Work in concert for complete realization of educational aims

The opening ceremony of the Special Refresher Course No (68) for basic education teachers was held at the Central Institute of Civil Service (Phaunggyi) in Hlegu Township in Yangon Division on 29 June.

Since its assumption of the State responsibilities, the Tatmadaw government has striven to establish a new nation, mobilizing all the national forces and focusing on education.

It is one of the educational aims of Myanmar to establish an education system that can create a constant learning society and cope with the challenges of the knowledge age. In accordance with this aim, the 30-year long-term national education promotion plan is being implemented.

The objectives laid down for the basic education sector are for every citizen to successfully complete basic education and become blue-collar and white-collar workers of strong moral fibre, to lay down the foundation for vocational education, to give priority to conducting science and arts courses that can contribute to increased productivity and preservation of national culture and literature and for students to have a good grounding in the subjects taught at basic education level for being able to pursue tertiary education.

Basic education teachers are to carefully nurture students, new generations who will have to shoulder the responsibilities of the future nation. Therefore, they are required to equip themselves with sound national convictions and constantly improve their teaching skills in accord with the changing times.

At a time when the long-term national education promotion plan is being implemented, we would like to call on parents, teachers and students to work in concert for complete realization of educational aims.

Values-Based Leadership talks on 4 July

YANGON, 30 June—With the sponsorship of Sinma Furnishing Co Ltd, monthly educative talks for July 2009 organized by Union of Myanmar Federation of Chambers of Commerce and Industry will be held on the first floor of UMFCCI office tower, here, at 2 pm on 4 July.

Professor Dr Aung Tun Thet will give talks on Values-Based Leadership (VBL).

Executives and members of UMFCCI and its affiliated associations and any interested persons may attend the talks.—MNA

US Air Force test fires missile from California Base

CALIFORNIA, 30 June—The Air Force successfully launched an unarmed Minuteman 3 intercontinental ballistic missile Monday from the California coast to an area in the Pacific Ocean some 4,200 miles away.

The missile, configured with a National Nuclear Security Administration Test Assembly, was launched under the direction of the 576th Flight Test Squadron, whose members installed tracking and command destruct systems on it to collect data and meet safety requirements.

On clear mornings the missiles in such tests can be seen as far away as Los Angeles 140 miles away, but a foggy coast on Monday made the missile difficult to see even in the immediate area.

“These are dangerous times we’re living in right now,” Lt. Col. Lesa K. Toler, commander of the 576th, said in a statement. “It’s extremely important our combatant commander has the capabilities he needs to perform the mission of fighting and winning our nation’s wars”.

Canada’s confirmed A/H1N1 flu cases rise to 7,983

OTTAWA, 30 June—The total of confirmed A/H1N1 flu cases in Canada has risen to 7,983, with 208 new cases added during the past three days, according to the latest figures released by the Public Health Agency of Canada (PHAC) Monday. Two more persons have died of the virus, bringing the total victims of the flu in Canada to 25. The number of patients that require hospitalization has increased to 636, with 140 cases added during the past three days.—Xinhua

Relatives burn tires after Lebanon sectarian clash

BEIRUT, 30 June—Relatives angry over the fatal shooting of a Lebanese woman in a clash between rival Sunnis and Shiites in a Beirut neighbourhood burned tires and briefly blocked a road on Monday, in a sign of the country’s lingering tensions as it struggles to form a unity government. The brief protest came despite heavy deployment of troops in mixed Sunni-Shiite districts of the Lebanese capital to prevent any renewal of Sunday’s outburst — the first sectarian violence since this month’s divisive parliament elections.—Internet

At least one killed in small plane crash in southern Canada

OTTAWA, 30 June—At least one person was killed early on Monday when a small plane crashed in southern Canada, police in Ontario province confirmed.

The plane crashed and caught fire at about 8:30 am local time (1330 GMT) in a field just outside the Waterloo International Airport in south-western Ontario, reports said.

Waterloo Region police Insp Steve Beckett said there is at least one fatality and officials are still trying to confirm whether there was anyone else onboard.

Beckett added there is extensive wreckage.

Study charts swine flu’s spread through air travel

ATLANTA, 30 June — In a startling measure of just how widely a new disease can spread, researchers accurately plotted swine flu’s course around the world by tracking air travel from Mexico.

The research was based on an analysis of flight data from March and April last year, which showed more than 2 million people flew from Mexico to more than 1,000 cities worldwide. Researchers said patterns of departures from Mexico in those months varies little from year to year; swine flu began its spread in March and April this year.

Passengers traveled to 164 countries, but four out of five of those went to the United States. That fits

with the path of the epidemic a year later. The findings were reported on Monday in the *New England Journal of Medicine*.

The research shows promise in forecasting how a new contagion might unfold, indicated one government health official who praised the work. “We share a com-

mon interest in this issue: If we map the global airline distribution network, can we anticipate, once a virus emerges, where it is likely to show up next?” asked Dr Martin Cetron of the US Centers for Disease Control and Prevention. He leads CDC’s division of global migration and quarantine.—Internet

Major air accidents since 2008

BEIJING, 30 June—A Yemeni airliner with 150 people on board crashed off the Comoros archipelago in the Indian Ocean on Tuesday, and no immediate news was available on whether there are any survivors.

The following is a list of major air accidents worldwide since 2008:

21 Feb, 2008, a passenger plane belonging to a small Venezuelan airline company Santa Barbara crashed in the Andes just after taking off. All 46 people on board were killed;

15 April, 2008, a passenger plane crashed into a market in eastern Democratic Republic of the Congo, killing more than 50 people;

20 Aug, 2008, 154 people died and 18 others were injured when a 15-year-

old plane crashed and burst into flames during takeoff in Madrid.

