UEC Chairman meets Kayah State/District/ Township subcommissions

NAY PYI TAW, 20 July—The meeting between Chairman of Union Election Commission U Thein Soe and members of Kayah State/District/Township Subcommissions, ward/village-tract subcommissions, returning officers and deputy returning officers was held at Town Hall in Loikaw on 17 July.

The UEC Chairman delivered an address and heard reports on work progress by the Kayah State subcommission chairman and work progress of

state/district/township/ward/village-tract subcommissions in Kayah State by Secretary U Khin Maung Yi of Kayah State subcommission and respective works by seven townships subcommissions in the state.

The UEC Chairman answered the queries raised by chairman of Loikaw District and Bawlake District subcommissions and made concluding remarks.

MNA

Four political objectives

- * Stability of the State, community peace and tranquillity, prevalence of law and order
- * National reconsolidation
- * Emergence of a new enduring State Constitution
- * Building of a new modern developed nation in accord with the new State Constitution

Four economic objectives

- * Development of agriculture as the base and all-round development of other sectors of the economy as well
- * Proper evolution of the market-oriented economic system
- * Development of the economy inviting participation in terms of technical know-how and investments from sources inside the country and abroad
- * The initiative to shape the national economy must be kept in the hands of the State and the national peoples

Four social objectives

- * Uplift of the morale and morality of the entire nation
- * Uplift of national prestige and integrity and preservation and safeguarding of cultural heritage and national character
- * Uplift of dynamism of patriotic spirit
- * Uplift of health, fitness and education standards of the entire nation

*Chairman of
Union Election
Commission
U Thein Soe

Maintain power plants till future generations

Maung Tway Htet

You may think that you just need to press the button to switch on the electric light to get electric light. In reality, it is not that easy. If you study the process of generating electric power from the very beginning to the very end, I am sure you will come to realize how much it is challenging to produce electricity. Then, you will

come to have a sense of saving electricity and you will never waste electricity, by switching on fluorescent lamps and electric bulbs unnecessarily in daytime, and leaving TV open without anyone watching on it.

To build an electric power plant is very demanding and it needs much time and huge funds. Suppose an electric

power plant has been built and put into service, the power supply plan has a long way to go for public consumption. We also have to set up grids and cable lines and build power stations in that regard.

Railroads for socio-economic improvement

The motto "Build roads at mountains, bridges over rivers" has been put into reality to a certain degree in the time of the government, leading to emergence of a large number of roads, bridges and railroads across the nation.

As part of the drive, the Ministry of Rail Transportation has been maintaining and upgrading old railroads, building new ones and producing passenger coaches and wagons coaches at low costs for ensuring secure and smooth transport in the nation and for public comfort and convenience.

Now, new railroads are being built one after another to link Nay Pyi Taw, the government seat, and states and divisions. Now, Nay Pyi Taw-Bagan, Nay Pyi Taw-Pyay, Nay Pyi Taw-Mandalay, Nay Pyi Taw-Shwenyaung, Nay Pyi Taw-Loikaw, Nay Pyi Taw-Chauk and Nay Pyi Taw-Yangon train schedules are in operation.

Minbu-An-Sittway Railroad Project is being implemented to ensure better relations among Magway Division, Rakhine State and Ayeyawady Division, which had only distant relations from one another due to natural barriers in the past. The 12 miles long Pyitawtha-Sittway-Yaychanbyin section and the 22.72 miles long Kuntaung-Ponnagyun-Yotayoke section of the 257 miles long project have been put into service.

Seikpyu-Yaw section of Kyangin-Pakokku Railroad was launched on 14 June. Kyangin-Pakokku Railroad is an artery for local people in the regions on the western bank of the river Ayeyawady.

For the time being, the total length of railroads is 3433 miles, up from only 1976 miles in 1988.

The government has been building railroads, roads and bridges to form them into transport networks covering the whole Union. Therefore, the people are under a responsibility to maintain the transport facilities for their durability.

2010 National Championship Basketball tournament goes on

YANGON, 20 July— Organized by Myanmar Basketball Federation, the 2010 National Championship Basketball tournament continued at the gymnasium of Aung San Stadium here this morning.

Uno team beat Venom team 73-21 and A-team stroke Joker team 77 - 37 in Men U 18 and under round robin match, and Agriculture and Irrigation Ministry routed Precious team 67- 39, Home Affairs Ministry won Industry No -1 Ministry (B) 86-36 in Women round robin match.

In Men Open group match, D.G.H team stroke team 94-31, Lion team trounced Agriculture and irrigation Ministry team 65-61.—MNA

People's Desire

11 soldiers, 1 civilian injured in mine blast in SE Turkey

ANKARA, 20 July — Eleven soldiers of the Turkish security forces and one civilian were wounded in a road mine blast in southeastern Turkey on Monday, local Dogan news agency reported.

Earlier, the semi-official *Anatolia* news agency reported that eight Turkish soldiers were wounded in the mine blast.

The handmade mine, allegedly planted by members of the outlawed Kurdish Workers' Party (PKK), was remotely detonated as a civilian van transporting soldiers to a nearby military garrison was passing by near Uzumlu village of Cukurca town of Hakkari province, said Dogan.—Xinhua

Gunmen massacre 18 partygoers in northern Mexico

PIEDRAS NEGRAS, 20 July — The gunmen did not say a word as they jumped from their cars and stormed the private party. They simply opened fire. When they were done, 18 people were killed.

Sunday's massacre in the city of Torreon was ghastly, but no longer unprecedented in northern Mexico, a region that is slammed day after day by gruesome slayings that authorities attribute to an increasingly brutal battle between drug gangs feuding over territory.

Investigators had no

suspects or information on a possible motive in the attack, but Coahuila, where Torreon is located, is among several northern Mexican states that have seen a spike in drug-related violence as the Gulf cartel and its former enforcers, the Zetas, fight for control of drug-trafficking routes.

