NAY PYI TAW, 2 Sept—On the occasion of the 65th Anniversary of the National Day of the Socialist Republic of Vietnam which falls on 2 September 2010, His Excellency Vice-Senior General Maung Aye, Vice-Chairman of the State Peace and Development Council of the Union of Myanmar, has sent a message of felicitations to Her Excellency Madame Nguyen Thi Doan, Vice-President of the Socialist Republic of Vietnam.—MNA

Prime Minister U Thein Sein felicitates Vietnamese counterpart

NAY PYI TAW, 2 Sept—On the occasion of the 65th Anniversary of the National Day of the Socialist Republic of Vietnam which falls on 2 September 2010, His Excellency U Thein Sein, Prime Minister of the Union of Myanmar, has sent a message of felicitations to His Excellency Mr. Nguyen Tan Dung, Prime Minister of the Socialist Republic of Vietnam.—MNA

Four political objectives

- * Stability of the State, community peace and tranquillity, prevalence of law and order
- * National reconsolidation
- * Emergence of a new enduring State Constitution
- * Building of a new modern developed nation in accord with the new State Constitution

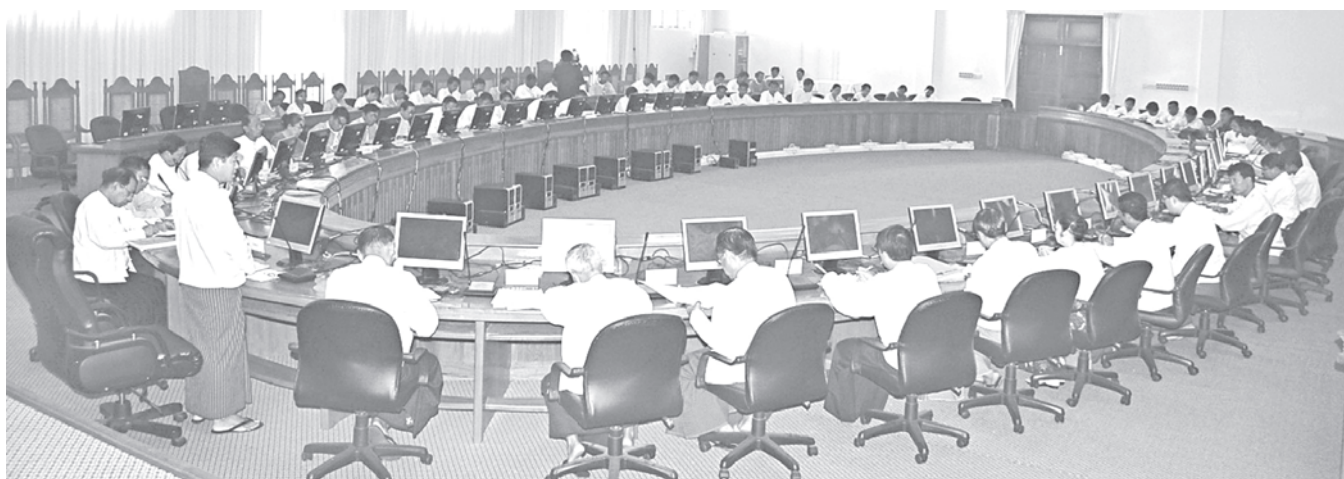

Four economic objectives

- * Development of agriculture as the base and all-round development of other sectors of the economy as well
- * Proper evolution of the market-oriented economic system
- * Development of the economy inviting participation in terms of technical know-how and investments from sources inside the country and abroad
- * The initiative to shape the national economy must be kept in the hands of the State and the national peoples

Four social objectives

- * Uplift of the morale and morality of the entire nation
- * Uplift of national prestige and integrity and preservation and safeguarding of cultural heritage and national character
- * Uplift of dynamism of patriotic spirit
- * Uplift of health, fitness and education standards of the entire nation

UEC, Region/State/District Election commissions meet

Union Election Commission Chairman U Thein Soe delivers an address at coordination meeting between UEC and secretaries of Region/State/District Election commissions.—MNA

NAY PYI TAW, 1 Sept—The Union Election Commission met secretaries of Region/State/District Election commissions at the coordination meeting at its office, here, this morning, with an address by Chairman of the Union Election Commission U Thein Soe.