24 Aug, 2008, a Boeing 737-200 owned by Itek Air crashed shortly after takeoff from the airport at Bishkek, Kyrgyzstan, killing 65 people and injuring 22 others;

14 Sept, 2008, an Aeroflot Boeing 737 plane crashed in a ball of fire near the Ural mountains, killing all 82 passengers and six crew members;

12 Feb, 2009, US Continental Airlines Flight 3407 crashed in suburban Buffalo in northern New York state, killing all 49 aboard and one on the ground.

20 May, 2009, an Indonesian Air Force Hercules C-130 crashed and burnt in Magetan, East Java, killing at least 98 people and injuring 15 others.

1 June, 2009, Air France Flight 447, an Airbus A330, went down into the Atlantic Ocean after leaving Rio de Janeiro for Paris, killing all 228 people on board.—Internet

Ailing California economy could prolong US recession

SACRAMENTO, 30 June — California faces a \$24 billion budget shortfall, an eye-popping amount that dwarfs many states' entire annual spending plans.

Beyond California's borders, why should anyone care that the home of Google and the Walt Disney Co might stop paying its bills this week?

Virtually all states are suffering in the recession,

some worse than California. But none has the economic horsepower of the world's eighth-largest economy, home to one in eight Americans.

California accounts for 12 percent of the nation's gross domestic product and the largest share of retail sales of any state. It also sends far more in tax revenue to the federal government than

it receives — giving a dollar for every 80 cents it gets back — which means Californians are keeping social programme afloat across the country.

While the deficit only affects the state, California's deepening economic malaise could make it harder for the entire nation's economy to recover.

When the state stumbles, its sheer size — 38.3 million people — creates fallout for businesses from Texas to Michigan.

Tourism spending in Canada falls for third consecutive quarter

OTTAWA, 30 June—Total spending on tourism in Canada declined by 1.3 percent in the first quarter of 2009, constituting the third consecutive quarterly fall of this industry, government agency Statistics reported on Monday.

Tourism spending measures the cumulative expenditures by both travelers from abroad and Canadians. Three consecutive quarterly drops last occurred in Canada in the aftermath of the 11 September, 2001 attacks, when the tourism industry experienced a major decline.

Tourism spending has declined a cumulative 2.4 percent so far in the current downturn, the report said.

Spending by visitors from abroad fell by 5.7 percent in the first quarter of 2009, the sharpest decline since just after the SARS outbreak in the second quarter of 2003. These travelers spent less on all tourism commodities, Statistics Canada reported.

Among this group, consumption of vehicle fuel was down 10.3 percent, and spending on food and beverages fell 8.0 percent. These drops could be driven in part by declining numbers of US visitors.

Meanwhile, tourism spending by Canadians fell slightly by 0.1 percent in the quarter. Canadians flew less, as spending on air transportation fell 2.3 percent.—*Internet*

First \$1 million find for US Antiques Roadshow

NEW YORK, 30 June—A woman who inherited some Chinese carved jade from her father has scored the first \$1 million (601,557 pounds) appraisal from experts on the US television programme "Antiques Roadshow," the producers said on Monday.

In a record for the show, four pieces of Chinese carved jade and celadon from the Chien Lung Dynasty (1736-1795), including a large bowl crafted for the Emperor, were given a conservative auction estimate of up to \$1.07 million. "For 13 years, we've been hoping to feature a million-dollar appraisal on 'Antiques Roadshow,' it's been our 'Great White Whale,'" executive producer Marsha Bemko said.

"We're thrilled that, despite this year's slow economy, 'Roadshow' finally captured this elusive trophy," she said in a statement released by Boston-based production company WGBH, which licensed the format from the British show of the same name produced by the BBC. On both shows, members of the public bring in items to be appraised by professionals in the hope of discovering that junk from the attic is actually a valuable treasure.—*Internet*

At least seven migrants killed off Spanish coast

MADRID, 30 June — At least seven African migrants died on Monday when a boat thought to be trafficking up to 30 people hit rocks near Cadiz in southern Spain, a spokesman for the Coast Guard said. The bodies of four people who appeared to be North Africans were found on Monday morning, near the fishing town of Barbate, near

Spain's southernmost tip, before police found three more corpses during the afternoon. The website of newspaper *El Pais* reported that 10 passengers survived, and that police were searching for the remainder. More than 13,200 immigrants risked their lives to reach the Spanish coast from Africa in 2008 and thousands more are

believed to have drowned attempting to seek a better life in Europe. People smugglers increase the number of trips in the summer, because better weather conditions reduce the dangers of shipwreck and hypothermia, common causes of death for those who risk the dangerous journeys to southern Spain or the Canary Islands.

Oil spikes to 8-month high

PERTH, 30 June—Oil prices jumped more than 2 percent to an eight-month high above \$73 a barrel on Tuesday, as a sudden spike in Brent buying pinned on fund positioning cemented the market's best quarterly gain since 1990.

While the rally drew support from fresh attacks on oil facilities in Nigeria, improving risk sentiment aided by rising equity markets and a weaker dollar, traders said those factors were secondary to the sudden big Brent bid orders that triggered the frenzy, overwhelming liquidity during the thin Asian day.

Trading volume in

both Brent and US crude oil futures surged to more than 10 times the norm for the Asian time zone as prices leapt more than \$1.50 in under half an

hour around 0200 GMT (10 pm EDT), the sort of move typically only seen in the event of hurricanes or other major disruptions.—*Internet*

Palestinians gloomy over success of inter-dialogue in Cairo

GAZA/RAMALLAH, 30 June—Most of Palestinians in the West Bank and Gaza are pessimistic over the reconciliation between rival Fatah and Hamas movements in their inter-dialogue in Cairo, a poll published on Monday indicated.