Internet

Apple to launch iPad in New Zealand on Friday

WELLINGTON, 20 July— The Apple iPad will finally reach New Zealand on Friday, the company announced on Tuesday.

The iPad tablet, billed as a “magical and revolutionary product”, launched in the United States on April 3 but demand caused delivery delays to the international market.

It went on sale in Australia, Canada, France, Germany, Italy,

Japan, Spain, Switzerland and Britain on 28 May.

Along with New Zealand, the iPad would go on sale in Austria, Belgium, China's Hong Kong, Ireland, Luxembourg, Mexico, the Netherlands and Singapore on July 23.

The Wi-Fi-only models would have a recommended retail price of 799 NZ dollars (568 US dollars) for 16GB, 979 NZ dollars

for 32GB and 1,149 NZ dollars for 64GB, and the Wi-Fi + 3G models at 999 NZ dollars for 16GB, 1,179 NZ dollars for 32GB and 1,349 NZ dollars for 64GB.

Russia to earmark over 800 mln dollars for far east space centre

MOSCOW, 20 July — Russian government has decided to allocate 24.7 billion rubles (around 811 million US dollars) in the next three years to set up a new space centre named Vostochny in the Far East region of Amur, said Prime Minister Vladimir Putin Monday.

“I hope that the Vostochny Space Centre will become the first civilian national space center, and (will) guarantee full independence of Russia's space activities,” said Putin at a meeting after visiting the Energia Aerospace Corporation in Korolyov near Moscow. “It is important that the new space center will provide service for all prospective space projects, including a manned transport system, new generation boosters and future interplanetary complexes,” said Putin as quoted by the RIA Novosti news agency. The Russian head of government said construction and operation of the new space center will boost the industrial capacity of Russia's Far East, while drawing capital inflow into the region.

Natural oil seeps in the Gulf make BP's task even harder

MEXICO CITY, 20 July—BP executives and government representatives are acknowledging that oil is now seeping from the sea floor near the original leak caused by the 20 April Deepwater Horizon rig explosion.

But whether the leak is a result of the well that BP claims it has successfully capped or a natural oil seep is debated.

Scientists have detected a “seep a distance from the well and undetermined anomalies at the well head,” according to a July 18 letter from Thad Allen, the federal government's oil spill response director, to BP's Chief Managing Director Bob Dudley. In his letter, Allen did not provide information regarding where exactly the leak is located, how big it is or where the leak may be coming from.

While BP spokesman Mark Proegler told Reuters Monday that “Scientists have concluded that the seep was naturally occurring,” Coast Guard officials aren't as sure.—Internet

Nokia Siemens to acquire majority of Motorola's wireless network infrastructure assets

HELSINKI, 20 July— Nokia Siemens Networks (NSN) said Monday it is buying the majority of Motorola's wireless network infrastructure assets, in a move aiming to improve the NSN's global competitiveness in wireless technology.

According to Nokia Siemens Networks, the companies have entered into an agreement under which Nokia Siemens Networks will acquire the majority of Motorola's wireless network infrastructure assets for USD 1.2 billion in cash. The companies expect to complete closing activities by the end of 2010.

The company believes the move will strengthen NSN's position worldwide, especially in Japan and The United States. Acquisition to enhance position of Nokia Siemens Networks in

key wireless technologies; will give company large global footprint in CDMA.

As part of the transaction, Nokia Siemens Networks expects to gain incumbent relationships with more than 50 operators and to strengthen its position with China Mobile, Clearwire, KDDI, Sprint, Verizon Wireless and Vodafone.

Around 7500

employees will transfer to work under Nokia Siemens Networks. Most of the staff is from research and development plants found in China and the US NSN will now be considered as the world's second largest internet supplier.

Nokia Siemens Networks and Motorola also are exploring a global relationship in the public safety arena.

Health Tip: Drive Safely in the Dark

WASHINGTON, 20 July—Driving at night can be more challenging and more dangerous, especially if you have impaired vision.

The US National Safety Council suggests these tips for safe driving at night:

- Make sure your headlights and taillights, windows and turn signal lights are cleaned regularly.
- Make sure your headlights are aimed correctly to avoid affecting other drivers.
- Never drive after drinking, and don't smoke while you drive.
- Turn on your headlights when daylight first starts to dwindle.
- Slow down, and leave more space between you and the cars in front of you.
- Remember to turn off the high beams when another car approaches.
- If you're feeling drowsy, take a break until you feel rested enough to continue.—Internet

Moody's revises up Ukraine's GDP growth to 3.3% in 2010

KIEV, 20 July — Global Appraiser Moody's on Monday revised up Ukraine's real gross domestic product (GDP) growth to 3.3 percent in 2010 and 4.5 percent in 2011. The international rating agency said Ukraine's higher GDP growth is expected mainly due to the increase of the country's exports under the influence of gradual recovery of the global economy, according to a Moody's report posted by Ukraine's finance ministry on its website.

Moody's also forecasted Ukraine's budget deficit is expected to stand at 6 percent of GDP in 2010 and declined to 4.5 percent in 2011.

According to the agency's report, Ukraine's inflation is expected to reach 11.4 percent in 2010 and 11 percent in 2011. The World Bank in July also revised up the forecast of Ukraine's GDP growth to 3.5 percent in 2010 and to 4 percent in 2011. Earlier, the economy's growth forecast was set at 2.5 percent for 2010 and 3.5 percent for 2011.

However, Ukraine still faces some risks to worsen its rating, including problems in the banking system, large external debts, weak economic recovery and possible failure in the implementation of a new IMF (International Monetary Fund) program, Moody's said.

Xinhua

Major step seen in quest for anti-HIV vaginal gel

VIENNA, 20 July—Scientists on Monday reported a major stride towards a vaginal gel that can thwart HIV, a goal that would be of huge benefit to African women bearing the brunt of the AIDS pandemic.