In his address, the Chairman of UEC said that the meeting is to coordinate electoral process for successfully holding free and fair election without any mistakes. He stressed the need to prepare the voting

roll and list of candidates and constituencies. All the officials concerned are to conduct their tasks in accord with the laws. In that regard, they will have to make field trips to inspect whether the polling stations are in proper condition or not, he said. He pointed out that it is necessary to set up five polling booths for each Hluttaw for the convenience of voters enabling them to cast votes in time. Therefore, he continued to say that it is necessary to increase the number of

members of polling stations. In conclusion, he urged those present to coordinate with members of the UEC, those in-charge of respective Regions and States, on data.

Later, the secretaries of Region/State/District Election commissions took part in the discussions and they coordinated with members of UEC on electoral process. The meeting came to an end with the concluding remarks by the UEC Chairman.—MNA

National unity key to overcoming difficulties

Global warming and climate change cause disasters across the world. Some countries are facing volcanic eruptions, earthquakes, floods, droughts and outbreaks of forest fires and landslides.

Coastal regions and the delta of Myanmar had often encountered strong winds. Myanmar faced 35 storms over the past 60 years. In early May 2008, the nation was hit by the cyclonic storm Nargis. The storm ravaged over 500,000 houses in over 40 townships in Ayeyawady and Yangon Regions, claiming lives of over 100,000 people.

The State gave priority to emergency rescue and temporary accommodation, rehabilitation, regional development and long-term prevention against natural disasters in the storm-affected areas. Tatmadawmen, departmental personnel and people with the use of aircraft, vehicles and vessels participated in the rehabilitation and reconstruction tasks.

Paddystrains, farming equipment, fishing nets and fishing boats and salt production equipment were provided to agriculture, fishing and salt industries.

Rural housings, urban buildings, education and health facilities and roads plus Cyclone Shelters have been constructed for homeless storm victims. The Road Network with 11 roads is under construction in the Delta region.

At present, the people of storm-ravaged regions are enjoying fruits of greater progress in various sectors thanks to harmonious efforts of the government, the people and the Tatmadaw and contributions of INGOs and wellwishers at home and abroad. Thus, the State constantly recognizes the noble spirit and industrious efforts of those who have contributed to rehabilitation of various sectors in the storm-ravaged areas.

Electoral Work Course opens in Kayan Township

NAY PYI TAW, 1 Sept—The opening of Electoral Work Course for polling station officers, deputy polling station officers and members of wards and villages in

Kayan Township was held at the gymnasium in Kayan on 30 August.

Chairman of Kayan Township subcommission U Kyaw Khin explained purpose of conducting the course and Township Law Officer U Aung Maung, laws and rules and electoral process.

U Aung Kyi Tun, secretary of township subcommission, gave lectures on duties of polling station officers, deputy polling station officers and members and demonstrated how to cast vote by voters.

Explosion rocks Kandahar in S Afghanistan, one killed

KANDAHAR, 1 Sept —A powerful explosion rocked Kandahar in south Afghanistan on Wednesday, leaving at least one person dead and injured a few others, police said.

"The blast occurred next to the office of Hajj Department, leaving one person dead and injured few others," a police officer told *Xinhua*, but declined to be identified.

Meanwhile, police chief of Kandahar Province Sardar Mohammad Zazai confirmed the incident, saying terrorists planted the explosive device into a motorcycle and detonated it leaving two

persons dead.

"Two persons including the director of Hajj department were killed in the terrorist attack organized by the enemies of peace in the provincial capital Kandahar City this morning," Zazai told *Xinhua*.

He also said that complete details will be released soon after completion of investigation. A doctor in Kandahar City hospital, Ahmad Shah told *Xinhua* that a dead body and four injured people had been taken to hospital.

No groups or individuals have claimed responsibility for the incident.—*Xinhua*

An Iraqi man raises his hands as an Iraqi policeman does a body search at a check point in Baghdad, Iraq, on 31 Aug, 2010. Iraqi forces are vastly improved and attacks have plummeted since the dark days of 2006 and 2007. But rarely a day goes by without some loss of life, and spectacular attacks such as the violence on Wednesday that killed 56 people still happen with disturbing regularity.—INTERNET

Fifteen killed in roadside bomb blast in Somali capital

MOGADISHU, 1 Sept —At least fifteen people were killed and more than 30 others injured on Tuesday after a roadside bomb explosion hit two passenger buses in the Somali capital Mogadishu, officials and witnesses said.

The explosion ripped through the passenger buses as they plied the only road connecting the divided city and is used by Somali government forces as well as the African Union peacekeeping forces in Mogadishu.