The survey, conducted by Jerusalem Media and Communication Center (JMCC), said 52.1 percent of the 1,199 Palestinians polled, expected the dialogue would fail to reach an agreement, while 37 percent said it would succeed.

The poll was carried out in both Hamas-ruled Gaza Strip and the West Bank, administrated by President Mahmoud Abbas, during the period between 20 June and 24 June. Rival Fatah and Hamas leaders began on Sunday night a sixth round of dialogue in Cairo amid disputes on unresolved issues, mainly the file of ending arrests by both groups' security forces in both territories, and the transitional period before holding the parliamentary and president elections on 25 Jan of 2010.

The poll said 26.5 percent held Israel fully responsible if Fatah and Hamas conferees fail to reach an agreement, while 23.5 percent held the Islamic movement (Hamas) responsible for the dialogue's failure and 15.15 percent said that Fatah would be responsible.—Xinhua

Seven wind power bases to be set up in China by 2020

BEIJING, 30 June—China plans to build seven wind power bases with a minimum capacity of 10 gigawatts (gW) each by 2020, in a move to dramatically increase the use of the clean energy.

The seven bases are Jiuquan in Gansu Province, Hami in Xinjiang Uygur Autonomous Region, Hebei Province, western Jilin Province, eastern Inner Mongolia, western Inner Mongolia and Jiangsu Province, Shi Pengfei, vice-president of Chinese Wind Energy Association, was quoted by Tuesday's *China Daily* as saying.

Once completed in 2020, the seven bases will have combined capacity of around 120 gW, when the country's total power capacity is projected to be 1,500 gW, Shi said.

Construction of these bases would require an investment of around 1 trillion yuan, Shi said.

China's wind energy resources are mainly located in the northern regions and the coastal areas. Construction of large-scale wind power bases in these areas is in line with the healthy development of the industry, Shi said.—Xinhua

Yemeni airliner crashes in Comoros with 150 on board, airport employee confirms

SANA'A, 30 June—A Yemeni airliner with 150 people on board crashed in the Comoros archipelago in the Indian Ocean on Tuesday, an employee working at the airport's control tower confirmed with *Xinhua*. The employee said on condition of anonymity that an Airbus A310 belonging to Yemenia Air crashed with 150 people on board some 15 minutes before its landing at Moroni, capital of Comoros.

According to the airline's schedule on website, Flight 626 flew to Moroni from Sana'a at 8:00 pm local time, on Monday. The plane is scheduled to land at the islands on 23: 59 pm local time.

Quoting Comoros Vice President Idi Nadhoim from the airport, *Reuters* said the plane crashed in early hours of Tuesday, but no immediate news was available on whether there are any survivors.

The report said the flight left Paris on Monday morning before landing in Yemen and then taking off for Moroni.

Media reports cited Yemenia airport official as saying that most of the passengers on the plane were believed to be Comoros residents returning from Paris.—Xinhua

Russia resumes Su-24 flights after crashes

MOSCOW, 30 June—The Russian Air Force has resumed flights of Su-24 bombers after a 10-day suspension following two crashes earlier this month, an Air Force official said on Monday.

"The flights have resumed. The investigation of the Su-24 crash in the Rostov region continues," said Sergei Bainetov, head of the armed force's flight security service.

A Su-24 plane crashed on 19 June in southern Russia's Rostov region after a same-type plane went down on 17 June in the northwestern Murmansk region. All pilots involved ejected safely.

Bainetov said the 17 June crash was caused by a pilot error during the landing while the cause of the other crash has yet to be established.

Su-24s are two-seat, twin-engine fighter-bombers that began service in 1974.—Xinhua

Pakistani security forces kill 18 terrorists

ISLAMABAD, 30 June—Pakistani security forces killed 18 terrorists in Swat and North Waziristan tribal agency in northwest Pakistan during the last 24 hours while 16 soldiers were dead including three officers, the Army said in a Press briefing on Monday.

Responding to a totally unprovoked attack by terrorists on the convoy with intense fire, the security forces killed 10 terrorists in North Waziristan agency but 16 soldiers were also killed.

In Swat, the security forces killed eight terrorists during search operation and also recovered cache of arms and ammunition, but six soldiers including one officer were injured during the operation.

The operation commencing from different directions has linked up at critical junctions and with securing of Biha valley in the North and Shamoza in the West, main areas occupied by terrorists have been cleared, according to the briefing.

Expo tickets to go on sale to individuals tomorrow

BEIJING, 30 June—From tomorrow World Expo 2010 ticket sales would begin globally to individual buyers, the Expo organizer said.

Three million tickets to the Expo have been sold since group sales began on 27 March, Chen Xianjin, deputy director general of the Bureau of Shanghai World Expo Coordination, told a press conference yesterday.

The public will be able to buy tickets from tomorrow at more than 2,800 outlets of China's four major ticket agents — China Mobile, China Telecom, China Post

and the Bank of Communications — across the country. The agents have opened hotlines, Websites and outlets around the world.

A standard single-day ticket costs 140 yuan (US\$20.53), and a peak-day ticket costs 180 yuan until on 31 September, the end of the second sales phase.

People outside the mainland can buy tickets from 9 agencies around the world, including United States-based Ticketmaster and Peregrine Travel Group, and Tianbao Travel Ltd in Canada.

The peak-day tickets

will cover access to the Expo site during the May Day (1-3 May) and National Day (1-7 October) holidays in 2010 as well as

the last week of Expo (25 to 31 October). The organizer expects these 17 days to attract the most visitors.

NASA selects nine new astronauts

WASHINGTON, 30 June —The US space agency says it has selected nine people to begin training in August as NASA's newest astronaut candidates.

