MONSOON RESPONSE IN ROHINGYA REFUGEE CAMPS
WEEKLY UPDATE | 26 July to 1 August 2019
Cox’s Bazar, Bangladesh

I - SITUATION OVERVIEW

- During the reporting period, monsoon-related events affected almost 640 refugees. 86 refugees were temporarily displaced.
- Impact on sector activities and essential facilities has been relatively limited, with no reports of key facilities damaged or destroyed.
- The monsoon season in Bangladesh officially started on 17 June. However, weather-related incidents have been recorded in the Rohingya refugee camps since April. Over 6,300 people have been temporarily displaced, while 42 have been injured. To date, the number of people temporarily displaced and injured is comparable to the 2018 monsoon season, when by the end of July around 6,000 people had been temporarily displaced and over 30 injured.

Cumulative incidents reported in Camps since April
Site Management Sector Daily Incident Reporting

CUMULATIVE CASUALTIES: Since 21 April, 10 fatalities have been reported in the Camps. Some 42 refugees have been injured.

---

1 Households and/or individuals directly affected by a specific incident, including people injured, relocated, displaced and with damaged shelters. These estimates do not include people who are indirectly affected, for instance by not being able to access affected facilities.
2 The Site Management Sector Daily Incident Reports started tracking the impact of monsoon and other weather related events on 21 of April.

IV - NEEDS AND RESPONSE TO WEATHER-RELATED INCIDENTS

SHELTER

During the reporting period, Site Management Sector partners reported 145 shelters as partly or fully damaged (116 households partially and 29 households fully damaged). Shelters reported damaged were verified and additional damaged shelters were reported directly to the Shelter Focal Points.

</table>

Out of 355 HHs that were verified as damaged 312 HHs received assistance. In month of July, 6,203 HHs were verified as damaged, out of them 6,098 HHs were provided with shelter assistance. Some households still remain with their relatives or in temporary collective shelters as the areas where they were residing are not yet useable due to the impact of slope failure.

PROTECTION

- Even though Protection Emergency Response Units (PERUs) were not formally activated during the reporting period, teams remained on standby for prompt action. Protection teams continued to work closely with other actors, especially Site Management and Shelter Focal Points, for urgent referrals and vulnerability assessments of households to be relocated to safer areas. In total, 73 households were referred for shelter repairing or relocation to safer shelters, 2 households were referred for WASH assistance and 1 Unaccompanied/Separated Child (UASC) was referred to Child Protection.

---

6 Please note that the ‘slope failure’ Landslides, as recorded in the camps, encompass a relatively broad variety of processes and phenomena: soil erosion, failure of stabilization structures, steep slope failures and rotational slides. Small landslides, or slope failures, typically involve up to a few m³; medium-sized landslides from 5 to 50 m³ and large landslides anything above 50 m³."
Emergency Preparedness sensitization and capacity-building continued to be conducted through different channels, including: 1,500 door-to-door or block gatherings which reached around 15,000 refugees;

Some 13 service projects were implemented by community groups across 16 camps with focus on repairing/maintenance of community infrastructures.

**Child Protection Sub-Sector (CPSS)**
- During the reporting period, 4 lost children between the ages of 4 to 7 were identified and reunited with their primary caregivers.
- Child Protection partners conducted 34 awareness raising sessions with 65 children, 54 adolescents and 223 parents and caregivers through Child Based Child Protection Committees (CBCPCs) on family separation and dengue fever prevention and treatment in cases of infection.
- Child safety walk exercises are conducted across all the camp to identify the physical safety and protection issues for children.

**COMMUNICATION WITH COMMUNITIES (CWC)**
- Video content on monsoon, cyclone and shelter preparedness continues at community as are the radio listener groups where participants listen and discuss programs on cyclone, shelter, and landslide preparedness.
- Awareness raising group sessions on monsoon preparedness sessions have been conducted in camp 1E, 1W, 2E, 2W, 3, 4, 15, 16, 21 and 22.
- Preparations for the Dengue prevention campaign are on-going, in collaboration with Health, WASH and the Education Sector.

**WATER, SANITATION and HYGIENE (WASH)**
- At least 440 people were affected by rainfall, with 17 bathing areas and 5 latrines partially damaged. Activities to repair the damaged infrastructure are on-going.