"We counted fifteen dead people on both buses and the 30 or so injured people were taken to the hospitals in Mogadishu," Nur Hassan, a commander of Somali government forces based in a nearby control post told *Xinhua*.

Xinhua

Hundreds of civilians killed in Iraqi violence in August

BAGHDAD, 1 Sept -- Violence killed hundreds of Iraqi civilians in August, authorities said Wednesday, a day after President Barack Obama marked the end of the US combat mission in the country.

The month's toll included 295 civilians killed and 508 wounded, the Ministry of Interior said.

Fifty-four Iraqi soldiers were killed and 150 more wounded in the same month.

In July, the number of people killed in the nation's violence was the highest since May 2008. Nearly 400 civilians were killed in that month.

The month of September started off with at least three attacks, authorities said.

In one, a police officer who works for the Interior Ministry was killed when a bomb attached to his civilian car exploded Wednesday morning in northwestern Baghdad.

In a separate attack in Tikrit on the same day, three police officers were wounded when a roadside bomb struck a police patrol.

And one more officer was wounded when a roadside bomb exploded outside his house in Falluja, authorities said. The officer was heading to work when the bomb went off. — *Internet*

Ground features affect bird flight paths

COLUMBIA, 1 Sept—“Free as a bird” may not be as free as it sounds, researchers say, as a study suggest what’s on the ground greatly affects where birds fly.

Scientists at the University of Missouri says the findings could be useful to foresters and urban planners alike to improve bird habitats that would perpetuate strong, diverse bird populations, a university release said Tuesday. Dylan Kesler, assistant professor in fisheries and wildlife at the university’s School of Natural Resources, found that non-migrating resident birds tend to travel over forest “corridors,” areas protected by trees and used by wildlife to travel. Birds choose to travel over woodlands because they can make an easier escape from predators as well as find

food, he says.

“Movement of individuals influences nearly every aspect of biology, from the existence of a single population to interactions within and among species,” Kesler said. “Movement determines where individual birds procreate. How they spread across the landscape affects who meets whom, which in turn dictates how genes are spread.” Man-made features such as roads, as well as gaps in forests from agriculture or rivers, can restrict birds to certain areas, he says. When forests are removed, bird populations become isolated and disconnected, which can lead to inbreeding and weaker, more disease-prone birds, Kesler says.

Internet

Largest neutrino observatory readied

COLLEGE PARK, 1 Sept— After two decades of planning and construction, the world’s largest neutrino observatory, beneath arctic ice, will open in December, scientists say.

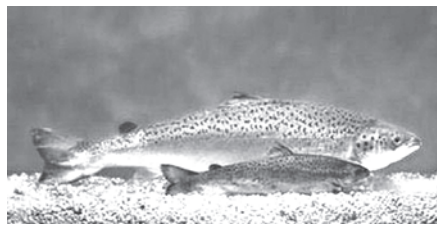

Dubbed IceCube, it holds 5,160 optical sensors in a cube whose sides measure more than 1,000 yards, making it an order of magnitude larger than other neutrino detectors, an American Institute of Physics release said Tuesday.

The Superkamiokande detector in the Japanese Alps, for example, is only 44 yards on a side. The goal of the world’s neutrino observatories is simple: find the source of cosmic rays. “Almost a century after their discovery, we do not know from where the most energetic particles to hit the Earth originate and how they acquire their incredible energies,” Francis Halzen, a professor of

physics at the University of Wisconsin in Madison, says. High-energy neutrinos are formed in the universe’s most violent events, like exploding stars and Gamma ray bursts. With no electric charge and essentially no mass, trillions of neutrinos pass through the Earth and everything on it without effect. On extremely rare occasions, a neutrino will strike the nucleus of an atom, creating a particle, called a muon, and a blue light that can be detected with optical sensors. The trick is spying those rare collisions of high-energy neutrinos. IceCube hopes to do it by sheer virtue of its size. “IceCube has been totally optimized for size in order to be sensitive to the very small neutrino fluxes that may reveal the sources of cosmic rays and the particle nature of dark matter,” Halzen says.

Apple iPad supply catching up to demand

SAN FRANCISCO, 1 Sept—Apple on Monday promised that US orders for its iPad tablet computers would ship within 24 hours, in a sign that supply of the hot-selling devices was catching up to demand.

The online Apple Store indicated that any of the six iPad models would be shipped, free of charge, within 24 hours of an order being placed.

People have snapped up millions of iPads since the gadgets launched in

the United States and wait times for the devices at times stretched into weeks.

