Hill station PyinOoLwin in blooming flowers

Article: Maung Maung Htwe (MNA); Photos: Tha Nyan (MNA)

Zaylay (Nyandaw) Roundabout seen with flower beds on Mandalay-Lashio Road in PyinOoLwin.

On our arrival at 21-mile camp of PyinOoLwin called the hill station at an altitude of 3538 feet, we felt cold and breathed fresh air.

At the archway of the town, we saw flowery

plants and beautiful landscaping works as an evidence of its being the town of flowers.

Various kinds of flowers along the roads were in bloom.

"We are carrying out

three tasks for PyinOoLwin to become a flower city, to be garbage free and ensure better roads," said Deputy Director U Tin Win of Township Development Affairs Committee.

"To be garbage free town, sanitation task is being undertaken with the use of five vehicles, while workers of the sanitation section are collecting of garbage. The committee designates the places for garbage," he added.

The news team of Kyemon Daily had an opportunity to visit PyinOoLwin and witnessed favourable weather and fertile soil of the town. Moreover, we saw the concerted efforts of the workers to grow various species of flowery plants.

As part of attracting local and foreign tourists, the red colour of December flower or Christmas flower (Poinsettia) covers the whole town in December when PyinOoLwin is most beautiful town.

To decorate Pyin-

OoLwin in coming cold season, the committee is nurturing 331,000 saplings of flowery plants at the nurseries. By the end of rainy season, the plan is under way to grow over 300,000 flowery plants at the designated areas.

The news team observed season-wise nurturing of flowery plants at the nurseries.

Admonition by Shwehintha Mahāthera

Though performing things altruistic,
You might yet hear remarks ironic.
Still without care but for your destination,
Should you travel on with good intention.

Four political objectives

- * Stability of the State, community peace and tranquillity, prevalence of law and order
- * National reconsolidation
- * Emergence of a new enduring State Constitution
- * Building of a new modern developed nation in accord with the new State Constitution

Four economic objectives

- * Development of agriculture as the base and all-round development of other sectors of the economy as well
- * Proper evolution of the market-oriented economic system
- * Development of the economy inviting participation in terms of technical know-how and investments from sources inside the country and abroad
- * The initiative to shape the national economy must be kept in the hands of the State and the national peoples

Four social objectives

- * Uplift of the morale and morality of the entire nation
- * Uplift of national prestige and integrity and preservation and safeguarding of cultural heritage and national character
- * Uplift of dynamism of patriotic spirit
- * Uplift of health, fitness and education standards of the entire nation

Matric exam forms, fee stamps to be in circulation on 1 October

YANGON, 21 Sept—The Myanmar Examination Board today announced that examination application forms and fee stamps for 2009-2010 academic year will be on sale at fixed prices at its office (Zwegabin Hostel) in Hline University Campus here from 1 October onwards.

Those students to sit for subject combination Nos 1, 5, 6, 7 and 8 are to fill in green forms and cards, and those students for subject combination Nos 2, 3 and 4, in pink forms and cards.

Each external student is to buy and stick a fee stamp onto the left-top part of the application form and submit it to the township education officer concerned from 1 to 30 October 2009.

The principals of basic education high schools, affiliated BEHSs, and BEHS branches concerned are to buy and stick fee stamps onto every application form, and submit them to the Myanmar Examination Board from 1 to 13 October 2009.

Late application forms will not be legitimate, and either subject combination is not changeable. So, students are to fill in and submit the correct forms, reminded the board.—MNA

PERSPECTIVES

Uphold Our Three Main National Causes in pursuing national goal

In the course of its history, Myanmar has been standing tall as a sovereign, independent country in the international community. One of the fine traditions is that national brethren remain cohesive in safeguarding the Union, sharing joys and sorrows.

Union Spirit is essential for perpetuation of sovereignty. It is, therefore, required of every citizen, wherever they live across the Union, to equip themselves with a strong sense of Union Spirit.

Moreover, the entire people have to oppose those disrupting State stability and community peace and nation-building programmes as well as certain foreign countries interfering in the internal affairs of the motherland.

In its drive for transforming the nation into a peaceful, modern and developed discipline-flourishing democratic one, the government has devoted itself to a variety of tasks covering the whole nation for stability of the State and community peace, improving economic infrastructural buildings and development of human resources.

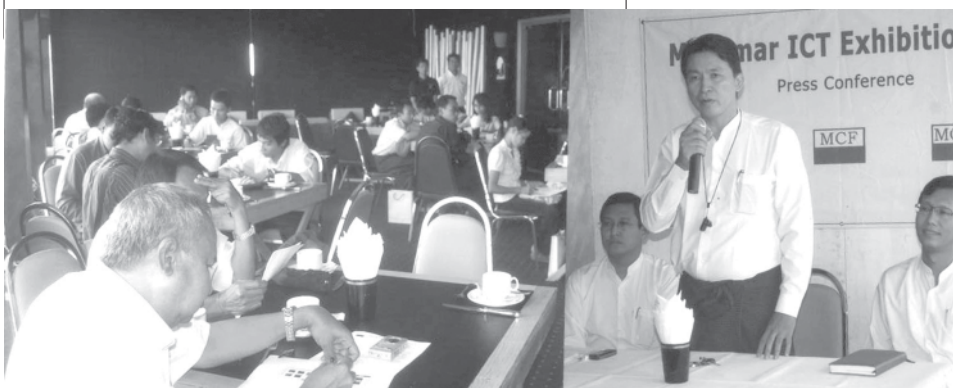

Only with State stability and community peace, will it be possible for the nation to enjoy development and realize the democratic goal, which can be achieved only with the constitution, not with anarchy and riots.

Therefore, the entire people are duty-bound to adhere to the national policy "non-disintegration of the Union, non-disintegration of national solidarity and perpetuation of sovereignty in order to achieve the national goal of building a democratic nation."

All this needs to be known

- * Do not be frightened whenever intimidated
- * Do not be bolstered whenever flattered
- * Do not be softened whenever appeased

Press Conference of ICT 2009 in progress.—MNA

People's Desire

- * Oppose those relying on external elements, acting as stooges, holding negative views
- * Oppose those trying to jeopardize stability of the State and progress of the nation
- * Oppose foreign nations interfering in internal affairs of the State
- * Crush all internal and external destructive elements as the common enemy

Industry-2 Minister inspects Thagara industrial region

NAY PYI TAW, 21 Sept—Minister for Industry-2 Vice-Admiral Soe Thein inspected hydropower turbine and generator factory, multi-diesel engine factory, excavator and bulldozer factory and industrial training centre (Thagara) being implemented in Thagara industrial region yesterday.

At briefing hall, the officials reported matters on department-wise undertakings, installation of machinery, progress and production of the factory to the minister. Next, the minister called on officials concerned to make all-out efforts in building the industrialized nation.—MNA

61st Anniversary of World Maritime Day 2009 observed

Minister Maj-Gen Thein Swe addresses the ceremony to observe 61st anniversary World Maritime Day.—MNA

YANGON, 21 Sept—The 61st Anniversary of World Maritime Day 2009 was observed at Park Royal Hotel on Alanpya Pagoda Road here this morning, with an address by Minister for Transport

Maj-Gen Thein Swe. Next, Country Director Me Toshihiro Tanaka of United Nations Development Programme (UNDP) read out the message of General Secretary of International

Maritime Organization (IMO) Mr Efthimios E. Mitropoulos.

Afterwards, video clips on motto of the IMO for 61st anniversary of the organization was presented that is "Climate Change: A

Challenge for IMO too". Next, the minister and guests viewed documentary photos of activities for safe water transport on non-polluted sea and impact of climate change and maritime activities.—MNA

Press conference on holding ICT Exhibition 2009

YANGON, 21 Sept — Under the supervision of Myanmar Computer Federation, Myanmar ICT Exhibition (2009) organized by Myanmar Computer Professionals Association and Myanmar Computer Industrialists Association will be held at the Tatmadaw Convention Centre on U Wisara Road here from 15 to 18 October. A press conference on holding the exhibition took place at

Sky Bristo hall of Sakura Tower this afternoon.

