

Statement on the death sentence for political activists, including (9) women
Burmese Women's Union

Date. August 8, 2022.

Unjustly sentenced to death, Jimmy, Phyo Zayar Thaw, Aung Thura Zaw, and Hla Myo Aung were actually killed, the military council announced on July 25. Despite warnings and objections from the international community, the decision was made without informing the families of the political prisoners who were killed. In addition, there are reports that other people who have been unjustly sentenced to death are being prepared for execution. We, the Burmese Women's Union, strongly condemns the unlawful killing of these political activists in prison.

Currently, there are 77 people who are unjustly sentenced to death, including 9 women. In the view of BWU, the jurisdiction under military council was unjust and all the sentences were biased. In the current situation, the sentences themselves should be regarded as crimes and murders. From the perspective of international human rights, the act shows no respect for justice and human rights in terms of law. Furthermore, the right to life does not allow the death penalty to be imposed on anyone. The action is also obviously against the essence of democracy.

BWU is seriously concerned that the terrorist military council is in a position to carry out more executions. So, now is the time for us to unite more to prevent such kind of actions. The actions of the Terrorist Military Council ignore the interests of the people and risk the sweat, blood and lives of many people to maintain their power. Therefore, in eradicating the military dictatorship,

the related alliance groups, Democracy and human rights activists and all the people should work together in harmony, hand-in-hand.

Although the international community, including ASEAN, warned and protested against the execution of political activists, the Terrorist Military Council did not recognize and acted against it. The heinous actions of the Burmese military council proves that it is time for the international community, including ASEAN, to take more practical measures to bring changes in Burma.

Therefore, it is important to immediately stop the inhumane acts of Burmese military. And, we the Burmese Women Union, would like to urge international governments to put more and severe pressures against Burmese military to stop its unlawful actions.