The shortened wait has prompted debate over whether Apple’s beefed-up production was paying off or if demand for iPads was waning.

Apple could provide some perspective on iPad sales during a special event to take place in San Francisco on Wednesday, but the California company’s iPod line is expected to be the main focus of the gathering.

The iPad went on sale in the United States on 3

April and Apple sold more than three million in 80 days.

The iPad allows users to watch video, listen to music, play games, surf the Web or read electronic books. The cheapest iPad costs 499 dollars (US) while the top model is priced at 829 dollars.

Apple has released the iPad in more than a dozen countries, and China Unicom is expected to start selling Apple’s iPad in the world’s largest Internet market in mid to late-September.

NASA tests prospective launch motor

BRIGHAM CITY, 1 Sept— NASA says it has successfully tested the largest and most powerful solid rocket motor that could be used for future US heavy lift launch vehicles.

ATK Aerospace Systems of Brigham City, Utah, conducted the 2-minute, full-scale stationary firing of the first-stage development solid rocket motor, dubbed DM-2, a NASA release said. The first-stage solid rocket motor is designed to generate up to 3.6 million pounds of thrust at launch. Although similar to the solid rocket boosters that help power the space shuttle to orbit, the five-segment development motor includes several upgrades and technology improvements implemented by NASA and ATK engineers, the space agency said. The external motor cases are flight-proven hardware used on shuttle launches for more than three decades. The cases used in this ground test have collectively launched 59 previous missions, NASA said.—Internet

Health

Breast, ovary removal can eliminate cancer risk for some

WASHINGTON, 1 Sept— Women with a certain genetic predisposition to breast or ovarian cancer can dramatically reduce their risk of developing either by undergoing preventative surgeries, a study showed on Tuesday.

The research, which tracked nearly 2,500 women with certain genetic mutations, found that pre-emptive mastectomies or surgeries to remove the ovaries or fallopian tubes nearly eliminated the incidence of either cancer.

"This is the first study to prove women survive longer with these preventative surgeries and shows the importance of genetic testing when there is a family history of early breast or ovarian

cancer," said Virginia Kaklamani, an associate professor of medicine at Northwestern University and a co-author of the study.

The research looked at 2,482 women with mutations of the BRCA1 or BRCA2 genes, which significantly increased their chances of developing ovarian or breast cancer.

It found that women

with mutations in either gene who opted for prophylactic mastectomies effectively eliminated their future risk of breast cancer.

The study showed "no breast cancer events occurring in women who underwent risk-reducing mastectomy during three years of prospective follow-up."

Internet

Health Tip: How to prevent osteoporosis

Osteoporosis is a disease of decreased bone density. Bones become thin, weak, fragile, and may break easily. This disease strikes more on women and older people. But people of any age or gender still have the risk of osteoporosis.

According to *healthday*, The National Institute of Arthritis, Musculoskeletal and Skin Diseases of the United States recommends the following steps to prevent osteoporosis:

- Eat a healthy and balanced diet, rich in vitamin D and calcium.
- Exercise frequently designed to help strengthen bones. Your doctor may recommend certain exercises.
- Consumption of drugs designed to prevent bone loss or increase bone density.
- Avoid things that could make you fall and avoid wearing high heels.

Internet

Salt is a four-letter word, expert says

DALLAS, 1 Sept— The average US adult eats about 1.5 teaspoons of salt a day, more than twice the recommended amount, a US professor of clinical nutrition says.

Dr Jo Ann Carson of the University of Texas Southwestern Medical Centre in Dallas says federal regulators have begun urging food manufacturers to cut back on the amount of sodium they add to everything from breakfast cereals to soups. The aim is for manufacturers to reduce the amount so gradually consumers would barely notice the lower sodium levels, but the final limits have not yet been determined.

"Lowering our salt intake is important to control blood pressure," Carson says in a statement. African-Americans, the elderly and those with diabetes are recommended to lower their salt intake because they are most often salt sensitive.

For the some 50 million Americans with high blood pressure, research finds the lower the sodium, the lower the blood pressure.

To lower salt intake: Eat fewer processed foods such as frozen dinners, packaged mixes and canned soups; replace salt with herbs, spices, lemon, lime, garlic and vinegar; replace salty snacks with unsalted pretzels or nuts mixed with raisins, graham crackers, low-fat or fat-free yogurt, plain popcorn and raw vegetables; and buy unsalted or low-salt varieties of foods and condiments.—Internet

Business

Japan's industrial production rises 0.3% in July

TOKYO, 1 Sept— Japan's industrial production rose a seasonally adjusted 0.3 percent in July from a month earlier, the Ministry of Economy, Trade and Industry said in a preliminary report on Tuesday.