A prototype cream tested in South Africa curbed the risk of infection by the human immunodeficiency virus (HIV) by 39 percent overall, but by 54 percent among those women who used it most consistently, they said.

The study coincided with the six-day 18th International AIDS Conference in Vienna, where leading campaigners responded with cheers leavened with some caution.

A wider trial has to be completed to scrutinise

the gel for safety and efficacy, and several important questions must be answered. Even so, this is a bright ray of hope, the scientists said.

"Without this gel, we may see 10 women becoming infected in a year. With

this gel, we would see only six women becoming infected," said Salim Abdool Karim, one of the two leading co-researchers, in a teleconference with reporters.

Japan's key economic gauge drops unrevised 0.1 point in May

TOKYO, 20 July — Japan's coincident composite index (CI), which reflects current business conditions, fell an unrevised 0.1 point to 101.2 in May, marking the first drop in 14 months, the Cabinet Office said in a report on Tuesday, maintaining the government's preliminary findings.

According to the report, May's decline, following a 0.8 point rise in April, was led by drops in manufacturers' investment goods shipments (excluding transport equipment), commercial sales (both retail and wholesale), industrial output and large industrial power consumption.

The leading composite index, which measures the state of the economy three months ahead, was revised downwards to 98.6 against a base of 100 set in 2005, from a preliminary reading of 98.7, marking the second consecutive monthly decline, the cabinet office said.—Internet

Eating fish weekly may lower risk of age-related eye disease

NEW YORK, 20 July—Older adults who eat fatty fish at least once a week may have a lower risk of serious vision loss from age-related macular degeneration, according to a U.S. study.

The study by researchers at the Johns Hopkins University in Baltimore does not prove that eating fish cuts the risk of developing the advanced stages of age-related macular degeneration, or AMD.

But researcher Bonnielin K. Swenor said the findings add to evidence from previous studies showing that fish eaters tend to have lower rates of AMD than people who infrequently eat fish. They study, reported in the journal *Ophthalmology* (<http://link.reuters.com/xut38m>), also supports the theory that omega-3 fatty acids — found most abundantly in oily fish like salmon, mackerel and albacore tuna — may affect the

INTERNET

development or progression of AMD.

"While the current research indicates that a diet rich in omega-3 fatty acids can reduce the risk of late AMD in some patients, more research is still necessary," Swenor told *Reuters Health*.

For the study, Swenor and her colleagues analyzed data from 2,520 adults aged 65 to 84 who underwent eye exams and completed detailed dietary questionnaires.

Internet

China sounds alarm over filthy cooking oil

BEIJING, 20 July—China has ordered food safety officials nationwide to step up the fight against "gutter oil" that is illegally skimmed from kitchen waste and resold, part of a government crackdown on foods tainted with potentially lethal substances.

China's Cabinet, the State Council, said the black market trade in waste oil posed "serious potential food safety risks" to the public.

The circular issued by the council Monday did not specify the health risks but the China Daily newspaper reported Tuesday that reused oil could contain dangerous substances such as aflatoxin, a mold that can cause cancer.

The State Council said the intensified crackdown should target edible oil trade fairs and wholesale markets. It called for inspections of oil being used at restaurants, school cafeterias, work canteens and kitchens at construction sites across the country.

"Recycling oil is something that has been done in all families, but the more the oil is cooked the more it will contain some residues of food and all these carcinogenic particles," said Marie-Paule Benassi, a food safety official with the European Union's delegation in China.

She said reused cooking oil would likely contain acrylamide, a chemical that forms naturally when starchy foods are baked or fried. Studies have shown the chemical, which also has industrial uses, causes cancer in lab animals and nerve damage to workers who are exposed to high levels.

HK people's spending on Mainland travel up 8.5%

HONG KONG, 20 July — Hong Kong residents' arrivals in the Chinese mainland totaled 70.6 million last year, and their spending also rose to 31.8 billion HK dollars (4.09 billion U.S. dollars), up 8.5 percent on 2008, the Census and Statistics Department of Hong Kong said on Tuesday.

Of all the arrivals, 31 percent were on business travel and 69 percent personal. For personal trips, 57 percent were to Shenzhen, 37 percent to other places in Guangdong and the remainder for elsewhere on the mainland.

The average spending per person for personal travel was about 650 HK dollars. For personal overnight trips, each person spent about 880 HK dollars on average while for same-day trips, each person spent about 300 HK dollars.

Xinhua

Short-snouted dogs face greater air travel risks

WASHINGTON 20 July—The University of Georgia's bulldog mascot, Uga, gets a special medical procedure to help him fly safely. But many other short-snouted dogs do not fare as well when put on an aircraft, new data shows.

Dogs with pushed-back faces such as English bulldogs and pugs accounted for roughly half the purebred dog deaths on airlines in the past five years, the Transportation Department disclosed Friday.

Overall, at least 122 dog deaths have been reported since May 2005, when U.S. airlines were required to start disclosing them, the department says. The dogs died while being shipped as cargo. English bulldogs accounted for 25 of the deaths, the single highest number among the 108 purebreds on the list.

File photo show Uga VII, the seventh English bulldog mascot for the University of Georgia team, who died last football season, keeps to the sidelines in Tempe, Ariz.—INTERNET

Pugs were next, with 11 deaths; followed by golden retrievers and labradors, with seven deaths each; French bulldogs, with six; and American Staffordshire terriers, four. Boxers, cockapoos, Pekingese and Pomeranians each accounted for two deaths.

Owners should consult with veterinarians before putting their dogs on planes, the department said. It believes the deaths

represent a tiny percentage of the pets shipped on airlines. The department said mixed breeds accounted for four airline deaths and a dozen dogs who died were of unknown breed. Short-nosed breeds — known as "brachycephalic" in the dog world — have a skull formation that affects their airways, said Dan Bandy of Shawnee, Okla., chairman of the Bulldog Club of America's health committee.—Internet

Innocent civilians falling victim to mine blasts

NAY PYI TAW, 20 July—A mine planted by insurgents went off in Kyaukkyo region at about noon on 16 July, costing the right foot of a man.