MCPA Chairman U Khun Oo explained that the ICT Exhibition was to be held so that those who are interested in IT development and IT sector, business people, managers, students and the people could study modern electrical appliances, communication devices and computer software at one place.

IT entrepreneurs, electronics companies, communication devices shops, CD shops, bookshops and other IT enthusiasts are invited to open their booths at the exhibition. They can contact MCIA office, Room No (204), Myanmar Info Tech, Hlaing Campus (Ph: 652238, 095067170).

Iran's leader says US nuke accusations wrong

TEHERAN, 21 Sept—Iran's supreme leader said on Sunday that US officials know they are wrongly accusing Iran of seeking to develop nuclear weapons. In Iran's first official reaction to the US decision to scrap a European missile intercept system to defend against threats from Iran, Ayatollah Ali Khamenei claimed President Barack Obama's administration is following the same policies

as its predecessor.

"The US officials who talk about Iranian missiles and their danger while saying Iran intends to build a nuclear bomb, they know these words are wrong," Khamenei said in remarks broadcast on state-run radio. "Despite its apparent friendly messages and words" the Obama administration is pursuing the same policy of Iran-phobia, he said. The US adminis-

tration has invited Iran to start a dialogue on its nuclear programme and gave a vague September deadline for Teheran to take up the offer. The US and five other world powers accepted an offer from Iran earlier this month to hold "comprehensive, all-encompassing and constructive" talks on a range of security issues, including global nuclear disarmament.—Internet

Jets soar over Beijing as China prepares for 1 October

BEIJING, 21 Sept—Dozens of fighter jets and other warplanes soared over Beijing on Monday as China stepped up preparations for National Day, tightening security around the city with restrictions on knife sales and plans to ground flights on 1 October.

The planes and helicopters flew in formation over Chang An Avenue, the major boulevard that runs east-west through the city and across the top of Tiananmen Square. Some of the planes released streams of red, blue and yellow smoke as they flew low over the city in a rehearsal for the 1 Oct celebration to mark 60 years of communist rule. China has tightened security in recent weeks ahead of the celebrations. In the latest move, the sale of knives has been banned at some stores including hypermarkets such as Wal-Mart and Carrefour, after two separate knife attacks near Tiananmen Square last week, according to store officials and state media.—Internet

Returning Afghan refugees face destitute future

TAQI NAQI, 21 Sept—Taqi Naqi township emerges bleak and barren from the dust of western Afghanistan, an apparent ghost town of derelict mud houses melding into a dun landscape.

The government built it for homeless refugees returning to Herat Province from Iran after US-led troops ousted the Taliban regime in late 2001, but no one wants to live here, away from arable farmland and big cities. Behind some of the doors, however, there is life — albeit one eked out with the help of foreign aid and dreams of a better future.

Inside 38-year-old Mina Yousif's house, the family of tailors prepares clothing for a wedding. Tapestries of Afghanistan's legendary anti-Soviet and anti-Taliban fighter Ahmad Shah Massoud bring colour to the dirt walls. "We did not want to come back to Afghanistan because here there are no facilities, there is no power," Yousif said, adding they felt pressured to return in 2004 by Iranian authorities after nearly 20 years as refugees.—Internet

Iraq helicopter crash kills US soldier

BAGHDAD, 21 Sept—A US soldier was killed and twelve others wounded when their helicopter crashed in the US military's main airbase in Iraq, the military said in a statement on Sunday. The helicopter went down over joint base Balad, about 80 km (50 miles) north of Baghdad, at 8 pm (1700 GMT) Saturday, the statement said. US officials were not immediately available to comment on the suspected cause of the crash.

Air crashes have become less common in Iraq now that the United States has fewer aircraft crossing the country's skies. The last reported incident was on 17 July, when a US State Department helicopter crashed near Baghdad, killing two crew members. In January, two US military aircraft came under enemy fire and crashed into each other, killing four soldiers.—Internet

Three US soldiers die in Afghanistan

KABUL, 21 Sept—One soldier with the NATO-led International Security Assistance Force (ISAF) was killed during a hostile incident on Saturday in eastern Afghanistan while two other ISAF servicemen were killed in a non-combat-related incident in southern Afghanistan on Sunday, said a statement of the alliance. Col Wayne Shanks, an ISAF spokesman, also confirmed the service members were from the United States.

However, it did not specify the exact locations of the incidents and provide no further information.

Conflicts and violence have left 359 international troops dead so far this year as some 100,000 foreign soldiers, including some 68,000 US troops, have been deployed in war-torn Afghanistan combating insurgency and helping with reconstruction.—Xinhua

Israeli troops kill two Palestinians on Gaza border

JERUSALEM, 21 Sept—A Palestinian Health Ministry official says Israeli forces have killed two Palestinian militants and wounded three in an incident along the Gaza border. Dr Moaiya Hassanain said the men were hit by tank fire. The Israeli military said a border patrol fired at a group of Palestinians seen planting a bomb at the Gaza border fence on Sunday. It did not elaborate.

The militant Islamic Hamas said one of its fighters was among the dead, identifying him as Abed Hafiz al-Silawi, 21.

While the smaller left wing Popular Front for the Liberation of Palestine identified the other as 21-year-old Mahmoud Ahmed Naseer in a separate statement. Joint operations by the two groups are rare, but not unheard of.—Internet

US jobs picture may worsen in coming months

WASHINGTON, 21 Sept —The jobs situation could worsen slightly over the coming few months, US President Barack Obama warned on Sunday as he declined to spell out whether the world's largest economy was out of recession." I want to be clear, that probably the jobs picture is not going to improve considerably and it could even get a little bit worse over the next couple of months," Obama said in

an interview with CNN.

"We're probably not going to start seeing enough job creation to deal with the, you know, a rising population until some time next year." As the nation battles its worst downturn since the Great Depression in the 1930s, the unemployment rate rose to 9.7 percent in August. And Obama has already warned that it may well tip over 10 percent before it begins to fall.

The US labour market

has moved closer to recovery as month-on-month job losses in August narrowed to 216,000, compared to 276,000 jobs lost in July well down from a peak of 741,000 losses in January. Obama said on Sunday he believed the embattled US economy would begin slowly adding jobs, saying: "What we've done, I think, in the first eight months is to stop the bleeding."

S Korea to cut customs duties on eco-friendly energy products

SEOUL, 21 Sept — South Korea will take new steps to promote the use of clean resources by cutting customs duties on eco-friendly energy products, the Ministry of Strategy and Finance said on Monday.

The government decided that the customs duties on 31 new products and components will be reduced by 50 percent from on Wednesday, the ministry said. Thus, importers of eco-friendly products will pay 10.8 billion won (about 0.91 million US dollars) less on customs duties.

G-20 security driving away Pittsburgh's bustle

PITTSBURGH, 21 Sept — Nick Mancini Hartner is like a lot of downtown business operators: He doesn't know what to expect if thousands of protesters show up for the Group of 20 economic

summit or, for that matter, how many customers will show up either.

That's why he'll try something new during this week's summit at his Mancini's Hearth Baked Bread shop. He'll lock

the doors and instead sell a limited menu of fresh breads on the sidewalk out front. "That way, we can react to whatever's happening," said Hartner, whose mother's family owns the business. "If it's a regular lunch crowd, we can open up the store. If it's slow, we can pull back and come inside and lock up."—Internet

China's aviation market to expand 7.9% annually in 20 years

BEIJING, 21 Sept—Airbus SAS, the world's largest maker of commercial aircraft, said in a report that China's aviation market will see an annual increase of 7.9 percent in the next 20 years, following India to become the world's second fastest growing market.