According to the government report, the index of output at factories and mines stood at 95.3 against the base of 100 for 2005 and that of industrial shipments fell 0.1 percent to 96.5. Meanwhile industrial inventories slipped 0.5 percent to 96.7, the report said. Economists commented that the yen's rise to 15-year highs against the US dollar has yet to adversely affect factories' output, although companies are expected to have to cut their output in the coming

months due to slowing demands from emerging markets and the US. For the full year to July, Japan's factory output rose 14.8 percent and through June 2010, industrial production increased a revised 17.3 percent, the government reported.—Xinhua

Brazil's ICI falls 0.6% in August

RIO DE JANEIRO, 1 Sept— Brazil's Industry Confidence Index (ICI) fell to 113.6 points in August this year, down 0.6 percent from the previous month, a local research institute said on Tuesday. The figure is the lowest registered since last November, said the Getulio Vargas Foundation (FGV), a Brazilian higher education institution involved in academic research on various subjects including macro- and micro-economics.

The ICI consists of two indicators — the Present Situation Index (ISA), which measures industrialists' opinion on the country's current economic scenario, and the Expectations Index (IE), which measures the prospects for the economic situation in the next months. In August, the ISA stood at 115.1 points, down 1.6 points from July, and the lowest level since February, according to the FGV. The IE, however, registered a

slight increase, from 110.4 points in July to 110.7 points in August.

The FGV said that 43.7 percent of industrialists surveyed expect Brazil's production to advance in the next three months, while 12.1 percent expect a production fall. The FGV also said that the utilization of the Brazilian industry's installed capacity was down from 85.1 percent in July to 84.9 percent in August. The ICI study was carried out among 1,173 companies, from 3 to 26 Aug.—Xinhua

700 workers abandoned in Dubai

DUBAI, 1 Sept — Hundreds of workers in Dubai, United Arab Emirates, have been abandoned by their employer and left to live in squalor and filth, a source said.

As many as 700 employees of Saqr Engineering and Contracting, some of whom say they have not been paid for eight months, have been abandoned in two labour camps in an industrial area of Dubai with backed up toilets and without fresh water or electrical power, the newspaper said.

The chairman of the company has "fled the United Arab Emirate, leaving me and these workers in trouble," said a silent partner, who requested anonymity.

Some volunteer groups have pitched in to bring water and food rations to the workers, some of whom have become ill during their ordeal, but workers do not seek medical help as their health benefits have run out.

"We are trying to solve the problem but he (the chairman) is the only one with signing authority. Ideally, we would have liquidated the company, sold the assets and sent the workers back," the silent partner said.—Internet

Students help end satellite mission

Boulder, 1 Sept— Colorado students took part in an unusual decommissioning of a satellite, bringing the craft into Earth re-entry to burn up in the atmosphere, scientists say.

University of Colorado at Boulder undergraduates, who have been helping to control five NASA satellites from campus, guided the Ice, Cloud and Land Elevation Satellite, or ICESat, out of orbit into Earth's atmosphere Monday, a university

release said.

After seven years of gathering valuable data on the polar regions and helping scientists develop a better understanding of ice sheets and sea ice dynamics, the science package on the satellite failed, leading to the decommissioning.

The control team at the university's Laboratory for Atmospheric and Space Physics — made up mostly of undergraduates working alongside LASP professionals —

uploaded commands for the satellite to burn its remaining fuel and switched off the transmitter.

"CU - Boulder undergraduates have controlled ICESat for the past seven years from our Mission Operations Centre here," LASP Director Bill Posselt said. "Although we are sad to see such a successful science mission come to an end, we are proud of our students' role in bringing the spacecraft safely out of orbit."

Canadian teens have more freedom

MONTREAL, 1 Sept— Canadian teenagers have more freedom than French or Italian peers and their parents are the most tolerant, researchers in Canada, France and Italy say.

A team of researchers at the University of Montreal, the Universite de Rennes in France and the Universita Cattolica del Sacro Cuore in Italy, examined how parents created emotional bonds and exert behavioural control with their adolescents. The countries were chosen because they share Latin languages, Roman Catholic history and advanced industrialization.

Teens answered questionnaires on their parents' behaviour concerning emotional bonding, communication, frequency of conflict, rules, discipline and tolerance of friend-related activities.

