

CONDEMNATION OF THE BARBARIC BOMBING OF CIVILIANS 11 APRIL 2023

On the morning of April 11th, 2023, the genocidal military junta carried out a barbaric bombardment on the innocent civilians of Pazigyee Village, Sagaing. The terrorist attack has resulted in countless tragic deaths and injuries, including many among the elderly, women, and children. The genocidal military junta maintains a semblance of control through brutal terroristic tactics, continues to escalate their violent campaign of airstrikes throughout the nation. It is imperative that we, domestically and internationally, recognise the ruthless and illegitimate nature of the junta and unite to put an end to their heinous crimes against humanity.

We urgently call upon the International Community, including the UN Security Council, neighbouring and Western Nations, ASEAN Member States, and all free and Democratic Countries to take immediate and effective action to protect the people of Myanmar. To prevent the junta from carrying out further violent airstrikes on innocent civilians, we call for the establishment of a no-fly zone over Myanmar. Additionally, stricter and more effective targeted sanctions must be imposed, in particular those related to the importation of aviation fuel, arms, and munitions to genocidal military junta; the purchase of oil, gas, and other natural resources from Myanmar; and seizing foreign assets from those responsible for these atrocities.

Most importantly, the perpetrators must be held accountable for their crimes against humanity. This can be achieved through investigation and prosecution in international criminal courts (ICC), the issuing of international arrest warrants, travel bans, and business bans. Moreover, the provision of support to civil society organisations in Myanmar working for human rights and democracy is essential. It is important that we work together to bring an end to the junta's reign of terror and strive towards a brighter, more peaceful future for the people of Myanmar.

The National Unity Government remains resolute in our commitment to protecting our people and bringing justice to those affected. In addition, we would like to reassure that our ministry's priority has been to gather information and take action to assist those impacted by this heinous crime. Our thoughts and prayers go out to the victims of the Pazigyee village, Kantbalu airstrikes, and we extend our deepest condolences, thoughts and prayers to their remaining family members and love ones. Again, we implore the international community to stand with Myanmar people in solidarity as we work towards a democratic and peaceful future for Myanmar.