India's aviation market is forecast to have a 10 percent growth annually over the next two decades, according to the report. A total of 25,000 new planes worth 3.1 trillion US dollars will be delivered between 2009 and 2028 in the global airline market, said the report. The report also said emerging economies, airline expansion, fleet replacement will drive the demand for energy-effective and environment-friendly airplanes. The Asia Pacific, including China and India, is forecast to account for 31 percent of demand, followed by Europe at 25 percent and North America at 10 percent over the next two decades.

The company predicted the world's aviation market will decline 2 percent in 2009 and increase 4.6 over the next year amid a gradual economic recovery.

China's civil air transportation continued recovering in August, with three major production indicators keeping a rapid growth in the month, according to statistics with Civil Aviation Administration of China (CAAC). In August, China's total air traffic turnover obtained a month-on-month growth of 7.4 percent and a year-on-year growth of 30.6 percent. The passenger traffic turnover registered growth of 7.6 percent on month and 41.6 percent on year. The cargo traffic turnover posted month-on-month growth of 8.6 percent and year-on-year growth of 18.1 percent.

PepsiCo on China's blacklist of bad foods

BEIJING, 21 Sept—Many foreign companies, including PepsiCo and Mead Johnson, from 25 countries have been blacklisted from a monthly report by a State Council watchdog in charge of product quality.

Among the companies blacklisted, the most prominent name was PepsiCo, which has its in-

ternational branch based in New York.

Nearly 38 tons of frozen concentrated orange juice that the firm allegedly imported from Louis Dreyfus Citrus Trading LDA in Brazil in July were found with excessive yeast, according to the website of the General Administration of Quality Supervision, Inspection

and Quarantine. Excessive yeast causes foods to spoil faster.

The watchdog issues its report monthly and names unqualified imported goods.

Though the blacklisting has no economic impact on the companies listed, the banned products are either returned or destroyed.—Internet

Sea piracy in waters near Singapore sets five-year high

SINGAPORE, 21 Sept—The waters in and around Singapore reported more piracy cases for ships this year, local media reported on Monday.

Piracy hit a five-year high in the South China Sea, with 10 sea attacks reported so far this year, exceeding 2005's record of nine, local newspaper the Straits Times reported on Monday.

Sea robbers have also been active in the Strait of Malacca and Strait of Singapore. Pirates have boarded ships on five occasions so far this year and made attempted boarding once. The two waterways saw one attack and three attempts over the same period last year.—Xinhua

Sino-Russian ties rise to unprecedented high level

Moscow, 21 Sept—This year marks the 60th anniversary of the establishment of China-Russia diplomatic relations, and the last six decades have witnessed abundant accomplishment of practical cooperation between the two countries and enhanced cooperation on international issues.

As friendly neighbours sharing common borders, China and Russia have unswervingly given emphasis to reinforcing political trust and coordination while developing bilateral ties.

After the establishment

of the Sino-Russian strategic partnership of cooperation in 1996, the two countries upgraded bilateral relations and set up a mechanism for regular high-level visits, through which leaders from both countries can effectively communicate and understand each other through frequent meetings and talks.

Chinese President Hu Jintao paid a visit to Russia in June, when he and his Russian counterpart Dmitry Medvedev attended a celebration to commemorate the 60th anniversary of bilateral dip-

lomatic ties.

The China-Russia relationship has gone through an extraordinary course of development during the past 60 years, which also saw increasingly mature bilateral political relations, Hu said in his speech.

China and Russia, which are permanent members of the UN Security Council, are facing the top task of domestic development and also shoulder the historic mission of promoting world peace and development, Hu added.

Malaysia elected to chair IAEA

KUALA LUMPUR, 21 Sept—Malaysia has been elected as Chairman of the Board of Governors of the International Atomic Energy Agency (IAEA) for the term 2009-2010, according to the Malaysian Foreign Ministry on Monday. The ministry said this is the second time in the history for Malaysia to have been elected to chair the IAEA Board.

The Special Session of the Board of Governors of the Agency to be held on 22 Sept will formally endorse the chairmanship of Malaysia, the ministry said in a press release. Arshad M Hussain, the current Malaysian Ambassador to Austria as well as the Governor of Resident Representative of Malaysia to IAEA, will serve as the chairman of the Board, by assuming the post from the outgoing Chairman from Algeria.

Malaysia served as the Chairman of the Board in the term 1977-1978. Established in 1957, IAEA is an independent inter-governmental organization aiming at promoting peaceful use of nuclear technology. The IAEA Board of Governors consists of 35 members. As one of the two highest policy-making bodies of the IAEA, the Board is dedicated to making most of the policy decisions of the IAEA and it meets five times a year. — Xinhua

Israeli jets strike smuggling tunnels in southern Gaza Strip

GAZA, 21 Sept—Israeli warplanes on Sunday night struck by air-to-ground missiles the tunnels used for smuggling under the borderline between southern Gaza Strip and Egypt, witnesses and security sources said.

The witnesses said that F-16 jets hovered over Rafah town and struck by missiles the borderline zone between the town and Egypt, where hundreds of tunnels had been dug and used for smuggling stuffs from Egypt to Gaza. The Israeli aerial attack came after militants fired earlier on Sunday two homemade rockets from northern Gaza Strip to Israel. Israeli radio reported the two shells landed on an empty area, causing no injuries or damages.—Xinhua

US man sought after wife, five kids found dead

BEIJING, 21 Sept — US police in Florida is searching for a 33-year-old man whose wife and five children were found dead in their Naples home, media reports said on Monday.

Six bodies of Guerline Damas, 32; Michzach, 9; Marven, 6; Maven, 5; Megan, 3; and Morgan, 11 months, were discovered

on Saturday, Collier County Sheriff Kevin Rambosk said at an earlier news conference. Authorities failed to locate Mesac Damas, the man who possibly left the country on Friday morning and may be in Haiti, Capt Chris Roberts of the Collier County sheriff's department said on Sunday.

"We don't see at this

point any indication of an individual out in the neighbourhoods committing additional crimes or homicides, but certainly we will look at every opportunity," Rambosk said.

Police said that there had been a "handful" of domestic disturbance calls to police since 2000 involving the Damas couple. —Xinhua

Mexico completes construction of 30 highways by end of August

MEXICO CITY, 21 Sept —The Mexican government has invested in 125 civil engineering projects to improve the nation's highway this year, and 30 of them had been completed by the end of August, the Transportation and Communication Ministry said in a statement on Sunday.

The government has invested 2.1 billion pesos (1.6 billion US dollars) to improve the country's transportation infrastructure, the statement said.

Mexico has built 157 km of new highways, nine junctions and one bridge so far this year, it said, adding that a total of 819.2 km of highways were being modernized.

It said the improved highway will boost the country's trade.

Xinhua

This year's El Nino expected to be mild

LOS ANGELES, 21 Sept—This year's El Nino would be mild, resembling the pattern of 2006 and 2007, weather experts said in remarks published on Sunday.

The oscillation of hot water in the eastern Pacific Ocean is going to be a let-down, in terms of precipitation over a parched California, Jet Propulsion Laboratory (JPL) researcher Bill Patzert told the *San Diego Union-Tribune*.

"This El Nino is definitely puny," Patzert said, adding that this year's pattern resembles the mild El Nino of 2006-2007, which left California's snowpack and reservoirs short of what water experts had coveted: an end to five years of drought.

Although the jet stream pattern still shows that California might get a wet winter, the likelihood of floods and massive rains is diminishing, the paper quoted climatologists as saying.—Xinhua

Venezuela says ready for S America-Africa Summit

CARACAS, 21 Sept—Venezuela is ready to hold the second South America-Africa Summit on 26-27 Sept, local authorities said on Sunday.