"Italian parents are seen as more demanding in rules and authorizations. They take more punitive actions when rules are broken and are less tolerant of peer socialization. They uphold family regulations and require their adolescents to ask for authorizations until a much later age."

The study, published in the Journal of Adolescence, finds Canadian mothers and fathers were seen as less punitive, less coercive and more tolerant than French and Italian mothers.— Internet

A stallion is left to choose a mare in the boxes of the Swiss National Stud in Avenches on 31 August, 2010. The Avenches Swiss National Stud Farm's goal are to improve horse breeding and raising conditions as well as of the horse's use in the rural environment, especially of the Franches-Montagnes breed, the only Swiss horse and the formation of the breeders. The decision of the Swiss Government to cut funding for the breeding centre was harshly criticised in cantons in western Switzerland. Supporters of the National Stud have submitted a petition to parliament signed by 62,000 people.

Three tropical storms to hit SE China

Soldiers help fisherfolks to stabilize fishing boats in a harbour of Changle City, southeast China's Fujian Province, on 31 Aug, 2010. XINHUA

BEIJING, 1 Sept— China's National Meteorological Bureau has sounded its tropical storm alarm. It is warning that the tropical low pressure system Namtheum,

together with tropical storms Lionrock and Kompasu could hit south-east coastal areas of China.

The stronger of the two, Storm Kompasu, is moving northwest at a

speed of up to 20 kilometres per hour. The two tropical storms and the low pressure system will jointly bring rainstorms and powerful winds to the coastal regions of Zhejiang on Tuesday and Wednesday.

Meanwhile, torrential rains are forecast to hit Fujian Province, with rainfall of more than 300 millimetres in some coastal regions over the next three days. All ships and fishing boats off the coasts of Fujian and Zhejiang have been advised to take shelter from storms.

Xinhua

Typhoon Kompasu to hit S Korea

SEOUL, 1 Sept— A typhoon is expected to directly hit South Korea, with heavy rains and strong winds forecast for Wednesday night and Thursday, as it moves northward toward Jeju Island on Wednesday.

As of 09:00 am local time Wednesday, Typhoon Kompasu, meaning "compass" in Japanese, is moving northwest from around 337 kilometres southwest of Jeju Island at a speed of 29 kilometres per hour, according to the national meteorological agency.

The Korea Meteorological

Administration (KMA) forecast that the typhoon, with a central pressure of 965 hectopascals, will be about 280 kilometers southwest of Jeju Island by 06:00 pm. local time Wednesday.

The typhoon will affect the Korean peninsula in earnest after arriving in the West Sea on Wednesday afternoon.

The season's seventh typhoon is expected to dump more than 50 millimetres of rain per hour across the nation by Thursday.

Xinhua

Shanghai cancels Wednesday school classes as typhoon Kompasu approaches east China

SHANGHAI, 1 Sept— Shanghai authorities Tuesday canceled all kindergarten, primary and high school classes for Wednesday because of typhoon Kompasu.

The decision aims to ensure students' safety as the typhoon is likely to bring heavy rains and strong gales from Tuesday evening until Wednesday.

Wednesday is the beginning of the autumn semester for schools across China. In Shanghai, the new semester will now start on Thursday.

Kompasu is packing wind gusts of 144 kilometers per hour near its center. It is moving northwest at a speed of 30 kilometers per hour and will enter the East China Sea Tuesday night.

Meteorological authorities issued a typhoon warning Tuesday afternoon, warning relevant authorities to prepare for strong winds and downpours at the Shanghai World Expo site.

Xinhua

Oil tanker, cargo ship collide leaving six missing off east China coast

HANGZHOU, 1 Sept—Six people are missing after a French oil tanker collided with a Chinese cargo vessel off the coast of east China's Zhejiang Province Tuesday, local authorities said.

All seven people aboard the Chinese vessel fell into water after the collision that took place at about 11:10 am near Ningbo City, and one was rescued, a spokesman with the Zhejiang Maritime Safety Admini-

stration said.

No oil spill was reported as the French vessel "FLANDRE" was not carrying oil when the accident happened. The vessel was travelling to the United Arab Emirates from a harbour in Ningbo, the spokesman said. Rescuers are searching the area for the missing person, he said.

Local maritime affairs authorities are investigating the cause of the accident, he added.—Xinhua

Russian cargo spacecraft undocks from ISS

Moscow, 1 Sept—The Russian space freighter Progress M-06M, that docked with the International Space Station (ISS) in July in a second attempt, has been undocked from the space station on Tuesday.

