Four political objectives
* Stability of the State, community peace and tranquillity, prevalence of law and order
* National reconciliation
* Emergence of a new enduring State Constitution
* Building of a new modern developed nation in accord with the new State Constitution

Four economic objectives
* Development of agriculture as the base and all-round development of other sectors of the economy as well
* Proper evolution of the market-oriented economic system
* Development of the economy inviting participation in terms of technical know-how and investments from sources inside the country and abroad
* The initiative to shape the national economy must be kept in the hands of the State and the national peoples

Four social objectives
* Uplift of the morale and morality of the entire nation
* Uplift of national prestige and integrity and preservation and safeguarding of cultural heritage and national character
* Uplift of dynamism of patriotic spirit
* Uplift of health, fitness and education standards of the entire nation

Indian Vice-President and wife to pay official visit to Myanmar

NAY PYI TAW, 2 Feb—At the invitation of Vice-Senior General Maung Aye, Vice-Chairman of the State Peace and Development Council of the Union of Myanmar and wife Daw Mya Mya San, His Excellency Shri M. Hamid Ansari, Vice-President of the Republic of India and wife Shrimati Saima Ansari will pay an official visit to the Union of Myanmar in the near future.—MNA

UNSG’s Special Advisor Mr Gambari meets Spokes Authoritative Team of SPDC, Ministers, social organizations, diplomats

NAY PYI TAW, 2 Feb—The Spokes Authoritative Team of the State Peace and Development Council met with Special Advisor Mr Ibrahim Agboola Gambari to the Secretary-General of the United Nations at the five-storey guest house in Yangon at 8.45 a.m. today. Present on the occasion were Leader of the Spokes Authoritative Team of the SPDC Minister for Information Brig-Gen Kyaw Hsan, members Minister for Foreign Affairs U Nyan Win and Minister for Culture Maj-Gen Khin Aung Myint. Mr Gambari also met on Minister for Relations U Aung Kyi at 10.20 a.m., Minister for Health Dr Kyaw Myint at 11 a.m., member of Commission for Holding Referendum U Thaung Nyunt and party at 1.30 p.m., Joint Secretary-General U Zaw Min and party of the Union Solidarity and Development Association at 2.05 p.m., and Ambassadors, Chargés d’Affaires of foreign missions to the Union of Myanmar and officials at 4.10 p.m. at Seinle Kantha State House separately.
In the evening, Leader of the Spokes Authoritative Team of the SPDC Minister for Information Brig-Gen Kyaw Hsan hosted a dinner to Mr Gambari at Mya Yeik Nyo Royal Hotel.—MNA

True patriotism
* It is very important for everyone of the nation regardless of the place he lives to have strong Union Spirit.
* Only Union Spirit is the true patriotism all the nationalities will have to safeguard.
Enhance health care services for local people in storm-hit regions

The government has been placing emphasis on the health sector of local people in storm-hit regions while implementing the rehabilitation and reconstruction tasks for storm victims. Arrangements have been made for upgrading offices and schools in those regions. Hospitals were also upgraded in order to provide better health care services to the people in urban and rural regions.

Under the arrangements of the Ministry of Health, health care services have been providing for storm victims with the assistance of specialists, medical teams and traditional medicine practitioners of the Traditional Medicine Department.

A 16-bed hospital is under construction in Setsan Village, Bogale Township, and MSF and IOM, international non-governmental organizations, are also providing health care services to local people.

A ceremony to hand over documents related to prefabricated clinics was held at the rural health care unit in the village on 25 January.

The prefabricated clinics that include patient wards, toilets and medical equipment were donated by IOM. A similar ceremony was held in Daw Nyein Village and Kyonda Village in Pyapon Township. The donation includes generators, air-conditioners and water supply.

There was no spread of communicable and degenerative diseases in the storm-ravaged regions and the greater achievements were obtained in the fight against such diseases due to the government’s proper arrangements, assistance of the wellwishers and constant cooperation of health staff.

It is the duty of local people to participate in the tasks to enhance the health care services for them in cooperation with the government.
Afghans threaten US troops over civilian deaths

MENGERLAM (Afghanistan), 1 Feb — An angry Afghan man with a thick black beard ranted wildly at the US officials, shouting about how their overnight raid had killed 16 civilians in his village. An Afghan elder cried out in grief that his son and four grandsons were among the dead.

One after another, a long line of government officials, villagers and community leaders told American military officials at the Laghman governor’s compound that Afghan soldiers must be allowed to take part in such raids. Several predicted increased violence against US forces if more nighttime operations take place.

Three recent US Special Forces operations killed 50 people — the vast majority civilians, Afghan officials say — raising the ire of villagers and President Hamid Karzai, who set a one-month deadline for his demand that Afghan soldiers play a bigger role in military operations.

“If these operations are again conducted in our area, all of our people are ready to carry out jihad. We cannot tolerate seeing the dead bodies of our children and women anymore,” Malik Malekzaratullah, the Afghan who ranted at the Americans, told The Associated Press. “I’ve already told President Karzai we are out of patience.”

US officials said it was possible the conventional Afghan troops stationed in Laghman Province — a separate group from the Special Forces units that carried out the nighttime raids — could face an increased risk of attack.

“Anytime there is that kind of public outcry, you can imagine that there are some people out there who may take that and put it into action,” said Lt Col Dan Fuhr, the top US commander in Laghman, one Province east of Kabul.—Internet

Suicide bomber attacks foreign troops in Kabul

KABUL, 1 Feb — A suicide bomber in a car attacked a convoy of foreign troops in the Afghan capital on Sunday, but there was no immediate word on casualties, a police officer said. Taleban militants claimed responsibility for the attack.

The bomber targeted the convoy in Kabul’s western outskirts, said Gen Zulmay Khan Horiyakheil, a regional police commander. It was not clear if the bomber hit the convoy. Representatives for NATO and US troops said they were checking the report. A Taleban spokesman, Zabiullah Mujahed, claimed responsibility for the blast in a phone call to an Associated Press reporter in Kabul.

Militant regularly launch suicide attacks on foreign and Afghan troops throughout Afghanistan, but the number of such attacks in the capital has decreased over the past year.—Internet

US says two Iraqi police killed in shooting

BAGHDAD, 1 Feb—US soldiers killed two Iraqi policemen on Saturday after coming under fire during an operation against al-Qaida in northern Iraq, the US military said.

