မော်ရှည်ချစ်သူများ၏ အောင်မြင်ချက်များကို စောင့်ရှောင်ပါ၀င်နိုင်မည်။

"မော်ရှည်ချစ်သူများ၏ အောင်မြင်ချက်များကို စောင့်ရှောင်ပါ၀င်နိုင်မည်။"
Compressed Natural Gas (CNG) is the most widely used alternative fuel for vehicles. It is a versatile fuel that can be used in both passenger and commercial vehicles. CNG has been used in vehicles for over 100 years, and it was first introduced in the United States in the 1960s. Today, CNG is used in a variety of vehicles, including cars, trucks, and buses.

There are two main types of CNG vehicles: those powered by CNG natural gas and those powered by compressed natural gas. CNG natural gas vehicles are powered by a CNG engine, which is designed to run on CNG. CNG compressed natural gas vehicles are powered by a CNG engine that is designed to run on compressed natural gas.

Dr. Gue See Sew, who is a renowned expert in the field of engineering, expressed his gratitude to Lieutenant General Sun Zhiqiang for his continuous support and encouragement. He also praised the efforts of the ASEAN Federation of Engineering Organizations in promoting engineering education and research in the region.

Lieutenant General Sun Zhiqiang congratulated Ir. Choo Kok Beng on his achievement and thanked him for his contributions to the engineering community. He also highlighted the importance of collaboration and cooperation among engineers from different countries.

Irr. Chua Choy Beng, who is a well-known engineer in the region, thanked Lieutenant General Sun Zhiqiang for his inspiration and encouragement. He also emphasized the need for engineers to continue learning and developing new skills to stay ahead in the competitive global market.

Overall, the conference was a great success, and it provided a platform for engineers to share their knowledge and experiences. The speakers and attendees were all enthusiastic and committed to advancing the field of engineering.

Dr. Gue See Sew concluded the conference by expressing his gratitude to everyone who had contributed to its success. He also called on engineers to continue to work together to ensure the continued progress of the engineering profession.
