

American citizen Mr John William Yettaw, Daw Aung San Suu Kyi, Daw Khin Khin Win, Ma Win Ma Ma brought to trial

NAY PYI TAW, 18 May—Restrictions were imposed on Daw Aung San Suu Kyi of No (54/56), University Avenue, Shwetaungkya (1) Ward, Bahan Township, Yangon, by issuing the restriction order against her fundamental rights under section-7 of the Law to Safeguard the State Against the Dangers of Those Desiring to Cause Subversive Acts, the arrest order under section-10 (A) and the prohibition order under section-10 (B)/11 and the continued prohibition order under section-13/14.

Amid such restrictions imposed on her, an American citizen by the name of Mr John William Yettaw on the night of 30 November 2008 swam across Inya lake to the back of the compound of Daw Aung San Suu Kyi's house, met with Daw Khin Khin Win and Ma Win Ma Ma at the gate and left a book titled 'Book of Mormon' in the house compound for Daw Aung San Suu Kyi to read. Likewise, on the night of 3 May 2009, he secretly entered the compound of Daw Aung San Suu Kyi's house by swimming across Inya Lake. She received Mr John William Yettaw and served him with meals. He was allowed to stay there up to the night of 5 May. Daw Khin Khin Win and Ma Win Ma Ma also helped her with her act. In connection with the case, Police Lt-Col Zaw Min Aung acting as a plaintiff filed law suits against Daw Aung San Suu Kyi under section-22 of the Law to Safeguard the State Against the Dangers of Those Desiring to Cause Subversive Acts; against Daw Khin Khin Win, Ma Win Ma Ma and Mr John William Yettaw under section-22 of that law and section-109; and against Mr John William Yettaw, who violated the prescribed rules and regulations although he arrived on a tourist visa, under section-13(1) of the Immigration Act (Emergency Provisions) at Bahan Township Police Station in accord with (Pa) 301/2009 and (Pa) 302/2009.

Likewise, Executive Officer of Mayangon Township Development Affairs Committee U Aung Naing Htoo filed a lawsuit against Mr John William Yettaw under section-28 of Yangon City Development Committee Law for breaching the restriction on swimming in Inya Lake imposed according to the YCDC Water Supply and Sanitation Rules (40) at Yangon North District Court.

District Judges U Thaung Nyunt and U Nyi Nyi Soe sitting at Yangon North District Court on 14 May heard the cases filed by Bahan Township Police Force and a case filed by the Executive Officer of Mayangon Township Development Affairs Committee under Criminal Case Nos 47/2009, 48/2009 and 49/2009. On that day, Yangon North District Law Officer U Myint Kyaing presented the arguments related to the cases to the court. After hearing the cases presented by the law officer, the district court adjourned the cases until 18 May after informing the defendants that they may defend through their lawyers.

Today, the defendants appeared in the court, and Advocates U Kyi Win, U Nyan Win and U Hla Myo Myint who are defending Daw Aung San Suu Kyi, Advocates Daw Khin Htay Kywe, U Hla Myo Myint and U Nyan Win who are defending Daw Khin Khin Win, Advocates Daw Khin Htay Kywe and U Hla Myo Myint who are defending Ma Win Ma Ma, and HGP U Khin Maung Oo who is defending Mr John William Yettaw presented their legal documents. The court continued hearing the cases until 3 pm, during which a prosecution witness appears for each case.—MNA

Four political objectives

- * Stability of the State, community peace and tranquillity, prevalence of law and order
- * National reconsolidation
- * Emergence of a new enduring State Constitution
- * Building of a new modern developed nation in accord with the new State Constitution

Four economic objectives

- * Development of agriculture as the base and all-round development of other sectors of the economy as well
- * Proper evolution of the market-oriented economic system
- * Development of the economy inviting participation in terms of technical know-how and investments from sources inside the country and abroad
- * The initiative to shape the national economy must be kept in the hands of the State and the national peoples

Four social objectives

- * Uplift of the morale and morality of the entire nation
- * Uplift of national prestige and integrity and preservation and safeguarding of cultural heritage and national character
- * Uplift of dynamism of patriotic spirit
- * Uplift of health, fitness and education standards of the entire nation

Special Sales of Ministry of Industry-1 coming soon

YANGON, 18 May—Ministry of Industry-1 will organize Special Sales in YeU of Sagaing Division from 18 to 24 May, Mogaung in Kachin State from 19 to 25 May, Natmauk in Magway Division from 20 to 26 May, Loikaw in Kayah State from 22 to 28 May, Thongwa in Yangon Division from 25 to 31 May, Katha in Sagaing Division from 26 May to 1 June, Patheingyi in Mandalay Division from 27 May to 2 June.—MNA

Can happiness be inherited?

MEXICO CITY, 18 May—A new study suggests that our feelings in our lifetime can affect our children.

Dr. Halabe Bucay suggests that a wide range of chemicals that our brain generates when we

are in different moods could affect 'germ cells' (eggs and sperm), the cells that ultimately produce the next generation. Such natural chemicals could affect the way that specific genes are expressed in the germ cells, and

hence how a child develops.

In his article in the latest issue of *Bioscience Hypotheses*, Dr Alberto Halabe Bucay of Research Center Halabe and Darwich, Mexico, suggested that the hormones and chemicals resulting from happiness, depression and other mental states can affect our eggs and sperm, resulting in lasting changes in our children at the time of their conception.

Brain chemicals such as endorphins, and drugs, such as marijuana and heroin are known to have significant effects on sperm and eggs, altering the patterns of genes that are active in them.

Biological particles trigger ice formation in high-altitude clouds

SAN DIEGO, 18 May — A team of UC San Diego-led atmospheric chemistry researchers moved closer to what is considered the "holy grail" of climate change science when it made the first-ever direct detection of biological particles within ice clouds.

The team, led by Kerri Pratt, a Ph.D. student of atmospheric chemistry Professor Kim Prather, who also holds appointments at Scripps Institution of Oceanography as well as the Department of Chemistry and Biochemistry at UCSD, sampled water droplet and ice crystal residues at high speeds from an aircraft flying

Biological particles—bacteria, pollen, fungi—act as nuclei for formation of ice in clouds.

through clouds in the skies over Wyoming in fall 2007.

Analysis of the ice crystals revealed that they were made up almost entirely of either dust or biological particles such as bacteria, fungal spores and plant material.

While it has long been known that microorganisms or parts of them get airborne and travel great distances, this study is the first to yield in-situ data on their participation in cloud ice processes.