An Iraqi officer confirmed the incident, which occurred near the northern city of Mosul, but said the policemen were manning a checkpoint when they were gunned down.

A US statement said the incident began when US soldiers entered a neighbourhood looking for a suspected al-Qaida operative who was believed to be in a building.

The Americans called for the building’s occupants to surrender when they came under fire from another building about 100 yards (meters) away, the statement added.

“Despite multiple attempts to identify themselves, the (US) force continued to receive hostile fire. Acting in self defence, coalition forces returned fire,” the statement said.

“Coalition force members immediately moved to the building and linked up with the Iraqi police forces. A search of the building revealed two Iraqi police, who were not in uniform, were killed during the exchange,” the statement added.

The US expressed regret for the policemen’s deaths.

Afghan blast kills Canadian soldier

OTTAMA, 1 Feb — A Canadian soldier was killed on Saturday when his armoured vehicle hit an explosive device on a road west of Kandahar in southern Afghanistan, Canada’s defence department said.

The soldier, Sapper Sean Greenfield, was the 108th member of the Canadian military killed since Canada sent forces to Afghanistan in 2002.

The other soldiers in the vehicle were not injured.

Canada has 2,700 soldiers in Kandahar, capital of a region that is a stronghold for Taleban militants. The Canadian combat mission is set to end in 2011.—Internet

Mortar, bomb attacks near polling stations in north of Baghdad

TIKRIT, 1 Feb — Four mortars and a roadside bomb explosion targeted polling stations in the city of Tikrit, the capital of Salahuddin Province and home of toppled ex-president Saddam Hussein, a provincial police source said on Saturday. Four mortar rounds landed near a polling station in the city and a roadside bomb went off at a marketplace also close to a polling station in central Tikrit, the source told Xinhua on condition of anonymity.

The attacks took place as local residents were heading to vote in the country’s landmark provincial elections, the source said. There are no immediate reports about casualties by the blasts, the source added.

Early on Saturday, about 42,000 polling stations in 14 out of Iraq’s 18 Provinces opened their doors for some 15 million Iraqis who have been called to cast their votes to elect members of provincial councils.—Internet

Workers at a Dell assembly plant in 2008. Nearly 187,000 workers in the US technology sector lost their jobs last year, the highest number in five years, consulting firm Challenger, Gray & Christmas said on Thursday.

Russia’s missile deployment depends on US missile defence plans

Moscow, 1 Feb—Russia will halt plans to install its Iskander missile system in Kaliningrad on the Polish border if the United States drops the deployment of a missile shield in eastern Europe, the Russian Foreign Ministry said on late Friday.

"If there is no the third phase of the missile defence system, there will be no Iskanders in the Kaliningrad region. If the third phase is set up, we will have to take measures in response," the ministry said on its Web site.

Regarding to reports, the ministry said on its Web site that Russia has decided to halt plans to station missiles in the country's Baltic outpost of Kaliningrad, the ministry said "nobody is phasing out anything, because there is nothing to phase out so far." The installation of missiles in Kaliningrad, proposed by Russian President Dmitry Medvedev in his first state-of-the-nation address on 5 Nov, 2008, might be a possible response to any deployment of the US missile shield in eastern Europe, it said.

Moscow, 1 Feb—Russia will halt plans to install its Iskander missile system in Kaliningrad on the Polish border if the United States drops the deployment of a missile shield in eastern Europe, the Russian Foreign Ministry said on late Friday.

"If there is no the third phase of the missile defence system, there will be no Iskanders in the Kaliningrad region. If the third phase is set up, we will have to take measures in response," the ministry said on its Web site.

Regarding to reports, the ministry said on its Web site that Russia has decided to halt plans to station missiles in the country's Baltic outpost of Kaliningrad, the ministry said "nobody is phasing out anything, because there is nothing to phase out so far." The installation of missiles in Kaliningrad, proposed by Russian President Dmitry Medvedev in his first state-of-the-nation address on 5 Nov, 2008, might be a possible response to any deployment of the US missile shield in eastern Europe, it said.

The missile plans have been halted because the new US administration is not rushing through plans to install missile defence facilities in Poland and the Czech Republic, Russia’s Interfax news agency on Wednesday quoted a general staff official as saying.

The two east European countries have signed agreements with the United States to home parts of its global missile shield, with a radar station in the Czech Republic and interceptor missiles in Poland.

Thousands in Prague rally against proposed US radar base

Prague, 1 Feb—A crowd of nearly 1,000 gathered at Jan Palach Square in the Czech capital of Prague to protest against the planned US radar base in the country.

Protestors also marched through the capital, holding banners saying, "Stop the new arms race" and chanting slogans like “No radar base here.”

They also presented a letter intended for President Barack Obama to the US Embassy.

Vojtech Filip, chairman of the Czech Communist Party, which organized the protest, said his party wants a referendum on stationing a radar base near Prague.

Other groups including the Mayors’ League Against Radar also took part in the rally.

Kenyan police free Obama’s half brother

NAIROBI, 1 Feb—The Kenyan authorities confirmed on Saturday they have released the half brother of US President Barack Obama, George Obama, who was arrested on Friday on a charge of possession of marijuana.

Police sources told Xinhua that George Obama who lives in Huruma residential estate in Nairobi was briefly arrested for being in possession of two rolls of bhang (cannabis).

“He was released on Saturday evening with no charges preferred against him,” said a senior police official who declined to be named.

“He was picked up in Nairobi’s Huruma area with three other young men,” he said.

Seven dead and 16 missing in Russian care home fire

Moscow, 1 Feb—Seven people died and at least 16 were missing after fire gutted a remote, wooden care home in the northwestern Russian republic of Komi on Saturday, a spokeswoman for the local branch of the Emergencies Ministry said.

President Dmitry Medvedev dispatched the Kremlin’s envoy in northwestern Russia to investigate the fire, which was close to being extinguished five hours after it started in the village of Podyelsk, 120 km (75 miles) from the regional capital Syktvykar.

“Seven bodies have been pulled out of the building. Firefighters have entered the building and are searching for the missing residents,” Lyubov Terenteva, head of the press service for the Emergencies Ministry in Komi, told Reuters.

Fire broke out at the care home, which houses 26 residents, mostly elderly, in the early evening.

Firefighters walk in the rubble of an old people's home in the village of Podyelsk, 120 km (75 miles) from the regional capital Syktvykar on 1 Feb, 2009. Twenty-three people were missing on Saturday after fire gutted the home in the northwestern Russian republic of Komi, the Interfax news agency reported on Saturday.