The explosion occurred when U Aung Myint of Kunseik Village, Shwegyin Township, Bago Division, stepped on it. At that time, he was observing the ground with three companions to pan for gold. He is now receiving treatment at Shwegyin General Hospital (100-bed). From 1 January to 16 July 2010, mine blast cases committed by insurgents across the nation killed four men and two women, and injured 37 men and five women.

Maintain power plants till future generations

Maung Tway Htet

Yeywa Hydropower Project in Pyin Oo Lwin Township, Mandalay Division, which will be able to generate 790 megawatts, is nearing completion.

(from page 1)

Despite being rich in natural water sources, with which hydropower is generated on a large scale, Myanmar, till 1988, had only two hydropower stations: No (2) Balu Creek Hydropower Station (168 megawatts) and Kindah Hydropower Station (56 megawatts), along with no coal-fired power stations.

Unlike early, Myanmar saw hydropower stations and coal-fired power stations one after another in states and divisions from 1988 onwards. The hydropower stations include Sedawgyi (25 megawatts), Paunglaung (280 megawatts) and Yeywa (790 megawatts) in Mandalay Division; No (1) Balu Creek (28 megawatts) in Kayah State; No (1) Zawgyi (18 megawatts), No (2) Zawgyi (12

megawatts) and No (1) Shweli (600 megawatts) in Shan State (North); Kengtawng (54 megawatts) and Tikyit coal-fired power station (120 megawatts) in Shan State (South); Zaungtu (20 megawatts), Thaphanseik (30 megawatts), Yenwe (25 megawatts) and Khabaung (30 megawatts) in Bago Division; and Mone (75 megawatts) in Magway Division.

In 1988, there were only two electric power stations in Myanmar. But, the construction of new electric power stations inclusive of coal-fired power station brought the total to 16. From 1988 to date, generation capacity of the power stations has surged from 224 to 2107 megawatts.

Now, 15 hydropower stations and one coal-fired power station supply electric power through national grids.

Till 1988, the nation had to rely mainly on gas-fired, steaming power and diesel-fired power stations for electric power. At that time, the generation capacity of the eight gas-fired, steaming power and diesel-fired power stations stood at 305.1 megawatts.

After 1988, Yangon Division witnessed Hlawga power station (99.9 megawatts), Hlawga steaming power station (54.3 megawatts), Nido steaming power station (9.4 megawatts), Ahlon power station (99.9 megawatts), Ahlon steaming power station (54.3 megawatts), Thakayta power station (57 megawatts) and Thakayta steaming power station (35 megawatts).

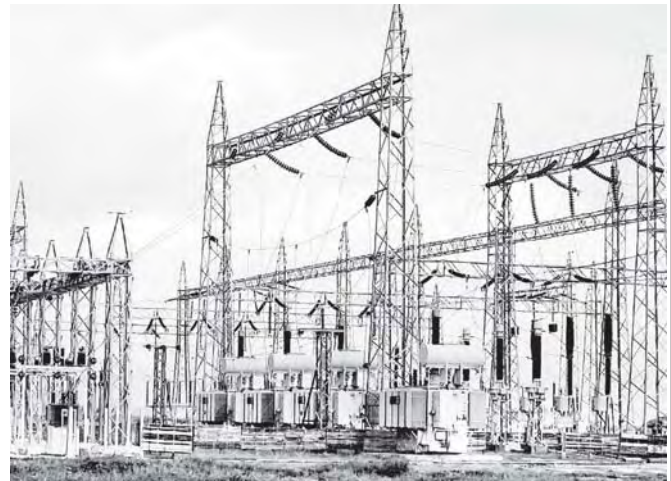

The electric power generation capacity of those stations has thus increased from 305.1 in 1988 to 409.8 megawatts. The generation capacity

of the gas turbines around Yangon is 470.70 megawatts which is supplied through national grid.

Electric power station

megawatts) and Sedawgyi (Upper) (64 megawatts) in Mandalay Division; Bu (Upper) (150 megawatts) in Magway Division;

(from page 8)

Wukyonkye (60 megawatts), Kankan (140 megawatts), Htonshin Creek (320 megawatts) and Laungdin (435 megawatts) in Kachin State; Thahtay (111 megawatts), An Creek (10 megawatts), Saidin (76.5 megawatts) and Laymyo

built with a proportionate mixture of natural pozzolana made of lava rock from extinct-volcano Mt. Popa and cement. The full tank level (FTL) of the dam is 666.8 feet and its full water storage capacity is 2,114,200 acre feet.

With generation ca-

completed by 96.45 per cent, and it is due to be completed in coming October.

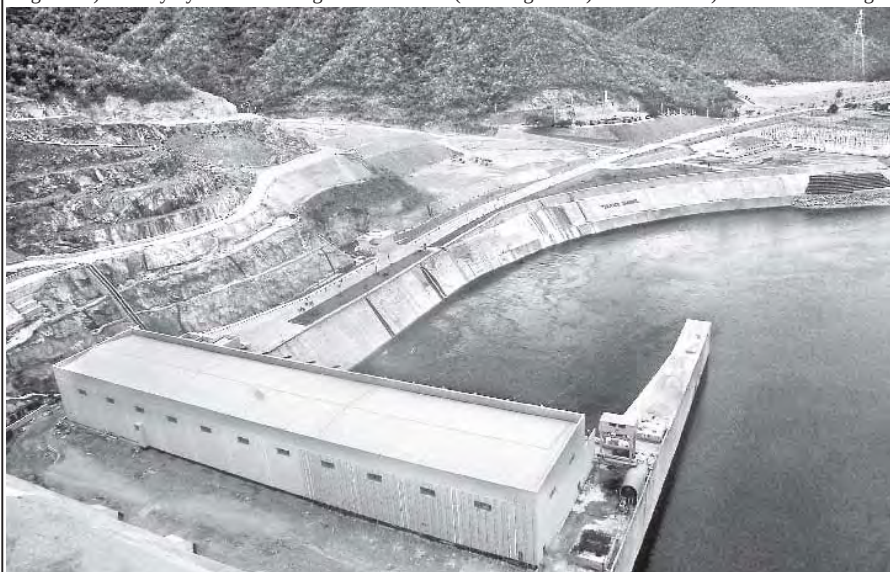

Upon completion, the ongoing projects will have a generation capacity of 41,121.5 megawatts in total. The projects due to be launched soon are Bilin (280 megawatts) in Mon