NASA officials said they reviewed more than 3,500 applications before selecting the candidates who will train at the Johnson Space Center in Houston. "This is a very talented and diverse group we've selected," said Bill Gerstenmaier, NASA's associate administrator for space operations. "They will join our

current astronauts and play very important roles for NASA in the future. In addition to flying in space, astronauts participate in every aspect of human spaceflight, sharing their expertise with engineers and managers across the country. We look forward to working with them as we transcend from the shuttle to our future exploration of space, and continue the important engineering and scientific discoveries aboard the International Space Station."

The new astronaut candidates are Serena Aunon of League City, Texas; Jeanette Epps of Fairfax, Va.; US Air Force Maj. Jack Fischer of Reston, Va.; US Air Force Lt Col Michael Hopkins of Alexandria, Va; Kjell Lindgren of League City, Texas; Kathleen Rubins of Cambridge, Mass.; US Navy Cmdr Scott Tingle of Hollywood, Md; US Army Lt Col Mark Vande Hei of El Lago, Texas; and US Navy Lt Cmdr Gregory Wiseman of Virginia Beach, Va.—*Internet*

Navigation tech used to monitor endangered sharks in S China's Hainan

BEIJING, 30 June — For the first time on the Chinese mainland, fishery officials are using SPLASH, a state-of-the-art navigation technology, to tag and track two whale sharks—an endangered species and the world's largest mammal.

The two sharks were released Monday at Sanya of southernmost China's Hainan Province.

The SPLASH navigation technology is one of the most accurate and innovative techniques in the world to conserve marine animals, David Rowat, chairman of Marine Conservation Society in Seychelles and an expert in marine conservation, was quoted as saying by Tuesday's *China Daily*.

Atlanta parking deck partially collapses

WASHINGTON, 30 June—A parking deck in midtown Atlanta, Georgia, partially collapsed Monday afternoon, crushing dozens of cars, authorities said.

Atlanta Fire Department spokesman Bobby Stewart told reporters that a section of the deck collapsed from the 4th floor, falling onto the 3rd, 2nd and 1st floors, as well as the basement.

Emergency personnel responded shortly after 12:30 pm eastern time (1630 GMT) at the Centergy Parking garage on the Abercrombie place between Spring and Williams streets in midtown Atlanta.

Authorities said roughly 35 vehicles were damaged and that a structural engineer was being called to the scene.

There has been no reports of any injuries so far while search and rescue crews are combing through the area.—*Internet*

Japan, US have secret nuke deal

TOKYO, 30 June—Japan and the United States had a secret deal to tacitly allow US forces to bring nuclear weapons into the nation, *The Yomiuri Shimbun* reported Tuesday.

Ryohei Murata, a former Foreign Ministry administrative vice minister, told the newspaper that Japanese and US governments have had a secret accord whereby Japan would tacitly approve port calls and passage through

Japanese territorial waters by US warships carrying nuclear weapons.

Murata, 79, who served in the position from July 1987 to August 1989, said the accord was reached in 1960, when the two countries renewed the bilateral security treaty.

Although the Japanese government has continued to officially deny the existence of such an accord, the latest revelation

marks the first time a former administrative vice foreign minister has gone on record as saying such a deal has existed.

During the negotiations over the bilateral treaty, Japan and the United States agreed to discuss in advance if US forces would be bringing nuclear weapons into Japanese territory as a matter of "important changes in equipment."

Ancient well, and body, found in Cyprus

Archaeologists have discovered a water well in Cyprus that was built as long as 10,500 years ago, and the skeleton of a young woman at the bottom of it, an official said.

Pavlos Flourentzos, the nation's top antiquities official, said the 16-foot (5-metre) deep cylindrical shaft was found last month at a construction site in Kissonerga, a village near the Mediterranean island nation's southwestern coast.

After the well dried up it apparently was used to dispose trash, and the items found in it included the poorly preserved skeleton of the young woman, animal bone fragments, worked flints, stone beads and pendants from the island's early Neolithic period, Flourentzos said.

The skeleton could be as old as the well itself, but archaeologists don't know how the girl died or when and why the skeleton was left there, he said. Radiocarbon dating found the well is between 9,000 to 10,500 years old, he said.

In this undated image provided by Cyprus' Antiquities Department, a researcher descends into a prehistoric well in Kirsonerga village in the Paphos district of Cyprus.

Archaeologists have discovered a water well in Cyprus that was built as long as 10,500 years ago, and the skeleton of a young woman at the bottom of it, an official said.

Calif man working 3 jobs wins \$39m lottery

A man who works three jobs to support his family — including one as a limousine driver — has won a \$39 million jackpot in California's SuperLotto Plus.

Clyde Persley, who is married with a 4-year-old daughter, turned in his winning ticket on Tuesday night and should get his first check for about \$16 million in four to six weeks, said a California lottery spokeswoman.

The 49-year-old Santa Cruz man operates candy-making machines for Santa Cruz Nutritionals, drives a limousine and picks up extra hours at a restaurant.

He says his first moves will be taking his wife on a trip to Hawaii and hiring a financial adviser.

Python's meal of radio collar helps cops

A thief in Western Australia made the mistake of stealing a python from a research lab that had swallowed a radio-collared marsupial, police said.

The radio-tracking device led investigators to a house in Heathbridge, where police found the python and arrested a 30-year-old man, *The West Australian* reported.

The snake was discovered in the Narrogin bush by Department of Environmental Conservation researchers tracking a radio-collared woylie, a small endangered marsupial. By the time they found the woylie, it was inside the snake, along with its collar and tracking device.

The 6-foot snake was brought to the Woodvale Research Center to make sure it had not been harmed by its meal. The snake was stolen from the lab last weekend and recovered, with the radio-tracking device still inside and sending out signals.

both for the students and for local youths.

In conclusion, the minister urged the

NAY PYI TAW, 30 June—The Central Institute of Civil Service (Upper Myanmar) opened Special Refresher Course No (34) for Basic Education Teachers at its Yadana Hall in PyinOoLwin Township, Mandalay Division, yesterday.