Iran produces smart anti-aircraft gun

TEHRAN, 1 Feb—Iran’s Defence Minister Mostafa Mohammad Najjar said that Iran has manufactured a smart anti-aircraft gun, Iran’s satellite Press TV website reported on Saturday.

“Iran successfully manufactured a smart 100mm anti-aircraft gun as part of a campaign to boost the country’s defence capabilities,” Najjar was quoted as saying.

He said the Defence Industries Organization has completed the wholly domestic task of manufacturing the 100mm anti-aircraft gun and its necessary ammunition “to counter aerial threats posed by enemy fighters, helicopters and cruise missiles.”

“One of the most important features of this weapon is its smart system which can track down the target and fire at it automatically,” he said, adding that the shells used in the system are equipped with a fuze which enables them to explode and terminate the target from a close distance even if they fail to hit it directly.
**London debut for treasures from Shanghai**

BEIJING, 1 Feb—The British Museum has celebrated the launch of Shanghai Week in London with the opening of “Treasures from Shanghai,” a spectacular collection of 60 ancient Chinese jade and bronze masterpieces on show in Europe for the first time.

“This exhibition brings to London pieces of superlative quality rarely seen outside China itself,” said the exhibition’s guest curator Jessica Rawson.

“The Neolithic jades on display are astonishing, particularly those that feature fine designs of strange human-like figures, birds and monsters with large teeth.”

She added: “The Shanghai Museum houses one of the world’s greatest collections of Chinese art.”

Chen Kelun, deputy director general of the Shanghai Museum, said the exhibition would provide “insights into the time-honoured urban civilization and etiquette of China” and identify themselves with the theme of the World Expo to be held in Shanghai next year.

The month-long exhibition is another example of the British Museum’s collaboration with China after the exhibition “First Emperor: China’s Terracotta Army” in 2007.

Shanghai Week is designed to commemorate the increasingly close relationship between Britain and China and showcase the heritage and culture of Shanghai as it prepares for the World Expo. —Xinhua

**French scientist shot near Mexico City airport dies**

MEXICO CITY, 1 Feb—A French scientist shot in the head by armed robbers near the Mexico City airport earlier this week has died, the French Embassy in Mexico said.

Christopher Augur was followed by robbers and shot on Tuesday after he changed 4,800 euros (about 6,500 US dollars) in a currency exchange office at the airport and headed back to the city.

Augur, who died at a city hospital on Saturday, was not the first victim to be shot at the Mexican airport.

The 55-year-old scientist had been in the country for three months, collaborating with a Mexican university on a biotechnology project.

The French ambassador to Mexico, Daniel Parfait, has condemned the assault and asked the Mexican government to punish the killers.

Mexican police said on Friday they had detained two suspects in the shooting, aged 19 and 29.

Assistant city prosecutor Luis Vasquez said a total of 17 such robberies of people leaving the Mexican capital’s airport have been reported since March 2008. The attacks appear to be the work of two or more gangs, or one organization with several cells.

The victims in four of the cases were foreigners, Vasquez said. —Xinhua

**Alaska’s Mt Redoubt to erupt at any time**

BEIJING, 1 Feb—Alaska’s Mount Redoubt is picking up volcanic activity. The Alaska Volcano Observatory on Sunday raised its threat level to orange, the stage just before an eruption.

The Alaska Volcano Observatory said in a statement Friday “volcanic tremor” has increased in “amplitude.” The observatory on Thursday began seeing even higher levels of seismic activity and long periods of tremors, said Geophysicist John Power. The activity on the 10,197-foot peak is “more energetic than that of the previous several days. However, it is still less vigorous than that observed last week,” the observatory said.

On 5 Nov, 2008, geologists noted changed emissions and minor melting near the Redoubt summit and raised the threat level from green to yellow.

The volcano is about 100 miles southwest of Anchorage. —Xinhua

**Brunei to export IT products to Philippines**

KUALA LUMPUR, 1 Feb—Brunei has signed deals with the Philippines to export information and communications technology products (ICT) to its Southeast Asian neighbour, according to reports reaching here on Saturday.

The Brunei Economic Development Board (BEDB) and three Brunei firms on Friday inked separate deals with Philippine-based Crestar Communications to pave the way for Brunei to export its ICT products to the Philippines, the Brunei Times reported.

The signing of the deals coincided with Brunei Sultan Hassanal Bolkiah’s three-day state visit to the Philippines, which was ending on Saturday, the Brunei newspaper said.

The three Brunei firms Expansys Technologies, Mimit e-Technology and Rafiqun WDSI have been identified as having ready-to-deploy innovative technologies with applications in both the commercial and public sectors in the Philippines, the daily said.

Expansys Technologies aims to launch its text or short messaging system gateway technology as the preferred platform in delivering the integrated systems of Mesh, IPTV and GPS technology in the Philippines, according to the newspaper. —Xinhua

136-kg car bomb found by N Ireland school

BELFAST, 1 Feb — A viable 300-pound (136-kilogramme) car bomb was discovered close to a school in Northern Ireland, police said on Saturday, in a grim reminder of the increasing threat posed by dissident paramilitaries.

The homemade device was in the back of a black Volkswagen car in the village of Castlewellan in the southeast of the province.

The device has now been made safe. A telephone warning claimed the bomb was originally intended for a nearby British Army base but had been abandoned.

They callers claimed to be from a dissident republican organisation — Catholic paramilitaries opposed to the peace process and wanting Northern Ireland to sever links with Britain and join the Republic of Ireland.

Bomb discoveries in Northern Ireland are now rare compared to the heights of the Troubles, the three decades of sectarian bloodshed in the province.

However, the last 18 months has seen an upsurge in violent activity from republican paramilitaries opposed to the peace process, including more than a dozen unsuccessful murder bids against police officers.

Gaza militants fire rockets into Israel

JERUSALEM, 1 Feb — Palestinian militants fired a rocket from Gaza on Saturday that exploded close to the southern Israeli city of Ashkelon without causing any damages or injuries, an Israeli military spokesman said.

Two more rockets were fired into southern Israel from Gaza on Sunday morning, neither causing damage or injuries, the military said. Israeli forces and Gaza militants are supposed to refrain from attacking each other under a fragile cease-fire. The truce has been breached several times, making diplomatic efforts to build a lasting agreement difficult.