MVA) substation, and (66/11) MV, (5 MVA) substation projects.

The new 11 projects to be launched soon are five national grid projects: Hlinethaya-Ahlon (230 KV), Twin Bundle, Single Circuit national grid (15 miles), Ahlon (230 KV) Twin Bundle Single

Nancho Hydropower Plant is under construction.

An aerial view of Yeywa Hydropower Project in PyinOoLwin Township, Mandalay Division, which will be able to generate 790 megawatts, on completion.

(500 megawatts) in Rakhine State; Kengtawng (Upper) (51 megawatts) in Shan State (South); Balu Creek-3 (52 megawatts), Ywathit (600 megawatts), Nampun (130 megawatts) and Namtabet (110 megawatts) in Kayah State; and Thakyet (20 megawatts), six Kawthoung coal-fired power stations (6 megawatts), Anyarphy (9 megawatts) and Taninthayi (600 megawatts) in Taninthayi Division.

Yeywa Hydropower Project, a pride of the State, is near Ye Yaman Village, 31 miles south-east of Mandalay, PyinOoLwin Township, Mandalay Division. It is of roller compacted concrete dam type, and is the first of its kind in Myanmar.

The 433 feet high power station is being

capacity of 790 megawatts (4 x 197.5 megawatts), Yeywa Hydropower Station, on completion, will be able to generate 3550 million kilowatts a day, on average. The generation capacity may go up or down, based on the tank level. The tank level was 567 feet high on 9 July 2010.

The test running of generator-1 of Yeywa Hydropower Station was launched on 18 February 2010, and the power supply programme was launched on 24 February 2010. The test running of generator-2 of Yeywa Hydropower Station was launched on 8 July 2010, and it started to generate power on 14 July 2010. Up to now, the two generators produce 3.3 million kilowatts a day. Generator-3 and generator-4 are in the process of being installed, and so far, the whole process has been

State and Dayai Creek (25 megawatts) in Kayah State.

At the same time, national grids and main substations are being set up across the nation. The national power supply system is being extended by ensuring parallel completion of power stations and national grids and main substations.

In addition to previous national grids, the 18-mile long Panlon-Namhsan grid (66 KV) project and the main substation project Namhsan (66/11) KV, 5 MVA have been completed.

The ongoing projects are two national grid projects: three-mile-long Kyaukpahto-Shwegu-Bhamo (66 KV) grid linked with Nabar substation, and 9.5-mile-long Kyungyaung-Pakokku (66 KV) grid project, two main substation projects: Nabar (66/33/11) KV, (10

Circuit national grid (0.9 mile) over the river Hline, 60 miles long Thaton-Mawlamyine Twin Bundle Single Circuit grid, 55 miles long Nabar-Mohnyin (66 KV) grid, six main substation projects: substation bay extension project in Hlinethaya main substation, Ahlon (230/33 KV) (2 x 1000) MVA main substation, 230 KV switch bay in Thaton Station, 230/66/11 KV substation and 2 x 50 MVA main power station, Mohnyin (66/11 MV), 5 MVA sub-

station and Mogaung 66/11 KV 5 MVA substation.

After all the ongoing projects have been completed, Myanmar will be able not only to satisfy the domestic demand but also to sell electric power surplus to her neighbours such as the People's Republic of China, Thailand and Bangladesh. Moreover, Myanmar will be able to generate more electric power in cooperation with other ASEAN nations, setting (See page 10)

Tarpein Hydropower Project over Tarpein River, about 30 miles northeast of Bhamo is ongoing.

(from page 9)

up grids to Greater Mekong Sub-Region power network.

With an increasing power generation capacity, Myanmar will be able to pay more attention for industrial development and improve the living conditions for the people. It is, indeed, a giant step to compete with other countries in various sectors. So, the youth of younger generations will have a brighter future due to that long-term interest.

From 1988 to date, the government has built a large number of diesel-fired, gas-fired, steaming and coal-fired power stations and hydropower stations across the nation. However, the nation is still no position to meet the domestic demand. Some regions including Yangon have not enjoyed all-time power supply.

From 1988 onwards, the nation has been seeing many industrial zones, factories, plants, new towns, housing estates and urbanization plans in states and divisions. Long ago, a house on a plot had only one meter box. Now, on average, a house on a plot has been upgraded to an eight-unit house, meaning the power demand has increased eight times. Therefore, it can be visualized that power demands of streets, wards and townships are getting significantly high.

Myanmar's population is increasing regularly, touching about 60 million, and so is electric power demand as a result of a surge in use of electric such as TV, computer, electric fan, copier, air-conditioner, refrigerator, iron, electric stove, rice cooker and laundering machine. In addition, electric power consumption is very high, if compared with that previously. On the ground of the fact, demand still ex-

ceeds supply in electricity.

Myanmar is not the only country where electric power demand exceeds supply. So are neighbouring countries such as Thailand, Bangladesh, India, Laos and Cambodia. They have to purchase electric power from other countries, apart from building more and more electric power stations in them.