Minister for Education Dr Chan Nyein, on behalf of Chairman of

the Myanmar Education Committee Secretary-1 of the State Peace and Development Council General Thiha Thura Tin Aung Myint Oo, delivered an address, saying that the 30-year National Education Promotion Plan is designed to scale up the development of human resources for building a peaceful, modern and developed nation in

standard; to enable the youth to have access to pre-vocational and vocational education according to their basic education levels; to equip aids for e-Education, modern communication and technological improvement; to produce reliable versatile citizens; to speed up tasks for improvement of basic education in cooperation with parents of the students; to expedite non-formal education services; and to ensure development of education research.

The entire national brethren are duty-bound to do their bit in building a new nation with education basis. Today's teachers need to assume the national education promotion duties to be a lofty, national duty.

be of enabling the motherland, the heritage of the forefather, to stand tall as a modern, developed nation in the world. They also have to inculcate the youth, who will shoulder nation-building tasks, with Union Spirit.

So, the trainees are to realize that Union Spirit is exactly patriotic spirit, with which national brethren will have to equip themselves, and whatever region they live in across the Union, they are to note from the bottom of their heart that Union Spirit is, indeed, invaluable national heritage.

The government is trying to improve the political, economic and social infrastructures in order that the nation can

including teachers are the driving force to achieve the goals, objectives and procedures of the national education promotion plan. However much systematic a plan or work programme is, the size of the success rests on the conviction, concept and competence of the performers.

So, teachers have to see to the national education promotion plan that is in the process of being implemented in conformity with the educational and technological changes and national norms.

If teachers educate and organize not only the students but also their parents effectively, basic education schools will become study centres as well as research centres

trainees to do in-depth study of lessons on national cause and undertakings of building a new nation.

Altogether 1305 trainees are attending the five-week course.

Also present on the occasion were Minister for Social Welfare, Relief and Resettlement Maj-Gen Maung Maung Swe, Deputy Minister for Labour Brig-Gen Tin Tun Aung, Chairman of Mandalay City Development Committee Mandalay Mayor Brig-Gen Phone Zaw Han, the deputy chief justice (Upper Myanmar), members of the Civil Service Selection and Training Board, heads of department, the rector, the pro-rectors and faculty members.—MNA

Dy Health Minister, experts meet to prevent, control New Influenza A (H1N1)

YANGON, 30 June — Secretary of the central committee for fighting infectious diseases Deputy Minister for Health Dr Mya Oo called for cooperation and unity in making efforts for prevention and control of the New Influenza A (H1N1) in accordance with the motto “One Nation, One Health” yesterday.

In his concluding remarks made at the co-ordination meeting of the committees for prevention and controlling the flu pandemic and heads of the health department at the Yangon Division Health Department, the deputy minister also stressed the need for co-operation of the authority, health staff, business-

men and social organizations to monitor the outbreak of flu infection.

He said the ministry could control the spread of the flu pandemic in accordance with the directives of the respective authority and he stressed the importance of the home quarantine and contact tracing in making efforts for controlling the A/H1N1.

The deputy minister briefed on preparations for prevention and control of the A/H1N1 virus based on experiences gained during the preparation for SARS and avian influenza disease and tasks for prevention and controlling the swine flu pandemic.

Chairman of Yangon Division Health Committee Secretary of Yangon Division Peace and Development Council U Khin Maung Tun briefed on home quarantine and contact tracing of the swine-flu infected patient, her family and those who contacted her and contact tracing of passengers who took the same flight with the patient and crews of the flight and employees at the arrival lounge. Head of Yangon Division Health Department Dr Hla Myint and participants of the meeting also reported on prevention and controlling the swine flu pandemic sector-wise.

Ministry of Health copes with the patient found infected with New Influenza A (H1N1) with great care

People urged to take part in preventive measures against possible spread and outbreak of disease

NAY PYI TAW, 30 June — The news was reported on 27 June that a 13-year-old girl who has been confirmed to be infected with A/H1N1 on her arrival in Yangon from Singapore on 26 June and she is being looked after at the private room of Yangon People's Hospital.

A total of 14 people who have come into contact with her — family members, her friends and their family members who visited Singapore together with her, private class teacher and classmates — have been kept in quarantine and officials concerned of the Health Department are taking care of them and local authorities concerned are providing social assistance to them.

Among those who flew together with her, 69 passengers including two foreigners are given health care by Yangon Division Health Department and heads of respective township Health Departments at hotels and their residences in Yangon. Other 22 passengers living in the states and divisions, except the one who is not yet found at his or her address, are being provided with medical care by heads of state/division/township Health Departments with the assistance of local authorities concerned.

In addition, all the 98 airport staff from respective departments who served at the foreign arrival lounge of Yangon International Airport on 26 June are also being provided with medical care and a person who was to meet with the patient in order to cover the news at Yangon People's Hospital has also been hospitalized at Waibagi Hospital and is being looked after.

As the 13-year-old girl, who has been confirmed to be infected with New Influenza A/H1N1, is recovering from her illness and her temperature has fallen, she will be discharged from the hospital after a certain period of surveillance.

A steward also fell ill on 29 June evening and he was hospitalized at the Waibagi Hospital. After he had had a medical checkup, it was found that his illness was seasonal influenza, not New Influenza A (H1N1). Those who are being kept under surveillance are in good health and there is nothing unusual.

After the 13-year old girl has been confirmed to be infected with New Influenza A (H1N1), eight sick people, including a foreigner, who were together with her in the same flight, went to the hospital themselves. After taking laboratory test, their illness was seasonal influenza, not New Influenza A (H1N1).

