Knowledge about COVID-19 is power

People are the key to winning the battle against the pandemic. They must cooperate with the authorities by following the guidelines and maintaining responsible behaviour and continue to help health leaders contain the spread of this deadly virus.

With the cooperation of volunteers, regional health authorities and the people, the spread of COVID-19 will be minimized to the greatest extent possible.

More importantly, the “Psycho Social Support”, in other words, counselling and giving support, has been provided at the “Community Based Facility Quarantine” units.

At all the IDP camps in Kachin State, Kayin State, Shan State and Rakhine State, the elderly persons between the ages of 60 and 85 years, and the pregnant mothers and under 2 years old infants would be entitled to K20,664 as financial support.

The Ministry of Social Welfare, Relief and Resettlement has kept the people informed of developments and sought approval from the Central Committee for COVID-19 Prevention, Control and Treatment, for the implementation of the working plan. This is the defining global health crisis that has been mitigating and reducing the suffering of the people.

More importantly, the “Psycho Social Support”, in other words — counseling and giving support, has been provided at the “Community Based Facility Quarantine” units. For those who are in dire need of counseling and support the valuable opportunities offered by phone numbers being provided by the Ministry in the relevant region and state, where the specially trained professionals are ready to answer in a secure and confidence manner.

In the working plan, the implementation tasks include such that of importing knowledge and information with regards to that of the prevention on the spreading of the virus; that of the emergency response when the symptoms of the infection are being detected, that of the proper management of the resources; that of the cooperation and coordination of the proper management over the information with regards to the pandemic trend; that of the monitoring and evaluation over the implementation of the working plan.

In connection with the various inspections being made by the UN agencies and the INGOs, the Unionungs and INGOs, the Union, the OCHA, the other UN agencies, the LRTF Fund Board, the World Vision Myanmar, the Myitlar Yin Myit Foundation and the Ministry of Social Welfare, Relief and Resettlement — in line with the directive of the Central Committee for COVID-19 Prevention, Control and Treatment, the IDP camps have been transformed into “Community Based Facility Quarantine” units.

PREVENTION, CONTROL AND TREATMENT OF COVID-19 AT IDP CAMPS

At all the IDP camps in Kachin State, Kayin State, Shan State, and Rakhine State, the elderly persons between the ages of 60 and 85 years, and the pregnant mothers and under 2 years old infants would be entitled to K20,664 as financial support.

In the campaign of social awareness, the humanitarian assistance program, the motto “No one is to be left behind” in line with the directive of the Ministry of Social Welfare, Relief and Resettlement has been transformed into “Community Based Facility Quarantine” units in collaboration with the regional government and the state governments.

The shelters are from the townships namely Kyathata, Labyan, Pauk, Hlaing Bwe, and Kaw Taung. Moreover, in the Rakhine State, the Hlaing Thaung PANB Quarantine in Maungtaw Township has been transformed into “Community Based Facility Quarantine” unit for the returnees of the Rakhine State under own consent.

With regards to the violence against women and girls, it takes many different forms, such as domestic violence, the sexual assault and harassment. These cases could be confided at hotline — 999 34040499 with safe, secure and confidentiality.

Working in top gear At a time when the COVID-19 pandemic stands at the grim milestone on this planet, Myanmar has formed the National Level Central Committee for COVID-19 Prevention, Control and Treatment, and that tasks are rolling ahead in top gear.

As having expected through projection, the first positive patient was confirmed in Rangoon, then March 2020, the formation of the Coronavirus Disease 2019 Containment and Emergency Response Committee. Related tasks are being rapidly carried out with the broad participation of the administrative sectors, healthcare workers and volunteers in the whole country.

On the part of the Ministry of Social Welfare, Relief and Re-settlement, the officers and the people are urging to raise cleanliness and public hygiene levels, and to maintain the guidelines and public awareness should be raised among the people.

Through the hand speakers, and awareness on the disease; and on the ground reality at the targeted areas.

Moreover, in the Rakhine State, the Hlaing Thaung PANB Quarantine in Maungtaw Township has been transformed into “Community Based Facility Quarantine” unit for the returnees of the Rakhine State under own consent.

In the face of this infectious disease, increased cooperation between administrative sectors, healthcare workers and volunteers is a must. People are the key to winning the battle against the pandemic. They must cooperate with the authorities by following the guidelines and maintain responsible behaviour and continue to help health leaders contain the spread of this deadly virus.

Having knowledge about the COVID-19 is the power to contain the disease. To give the power to the people, health awareness should be raised—does not only among the people to ensure that they take steps to minimize exposure to the virus.

While the Ministry of Health and Sports has kept the people informed of developments, the people are urged to stay informed and stay safe following the health guidelines. This is the defining global health crisis that knowledge really is power.

A number of school/college/universities, and on the ground reality at the targeted areas.