China, for instance, has enjoyed electricity safety, but it still has to seek more sources to generate electric power because it sells electric power to Cambodia and Laos. In spite of a growing number of electric power plants in Thailand, Bangladesh, India and China, electricity demand is still high in those countries.

It is common knowledge that the government is in pursuance of plans to seek more sources to generate electricity to meet the demand in the nation in future. Further, it has a large number of hydropower projects on the go, pouring huge funds and working day in, day out.

However, it takes many years to establish a hydropower plant. The tasks range from feasibility study to supply of electricity through national grids. Hydropower stations are in water sources near mountain ranges and in jungles, far away from human dwelling areas. A hydropower plant takes many years and costs a variety of challenges to emerge but benefits the people for a very long time, as evidenced by Balu Creek Hydropower Station (2) in Kayah State, which has celebrated its Golden Jubilee.

To build hydropower plants is very difficult in mountainous regions with many waterways like Rakhine State. It rains heavily in the state, so construction work is adjourned in the rainy season. To make things worse, transporta-

tion of heavy machine to worksites calls for huge sums of money and great challenges. Before 1988, never in their wild-east dreams did local people of Rakhine State expect to see railroads and factories in their region. Now, their state has seen many railroads and factories thanks to the benevolent attitude and goodwill the government shows to the people.

Now, the Myanmar Oil and Gas Enterprise under the Ministry of Energy is laying 24-inch diameter offshore pipelines for 179.64 miles from Yadana region in Mottama Offshore Oilfield to Yangon, spending about 270 million US dollars to supply more electric power to Yangon dwellers.

On 8 June 2010, gas was started to be piped to Ywama Gas Distribution Station in Yangon from Yadana Gas

Field. Since 12 June, Yadana Gas Field has stepped up distribution of gas, thus contributing to electric power supply for Yangon to a certain degree.

The electric power plants the government has built and is building, and the plants due to emerge soon are, in fact, invaluable national heritage. Those facilities which have come into existence due to the visionary government's genuine goodwill to the public bring long-term benefits to new generations. Therefore, a bounden duty to maintain electric power plants is to be relayed from one generation to the next for their durability.

China's Three Gorges Dam withstands peak flood test

YICHANG, 20 July—The Three Gorges Dam

on China's Yangtze River was holding up against its first major flood-control test on Tuesday, said officials of the China Three Gorges Corporation.

The flow on the river's upper reaches topped 70,000 cubic metres a second on Tuesday — 20,000 cubic metres more than the flow during the 1998 floods that

killed 4,150 people and the highest level since the dam was completed last year.

The flow peaked at 70,000 cubic meters per second at the Three Gorges Dam at 8 am, still below the record high of 70,800 cubic metres per second in 1981, a spokesman with the corporation said.

Cold wave kills 18 in Bolivia

LA PAZ, 20 July—The Bolivian authorities said on Monday that 18 people had died in a cold wave with the lowest temperature of 3 Celsius degrees in 29 years.

Santa Cruz, a department in the east of the country, registered on Monday the record low temperature of 3 Celsius degrees.

The cold wave made the authorities suspend schools till on Wednesday in nine departments of the country. The Education Ministry said it will evaluate the influence of these low temperatures and the respiratory infections to decide whether to extend the suspension.

Meanwhile, sources of the National Service of Meteorology and Hydrology said another cold wave will reach the country on Thursday, but this one will be of lower intensity.—Xinhua

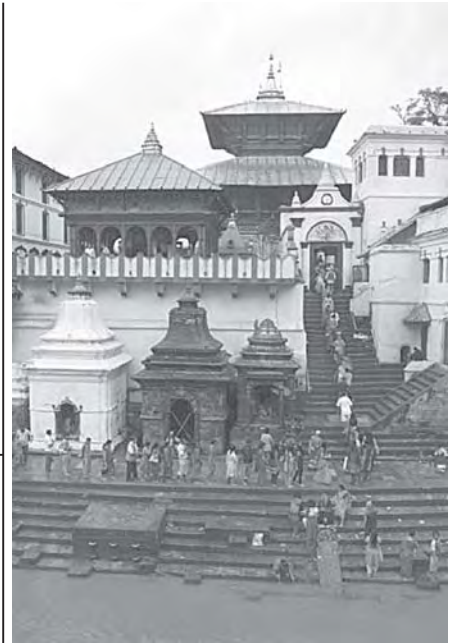

Iran to launch hi-tech submarine

TEHERAN, 20 July—Iranian Defence Minister Brigadier General Ahmad Vahidi said on Monday that the country plans to launch a hi-tech submarine equipped with advanced weapons in the near future, the semi-official *Fars* news agency reported.

"The submarine enjoys advanced technology, high power of maneuvering and underwater operations and is equipped with hi-tech weapons," Vahidi was quoted as saying in the central city of Isfahan where he was attending a ceremony.

On Sunday, Vahidi said that new submarines made by experts of Iran's defence industries would be delivered to the Navy on 27 July, according to the official *IRNA* news agency.

Moscow scorched by summer heat

MOSCOW, 20 July—Russian capital has been scorched by ongoing heat, with temperatures beating the record of 35-37 degrees Celsius this week.

This July has already been tagged as the hottest month ever. Scientists said this summer is one of the three hottest in Russia over the past 130 years, with media reporting a new temperature record almost every day.

Ponds and reservoirs were overcrowded with heat-tired Muscovites. Ice cream sales broke all possible records and police officers seemed to have given up preventing people from swimming in the city's fountains.

Meanwhile, sanitary and epidemiological services claimed all but two ponds and lakes in Moscow were dangerous for swimming due to infectious water. But hundreds of those bathing in the sun did not seem to care.

The heat which actually started in late June has brought Moscow residents along with many problems.—Xinhua

WWI soldier found in mass grave reburied in France

FROMELLES, 20 July—The remains of a World War I soldier left in a mass grave for more than 90 years were moved by four-horse cart to a new cemetery for reburial with full honours on Monday in a ceremony attended by Prince Charles.

