleum Co. (CNPC) reports that China National Offshore Oil Co. (CNOOC) subsidiary China Oilfield Services Limited (COSL) signed an agreement with Burma for offshore oil services in 2005, and obtained two production shares following competition with Thai PTT and India's ONGC Videsh.<sup>5</sup> COSL reports that in November 2005 it secured a 60 day US\$ 6 million contract with Daewoo to provide drilling services with its NHII ship.<sup>6</sup>

#### **A-3 Block (Offshore)**

China National Petroleum Co. (CNPC) and Hong Kong-based subsidiary PetroChina signed an MoU with Myanmar Oil & Gas Enterprise for the purchase of natural gas in late 2005.<sup>7</sup> CNPC has a 60% stake in the deal and PetroChina has a 40% stake.<sup>8</sup>

#### **A-4 Block (Offshore)**

A Sino-Singaporean consortium created by China National Offshore Oil Co. (CNOOC) Myanmar, China Huanqiu Contracting & Engineering Co., and Golden Aaron Pte. signed a production sharing contract for natural gas exploration with Burma in 2004.<sup>9</sup> In February 2008, CNOOC reported it will exchange its C-1 and A-4 blocks for Thai PTT's 20% control of the M-3 and M-4 blocks.<sup>10</sup>

The Sino-Singaporean consortium created by China National Offshore Oil Co. (CNOOC) Myanmar, China Huanqiu Contracting & Engineering Co., and Golden Aaron Pte. signed a 20 year production sharing contract with Myanma Oil & Gas Enterprise in October 2004.<sup>23</sup>

## **MANDALAY DIVISION**

### **Bagan Project (Onshore)**

Chinnery Assets was created on 16 November 2001 when China National Petroleum Co. (CNPC) Hong Kong and parent CNPC International entered into a shareholders' agreement, with both parties holding 50% of shares.<sup>24</sup> That same day, Chinnery Assets signed an agreement with Canada's TG World to acquire a 70% interest in three production sharing contracts at the Bagan Project, which includes blocks IOR-3, RSF-2 and RSF-3, worth US\$ 900,000.<sup>25</sup> CNPC Hong Kong's 2002 Annual Report describes an initial investment of HK\$ 5,070,000 for these production sharing contracts, while the 2007 Annual Report claims that the group decided to abandon the blocks after exploration revealed limited commercial reserves, and the exploration investment of HK\$ 6,355,000 in these blocks was included as impairment loss on loans to jointly controlled entities<sup>26</sup>.

### **IOR-3 Block (Onshore, Tetma)**

Chinnery Assets controls 70% of the production sharing contract for this 481 km<sup>2</sup> partially developed oilfield with an estimated reserve of 1.91 million barrels, a quantity based on seismic testing conducted by the geology research center of China National Oil & Gas Exploration & Development Co. (CNODC).<sup>27</sup> In June 2007, a CNPC Hong Kong spokesperson suggested the possibility of abandoning this block, which was later confirmed by the 2007 Annual Report.<sup>28</sup>

### **RSF-2 Block (Onshore, Tuyintaung)**

Chinnery Assets controls 70% of the production sharing contract at this 1,050 km<sup>2</sup> area with an estimated reserve of 216.6 million barrels, a quantity based on seismic testing conducted by the geology research center of China National Oil & Gas Exploration & Development Co. (CNODC).<sup>29</sup> The research phases are complete, and preliminary surveying was conducted<sup>30</sup>. In June 2007, a CNPC Hong Kong spokesperson suggested the possibility of abandoning this block, which was later confirmed by the 2007 Annual Report.<sup>31</sup>

### **RSF-3 Block (Onshore, Gwegyo-Ngashandaung)**

Chinnery Assets controls 70% of the production sharing contract for this 1,603 km<sup>2</sup> exploration area with an estimated reserve of 288.2 million barrels, a quantity based on seismic testing conducted by the geology research center of China National Oil & Gas Exploration & Development Co. (CNOOC).<sup>32</sup> The research phases are complete, and preliminary surveying has commenced<sup>33</sup>; however, in June 2007, a CNPC Hong Kong spokesperson suggested the possibility of abandoning this block, which was later confirmed by the 2007 Annual Report.<sup>34</sup>

## **MOATTAMA COAST**

### **M-2 Block (Offshore)**

The Sino-Singaporean consortium created by China National Offshore Oil Co. (CNOOC) Myanmar, China Huanqiu Contracting & Engineering Co., and Golden Aaron Pte., signed an exploration and production sharing contract with the Myanmar Oil & Gas Enterprise in early 2005 for this 9,600 km<sup>2</sup> natural gas block.<sup>35</sup>