The Ministry of Health is taking necessary measures to prevent the spread of New Influenza A (H1N1) and control the outbreak of disease. Authorities concerned have urged the people to cooperate with them. — MNA

Special sales of Industry-1 Ministry

55 new A/H1N1 flu cases confirmed in Europe

STOCKHOLM, 30 June—A European health agency said Monday that 55 new A/H1N1 flu cases were reported in European countries within the last 24 hours.

Of the new cases, 22 were confirmed in Germany, 15 in Greece, five in Cyprus, three in Bulgaria, two respectively in Belgium,

Ireland and Portugal, one respectively in Sweden, Norway, Luxembourg, and Romania, the European Centre for Disease Prevention and Control (ECDC) said in its daily situation report.

The total number of confirmed cases of the H1N1 flu virus in the EU and European Free Trade Association (EFTA)

countries rose to 6,173, with 541 cases in Spain and 4,250 in Britain, 239 in France and 388 in Germany, the ECDC said. The ECDC publishes a daily situation report about the H1N1 flu cases in the EU and EFTA countries based on official information from these countries.

Maine expands MacBook program to high schools

MACWORLD, 30 June—The Maine Department of Education on Tuesday announced that it has expanded its student laptop program to include high school students. It's a huge win for Apple, because the state will be acquiring another 64,000 MacBook laptops, with up to 7,000 additional MacBooks possibly ordered in the coming weeks.

The Maine Technology Learning Initiative (MTLI) has equipped middle schoolers in the state of

Maine with MacBooks since 2002. The expansion of the program will provide MacBook laptops for students and faculty in grades 7 through 12. Negotiations to make the expansion were reported in March.

Apple is providing educational software, professional development, repair, replacement and technical support, according to the Maine Department of Education.

Apple won the first MTLI contract in September 2001. The company also competed for

and won a second contract in 2006.

Sad dads may lead to crying infants

THE HAGUE, 30 June—Don't automatically blame mom: A crying, colicky baby can be just as much the result of dad's state of mind, Dutch researchers report.

Other studies have found that depression among mothers can be related to excessive crying or colic, a common problem with newborns, but the researchers said that little was known about whether fathers' emotions and behavior also have an effect.

"Up to now, almost all attention went to the prenatal effects of maternal depression on child development, leading to the development of detection and treatment programs that focused on mental well-being of mothers," said lead researcher Dr. Mijke P. van den Berg, a psychiatrist at the Erasmus Medical Center in Rotterdam.

"This study showed the importance of taking paternal factors and well-being during pregnancy into account, next to maternal," she said. The report is published in the July issue of Pediatrics.

To see how parental depression was related to excessive crying, van den Berg's team gathered data on symptoms of depression among parents of 4,426 infants who were 2 months old. Excessive crying was defined as crying for more than three hours a day on more than three days in the past week.

Overall, just 2.5 percent of the infants in the study fit the excessive crying criteria. But, the researchers found a 30 percent higher risk for depression among parents whose infant cried excessively.—Internet

EPA approves California pollution rule

WASHINGTON, 30 June—The Environmental Protection Agency gave the go-ahead Tuesday for California to impose stringent regulations on greenhouse gas emissions from motor vehicles, setting the stage for a national requirement expected to mirror the state's effort. California has been fighting the federal EPA over the issue for years.

The EPA decision Tuesday to granted California a formal waiver clears the way for the state to implement a 2004 state pollution law to combat global warming. The Bush administration repeatedly rejected the waiver request, which was required by the federal Clean Air Act. The California regulation requires automakers to increase the fuel economy of cars and trucks sold in the state by 40 percent over the next seven years, to an average of 35.5 miles per gallon by 2016.

The EPA decision had been expected since President Barack Obama in May announced plans to implement a national requirement similar to the one in California. But the federal waiver for California sets the stage for the national program. At least 14 states already have said they want to follow California's lead once the EPA gives a green light.—Internet

Children can inhale growth hormone

INDIANAPOLIS, 30 June—A clinical trial led by a US hospital found growth hormone can be delivered via inhalation to children, researchers said.

The five-centre study of 22 patients led by Riley Hospital for Children in Indianapolis found that in a one-week period the inhaler safely and effectively delivered growth hormone to the bloodstream of children being treated for a deficiency in this small peptide hormone usually administered by daily injections.

Dr Emily Walvoord of the Indiana University School of Medicine, the study's coordinating investigator, said the children — as young as age 6 and as old as age 16 — reported they preferred the inhaler.

The researchers also found that when a drug is delivered via the lungs, children have very different physiologies and drug absorption rates than adults.

"We saw that children in the study needed higher doses of growth hormone to attain the same blood level as the adults," Walvoord said in a statement.

Rainstorm leaves six dead, two missing in China

BEIJING, 30 June—Six people were killed and another two are missing Monday after severe rainstorms lashed a wide swath of south and east China, local officials said.

Of the dead, one was from the southwestern municipality of Chongqing, two from Wuhan city of central Hubei Province, and three from the eastern province of Anhui. Two others are missing after a rainstorm caused landslides and a slag heap to collapse in Chongqing.

Rescuers were digging through the slag heap in Hechuan District of Chongqing on Monday afternoon, searching for two men who were buried during the rainstorm, said officials from the district government.

The rainstorm began to ravage Chongqing Sunday and has led to temporary evacuation of thousands of people from their homes, said Liu De, head of the Chongqing observatory. A village named Tiefeng was cut off power, roads and communication by the rainstorm.—Internet

Moderate quake hits southwest China

CHENGDU, 30 June—An earthquake measuring 5.6 on the Richter scale shook Mianzhu City, southwest China's Sichuan Province, at 2:03 am on Tuesday, said China National Seismological Network.

The earthquake, with the epicenter monitored at 31.5 degrees north and 104.1 degrees east, was felt in five other areas of Sichuan: Chengdu, Deyang, Mianyang, Guangyuan and Aba, according to the Sichuan Provincial Earthquake Bureau on Tuesday.