The rocket attacks were the first from Gaza since Thursday, said the Israeli military spokesman, who declined to be identified under army regulations. There was no claim of responsibility from any Palestinian militant group.

Israel and Gaza’s Hamas rulers stopped fighting in late January after a three-week Israeli offensive meant to halt eight years of near-daily rocket fire from Gaza.

Northern Ireland school

By James Wilson

NORTHERN IRELAND is holding its breath ahead of a crucial week, with police preparing themselves for the possibility of more terrorist attacks as the peace process enters another fraught phase.

The Troubles, the three decades of sectarian bloodshed in the province, have started to resurface in recent months. A bomb was discovered close to a school in Northern Ireland on Saturday, police said on Saturday, in a grim reminder of the increasing threat posed by dissident paramilitaries.

The homemade device was in the back of a black Volkswagen car in the village of Castlewellan in the southeast of the province. The device has now been made safe. A telephone warning claimed the bomb was originally intended for a nearby British Army base but had been abandoned.

The callers claimed to be from a dissident republican organisation — Catholic paramilitaries opposed to the peace process and wanting Northern Ireland to sever links with Britain and join the Republic of Ireland. Over 50 killed in Kenya oil blaze

NAIROBI, 1 Feb — More than 50 people were killed and dozens of others injured when an oil spill from a crashed truck burst into flames in Kenya on Saturday, local police and the Red Cross said.

The incident occurred near the central town of Molo, several hours’ drive from the Kenyan capital of Nairobi. Hundreds of people had gathered around the crashed truck in search of free fuel when the spill caught fire.

Bottled water firm

By David E. Taylor

A bottle of water is a rite of passage for those embarking on a long journey to pastures new. For others, the bottle is a reminder of the hard times that lie ahead. But for the hardy few, it is a symbol of hope and determination.

The 3D-print of the head of a Chachapoya-Mummy from Peru is seen in the special exhibition “Darwin’s Legacy” at the Neanderthal Museum in Mettmann, western Germany. To mark the 200th birthday of British scientist Charles Darwin and the 150th anniversary of his theory of evolution, the museum is putting on several special exhibitions about the natural history of life on earth.

Emperor penguins imperiled by melting ice

US researchers say Antartica’s emperor penguins could be extinct in parts of the region by the end of the 21st century.

Scientists discover honey bees can count

Australian and German scientists say they have discovered honey bees can tell the difference between different numbers at a glance.

The researchers, led by Professor Shaowu Zhang of the Australian National University and Professors Hans Gross and Juergen Tautz of Wurzburg University in Germany, showed bees can discriminate between patterns containing two and three dots. With a bit of schooling, bees can learn to tell the difference between three and four dots.

$130,120 found in tire on side of highway

Police said $130,120 cash discovered inside of an abandoned tire by Indiana Department of Transportation workers was likely drug money.

The Indiana State Police said the money was discovered by the highway workers on Friday while they were picking up litter along I-70 in Hancock County, the Indianapolis Star reported. The workers called the state police, who said the cash was rolled up in rubber bands, a common practice among drug couriers. A law enforcement dog detected the scent of drugs on the money.

US Immigration and Customs Enforcement spokesman Brett Sturgeon said officers will likely use notices in a newspaper to try to find the money’s rightful owner.

“In cases where there is no ownership, they will post a public notice in the local newspaper for three consecutive weeks before it is determined to be an administrative forfeiture,” Sturgeon said. “If no one petitions for the items or currency, it becomes the property of the government.”

Indonesia to subsidize public housing with 2.5 trillion rupiahs

JAKARTA, 1 Feb — The Indonesian government plans to subsidize the development of public housing across the country with 2.5 trillion rupiahs (about 222.9 million US dollars) in the 2009 fiscal year, said Indonesian Public Housing Minister Mohammad Yusuf Assy’i on Saturday.

“The budget is for a subsidy for housing development for the people across Indonesia,” the minister said in western Indonesia’s Aceh Province, adding that the funds would be enough for building 170,000 units of land housing and around 40,000 units of apartment, according to national Antara news agency on Saturday.

Afghan street protests after US raid kills two

KABUL, 1 Feb—Hundreds of Afghans demonstrated on Sunday against an overnight US military raid that one villager said killed several civilians. The American military said its forces only killed two militants.

The angry protestors gathered on the main highway linking Kabul and Kandahar near the site of the raid, the latest to stir up Afghan ire against foreign forces accused of killing civilians.

Also Sunday, a suicide bomber in a car attacked a convoy of foreign troops in Kabul, wounding two Afghans, police said. Taliban militants claimed responsibility for the attack.

The US military said that its overnight raid in southeastern Ghazni province targeted a militant who coordinates attacks using roadside bombs and other weapons. Its said coalition forces conducting the operation called out for all inhabitants to leave the targeted home, but several people barricaded themselves inside one building.

Coalition troops forced their way in and killed two militants, the US military said in a statement.

Sayed Ismail Jahangir, a spokesman for Ghazni’s governor, said local officials also reported two people killed in the raid. “We are now investigating. Who are these two killed, civilians or insurgents?” Jahangir said.

The issue of civilian deaths is highly sensitive in Afghanistan. President Hamid Karzai has pleaded for years with the US and NATO forces to prevent the deaths of innocent Afghans during military operations.

Government allies see gains in Iraqi elections

BAGHDAD, 1 Feb—Allies of Iraq’s US-backed prime minister appeared Sunday to have made gains in the provincial elections, rewarding groups credited with reining in insurgents and militias, according to unofficial projections.

Initial results from Saturday’s landmark voting are not expected for days. But reports by Iraqi media and interviews by The Associated Press suggest candidates backing Prime Minister Nouri al-Maliki had strong showings in the crucial Shiite heartland in southern Iraq.

If the indications prove true, it would strengthen al-Maliki’s hand ahead of national elections later this year and reflect a shift away from the more religious parties dominating the country.

Nationwide turnout was 51 percent, said Faraj al-Haidari, chairman of the election commission. It ranged from 40 percent in the Sunni-dominated Anbar province in western Iraq to 65 percent in the Salahuddin province, which includes the hometown of Saddam Hussein. Final figures were not yet ready for the Baghdad area, but al-Haidari said initial reports placed it at about 40 percent.

Al-Maliki’s supporters appeared to hold the lead in many areas of the south, including the key city of Basra and the Shiite spiritual center of Najaf, according to Iraq’s private Al-Sharqiya television. The trend was supported by voter comments in Basra and other areas.