Key topics for the summit are education, health, energy, communication and the world economic crisis. A Sunday multicultural parade featuring peoples from both continents marked the start of a cultural festival dedicated to the summit that will take place on Margarita Island, a tourist resort in northeastern Venezuela.

Venezuelan President Hugo Chavez said during the show that the summit embodied multi-polarity seeking to rescue the identity and history of the world's poor.

Pa man gulps 33 1/2 burritos, wins eating contest

Professional eater "Humble Bob" Shoudt ate 33 1/2 burritos in 10 minutes, winning the 2009 World Burrito eating championship before an excited crowd at the New Mexico State Fair.

Shoudt, of Royersford, Pa, finished just ahead of runner-up Hall "Hoover" Hunt of Jacksonville, Fla, who put down 30 burritos in the International Federation of Competitive Eating-sponsored contest.

Shoudt, who won \$1,500, said he didn't eat for two days to prepare for the competition. Competitors ate 4-ounce burritos, filled with beef, beans and green chile — each weighing about a quarter of a pound.

Professional competitive eater 'Humble Bob' Shoudt from Royersford, Pa, competes in the 2009 World Burrito Eating Competition hosted by the International Federation of Competitive Eating at the New Mexico State Fair in Albuquerque, NM. Shoudt won the contest, eating 33 and a half beef, bean and green chile burritos in 10 minutes.

NJ police say pot plants growing on High Street

Maybe this is why they call it High Street. Police confirm the odd-looking plants they pulled last week from a flower basket in Millville's business district were indeed marijuana. The plants were discovered by a passer-by. Police responded to the scene with a ladder and confiscated the 3-foot-tall plants, which were growing in a basket hanging from a lamp post.

The city's parks and recreation department, which tends to the baskets, says it has no idea how the pot plants got there.

No arrests have been made yet.

Train misses drunken teen napping on track

A drunk French teenager narrowly escaped death on Sunday after falling asleep on a railway track and slumbering undisturbed as a high-speed train roared over him, police said.

The 19-year old, whose name was not released, remained fast asleep face down on a stretch of track near Saint Nolf in southern Brittany, as the Quimper to Paris train passed, leaving only a few grease stains on the back of his jacket.

The driver saw the body lying on the tracks and slammed on the brakes, but was only able to stop a few hundred meters further on.

"It was his unconscious state that saved him really, as he lay there completely still like a dead body," said a spokesman for the local police force, adding that the clearance under the train is only around 20 centimeters.

Article: Maung Maung Htwe (MNA); Photos: Tha Nyan (MNA)

(from page 1)

It is not easy to grow a landscape or a block of flowery plants. There are many different steps for cultivation of plants by using fertilizers. Moreover, it is necessary to weed the flower beds.

We saw upgrading of landscapes at the corner of Lanthaya Road near Gandamaying Roundabout, at the corner of Yangon-Mandalay Highway and Ziwaka Road, at the entrance to the town and at the corner of Nanda Road near Gandamaying

Roundabout.

With regard to water supply task, Senior Engineer U Naing Lin Maung of Township DAC explained, "A total of 25.92 million gallons of water is daily supplied from Hsinlan Dam, Naungkhamgyi Lake, Thittabin (Upper) and Thittabin (Lower) lakes, Thetkan spring, People's Park spring and Cherry Tube-well to the local people of PyinOoLwin Township. There are 4872 artisan and deep wells in the township. At present, arrangements are being made to supply drinking water to 11 wards."

In the evening, we left

The signboard of PyinOoLwin decorated with beautiful landscape.

PyinOoLwin. Junctions and corners of the roads and roundabout landscapes were illuminated. The clock

tower built in 1936 as a symbol of PyinOoLwin was decorated with multi-coloured lights at the centre of the town.

Thittabin (Upper) Lake stores 50 million gallons of water, located 380 feet upstream of PyinOoLwin.

"We are carrying out three tasks for PyinOoLwin to become flower city, to be garbage free and ensure better roads," said Deputy Director U Tin Win, Township DAC.

We remembered the talks of Deputy Director U Tin Win. He said that the committee will try to repair the clock of the tower to give clear sound.

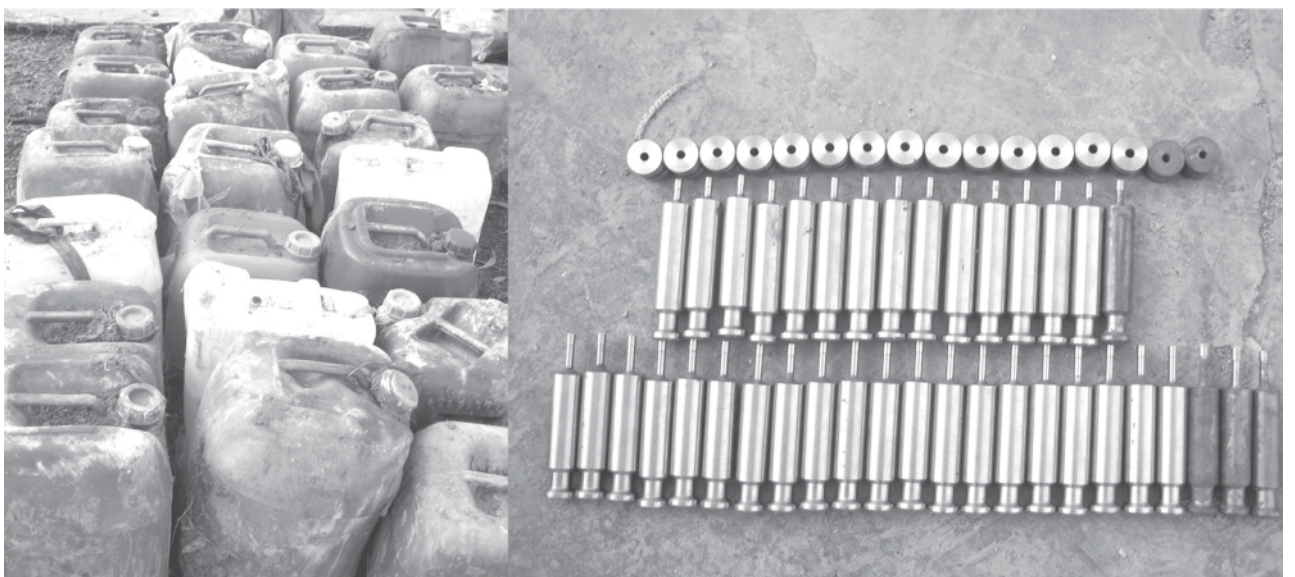

PyinOoLwin was named as PyinOo by King Badon. At present, PyinOoLwin has

prestigious and significant places such as Yatanarpon Myothit and National Kandawgyi Gardens and Defence Services Academy.

Commander donates cash, provides assistance to locals in Seikphutaung

NAY PYI TAW, 21Sept—Commander of Nay Pyi Taw Command Maj-Gen Wai Lwin, accompanied by officials and members of social organizations, visited Seikphutaung Village in Eastern Nay Pyi Taw Pyinmana Mountain Region and met with locals.

After addressing a ceremony to donate rice, water pipes and agricultural assistance, the commander

and officials donated cash and provided assistance to the villagers. One of the villagers spoke words of thanks.

On arrival at the construction site of Malhaw creek bridge, the commander heard the report presented by the Incharge engineer and left necessary instructions.

Free eye treatment, operation in Taungtha

Eye Specialist Professor Dr Tin Win and members of eye specialists giving free medical treatment to patients with eye complaints.—MNA

NAY PYI TAW, 21 Sept—Under the patronage of U Aung Thaung, Minister for Industry-1, the ministry, the Ministry of Health and social organizations from Taungtha Township, Myingyan District, Mandalay Division, provided free medical treatment for the eye patients from Myingyan, Natogyi and Taungtha townships for the second time from 16 to 20 September at Taungtha Township Hospital.