The unknown soldier's new headstone in northern France bears a simple inscription: "A soldier of the Great War. Known unto God." His nationality is unclear, but he was either Australian or British.

German machine guns and artillery left more than 5,500 Australians and more than 1,500 British killed, wounded or missing in under 24 hours at the 1916 Battle of Fromelles, the first Australian combat operation on the Western Front. Many of the dead were buried by Germans in a mass grave, which was covered by plants over time and discovered by an Australian amateur historian in 2008.

After more than two years of exhumation and identification work by archaeologists, 249 of the bodies were reburied under marble gravestones laid out in a V shape in a new cemetery in the French town of Fromelles.

American charged with murdering Thai bar hostess

BANGKOK, 20 July—An American has been arrested and charged with killing a bar hostess he met on the Thai resort island of Phuket, police said on Monday.

Ronald John Fanelli, 37, was taken into custody Sunday on charges of killing 33-year-old Wanpen Satienjai and concealing the crime and cause of murder, police Lt Col Wijak Tarom said. He said Fanelli — who has lived on the southern resort island for three years — confessed to stabbing the woman last month and disposing of her body.

The *Phuket Gazette* reported on its website that Fanelli served in the US Navy before settling in Thailand about three years ago.

Climate change to blame for hottest summer ever?

PARIS, 20 July—The first six months of 2010 brought a string of warmest-ever global temperatures, but connecting these dots to long-term climate change patterns remains frustratingly difficult, experts say.

Not only was last month the hottest June ever recorded, it was the fourth consecutive month in which the standing high mark was topped, according to the US National Oceanic and Atmospheric Administration (NOAA).

Indeed, 2010 has already surpassed 1998 for the most record-breaking months in a calendar year.

As a block, the January-to-June period registered the warmest combined global land and ocean surface temperatures since 1880, when reliable temperature readings began, NOAA said.

China, France to further expand cooperation

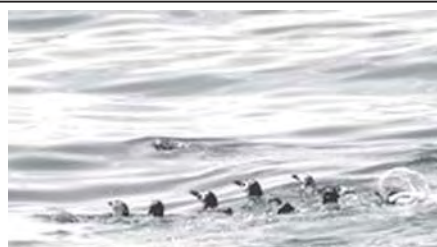

GENEVA, 20 July—Top legislators of China and France met here on Monday and reiterated their willingness to further expand cooperation in various areas and strengthen coordination in international affairs.

Wu Bangguo, chairman of the Standing Committee of the National People's Congress (NPC) of China, said his latest official goodwill visit to France was successful thanks to joint efforts by both China and France. It is in the interest of both countries and peoples to strengthen the bilateral ties and deepen cooperation in international and regional affairs, Wu said at the meeting with Accoyer.

Bernard Accoyer, speaker of the French National Assembly, said Wu's visit to France is remarkable in Sino-French ties and is fruitful, which

will play a constructive role in deepening substantial cooperation and boosting the friendship between the two peoples. France looks forward to take chance of Wu's visit to conduct closer coordination in international affairs and accelerate the development of Sino-French ties, he said.

Wu paid an visit to France from July 7 to July 14 as a part of his three-nation Europe tour. He is here to attend the third World Conference of Speakers of Parliament. On the sideline of the conference, Wu also met with Klaus Schwab, executive chairman of the World Economic Forum, on Monday and discussed the upcoming Summer Davos Forum in China.—MNA/Xinhua

Hundreds of dead penguins wash up on Brazil shores

SAO PAULO, 20 July—Hundreds of dead penguins and other sea animals have washed up on Sao Paulo state's shores and scientists are investigating the causes, environment officials told *Folha Online* news agency.

The Institute of Environment and Natural Resources said 530 penguins, numerous other sea birds, five dolphins and three giant sea turtles have been found in the coastal towns of Peruibe, Praia Grande and Itanhaem, with more likely on other nearby beaches.

Sao Paulo University biologists and a wildlife research center are looking into the possible reasons for the animal deaths, the institute said.—Internet

Philippine coast guard in search for missing fishing boat

MANILA, 20 July—A fishing boat with a Japanese and eight Filipino crews aboard was reported missing off Indonesian waters, a day after departing Davao City in southern Philippine, a coast guard official said Tuesday.

Commodore Lino Dabi, commander of the Coast Guard District South, said the incident was reported Monday by Ted Okubo, a Japanese national and operation manager of Sanko Pacific Tuna Inc. based in Toril district in Davao City.

Dabi said they have issued Notice to Mariners (Notam) to all Philippine fishing vessels in the region to help in locating the fishing boat.

"We have also asked the (Coast Guard) headquarters to make representation to Indonesian authority and to the Palau states to issue the same Notam in Indonesia and Palau," Dabi added.

The vessel's last recorded contact was on July 17 near the Talaud Island of Indonesia. Dabi said he could not say if the sea was rough during the last contact.

Judge refuses to withdraw from drilling ban case

NEW ORLEANS, 20 July—A federal judge who overturned the Obama administration's initial six-month moratorium on deepwater oil drilling has refused to disqualify himself from the case.

Several environmental groups had asked US District Judge Martin Feldman to withdraw from the case because of his investments in several oil and gas companies. Feldman refused in an order issued on Friday and posted on Monday.

Wide-eyed primate caught on camera for first time

A "cute" primate so rare it was thought to be extinct has been caught on camera in the forests of Sri Lanka for the first time, scientists said on Monday.

The Horton Plains slender loris is a small, nocturnal animal which can grow up to 17 centimetres (six inches) long with big, bulging eyes.

Endemic to Sri Lanka, it was first discovered in 1937 but had only been seen four times since then.

Scientists last caught a glimpse of the primate in 2002, and believed the elusive animal had since died out.