More than 100 dead in Kenya gasoline blaze

MOLO (Kenya), 1 Feb—There were not nearly enough hospital beds—or body bags—after one of Kenya’s deadliest accidents in recent memory.

Burn victims lined the floors of overwhelmed hospitals on Sunday, hooked up to drips and moaning in pain after an overturned gasoline tanker exploded as hundreds of people tried to scoop up free fuel. More than 100 people were killed and 200 injured in the inferno, which was likely sparked by a cigarette.

“Everybody was screaming and most of them were running with fire on their bodies, they were just running into the bush,” said Charles Kamau, 22, who was driving through Moio on Saturday night when he saw the road blocked by hundreds of people with gerry cans, plastic bottles and buckets—anything to siphon some free fuel.

As he waited for the crowd to disperse, the gasoline ignited with a blast that was felt miles away. Prime Minister Raila Odinga said someone’s cigarette might have caused the explosion, but police said the cause remained under investigation.

YANGON, 1 Feb—The 31st Inter-State/Division Golf Championship 2009 kicked off at Ayeyawady Golf Club in Taunggyi of Shan State this morning. It was attended by Chairman of Shan State Peace and Development Council Commander of Eastern Command Brig-Gen Ya Pyae, Chairman of Myanmar Olympic Committee Minister for Sports Brig-Gen Thura Aye Myint, officials, guests and golf enthusiasts. The commander, the minister, Patron of Myanmar PGA and Myanmar Golf Federation Maj-Gen Win Hlaing (Retd) and officials launched the championship.

After the opening ceremony, the first round of the championship commenced.—MNA

YANGON, 1 Feb—Yoma Technologies to conduct Java professional courses

Under the arrangements of a British Software Engineer, Yoma Technologies will open the Step by Step Computer Programming Course (Java) on 16 February, the Advanced Java Course on 22 April and the Developer Course (JSE/J2SE) on 23 February, the OJT Java Developer Course (JSE/J2SE) on 22 April and the Enterprise Java (J2EE) on 16 February.

Step by Step Computer Programming Course (Java) will include subjects on Computer Programming Concepts, Introduction to Programming Using Java, Programming Logic & Control Structures, Recursion and Algorithms and Introduction to Object Oriented Programming (OOP).

Advanced Java Course will comprise subjects on Object Oriented Design and UML, Core Java/J2SE (Collections, I/O, Inner Classes, Generics, etc.), Java Swing API for GUI, Introduction to Relational Databases and SQL and Java Databases Connectivity (JDBC).

Moreover, Software Development Lifecycle, Object Oriented System Analysis and Design, Software Architectures, Component Based Development, Software Engineering Best Practices and A practical software development project to apply all of the above will be conducted at the OJT Java Developer Course.

Enterprise Java Course will comprise subjects on EJB 2, JPA for Object-Relational Mapping, JTA with EJB, JMA with EJB, Servlets, JSP to extend Servlets and JSF the latest Java Web Application Framework. Those wishing to attend the courses may contact Yoma Technologies in Hlme Township, at room No. 3, Building-2, Myanmar Info-Tech, Tel: 652264, extension: 15, 703230 and 603599.

Buthidaung Township gaining development momentum in all aspects

(Article: Reporter Singu Soe Win; Photos: Tin Soe (Myanma Alin))

On our way to Buthidaung Township, we witnessed timber extraction work with the use of elephants and machinery. From high Mayyu mountain range, timber logs and elephants in the extraction site seemed very small.

Together with paddy and produced 5,013,940 acres of paddy. The average yield of the region was 74.56 baskets per acre. In the previous year, the township yielded 71.5 baskets per acre achieving 138 per cent of rice sufficiency. The township has put 20,753 acres of land under summer paddy and cold season crops against the target of 58,782 acres.

In interviews, Executive Officer U Saw Wai of Township Development Affairs Committee and engineer in-charge U Min Tun said, “The Township DAC set the plan to earn K 209 million income in 2008-2009 financial year. In levying the taxes, the committee has collected over K 2.7 million for 1,953 buildings. So far, the committee has levied over K 182.6 million as taxes.”

The committee is carrying out development tasks including construction of a clock tower and landscaping near the port, the landscape works at the junction of Danyawady and Mayyu roads, placing of curbstones and growing of landscapes and shady trees along Bogyoke, Mayyu and Danyawady roads and painting of signboards, clock tower and curbstones.

Moreover, a total of 31 streets, bridges and 33 conduits are under construction in the urban area. The committee has spent K 97.20 million on construction of four miles and three furlongs long tarred road and four miles and two furlongs long gravel road out of 11 miles long urban roads. Furthermore, the remaining earth and gravel roads are under construction in accord with the plans yearly. The committee is making efforts for building 21 reinforced concrete bridges and two concrete conduits and upgrading 10 wooden bridges to the concrete ones by spending its funds yearly.

A total of 33 million gallons of water is being supplied six wards from 16-acre Kandawgyi Lake daily through 14 water tanks and 164 water taps. Moreover, water can be available at four earthen lakes for the public use.

Out of eight rural roads stretching 61 miles and four furlongs, the committee spent K 62.50 million on construction of 23 miles and four furlongs long gravel roads and 38 miles long earth roads. Furthermore, a total of 26 bridges and conduits were built on the rural roads by spending K 18.23 million.

As part of efforts to supply water to rural areas, a total of 27 earthen lakes were dug and fenced by spending K 12.15 million. In 2008-09 financial year, the committee is constructing eight tarred and gravel roads stretching 8,640 feet in urban area. A total of 10 more earthen rural lakes are being dug at two model villages and four other villages where water is scarce.

In the township, altogether 704 private entrepreneurs grew 2,192 acres of rubber plants. Of them, a total of 1,544 acres of rubber plantations are thriving in the township and rubber latex can be extracted from most of plantations.

Out of 339 villages in the township, self-reliant libraries have been opened in 290 villages. Actually, remarkable progress can be witnessed in Buthidaung Township in Rakhine State and it is on a par with development of other townships.

Inadequate hygiene raises teen MRSA risk

ATLANTA, 1 Feb—Inadequate hygiene among high school athletes increases their risk of contracting methicillin-resistant Staphylococcus aureus, US health officials said.