China National Offshore Oil Co. (CNOOC) Myanmar signed an agreement with Myanmar Oil & Gas Enterprise for exploration of this natural gas block.<sup>36</sup>

### **M-3 Block (Offshore)**

China National Offshore Oil Co. (CNOOC) plans to receive a 20% stake in this block controlled by Thai PTT Exploration & Production in exchange for CNOOC's A-4 and C-1 blocks.<sup>37</sup>

### **M-4 Block (Offshore)**

China National Offshore Oil Co. (CNOOC) plans to receive a 20% stake in this block controlled by Thailand's PTT Exploration & Production in exchange for CNOOC's A-4 and C-1 blocks.<sup>38</sup>

### **M-10 Block (Offshore)**

The Sino-Singaporean consortium created by China National Offshore Oil Co. (CNOOC) Myanmar, China Huanqiu Contracting & Engineering Co., and Golden Aaron Pte., signed an MoU for exploration and a production sharing contract for this 15,534 km<sup>2</sup> natural gas block.<sup>39</sup>

## **PEGU DIVISION**

### **Pyay Oilfield**

In May of 2006, China National Petroleum Co. (CNPC) Huabei Petroleum and China National Oil & Gas Exploration & Development Co. (CNODC) affiliated Kai Er Co. signed well drilling service contracts worth RMB 60 million for the Pyay Oilfield.<sup>40</sup> Following initial failures in 2004, due to unfamiliarity with local conditions, Well Drilling No. 4 Company Team No. 40511 successfully completed the KYTC-1 and KNC-1 wells in 2006.<sup>41</sup>

### **IOR-4 Block (Onshore)**

China National Petroleum Co. (CNPC) has a 100% holding of this block through a contract with the Ministry of Energy.<sup>42</sup> CNPC reports that preliminary drilling at the PSC-1 well at the IOR-4 block yielded remarkable results.<sup>43</sup> In July 2006, the PSC-101 well was extended from 1200 m to 1960 m following work completed by CNPC Huabei affiliated Drilling No. 4 Company Team No. 40511.<sup>44</sup>

## **SAGAING DIVISION**

### **C-1 Block (Onshore, Indaw-Yenan)**

A consortium created by China National Offshore Oil Co. (CNOOC) Myanmar., China Huanqiu Contracting & Engineering Co., and Singapore's Golden Aaron Pte., signed an exploration and production sharing contract with the Myanmar Oil & Gas Enterprise (MOGE) in early 2005 for this 17,000 km<sup>2</sup> natural gas block.<sup>45</sup>

China National Petroleum Co. (CNPC) Sichuan Petroleum Geophysical Prospecting Co. and MOGE signed and completed a contract for 2D seismic surveying with China National Offshore Oil Co. (CNOOC) Myanmar by May 2007.<sup>46</sup> In February 2008, CNOOC reported it will exchange its C-1 and A-4 blocks for Thai PTT's 20 % control of M-3 and M-4 blocks.<sup>47</sup>

### **C-2 Block (Onshore, Shwebo-Monywa)**

The Sino-Singaporean consortium created by China National Offshore Oil Co. (CNOOC) Myanmar, China Huanqiu Contracting & Engineering Co., and Golden Aaron Pte., signed an exploration and production sharing contract with the Myanmar Oil & Gas Enterprise in early 2005 for this 26,000 km<sup>2</sup> natural gas block.<sup>48</sup>

<sup>48</sup> '中海油拿下缅甸 3 个油气区块 (CNOOC Secures 3 Burmese Oil & Gas Blocks).' *CNOOC Website*, 27 January 2005. <http://www.cnooc.com.cn/zhyww/xwygg/210729.shtml>; & '中缅签署 3 个油气区块合同 (China & Burma Sign Contracts for 3 Oil & Gas Blocks).' *CNOOC Website*, 31 January 2005. <http://www.cnooc.com.cn/zhyww/xwygg/211931.shtml>

China National Petroleum Co. (CNPC) Sichuan Petroleum Geophysical Prospecting Co. was chosen by China National Offshore Oil Co. (CNOOC) Myanmar in November 2005 to conduct seismic surveying at this block.<sup>49</sup>

China National Offshore Oil Co. (CNOOC) Myanmar signed an agreement with Myanmar Oil & Gas Enterprise for exploration of this natural gas block.<sup>50</sup>

#### **D Block (Onshore, Sagaing & Magwe Divisions)**

Sinopec planned to drill an exploration well at this 4,763 mile<sup>2</sup> oil block in June 2007.<sup>51</sup>

