Talk focused on climate change policy of Myanmar by San Win, Assistant Director Environmental Conservation Department from Myanmar (15 min)

Q&A: This workshop will discuss the SR15 and AR5 key messages with a specific focus on the region as well as the AR6 scoped outlines and what it means for the science-policy interface. It will provide an opportunity for dialogue between local, regional and national policymakers and other stakeholders on the challenges and priority actions on climate change with the input from IPCC scientists. It will reply to questions such as:

- What are the most troubling aspects of climate change for the country and region? (Water, food, flooding, draught, other?)
- How is climate change already affecting the country and region?
- What are the most effective actions currently underway in the region for adapting to climate change?
- What are the most effective actions currently underway for reducing greenhouse gas emissions?
- How can the business community help prevent climate change?
- What can everyday people do to curb climate change and to adapt to it?
- What lessons can other countries learn from your country's example?

LUNCH BREAK

12:00 – 13:00

Summary on how to contribute to the work of the IPCC by Jonathan Lynn (5 min)

Perspectives from Myanmar by Zin Nwe Myint, Department of Geography, University of Yangon (15 min)

Q&A: This workshop will provide a summary on how to contribute to the work of the IPCC and the upcoming WG reports to stimulate the production of literature, reviews and participation in the next assessments. It will raise awareness on the AR5 and SR15 findings, as well as the role of the IPCC and its authors, the IPCC process in general and the opportunities for local scientists during the AR6 and future assessments. It will provide an opportunity for a dialogue between local research community and IPCC scientists. It will reply to questions such as:

- How can local scientists build a pipeline of papers from the region that can be assessed in future assessment reports?
- How can emerging local scientists become IPCC Authors and Expert Reviewers?
- How can we ensure that research on the pressing issues and the region is fully assessed in the IPCC?
- Why is it important exposing new and existing students and post-docs to the culture and practice of the international research community?
- What are the prospects to improve national and regional contribution to future assessments?
- How can one review the drafts of the reports?
- How can one be nominated to participate in the various IPCC process?