The medical team led by eye specialist Prof Dr Tin Win and Medical Superintendent Dr Than Lwin of Yangon Eye Specialist Hospital in-

cluded Dr Nyunt Aung, Dr Nilar Thein and specialists Dr Khin Ohn Myint, Dr Nu Nu Yin, Dr Thein Zaw, Dr Thein Htut, Dr Chaw Wai Lwin, Dr Aung Nay Oo, Dr Hnin Yu Chit Hsai, Dr Ko Ko Lin, Dr Malar Kyaing, Dr Yu Yu Thein, Dr Hlaing Hlaing, Dr Shwe Wah Aye, Dr Ohnmar Zin, Dr May Ko Ko Thet, Dr Theingi Win (1), Dr Zin Mar Myint, Dr Ei Kay Thwe Han, Dr Theingi Win (2), Dr Zin May Tun, Dr Thein Than Htaik, Dr Aung Kyaw Htoo, Dr Myo Min Win, Dr Aye Chan, Dr Aung Ko Ko Htet and 14 nurses and expert U Than Htaik of Alcon Co.

With the help of Head of Taungtha Township Health Department Dr Tin Maung Oo and doctors, nurses, health staff, officials of the Ministry of Industry-1 and members of social organizations, the eye specialist team carried out eye tests, performed eye care services and provided power glasses for the eye patients of 83 village-tracts of the three townships and gave talks on dos and don'ts after eye operation and eye health care.

On 20 September, a ceremony to mark the successful eye operations took place in conjunction with a ceremony to hon-

our the eye specialists at Taungtha Township Basic Education Middle School. Minister U Aung Thaung attended the ceremonies and gave an honorary speech.

Next, team leader Prof Dr Tin Win explained eye operations. A representative of social organizations and an eye patient expressed their thanks. The minister, specialists and donors presented sun-glasses to the patients who had received eye treatment.

The eye specialists team provided eye treatments for 5140 eye patients from 83 village-tracts in Myingyan, Natogyi and Taungtha townships, successfully performed eye operations on 861 patients and presented 1298 sets of power glasses free.

Managing Director U Aung Myat of Mother Trading Co was the main sponsor and U Win Lwin and Daw Myat Myat Maw (Kyaw Thar Co), U Kyaw Moe Naing (Myanmar Moe Naing Co) and Sandar Myaing Pharmaceutical Co also shared the medical equipment and expenses for eye treatments and operations.

Live birth depends on evolution of chromosomal sex determination

READING, 21 Sept — A new analysis of extinct sea creatures suggests that the transition from egg-laying to live-born young opened up evolutionary pathways that allowed these ancient species to adapt to and thrive in open oceans.

The evolutionary sleuthing is described this week in the journal *Nature* by scientists at Harvard University and the University of Reading who also report that

the evolution of live-born young depended crucially on the advent of genes — rather than incubation

temperature — as the primary determinant of offspring sex.

Early life on earth

BERLIN, 21 Sept — German scientists investigating the complex chemical mixture thought to be present in the early Earth's oceans have found that amino acids can be 'cooked' into many other important chemical building blocks of life when embedded in salt crusts.

Results of the laboratory experiments will be presented by Dr Stefan Fox at the European Planetary Science Congress in Potsdam, Germany, on Thursday 17 September.

Approximately 4.5-3.8 billion years ago, the Earth was probably covered by a salty ocean, rich in organic compounds, dotted with active volcanic islands and short-lived continents. The team from the University of Hohenheim in Stuttgart has simulated some of the chemical

processes that might have taken place along hot volcanic coasts during this Hadean era by evaporating solutions of artificial primordial seawater and then baking the salty residue in an atmosphere of nitrogen and carbon dioxide to volcanic temperatures of 350 degrees Celsius.

FCC chairman says 'open Internet' rules are vital

NEW YORK, 21 Sept—Wireless carriers shouldn't be allowed to block certain types of Internet traffic flowing over their networks, the chairman of the Federal Communications Commission chairman said Monday in a speech that figures to provoke a fight with the industry.

FCC Chairman Julius Genachowski said wireless carriers should be subject to the same "open Internet" rules that the agency has begun to apply to home broadband providers.

It's unclear how the rules would apply in practice to wireless data. For instance, carriers officially restrict how Internet-access cards for laptops are used, but rarely enforce the rules. The government also has been investigating Apple Inc.'s approval process for iPhone applications, but Genachowski isn't directly addressing manufacturers' right to determine which applications run on their phones.

"Surgical Olympics" to be held in Beijing: Greek professor

ATHENS, 21 Sept—The theme of the 2008 Olympics is the driving force behind medical specialists from more than 70 countries gathering in Beijing from 23 to 26 Sept, a senior organizer told Xinhua in an interview here before leaving for the event.

The theme of the Beijing Olympic Games — "One world, one dream" — became the main idea of the 19th International Congress of the International Association of Surgeons, Gastroenterologists and Oncologists (IASGO), its Secretary General, Nicolaos J. Lygidakis said.

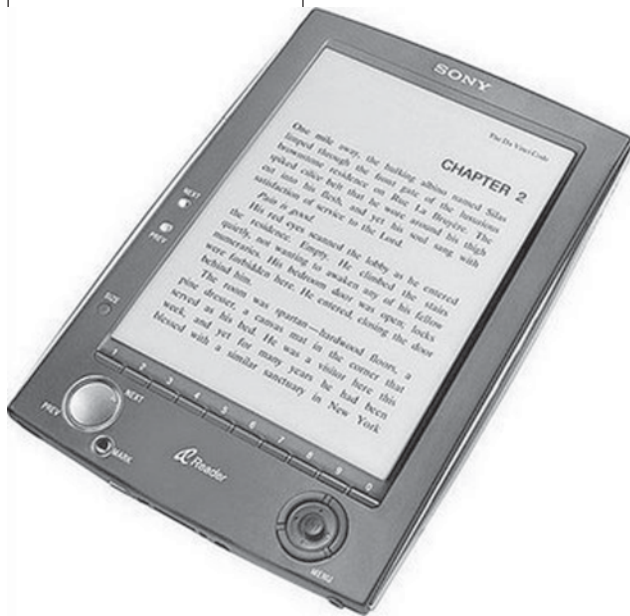

The "Surgical Olympics" will bring together surgeons, gastroenterologists and oncologists to discuss the latest in medical science and help bridge the gap between different levels of medical services in the world.

"We call it surgical Olympics because the spirit of the Olympic exists not only in sports but also in the field of scientific research. In ancient Greece, intellectuals were encouraged to produce better achievements," said Lygidakis, who is also a professor at the Athens Medical Center.

Tanzania to host 2010 World Economic Forum on Africa

DAR EES SALAAM, 21 Sept—Tanzania will host the 2010 World Economic Forum on Africa which President Jakaya Kikwete says is an honor for the East African country, the local Daily News reported on Monday. "It is an honor for Tanzania to host the 2010 World Economic Forum on Africa. We are looking forward to welcoming the community, which I am confident will continue to make important contributions in our collective quest for a better world," Kikwete was quoted as saying.

He noted that it is heartening to see the positive impact that the World Economic Forum has on key issues of global concern as the unique gathering regularly convenes a very diverse group of friends of the continent, who are united in their optimism of what Africa can, must and will achieve. The gathering is scheduled to be held in Dar es Salaam from 5 to 7 May, 2010, which makes Tanzania the first East African country to play its host, according to a statement released by the Swiss-based forum.—Xinhua

German teen who attacked school awakes from coma

ANSBACH, Germany, 21 Sept—A German teenager who wounded nine students and a teacher in a terrifying ax and arson attack on his school was motivated by "hatred for humanity" and had been planning the rampage since April, officials said on Monday.