The Centers for Disease Control and Prevention’s Mortality and Morbidity Weekly Report said effective MRSA skin and soft tissue infection outbreak prevention among high school football programs could be achieved by designing processes and facilities to enable and promote optimal player hygiene and better educating coaching staff. The investigation of a high school football team MRSA outbreak in New York in 2007 suggests that football training camps are a setting where multiple risk factors converge to increase the likelihood of MRSA outbreaks. These risk factors include inadequate hygiene among players like sharing personal items, inadequate skin injury care and possibly crowded living conditions.

Outbreaks of soft tissue infection like MRSA continue to be a problem among football teams, especially at the high school level, the report said.—INTERNET

Protesters rally against world economic forum

Geneva (Switzerland), 1 Feb—Hundreds of people rallied in Geneva and Davos on Saturday to protest against the World Economic Forum, saying the elite gathered for its annual meeting are not qualified to fix the world’s problems.

Carrying banners reading ‘You are the Crisis’ and throwing snowballs, several hundred protesters marched to fences surrounding the heavily guarded Hotel Seehof in the Davos ski resort, where many world leaders and business people stay during the forum.

Protester Alex Heideger, a member of the Davos Green Party, said these were the people to blame for the economic mess. “It’s the same people who came last year and said the world economic situation is fine, and now we’re in a financial crisis. Now it’s the taxpayer who has to solve the whole problem. “It’s people like you and me who have to pay for it with our tax money,” he said.

In Geneva, where the WEF has its headquarters, police in riot gear fired tear gas and water canon to disperse a crowd that had gathered in a square near the train station, sending people running in all directions. Witnesses said there did not appear to be any violence by the protesters besides some thrown bottles. One of the groups organizing the rally later accused Geneva authorities of responding with disproportionate force to the demonstration.—INTERNET

Exercise no danger for healthy joints

BOSTON, 1 Feb—In the absence of existing joint injury there is no increased risk of osteoarthritis from exercise, US and German researchers said.

Although exercise is widely promoted as being beneficial for weight control, disease management in cardiovascular disease and diabetes, as well as psychological well-being, there is a perception that exercise is potentially deleterious to one’s joints, lead researcher Dr David Hunter of New England Baptist Hospital said.

Researchers from Boston and Airing, Germany, reviewed existing studies on the relationship between regular exercise and osteoarthritis.

“We found that in elite athletes where there was more likelihood of obtaining sports injuries, there was an increased risk of osteoarthritis in the damaged joints, but in most people vigorous, low-impact exercise is beneficial for both its physical and mental benefits,” Hunter said in a statement.—INTERNET

BPA remains in body after 24 hours

ROCHESTER, 1 Feb—Surprisingly high levels of the chemical bisphenol A remain in the bodies of some people even after they fast for as long as 24 hours, US researchers said. The finding, published online in the journal Environmental Health Perspectives, suggests BPA exposure may come from non-food sources, or that BPA is not rapidly metabolized, or both.

Researchers at the University of Rochester Medical Centre said the research is important because, until now, scientists believed BPA was excreted quickly and that people were exposed to BPA primarily through food.

Researchers said BPA exposure may come from non-food sources, or that BPA is not rapidly metabolized, or both. Manufacturers use BPA to harden plastics in many types of products, but it is also used in PVC water pipes, food storage containers, the inside of metal food cans and dental sealants.

Lead author Dr Richard W Stahlhut of the University of Rochester’s Environmental Health Sciences Centre and colleagues obtained data for a sample of 1,469 US adults through the Centre for Disease Control’s National Health and Nutrition Examination Survey.—INTERNET

Report says Taliban warns Obama more troops in Afghanistan will lead to more bloodshed

KABUL, 1 Feb — A Taliban leader warned President Obama Saturday that his plans to increase troops in Afghanistan will lead to more violence, Al Jazeera reported.

The comments were made by Taliban leader Mullah Mohammad Rasul and broadcast on Al Jazeera TV on Saturday. “Just as they are bringing more troops, so too the Taliban will have more troops,” Rasul, a former governor of the Afghan Province Nimruz, told Al Jazeera.

Rasul said bands of bombers were organizing and ready to fight the US military, according to the station. Obama promised during the presidential campaign to increase troop levels and resources for the war the United States is fighting in Afghanistan. There are currently 36,000 US troops in Afghanistan.—INTERNET
**Invitation To Tender**

Save the Children is an international aid agency responding to Cyclone Nargis in Myanmar. Save the Children wish to invite competent, reliable and legally registered construction companies for the construction of sub rural health centres as follows:

- 2 centres in Ngapudaw Township (Ayeayarwaddy division) RefNoCONS/HEA/NPW/001
- 4 centres in Kyauktaun Township (Yangon division) RefNoCONS/HEA/KYT/002
- 4 centres in Kungyangone Township (Yangon division) Ref NoCONS/HEA/KCG/003

The interested bidders can obtain the complete set of bidding documents at SC offices in:

- Kyauktaun, No. 25 Saybowa Block, Yangon-Kyauktaun road
- Yangon, No. 224 A, Solomon Tower, 2nd Floor, U Wisara Road, Bahan Township
- Kunchangone, No. 102 Myoma street, Myoma Block
- Thingangon, Ywarma Street, Ywarma quarter, Ngapudaw Township

The bidding documents can be collected not later than 6th February 2009 at 17.00 h

The bidding SEALED documents should be received by the Children not later than 13th February 2009 at 17.00 h; clearly specifying Ref # on the envelope.

Iran’s police seized about 1,000 kg of drugs and detained 14 smugglers

**TEHERAN, 1 Feb**—Iran’s police seized about 1,000 kg of drugs and detained 14 smugglers in the last three days, the official IRNA news agency reported on Saturday.

In an announcement released by the Information and Media Communication Centre of Iran’s Police on Saturday, the police forces, in a number of operations in different parts of the country, “seized 918 kg of drugs...and detained 14 smugglers.”

In November, Iran’s Drug Control Headquarters (DCH) announced that Iran would seal all the borders of the country within two years to control drugs smuggling. Secretary General of the DCH Ismail Moqaddam said that Iran intended to end the flow of narcotics through the country in the near future, the report said.

“Teheran is prepared to train Afghan police in a bid to reduce drug cultivation in the country,” he said.

Iran is located at the crossroad of international drug smuggling from Afghanistan, the world’s top opium producer, to Europe.

The country has seized some 375 tons of narcotics in the past eight months and “it has also spent over 600 million US dollars in the last two years to dig canals, build barriers and install barbed wire to seal off the country’s borders.”