A bureau had received reports of fatalities, but it warned of the possibility of aftershocks, including some measuring 5 on the Richter scale.

The Emergency Response Office of the Sichuan Provincial Government reported no casualties in Mianzhu, one of the areas hardest hit in the 8-magnitude quake on 12 May last year.—Internet

Six more deaths of A/H1N1 flu reported in four US states

HOUSTON, 30 June—At least six more deaths of the A/H1N1 flu virus have been reported in four US States on Monday.

Massachusetts health officials said that an 84-year-old man in Boston died from complications of the A/H1N1 flu, becoming the second victim of the virus in the state.

He died on 18 June after being hospitalized for six days, they said, adding that he also suffered from underlying health problems that increased his risk of complications from the flu.

A Boston woman in her 30s died from the virus earlier this month. There have been 474 confirmed cases of the A/H1N1 flu in Boston and 1,287 statewide as of 26 June.

Health Commissioner John Auerbach said the numbers of flu cases have been decreasing in the state, but authorities still are seeing person-to-person spread of the virus.—Internet

Rising sea levels threatening Florida Keys

KEY WEST, 30 June—Rising sea-levels could one day leave significant portions of the Florida Keys underwater, experts say. Researcher Evan Flugman said in a Florida International University report the Florida Keys are at the forefront of the emerging threat of rising sea-levels in the southern portion of Florida, *The*

Miami Herald reported on Sunday.

"South Florida is on the front line against sea-level rise in the United States, and the Florida Keys are ground zero," Flugman said.

The non-profit group Nature Conservancy estimates nearly 9,000 acres of Florida Keys land could be underwater by as

early as 2100. That estimate is based on best case predictions regarding the rise in sea-levels, the *Herald* reported.

Chris Bergh, the group's director of coastal and marine resilience for Florida, said the news regarding the rising sea-levels should be treated as a true threat to the Florida Keys.—Internet

Ninth A/H1N1 flu case detected in Bangladesh

DHAKA, 30 June—Number of the A/H1N1 flu cases in Bangladesh rose to nine on Monday, as one more person was found infected with the virus, leading English-language newspaper *The Daily Star* reported on Tuesday.

A 46-year-old woman

who recently returned from the United States was diagnosed with the A/H1N1 flu on Monday, the newspaper said, quoting officials.

Mahmudur Rahman, director of the Institute of Epidemiology, Disease Control and Research (IEDCR) under the health

ministry, told the newspaper that the woman was not tested earlier in the airport as the incubation period of the virus was going on at that time.—Internet

Costa Rica confirms second death of A/H1N1 flu

SAN JOSE, 30 June—Costa Rican Health Minister Maria Luisa Avila on Monday confirmed the second death of A/H1N1 flu in the country. A 36-year-old woman died in hospital with complications from high blood pressure and lung problems, Avila told *Xinhua*.

"The woman has pathological obesity. It is not a case of contracting the influenza, but routine tests found that she had A/H1N1 flu," said Avila.

Costa Rica reported its first death of A/H1N1 flu on 9 May 9. The dead was a 52-year-old man.—Internet

Thailand reports 1,414 A/H1N1 flu patients

BANGKOK, 30 June—Thailand's Public Health Ministry on Tuesday announced 84 more patients, who are confirmed to have infected with the A/H1N1 flu virus, bringing the country's total number to 1,414.

Of the total, some 1,390 cases had recovered, while 24 others were still in hospitals, Deputy Public Health Minister Manit Nopamornbodee said,

Meanwhile, Manit said the condition of the in-

fectured 47-year-old man, who also had pneumonia, was still critical.

People with flu symptoms should have enough rest and not to exercise excessively, Manit suggests.

People wearing facial masks walk out of a hospital in Manila, capital of the Philippines, on 29 June, 2009. The total number of confirmed cases of A/H1N1 flu has risen to 604 in the Philippines as far as Sunday night, according to figures released by the Philippine Ministry of Health.—INTERNET

A/H1N1 flu cases in Vietnam increase to 123

HANOI, 30 June—Vietnam's Ministry of Health confirmed 15 more A/H1N1 flu cases in the country, bringing total number of flu patients to 123, local newspaper the *Liberty* Saigon on Tuesday.

Of the 15 newly-detected cases, 13 cases were detected in Ho Chi Minh City and the rest two in Hanoi, said the

ministry.

Of these patients, there was one Thai patient entering the country through the Moc Bai border gate in southern Tay Ninh province of Vietnam, becoming the first case of flu coming to Vietnam by land, said Tay Ninh department of health.

Veteran Alexander staying at Burnley

LONDON, 30 June—Newly-promoted Premier League side Burnley have agreed a one-year contract extension with veteran defender Graham Alexander.

The 37-year-old Scotland international played a key role last season in the Lancashire side's drive through the playoffs into the top flight for the first time in 33 years. Alexander played 61 games for Burnley during the season, scoring 11 goals in the process.

The defender's new deal follows that of manager Owen Coyle, who recently signed a two-year extension to his contract.—*Internet*

Eto'o transfer in doubt over bonus demand

Samuel Eto'o

MADRID, 30 June—Samuel Eto'o is demanding a "transfer bonus" of 15 million euros from Barcelona to sign for Manchester City, which could scupper any deal for the Cameroon striker,

Spanish media said on Monday.

Barcelona president Joan Laporta said at the weekend that Eto'o had received a "stratospheric" offer from a foreign club, later identified as Manchester City, who are ready to pay 30 million euros to Barca plus 10 million a year in salary.

But Catalan sporting dailies Sport and Mundo Deportivo said Eto'o, whose contract with Barca ends in 2010, is demanding a "transfer bonus" of 15 million euros, something the Spanish club will not accept.