The new details came as the 18-year-old was awakened on Monday from a medically induced coma. Prosecutor Gudrun Lehnberger said the suspect was responsive but has not yet been questioned about Thursday's attack.

However, the roughly 80 pages of evidence recovered from the teenager's laptop included extensive information on his plans, much of it addressed to a female whose name was not released,

said Juergen Krach, another prosecutor. Krach said investigators believe the addressee may be fictional and the material was apparently not sent to anyone.

The teenager, who has not been named, wrote that his "goal was to kill as many students and teachers as possible and burn down the school building," Lehnberger said.

"As a motive, he named his hatred for humanity and, above all, school," she added at a news conference.

The assailant wrote that he was treated unfairly in and out of school and feared that he wouldn't meet the requirements for graduation, Lehnberger said.—Internet

Sinking River Deltas Threaten Millions

COLORADO, 21 Sept—Most of the world's low-lying river deltas are sinking due to human activity, making them increasingly vulnerable to flooding from rivers and ocean storms and putting

tens of millions of people at risk, a new study finds.

Researchers have long warned that the mass human migration to coastal areas in recent decades puts more and more people at risk of death from major storms. About 500 million people in the world live on river deltas. A 2007 Intergovernmental Panel on Climate Change report, which concluded that many river deltas are at risk from sea level rise. The new study indicates other human factors are causing deltas to sink significantly.

Why? The sinking of

deltas from Asia and India to the Americas is made worse by the upstream trapping of sediments by reservoirs and dams, man-made channels and levees that whisk sediment into the oceans beyond coastal floodplains, and the accelerated compacting of floodplain sediment caused by the extraction of groundwater and natural gas, the scientists say. New Orleans is one example of a city that sits in a sinking delta, a problem known long before the city was ravaged by hurricane Katrina.

Xinjiang builds sound social security, medical service: white paper

BEIJING, 21 Sept—Xinjiang has gradually built a sound social-security system and improved medical service, said a white paper issued here on Monday.

Since 1978, Xinjiang's social-security system has gradually taken shape to provide basic living guarantees for the people, said the paper titled "Development and Progress in Xinjiang" issued by the Information Office of the State Council.

The 2008 figures show that Xinjiang had 799 community services facilities in urban areas. About 9,645,700 people had taken part in the five major insurance programs, of basic pension insurance, unemployment insurance, medical insurance, industrial injury insurance, and maternity insurance.

A total of 638,000 urban residents are receiving the minimum living allowance from the government. Social

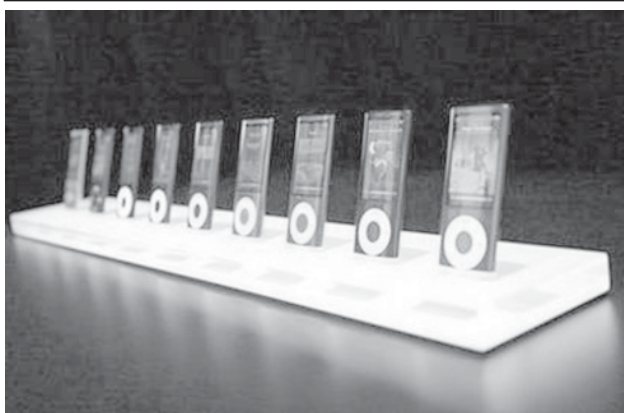

welfare institutions of various types had 19,000 beds by the end of 2008, taking in 14,000 residents under their care.

From July 2007, the rural minimum living allowance system was introduced, providing subsidies for farmers and herders with annual average per-capita income lower than 700 yuan. In 2008, 1,310,000 farmers and herders in extreme poverty received the subsidies.

Development of A/H1N1 vaccine on track: WHO head

HONG KONG, 21 Sept—Director General of World Health Organization (WHO) Margaret Chan said here Monday that the production of influenza A/H1N1 vaccine is on track and it will be ideal to produce three billion of them annually.

Speaking after the opening ceremony of the Regional Committee Meeting of the Western Pacific Regional Office, Chan said that many countries and regions are producing vaccines for the new flu and it would be ideal to have three billion produced in one year. "The development of vaccine is on track, it will take five to six months after the emergence of the new virus before we can start producing vaccines," she said, adding that China is the first country to report to the WHO about vaccine production and get their people inoculated.

According to data collected from laboratories worldwide, Chan said, from April to now, the new virus is still very similar and no mutation was found so far. Therefore, new vaccines produced should be effective in preventing the virus.

Chan said as the peak flu season comes in winter, a second wave of the A/H1N1 flu outbreak is expected to arise with more reports of new cases. She suggested that medical resources should be focused more on saving patients contracted the new virus so as to reduce the number of severe cases and deaths.

Noting that a total of 190 countries and regions have reported cases of influenza A/H1N1, Chan said that the majority of them are mild and most patients recovered on their own. However, people belong to the risk group such as those suffering from asthma, heart disease, obesity and pregnant women should pay more attention to the disease.—Xinhua

Cambodia, Vietnam cooperate to fight against drug trafficking

PHNOM PENH, 21 Sept—Cambodia and Vietnam will strengthen bilateral cooperation to fight against drug trafficking crossing the two countries, an official said on Monday.

"Primer Minister Hun Sen held talks on Monday with visiting Vietnamese Deputy Prime Minister Truong Vinh Trong at Cambodian National Assembly," the premier's spokesman Ieng Sophalet said, adding that after they left the center, they will have appropriate jobs and skills in the future.

"Vietnamese thanked

Sen requested Vietnamese side to help building a drug rehabilitation center for Cambodian victims because Vietnamese side have more experience and abilities in dealing with the drug cases."

"The center also will play a key role for helping to provide the vocational training for those victims. Their families also have suffered from the drug cases," Ieng Sophalet said, adding that after they left the center, they will have appropriate jobs and skills in the future.

Xinhua

the bilateral cooperation and the cooperation between the police authorities from both sides to fight against and crack down the drug matters crossing border of the two countries in the past years," Ieng said.

Both sides have considered drug users as not criminals but they all are victims from drug problems, he said, adding that Vietnamese side also expressed a strong commitment to help reduce the drug cases in Cambodia.

Xinhua

Strong quake jolts Bangladesh, no reports of casualty or damage

DHAKA, 21 Sept—A strong earthquake measuring 6.4 on the Richter scale jolted Bangladesh at 3:53 pm local time on Monday afternoon.

The epicenter of the quake was 462 kilometers northeast from the capital Dhaka.

Fire service men said they did not receive any report of damage or casualty yet, but the weather offices said many people ran out of their homes to safer places.

Bangladeshi experts predict that a major tremor will hit the country with heavy casualty soon as the country is sitting on the earthquake zone. Bangladesh is very often hit by mild or moderate earthquakes.

Mexico subway shooter charged with double homicide

MEXICO CITY, 21 Sept—A gunman who opened fire in a crowded Mexico City subway station faces double homicide charges.

Police say Luis Felipe Hernandez was jailed on Sunday on the charges after psychological exams determined he is fit to stand trial. After Friday evening's shooting, officials had said Hernandez, 38, appeared to be mentally unstable.

Hernandez was writing an anti-government statement on a wall at the packed Balderas station when a police officer confronted him. He fatally shot the officer and then continued firing as people got on and off a train during rush hour. One commuter was killed and eight others were injured.—*Internet*

New Zealanders lack knowledge about eye health

WELLINGTON, 21 Sept—A shocking number of people in New Zealand are neglecting the health of their eyes, according to a survey released on Sunday.

The survey, released to coincide with Save our Sight month, revealed that approximately 68,000 New Zealanders over 40 percent have glaucoma.

Half of them don't even know they have the dis-

ease which undetected can lead to blindness, but can be treated if diagnosed early.