But field researchers, working with the Zoological Society of London, managed to track down the mysterious creature in the forests of central Sri Lanka.

In a world first, they were able to take pictures of an adult male slender loris sitting on a tree branch.

This is an undated handout photo issued on 19 July, 2010 by the Zoological Society of London (ZSL) of a Horton Plains slender loris, sitting on a forest branch in a mountain forest in central Sri Lanka. Researchers say they photographed the rare primate thought to have been extinct for more than 60 years in a forest in central Sri Lanka. The Zoological Society of London said in a statement on Monday that a Horton Plains slender loris with wide eyes and short limbs has been caught on camera by ZSL and Sri Lankan researchers after they surveyed forest patches for more than 200 hours, looking for signs of the primate.

Iowa man who just wanted a hug lands in jail

Police arrested a man who they said punched another man who refused to hug him. Iowa City police responded to a report of someone being aggressive and punching cars on Sunday night. The suspect, a 23-year-old man, told police he became upset after he tried to hug a man and was pushed away. Police said the man punched and dented the hood of a car before punching the man he tried to hug.

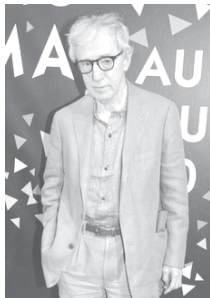

Police said the man had a blood-alcohol content of .086. He was charged with simple assault and fourth-degree criminal mischief, a serious misdemeanor.

Audiobooks of 4 Woody Allen works set for release

New York, 20 July—The Academy Award-winning filmmaker and writer has recorded audio editions of four of his books, compilations of the comic stories and essays he has published in The New Yorker and elsewhere.

They include "Mere Anarchy," "Getting Even" and "Side Effects."

The audiobooks are being released on Tuesday by the digital audio producer and

Indian entrepreneur closes in on Blackburn deal

MUMBAI, 20 July—An Indian entrepreneur is close to clinching a deal to buy English Premier League club Blackburn Rovers worth between 54 and 69 million dollars, a source familiar with the matter has told AFP.

The process of due diligence — which opens up the club's financial accounts for evaluation to a potential buyer — has begun, the well-placed source said, on condition of anonymity.

"Once this is complete, Saurin Shah and his consortium will make a fresh bid for Blackburn," the source told AFP.

Blackburn Rovers' English midfielder David Dunn celebrates after scoring during an Premier League.—INTERNET

The deal is set to be valued at between 35 and 45 million pounds including debt, the source added, without elaborating.

Power takes Honda Indy Toronto for 2nd win in row

TORONTO, 20 July—Will Power is long on street smarts.

The 29-year-old Australian, named after his motorcycle racing great-grandfather, knew when to be aggressive and

when to play it safe Sunday in the Honda Indy Toronto.

After patiently avoiding early trouble in the wreck-filled race, the IndyCar leader passed Justin Wilson on the outside off a restart with 14 laps left, then held off Dario Franchitti for his second straight victory and fourth of the season.

"As I predicted, it was a very wild race," Power said. "It started on the first corner for me when I had Helio (Castroneves) and (Ryan) Hunter-Reay come cruising up the inside. I was like, 'OK, I'll let those guys go.' And then I lost a couple of more positions. But I know how this race goes.

Rare sight: Woods playing out the string in major

ST ANDREWS, 20 July—His day was effectively over by the fourth hole, where Tiger Woods needed two tries to get out of a pot bunker. What followed was something rarer still: Woods simply playing out the string in a major. It's been a half-dozen years since he came down the back nine on Sunday in a grand slam event with absolutely nothing at stake.

With good pal Lucas Glover in tow, Woods played fast, casually and laughed a lot, looking to all the world like a guy resigned to his fate. Scolds no doubt will point to his performance here as more evidence that all those romps off the course sapped nearly all of his strength and resolve on it.

Woods won the last two times the Open stopped off at St Andrews,

once by a record margin, and the best he could muster this time around was a tie for 23rd. Coming on the heels of fourth-place finishes at the Masters and the US Open, two other major championship venues where he also won by record margins, they'd have you believe he's become Samson in golf spikes — after the haircut.—INTERNET

Expo site braces for heat wave

BEIJING, 20 July—Surging temperatures failed to deter visitors as the Expo site welcomed some 440,800 visitors by 7:00 pm on Monday. The hot weather is expected to continue throughout this week with temperatures climbing above 35 degrees Celsius, according to the city's weather bureau.

Among yesterday's visitors, 140,300 were group tourists, and 61,400 visitors used free tickets Shanghai government distributed to local residents. A total of 62,314 tickets were sold on site, with 22,072 evening admissions.

Houtan, Shangnan Road, Changqing Road, and Gaoke Road W. gates received 83,000, 76,000, 64,000, and 61,000 visitors respectively.

By 5pm, 78 shows were staged within the site, attracting 57,900 spectators.

The city would experience hot and sunny days with the end of the plum rain season and maximum temperatures would range between 34 and 36 degrees, forecasters said.

Religious edifices excavated from old Pinle City

NAY PYI TAW, 20 July—An ancient building was discovered while a group of the staff from the Archaeology, National Museum and Library Department (Nay Pyi Taw) was carrying out excavation tasks in old Pinle City in Mongmaw Village, Myittha Township, Kyaukse District, Mandalay Division, from 6 June to 12 July.

The building measuring 53ft by 53ft with two front and back brick stairs measuring 14ft by 9ft by 8ft unearthed from Mound No.20 is

similar to the religious buildings with a circle-shaped stake centred in a square-shaped stake excavated from ancient Pyu cities.

The stake of the excavated ancient building is quite similar to those of the buildings unearthed from Mound Nos. 14 & 15 in old Beikthanoe city, the building in old Srihattara city and the buildings from Mound Nos. 8, 14 & 15 in old Pinle city. According to the findings, it is learnt that the excavated building is a religious edifice.— MNA