---

**Thousands without power in Kentucky**

**LEXINGTON, 1 Feb**—Kentucky still struggled on Saturday with the effects of a deadly ice storm that brought the worst power outage in the state’s history. About 4,600 Guard members will be dispatched to the hardest-hit area, WKYT.com reported.

Gov Steve Beshear called the storm “the biggest natural disaster in the state’s modern history,” WKYT said. The governor said 450,000 people still had no electricity in their homes late Saturday, down from 700,000 on Thursday.

Thousands of people also had no water service.

“It’s going to take some time to dig our way out of this,” the governor said. The western part of the state was hit the hardest, he said.

Jamie Gummels said she had been told her power might not be restored for several days. “We were sitting there being thankful that we still had power,” she said. “A few minutes after we said we were thankful we had power, it went out.”

Louisville Mayor Jerry Abramson said there had been at least four deaths from the storm, three people in one family killed by an improperly vented generator and another person who was using a charcoal grill for heat.

---

**Mafia still big business in Italy**

**ROMO, 1 Feb**—The four major Italian mob organizations had revenues last year equal to 9 percent of the country’s gross domestic product in 2008, a think tank reports.

Europes estimated the mob’s total income at 130 billion euros ($167 billion). Drugs continued to be the biggest share of the business, generating an estimated 59 billion euros ($76 billion). The major crime organizations are regionally based. They are the Cosa Nostra in Sicily, the Camorra in Naples, Ndrangheta in Calabria and Sacra Corona Unitia in Puglia.

Environmental crimes have become more important and are now the second-biggest money-maker, the report said. It put the revenue brought in by trafficking in illegal waste and similar activities at 16 billion euros ($21 billion). More traditional mob crimes are still important, including loansharking, protection and arms trafficking.

Last year, police seized a total of 5.2 billion euros ($6.7 billion) in Mafia assets, getting the most from Cosa Nostra, followed by Camorra and Ndrangheta.

**Egypt ‘to monitor Gaza tunnels’**

**CAIRO, 1 Feb**—Egypt says it has begun to install cameras and motion sensors along the border with Gaza to try to stop weapons smuggling by Palestinian militants.

Tighter surveillance of the tunnels is one of Isra
el’s key conditions for maintaining the ceasefire that ended its three-week offensive against Hamas. The tunnels were used to smuggle food and medicine, as well as arms. Israel bombed them, but when the fighting stopped some were still usable and others have been repaired.

Egyptian security sources said the authorities had begun installing the equipment in the last few days along the 14km (8-mile) border with the help of American, French and German expertise.

Reuters news agency quoted the sources as saying they hoped the equipment would detect any new tunnel-building activity in the area.

**Malaysia’s second astronaut’s mission extended**

**KUALA LUMPUR, 1 Feb**— The Malaysian Science, Technology and Innovations Ministry has extended its contract with the country’s second astronaut Faiz Khalil for two years, local media reported on Saturday.

Faiz had accepted the offer, which means he would stand by as the country’s candidate astronaut until 2011 to see if there is any opportunity to enter space.

Faiz said that he was ready to undergo the rigorous astronaut training if the government decided to restart its space programme that it had momentarily stopped.

The injuries to his arm were fully healed and doctors had given the all-clear for him to pursue all types of activities, he told reporters on Saturday.

Faiz was reportedly injured when robbers armed with machetes attacked him and a friend in front of his house near here in November 2007.

He reportedly suffered a 5cm long gash on his left arm that almost reached his bone and needed more than 100 stitches for the eight injured tendons controlling his fingers. Malaysia’s first astronaut Sheikh Muszaphar Shukor went into space aboard a Russian spaceship in October 2007.—Internet

**Five newborns killed, one injured in India hospital fire**

**CHANDIGARH, 1 Feb**—Five newborns, all less than a week old, were killed and another was injured on Saturday in northern India after a short circuit sparked a fire in the hospital maternity ward where they were being treated for jaundice.

The blaze began before dawn at the state-run Rajendra hospital in the city of Patiala, apparently after a machine that helps treat jaundiced babies by exposing them to a special light malfunctioned, said police officer Pritpal Singh.

Five other newborns were rescued, including one that suffered burns. All the babies were under a week old and receiving treatment under the phototherapy machine.

“There was a short circuit in the tubes of the machines,” hospital superintendent Surinder Singh told a local television station. “The staff reacted immediately, but unfortunately five babies could not be saved.”

Television footage showed several weeping relatives outside the hospital, including some of the mothers who had been in nearby rooms at the time of the fire.—Internet

**Police investigate missing art dealer**

**SYDNEY, 1 Feb**—An Australian art dealer has disappeared, leaving clients wondering whether their money and artworks are safe. Police are trying to determine if Ron Coles was involved in art forgery, the Melbourne Sun-Herald reported.

The newspaper cited sources in the art world who said that dubiously painted masterpieces ostensibly by well-known Australian painters may be flooding the market.

“It’s been common knowledge for a while — we knew this was going to blow,” one source told the newspaper. “Nobody wanted to undermine confidence in the industry. Like it or not, the truth is now going to emerge.”

The source said one painter, d’Arcy Doyle, “was not a prolific painter and yet in recent times, there has been a never-ending stream of fresh works.”

Coles, who operated a gallery in Sydney, offered art as an investment, with many of his clients putting money from their retirement accounts into portfolios of artworks. Police say they have received 150 complaints from people who say Coles owes them money, including some who say they saw art they thought they owned on the Internet attributed to other owners.—Internet

Manchester United manager
ready for title twists
Manchester, 1 Feb—
Manchester United manager
Sir Alex Ferguson said he expected there to
be tricky moments be-
tween now and the end of the season after seeing his
side extend their Premier
League lead. United’s 1-
over Everton at Old
 Trafford here Saturday
left then five points clear
at the top of the table with
15 league games remain-
ing and ideally placed to
claim a third successive
Premier League title.

But Ferguson refused to
carry forward away after
Cristiano Ronaldo’s first
half penalty earned his
side a seventh straight
league win. “The impor-
tant thing is we keep the
form going,” said
Ferguson. “We have a
difficult game away to West
Ham next week. All teams
drop points in the run-in.
We just hope we don’t
drop as many as the rest,”
the Scot added.—Internet

Serena wins fourth
Australian Open title
Melbourne, 1 Feb—Serena Williams
thashed Russia’s Dinara Safina 6-0, 6-3 to
win her fourth Australian Open title Saturday, bring-
ing up her 10th Grand Slam and reclaiming the
world number one ranking on the way.