Similarly, the survey found 41 percent of people were unaware that macular degeneration, a condition which affects people as they age, can lead to blindness.

Forty-seven percent of participants in the survey felt uninformed or very uninformed about eye

health in New Zealand, and 62 percent of people who don't wear glasses or contact lenses had never had an eye examination, the survey said.

Save our Sight month throughout September is an annual initiative promoted by the New Zealand Association of Optometrists.

The survey, Eye Health in New Zealand: A study of public knowledge, attitudes, and practices related to eye health and disease, is the first of its kind in New Zealand.

Buenos Aires is world's fourth noisiest city

Buenos Aires, 21 Sept—Buenos Aires was ranked the fourth noisiest city in the world, with heavy traffic as one of the major factor to blame, a report by the municipal government said on Sunday.

"Traffic is one of the factors that most affect Buenos Aires," said the report issued by the Environment Protection Agency under the municipal government, which named Tokyo, Nagasaki and New York as the top

three noisiest cities.

The three-year study, commissioned as part of the city's 2008-2012 Strategic Plan, first built a noise map of the city centre and identified the boroughs of Barracas, Monserrat and Constitucion, and the Santa Fe and Pueyrredon Avenue as the noisiest areas.

These areas regularly suffer between 65 and 80 decibels of noise. The World Health organization regards 70 as un-

comfortable and 90 as harmful. Some 507,000 people live in the area surveyed.

According to the department of electro acoustics of the University of Buenos Aires, areas which now regularly experience 70 decibels of noise had suffered only 50 or 60 decibels in the 1970s. As sound is measured logarithmically, a 3-decibel increase is a doubling of noise levels.

Lung cancer in non-smokers different

BALTIMORE, 21 Sept— A new biology, diagnosis and treatment guide issued by US researchers finds that lung cancer in those who have never smoked is different from that of smokers.

Dr Charles M Rudin of The Johns Hopkins Kimmel Cancer Center in Baltimore said exposures to second-hand smoke and radon gas are thought to play important roles in causing the disease in

never-smokers.

Radon, which leaks into homes from naturally occurring uranium in soil, is known to be the leading cause of such cancers in US populations, but in about half of never-smokers, lung cancer cannot be explained by known risk factors identified in the guide — which also include asbestos, indoor wood-burning stoves and aerosolized oils caused

by cooking.

“It is becoming increasingly clear that the genetic, cellular, and molecular nature of lung cancer in many never-smokers is different from that of smoking-related lung cancers, and there is good evidence now that the best treatment and prevention strategies for never-smokers may be different as well,” Rudin said in a statement.

Brazilian scientists develop technology to rejuvenate barren soils

RIO DE JANEIRO, 21 Sept— Scientists at Brazil's National Amazon Research Institute (INPA) have developed a technology for rejuvenating barren soils, local media reported on Sunday.

The technology, using leguminous plants from the febraceae family to re-inject nutrient materials into soils, “is cheap and can be an important solution to the Amazon region, where soils are poor in nitrogen,” said Luiz Augusto Gomes de

Souza, an expert from INPA.

Legume roots can create a structure called nodule which draws in bacteria to fix nitrogen in soils, providing nutrients for future plants at the same spot, Gomez said.

The plants feed the bacteria through photosynthesis products and consume the nitrogen the bacteria excrete, making legumes rich in nitrogen, he said.

The expert studied at least 45 kinds of native legumes in the Amazon

region, including sucupira, angelim, jacaranda, macacauba, copaiba, cumaru and jatoba, to see which one had the greatest nitrogen-fixing capacity.

“The study included collecting fruit, germinating seeds, producing sprouts and then saplings.

It allowed us to identify the best species that could contribute to soil re-juvenation,” he said. The technology can also be used to boost agricultural output, he said.— *Xinhua*

Rocket light spooks some on East Coast

WALLOPS ISLAND, 21 Sept— A NASA rocket launched to study clouds spooked dozens of people along the US East Coast, some worried about aliens landing, officials said.

Exhaust particles from the rocket launched on Saturday night at Wallops Flight Center in Virginia illuminated the sky with a cone-shape light that could be seen as far north as Massachusetts, NASA spokesman Keith Koehler said.

CNN affiliate stations and NASA officials reported dozens of calls

from people who saw the light, including some worried about extraterrestrial visitors, CNN reported on Sunday.

The Black Brant XII Sounding Rocket was launched to study Earth's highest clouds, about 173 miles up in the atmosphere, Koehler said.

The rocket's exhaust

particles formed an artificial noctilucent cloud. Natural noctilucent clouds, also called “polar mesospheric clouds,” form spectacular displays most easily seen just after sunset when illuminated by sunlight just below the horizon, NASA said.

Internet

Bariatric laparoscopic surgery an option

DALLAS, 21 Sept— Single-incision laparoscopic surgery is an option for people considering bariatric procedures for weight loss, a US researcher said.

Dr Edward Livingston, professor and chief of gastrointestinal and endocrine surgery at the University of Southwestern Medical Center in Dallas, said having just a single entry point means less scarring than in traditional laparoscopic surgery, in which five or more incisions are required.

“The promise of fewer scars really appeals to

patients, evidenced by the growing demand,” Livingston said in a statement. “Not everyone has heard about it, but the enthusiasm is striking once they find it's a possibility.”

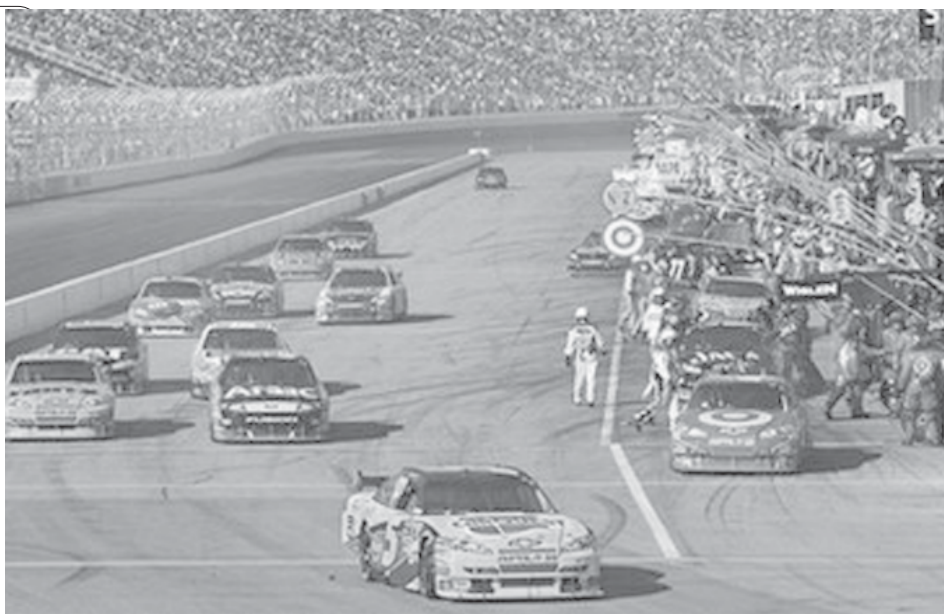

Single-incision surgery can help reduce post-operative pain, speed healing and reduce risk of infection, studies in the emerging field indicate.

Bariatric surgery, or weight loss surgery, is performed for the purpose of losing weight on the stomach and intestine of people who are dangerously obese.

Vietnam confirms 7th death of A/H1N1 influenza

HANOI, 21 Sept— Vietnam confirmed that a 40-year-old man died of A/H1N1 influenza, the 7th death of the flu in the country, said a daily report on the website of the Ministry of Health on Monday.