#### **OIL & GAS PIPELINES**

Sinopec has signed a RMB 8 billion contract for the construction of a 2,380 km long oil pipeline between Sittwe and Kunming.<sup>52</sup> In April 2007, China's National Reform & Development Council approved the construction of a pipeline to bring oil from the Middle East and Africa to China, and avoid the Straits of Malacca.<sup>53</sup> China will also provide Burma with a US\$ 83 million loan to develop its oil resources.<sup>54</sup>

PetroChina, with subsidiary ChinaOil Singapore, is negotiating for the construction of a pipeline capable of carrying 170 billion m<sup>3</sup> of natural gas between Burma's Arakan State and Chongqing.<sup>55</sup> A news report from April 2007 indicates that PetroChina has reached an initial agreement with Myanmar Oil & Gas Enterprise (MOGE) for the construction of two parallel natural gas and oil pipelines linking the Arakan Coast with Kunming and/or Chongqing.<sup>56</sup>

China National Petroleum Co. (CNPC) surveyed sites in Arakan State in January 2007 for the construction of parallel oil and natural gas pipelines.<sup>57</sup> In December 2007, CNPC signed a strategic agreement with Yunnan for cooperation on the development of an oil pipeline from Burma.<sup>58</sup>

Nonetheless, the current status of both the oil and natural gas pipelines remains unclear as conflicting reports continue to appear in Chinese and English media. Huang Qifan, Mayor of Chongqing, has been building hype in Chinese media about decisions from high level officials in the Chinese

## MINING

### CHIN STATE

#### **Mwetaung Nickel Deposit**

Kingbao (Jinbao) Mining Co. signed agreements with the Ministry of Mining No. 3 to conduct exploration and feasibility studies<sup>1</sup> to explore this laterite nickel mine that contains proven nickel reserves in excess of 10 million tons at an average grade of 1.5%.<sup>2</sup> Jinbao (Kingbao) Mining Co. is a 50/50 joint venture created in 2005 by Gold Mountain (Hong Kong) International Mining Co., a wholly-owned subsidiary of Zijin Mining Co., and Wanbao Mining Co., a wholly-owned subsidiary of China North Industries (NORINCO).<sup>3</sup>

### SAGAING DIVISION

#### **Letpadaung Copper Deposit (Monywa)**

According to news reports from 2006, China Nonferrous Metal Mining Co. owns the mine.<sup>4</sup>

### SHAN STATE

#### **Tigyit Coal Fired Power Plans and Mine (120 MW) (Tigyit, Pin Laung Township)**

China National Heavy Machinery Co. (CHMC) signed a US\$ 42.9 million contract with the Ministry of Electric Power in August 2001.<sup>5</sup> In March 2004, the third and final shipment of equipment from CHMC arrived in Burma, including belt conveyors, crushers, etc. at a value of US\$ 5 million.<sup>6</sup> The Final Acceptance Certificate has been signed, and the plant is in operation, with a conveyor belt transporting coal from the mine to the power plant.<sup>7</sup>

#### **Namtu-Bawtwin Mineral Deposit**

Yunnan Machinery & Equipment Import & Export Co. (YMEC) has been awarded the mining and operation rights to reclaim lead and zinc from the tailings at Namtu by Burma's Ministry of Mines.<sup>8</sup> YMEC has invested US\$ 5 million for a 500 ton per day concentrating mill, which is expected to come online in late 2008, and plans to invest an additional US\$ 50 million for the development of an 8 million ton per year open pit mine in the near future.<sup>9</sup>

## **MANDALAY DIVISION**

### **Tagaung Taung Nickel Deposit (Thabeikkyin Township)**

China Nonferrous Metal Mining Co. (CNMC) signed an agreement with the Ministry of Mining in July 2004 to conduct exploration and a feasibility study at this ferrous nickel deposit.<sup>10</sup> In 2007 China's National Reform and Development Council approved this project, under which CNMC would control 75%, while Burma's Mining Enterprise No. 3 would control the remaining 25%.<sup>11</sup> In June 2007, the feasibility study was completed and approval was granted by the Ministry of Mining<sup>12</sup>. In July 2008, CNMC Nickel Co. and Burma's Mining Enterprise No. 3 signed a new agreement to move forward with this US\$ 800 million project, with both parties having a 50% stake.<sup>13</sup>

China EXIM Bank and the China Development Bank are providing funding, while Canadian-based Hatch and China Nonferrous Engineering & Research Institute will jointly design the project.<sup>14</sup>

### **Mount Popa Pozzolan Mine & Factory**

Jiangsu Pengfei Group Co. signed an agreement with Ministry of Electric Power No. 1 for the construction of a 500 ton per day pozzolan factory.<sup>15</sup>