Williams sisters surge into Wimbledon quarter-finals

Venus (L) and Serena Williams talk before their ladies doubles match against Virginie Razzano of France and Aravane Rezai of France at the Wimbledon tennis championships, in London on 25 June, 2009.—INTERNET

LONDON, 30 June—Venus and Serena Williams remained on course for a fourth clash in the Wimbledon final as they powered their way through to Tuesday's quarter-finals. The pair crushed their fourth round opponents in imperious fashion as world number one Dinara Safina came back from a set down to earn a spot in the last eight, becoming the first player to win a competitive match under the new Centre Court roof.

Defending champion Venus easily won the first set 6-1 against former world number one Ana Ivanovic, who retired hurt in floods of tears, as temperatures shot past 30 degrees at the All England Club.—*Internet*

Murray triumphs, Federer cruises at Wimbledon

LONDON, 30 June—Andy Murray marked the first appearance for a competitive match of Wimbledon's 80-million-pound Centre Court roof by clinching a late-night five-set thriller.

The British third seed defeated brave Swiss 19th seed Stanislas Wawrinka 2-6, 6-3, 6-3, 5-7, 6-3 in a fourth round clash which ended at 2239GMT, the latest finish in Wimbledon history.

Murray, bidding to end Britain's 73-year wait for a home men's champion, stayed on course for a dream final against five-time winner Roger Federer who eased into his 25th Grand Slam quarter-final with a 6-4, 7-6 (7/5), 7-6 (7/5) win over Robin Soderling.

Murray was angry that his Wimbledon fourth round clash was played under the new 80-million-pound Centre Court roof, but believes the steam-bath conditions it creates could

Britain's Andy Murray celebrates after beating Switzerland's Stanislas Wawrinka 2-6, 6-3, 6-3, 5-7, 6-3, on the seventh day of the 2009 Wimbledon Tennis Championships at the All England Tennis Club, in London.—INTERNET

prove a powerful ally.

Federer clinched an 11th win in 11 meetings with Soderling earlier in the day when the roof was open and temperatures reached a scorching 35 degrees.

In a repeat of the French Open final, where Federer claimed a record-equalling 14th Grand Slam title, the great Swiss on Monday won 6-4, 7-6 (7/5), 7-6 (7/5).—*Internet*

Djokovic into Wimbledon quarter-finals

Novak Djokovic

German Under 21's take Euro crown

MALMO, 30 June—A double by Sandro Wagner rounded off a stunning 4-0 success for Germany over England in the European Under-21 championship final to give them their first success in the tournament.

The Germans - who added this title to the ones presently in the hands of their Under-17 and Under-19 compatriots - also scored through Gonzalo Castro and the hugely impressive Mesut Ozil.

It was England's first appearance in the final since 1984 and brought to an end a run of having not lost open play in 21

matches and gave German coach Horst Hrubesch echoes of his major success as a player with the then West Germany in the senior 1980 European final over Belgium.—*Internet*

Chelsea appeal against Drogba and Bosingwa bans

Chelsea's striker Didier Drogba

LONDON, 30 June—Chelsea announced on Monday they'd appealed against the bans handed out to striker Didier Drogba and defender Jose Bosingwa by European football's governing body UEFA earlier this month.

Drogba was given a four-match ban and Bosingwa a three-match ban, with other games suspended for their comments following Chelsea's 1-1 second leg

semi-final draw with eventual champions Barcelona at Stamford Bridge in May which saw the London club go out of the Champions League.

The Blues were also fined 85,000 pounds (100,000 euros) for the improper conduct of their players and the throwing of missiles by their fans.

Safina raises the roof at Wimbledon

Russia's Dinara Safina celebrates a point against France's Amelie Mauresmo on the seventh day of the 2009 Wimbledon Tennis Championships at the All England Tennis Club. Safina won 4-6, 6-3, 6-4.—INTERNET

LONDON, 30 June—Dinara Safina became the first player to win a competitive match under the new Centre Court roof at Wimbledon, beating France's Amelie Mauresmo 4-6, 6-3, 6-4 on Monday to book a quarter-final spot.

The Russian world number one claimed victory over the 2006 champion in two hours and nine minutes as the pair made history at the All England Club.

Top seed Safina was a set down, but leading 4-1 in the second set when heavy rain prompted the 80-million-pound, 1,000-tonne roof to slide into action.

The Russian now faces Germany's unseeded 19-year-old Sabine Lisicki for a place in the semi-finals.

Safina, number one despite never having won a Grand Slam, raced into a 3-0 lead in the first set but 17th seed Mauresmo turned on the power and stormed back, taking the first set 6-4 in 39 minutes.

Mauresmo broke in the first game of the second set and was 40-0 up in the second game but ended up losing it to Safina, who got angry about a line call and stormed her way through the rest of the set.—*Internet*

Freight train derails in Italy, kills 12, burns 50

VIAREGGIO, 30 June—A freight train carrying gas derailed and exploded in the midst of a small Italian town, setting off a fire that killed at least 12 people, many as they slept in their homes, and injured at least 50, officials said Tuesday.

The 14-car train was traveling from the northern city of La Spezia to Pisa when a car derailed while traveling through a residential neighborhood beside the train station in the Tuscan seaside town of Viareggio just before midnight Monday.

A train car filled with liquefied petroleum gas, or LPG, sprang a leak, causing an explosion that collapsed five buildings and set fire to a vast area. Homes crumbled or burned, killing residents as they slept.

The exact death toll was unclear as hundreds of rescuers searched through the rubble for survivors.

Guido Bertolaso, the chief of the Civil Protection Department, told reporters at the scene that 12 people had been killed, the ANSA and Apcom news agencies said. He said four people were missing.—Internet