In one of the most
spectacular wins ever, the American
dominately defeated third seed Safina, allowing her
opponent to win only eight points in the first set
and claiming the championship in less than an
hour.

“I’m so excited ... I clearly knew this game and
get great support here. I didn’t get that every
game,” Williams said, after winning the first
set, 6-2, 6-1, and claiming the championship in less than an
hour.

A NASA Earth Observatory photo shows a large plume of smoke spreading southward from a fire (outlined) in Victoria’s Gippsland region, Australia, on 30 January. Wildfires that destroyed at least 28 homes in Australia were coming under control Sunday as a blistering heatwave that claimed dozens of lives eased, officials said.—INTERNET

**WEATHER**

Sunday, 1 February, 2009

Summary of observations recorded at 09:30 hr MST: During the past 24 hours, weather has been partly cloudy in Kachin State and Taninthayi Division and generally fair in the remaining States and Divisions. Night temperatures were (3°C) to (4°C) above February average temperatures in Kachin State, Mandalay, Bago and Taninthayi Divisions, (3°C) below February average temperatures in Chin and Rakhine States, upper Sagaing and Magway Divisions and about February average temperatures in the remaining areas. The significant night temperatures were Nambas (3°C) and Haka (4°C).

Maximum temperature on 31-1-2009 was 91°F. Minimum temperature on 1-2-2009 was 61°F. Relative humidity at (09:30) hrs MST on 1-2-2009 was 74%. Total sunshine hours on 31-1-2009 was (6.hrs) approx. Rainfall in 1-2-2009 was(Ni)(Nil) at Mingaladon, Kaba Aye and Central Yangon. Total rainfall since 1-1-2009 was(Ni)at Mingaladon, Kaba Aye and Central Yangon. Maximum wind speed at Yangon (Kaba Aye) was (5) mph from Southwest at (15:30) hours MST on 31-1-2009.

Bay inference: Weather is partly cloudy in the Andaman Sea and Southeast Bay and generally fair elsewhere in the Bay of Bengal.

Forecast valid until evening of 2nd February 2009: Possibility of isolated light rain in Kachin State, weather will be partly cloudy in Mon State, upper Sagaing, Yangon and Taninthai Divisions and generally fair in the remaining areas. Degree of certainty is (40%).

State of the sea: Seas will be slight to moderate in Myanmar waters.

Outlook for subsequent two days: Likelihood of isolated light rain in the extreme Northern Myanmar areas.

Forecast for Nay Pyi Taw and neighbouring area for 2-2-2009: Generally fair weather.

Forecast for Yangon and neighbouring area for 2-2-2009: Partly cloudy.

Forecast for Mandalay and neighbouring area for 2-2-2009: Generally fair weather.
Buthidaung Township gaining development momentum in all aspects

In the morning of 2 December 2008, Staff Officer U Kyaw Dewa of Maungtaw District Peace and Development Council Office took the news crew of the Myanma Alin Daily to Buthidaung by car.

We, the news team, saw children and adults in various dresses of Maungtaw walking near the 4th mile checkpoint. Obviously, peace and stability is prevailing in the border town.

The Myanma Radio and Television retransmission station was built with tower on a high hill. In my mind, I praised the staff members on MRTV who are discharging departmental duty on the hill without fear of dangers of wild elephants and beasts.

At Buthidaung Jetty, we met Chairman of Township Peace and Development Council U Nyan Myo before his departure for Sittway. Next, we had a chance to interview departmental personnel of the township.

First, Secretary of Township PDC U Aung Shwe Zan explained, “On 780 square miles of land Buthidaung Township is formed with seven wards and 339 villages of 78 village-tracts which are home to over 280,000 people. The township is facilitated with three Basic Education High Schools, one BEHS (Branch), one Affiliated BEHS, six BEMSs, two Affiliated BEMS, 145 PEPSs, 15 Post-Primary Schools and one Pre-Primary School. Over 900 teachers are teaching over 57,000 schoolchildren. Moreover, there are one township hospital, one station hospital and seven rural health centres. In 2007-2008, two hospitals provided over 27,000 patients with health care services and seven rural health centres helped give birth to 124 expectant mothers.”

Forester U Kyaw Sein Mra of Buthidaung Township Forest Department said that village fuel-wood substitute plantations and Thitseint (Belleric myrobalan) plantations were set up in the area of 5,010 acres of ironwood and teak plantations in the township. Elephants, tigers, wild beasts, other animals and birds can be seen in their natural habitat of 16.67 square miles of Mayyu Forest Reserve. Satin Protected Public Forest is on 196,142 acres of land, he said.

Drill here! locating drinking water under challenging conditions

MANAGUA, 1 Feb — Volcanic ground is a challenging place to drill water wells. In central Nicaragua, situated on volcanic bedrock, only 3 of every 10 wells drilled produce sufficient water for even one household.

That’s because, in volcanic rock, groundwater flows primarily through fracture zones that can’t be seen on the earth’s surface. Locating those underground fractures can improve the well-drilling success rate dramatically.

How a brain chemical changes locusts from harmless grasshoppers to swarming pests

SYDNEY, 1 Feb — Scientists have uncovered the underlying biological reason why locusts form migrating swarms. Their findings, reported in today’s edition of Science, could be used in the future to prevent the plagues which devastate crops (notably in developing countries), affecting the livelihood of one in ten people across the globe.

A collaboration between a team of scientists in Cambridge and Oxford, UK and Sydney, Australia has identified an increase in the chemical serotonin in specific parts of the insects’ nervous system as initiating the key changes in behaviour that cause them to swarm.

‘Hot Spot’ for toxic harmful algal blooms discovered off Washington Coast

VICTORIA, 1 Feb — A part of the Strait of Juan de Fuca, which separates Washington state from Canada’s British Columbia, is a potential “hot spot” for toxic harmful algal blooms affecting the Washington and British Columbia coasts.

Marine scientists found that under certain conditions, toxic algal cells from an offshore “initiation site” break off and are transported to nearshore areas, where they may trigger harmful algal blooms that ultimately force the closure of Washington state shellfish beds along beaches.

“Knowing more about these blooms is critical for protecting human and ecosystem health,” said David Garrison, director of the National Science Foundation (NSF)’s Biological Oceanography Program, which co-funded the research.

“This research is a very successful step toward addressing harmful algal blooms in the US.”