The man, living in the central province of Danang, was admitted to the Military Hospital 7 No on 16 Sept with fever and difficulty in breathing, said the ministry. The patient was then transferred to the Danang Hospital as his conditions deteriorated. He died on the same day due to respiratory failure. His sample was tested positive with A/H1N1 virus. Vietnamese Ministry of Health on Sunday confirmed 282 more cases of A/H1N1 influenza, raising the total number of flu patients in the country to 6,883, said the report.— *Xinhua*

Colombian state governor hospitalized due to A/H1N1 flu

BOGOTA, 21 Sept— Andres Gonzalez, governor of the central Colombian state of Cundinamarca, has been hospitalized due to the infection with the A/H1N1 flu, said the state's National Health Service on Sunday.

Gonzalez, who began showing flu-like symptoms last week, is now quarantined at hospital and treated with drugs.

Those who contacted the governor were warned of a possible flu risk.

Gonzalez's infection came after Colombian President Alvaro Uribe and four top officials tested positive for the flu in late August.

The epidemic has killed 65 out of a total of 1,090 infected in the nation.

Hamburg on top, Hertha humiliated in German Bundesliga

BERLIN, 21 Sept—German Bundesliga leader Hamburg saw a 1-1 draw in Frankfurt, staying at the top of the Bundesliga table, while powerhouse Hertha Berlin were humiliated 4-0 at home by newly-elevated Freiburg. Frankfurt maintained their unbeaten start to the season with a valuable 1-1 draw at home to early pacesetters Hamburg at the Commerzbank Arena.

Hamburg's Brazilian midfielder Ze Roberto looked to have set the hosts on their way early in the match but Marco Russ levelled the scores against the run of play with a sweetly struck volley. Hamburg played dominantly and had good actions in the opening stage, but failed to exploit their opportunities. Hamburg's Brazilian international Ze Roberto opened the scoring at the 8th minute by a header from five meters, after Frankfurt's goalkeeper failed to save the ball properly.

Record-breakers Sampdoria go top, Mourinho sent off

ROME, 21 Sept—Sampdoria set a club record four straight victories at the start of a Serie A season with a 4-1 success over lowly Siena on Sunday that took them

top of the table. Sampdoria lead Juventus, who won 2-0 against Livorno on Saturday, on goals scored to be the unlikely pacesetters at this early stage of the season.

It wasn't such good news for their city rivals Genoa, though, who could also have gone top but they lost their 100-percent record with a 3-1 defeat at Chievo. Meanwhile, Inter Milan coach Jose Mourinho, who on Saturday launched a broadside at his Italian critics, was sent off for arguing with the referee as the champions came back from a first-half deficit to beat Cagliari 2-1 in Sardinia.

Man United determined to silence City

MANCHESTER, 21 Sept—Manchester United manager Sir Alex Ferguson insists his side will silence "noisy neighbours" Manchester City after a sensational 4-3 victory over their bitter rivals. Michael

Owen scored a dramatic 96th minute goal to secure a derby triumph which had featured three City equalisers. The rivalry that had been building all week helped create a superb contest at Old Trafford which showed that City are worthy of being considered serious contenders for silverware after their close-season of extraordinary spending.

But United had the final word thanks to substitute Owen's stoppage time strike. "Sometimes you've got a noisy neighbour and you have to live with it," Ferguson said. "You can't do anything about them and they keep on making noise." But what you can do, and what we've shown is that you can get on with your life, put your television on, turn it up a bit louder and as the players showed their playing power and that's the best answer of all. They'll always be noisy!"—Internet

Saha's double gets Everton back on track

LIVERPOOL, 21 Sept—Everton forward Louis Saha made up for his Europa League red card as the French star's double-strike inspired a 3-0 win over Blackburn on Sunday in their Premier League match. Saha was harshly sent off in the final moments of his side's 4-0 Europa League win over AEK Athens on Thursday after an off the ball clash with defender Juanfran.

But the former Manchester United player took out his frustrations on Blackburn to continue his

prolific start to the campaign and lift Everton out of the relegation zone. Nigerian defender Joseph Yobo was also on the scoresheet at Goodison Park as Everton won for just the second time in the Premier League this season.—Internet

Ronaldo at double as Real Madrid make it three out of three

MADRID, 21 Sept—Cristiano Ronaldo scored twice as Real Madrid made it three wins in three games with a 5-0 thrashing of bottom side Xerez in Spanish league action on Sunday. There was no David versus Goliath scenario as the might of Real, with a budget of 400 million euros, crushed the newcomers who have the smallest budget in La Liga.

Ronaldo opened the scoring inside the first minute in the match played at the Bernabeu but Xerez held on until the final quarter when the Portuguese winger, Guti, Karim Benzema and Ruud van Nistelrooy all netted in quick succession. It was a sweet return to action for van Nistelrooy, who was

Real Madrid's Portuguese forward Cristiano Ronaldo

making his first competitive appearance since suffering a serious right knee injury last year. The result saw Real move ahead of defending champions Barcelona and Athletic Bilbao on goal difference at the top of La Liga.

Chelsea face nervous wait over Drogba injury

LONDON, 21 Sept—Chelsea manager Carlo Ancelotti faces a nervous wait to discover how long Didier Drogba will be sidelined after the Ivory Coast striker was stretchered off with a calf injury in his side's 3-0 win over Tottenham. Ancelotti's side maintained their 100 percent record under the Italian, who replaced interim manager Guus Hiddink in the close-season, and regained top position in the Premier League with a convincing display at Stamford Bridge on Sunday.

Tottenham could not conjure a reply to goals from Ashley Cole, Michael Ballack and Drogba and Chelsea have now set a club record sequence of 11 successive victories in league action, including fixtures from last season.—Internet

Leonardo praises AC Milan in victory over Bologna

ROME, 21 Sept—AC Milan coach Leonardo praised his players' pride following their laboured 1-0 home win against Bologna but said he wouldn't get carried away with the result. Milan sit five points behind leaders Sampdoria and Juventus and three behind champions Inter Milan in the Serie A table after their second win in four matches. Both of those have been narrow successes against minnow opposition with this win added to their 2-1 victory at Siena on the opening day of the season.

Between those two matches, though, came a pair of disappointments: a 4-0 defeat to Inter and 0-0 draw at Livorno so Leonardo believes that these three points have helped put the club on the right track. "I'm not using triumphant tones for this victory, there's still many things to do," he said. "My triumph was the commitment the team showed against Bologna. The players did a lot, they showed their pride from the beginning to the end."

FAO says poor harvest to increase food insecurity in Africa

LAGOS, 21 Sept—The Food Agricultural Organization (FAO) has said poor harvest in 2009 will increase food insecurity in Africa, following the below average rains on the continent, the News Agency of Nigeria reported on Monday.

A statement issued on Monday by FAO said food insecurity situation and lack of adequate pasture have worsened livestock conditions and reduced market prospects, impacting their incomes and ability to access staple foods.

According to the statement, reproduction of livestock had suffered from successive poor seasonal rains since 2007, making the recovery of the pastoral livelihood systems more difficult and worsening long-term food insecurity.

The statement said the prices of maize, a major staple, had shown a declining trend since the beginning of the year, but remained higher than they were two years ago.

Today's vehicles and motorways in Myanmar (3)

Article: *Kayan Soe Myint*; Photos: *Ministry of Construction*

While today's road network is bigger than that of the past, the number of vehicles has increased in the country.

The number of vehicles which are registered in the country has reached 2,015,531 in August, 2009. Out of them, 79,246 are trucks and light trucks.

The following table shows the detailed number of vehicles.

home are running on roads. For road safety, Directorate of Road Transport under the Ministry of Rail Transportation enacted the standards of vehicles and traffic rules, and general standards of vehicles are as follow.

(a) Truck (Drop Side Body)

(with fixed floor, front bumper, drop side body, open roof)

A vehicle overloaded with sawn timber seen on the road.

No.	Vehicle	Yangon Division			states/divisions	Total
		Municipal area	Outside	total