The spacecraft will start an automatic flight after separation, in which some technical experiment will be conducted, said the Mission Control Centre outside Moscow.—Xinhua

Three Australians killed as plane crashes on Papua New Guinea island

CANBERRA, 1 Sept—Australian Foreign Minister Stephen Smith on Wednesday confirmed three Australians were among those killed in a plane crash on a remote island in Papua New Guinea.

Smith said a Cessna Citation jet was carrying three Australians and two New Zealand citizens when it crashed on Misima Island on Tuesday.

According to ABC Network, the Trans Air flight overshot the

runway in wet and windy weather, crashed into trees and burst into flames killing four of those on board.

An Australian permanent resident who is believed to be one of the pilots, survived the accident with only heavy bruising.

Among the dead is a 61-year-old marine pilot from Sydney who was working for the Brisbane-based company Australian Reef Pilots (ARP), which provides help for vessels

navigating in difficult shipping lanes.

ARP managing director, Craig Southerwood, said the marine pilot, a passenger aboard the small Trans Air jet, had been on his way to board a ship to guide it down the east coast of Australia.

"ARP staff on the ground waiting to meet the marine pilot witnessed the accident and are obviously quite shocked," Southerwood told *The Australian* newspaper.—Xinhua

Local farmers weigh Lycium chinensis (the fruit of Chinese Wolfberry) in Dulan County of northwest China's Qinghai Province, on 31 Aug, 2010. There are 80 square kilometres planting area of Lycium chinensis in Dulan county with about 46.7 square kilometers among them entering harvest season this year. Lycium chinensis industries dominate local economy in Dulan.—XINHUA

Indonesia's Merpati to purchase 15 planes from China

JAKARTA, 1 Sept—Indonesian State-Owned Enterprises Minister Mustafa Abubakar has said he expects the purchase of 15 new aircraft from China for state-run Merpati Nusantara airline is to be settled by the end of the year, a media reported here Tuesday.

"Hopefully, we can

bring in all of the planes by end of this year," Mustafa was quoted by the *Jakarta Post* as saying.

He said that the government had so far imported two of the 15 planes.

Airliners in Indonesia has attempted to expand business, which has high potential. The

government has put a priority to develop aviation industry, as it will be the most effective transport mean in the archipelago country with over 17,500 islands and homed by over 238 million people.

So far, less than 4 percent of the population travel by plane, according to Transport Ministry.—Xinhua

Those who did not submit the applications within the designated period will not be allowed to sit for the examination, and the combinations described on the examination applications and the cards will not be allowed to change. The students are to check the forms of combinations and fill up it correctly.

The applications and payment stamps are available at MBE (Zwegabin Hostel) in the compound of Hline University in Hline Township.—MNA

Gwaygyo Dam laden...

(from page 16)

Gwaygyo Dam in Yesagyo Township built by the government. We first had an interview with Chairman U Zaw Soe of Yesagyo Township Peace and Development Council for the Gwaygyo Dam. He explained that the dam was built near Gwaygyo Village of Sitha Village tract in Yesagyo Township by damming Hsinmawin Creek; that the dam get 6.0 square miles of catchment area and annual rainfalls of 19 inches with 1800 acre feet of water inflow area; that it is of 57 feet high and 2100 feet long earthen type embankment and can

store 1840 acre feet of water at its maximum level; that the dam has 390 acres feet of still water storage capacity; 124 acres of water surface area at its maximum level, two-foot-wide reinforced concrete conduit in diameter with 15 cu/sec discharge, 40-foot-wide spillway with 1823 cu/sec discharge, 1500-foot canal, and 400 acres of irrigable area; and that starting date of construction of the dam is 1 September 2006 and was completed on 19 August 2007.

He continued, "In the past, local farmers in arid regions were not able to grow crops due to dry

and hot weather and also lack of irrigation water although they had arable lands. Thanks to completion of Gwaygyo Dam gifted by the government, croplands turn into farmlands and farmers are now enjoying cultivation of summer and monsoon paddy as well as cold crops."

Later on, we proceeded to Gwaygyo Dam to interview Staff Officer U Khin Maung Htwe. He explained, "Local farmers in this region could merely grow monsoon crops in the past. And production rate was at low level because the region solely depended on rains. But with the emergence of Gwaygyo Dam, 206 acres of monsoon

paddy and 85 acres of summer paddy in 2008-2009 and 200 acres of monsoon and 25 acres of summer paddy including 25 acres of cold season crops in 2009-2010 were cultivated."

Farmer U Chit Khaing wearing smiles said, "Our region is dry and hot. We could grow green gram, pigeon pea, chilli and maize only when rains came to the region. Twenty years ago, monsoon paddy was grew a little in the west of the village but results were in vain. Due to Gwaygyo Dam, we now can grow summer paddy, monsoon paddy and cold season crops as our wishes. The dam is beneficial to

drinking water as well as greening of the region."

In a bid to take strenuous approach to development of the nation, the government is building infrastructures wherever necessary. As a result, croplands of

Gwaygyo Village turn into farmlands completely. So, socio-economic statuses of the locals residing in Gwaygyo Village are getting better.

Russia has 85 second-generation billionaires

MOSCOW, 1 Sept—The number of billionaires' descendants in Russia rose 1.5 times in 2010 compared to 2009, with their accumulated capital increasing two-fold, Moscow's *RBC Daily* reported on Monday.

In Russia there are 85 offspring of the billionaires against 54 in 2009. These children's fortune amounted to 250 billion US dollars while a year ago it was "only" 107 billion dollars, the report said. The richest father's fortune successor in Russia with 10.65 billion dollars this year is Yusuf Alekperov, the only son of the largest shareholder of the Lukoil company.

He is followed on heels by Alexei Kuzmichev, only son of the Alfa Group shareholder, with 7.1 billion dollars to inherit.

The third place is occupied by Petr Deripaska and his sister Marina, the children of Russia owner Oleg Deripaska, with 6.9 billion dollars each. Last year, those siblings took only 14th position in the rating of those born with a silver spoon in mouth.

The fifth place hold three children of Vladimir Lisin, owner of NLMK steel works, with 18.8 billion dollars to share brotherly.

Compared to 2009, the list of this year's "golden kids" added a new name Gennady Timchenko, the son of the co-owner of Gunvor oil trade company, Russia bank and Novatek chemical company. All in all, the fortune of ten richest "heirs" of their parents' business empires have been worth 250 billion dollars.—Xinhua

Eight killed, 13 seriously injured in Slovakia shooting

Police stand by an unidentified body on 30 August, 2010, in the Bratislava suburb of Devinska Nova Ves where a shooting spree occurred.—XINHUA

BRATISLAVA, 1 Sept—Eight people, including the gunman, died and 13 others were seriously injured in a shooting incident in the Slovak capital Bratislava on Monday, local police said.

The deadly shooting spree is the worst of its kind in more than a decade, the police added.

According to a report of the state-run TASR news agency, the incident occurred at around 10 am

(0800 GMT) on Monday in Devinska Nova Ves District on the outskirts of Bratislava. An unidentified middle-aged man attacked a family of Roma minority, killing six of its members. He then started shooting on people in the street and neighbouring houses with an automatic gun and other weapons, fatally injuring a 50-year-old woman on a balcony.

"Policemen arrived

two minutes after they got an emergency call and saw the presumed murderer coming out of the house," police chief Jaroslav Spisiak said at a press conference, adding that the gunman fired at the police and also indiscriminately at the passers-by.

When the police got the man cornered, he committed suicide, said Spisiak.

Singapore ranked as world's 4th largest foreign exchange centre

SINGAPORE, 1 Sept—A recent survey ranks Singapore as the fourth largest foreign exchange centre in the world and the second largest foreign exchange centre in Asia, after Tokyo, the Monetary Authority of Singapore said on Wednesday.

According to the latest survey by the Bank for International Settlements (BIS), average daily foreign exchange turnover in Singapore was 266 billion US dollars during April 2010 compared to 242 billion US dollars in April 2007.

Average daily turnover in over-the-counter (OTC) interest rate derivatives was 78 billion US dollars in April 2010, 37 percent higher than the 57 billion US dollars recorded in April 2007. The survey ranks Singapore as sixth largest centre globally, up from seventh position in 2007 and underscores Singapore's development as a key derivatives trading centre in Asia.

Twenty believed killed in shootout in eastern Mexico

MEXICO CITY, 1 Sept—Twenty people were believed killed in a shootout between the army and criminals in Panuco, a city in the eastern Mexican State of Veracruz, while 11 soldiers reportedly suffered serious gunshot wounds, local media reported on Monday. Angelica Hernandez, an official with the State Attorney's Office (PGE), was quoted as saying that the gunbattle broke out at 9 pm local time on Sunday and lasted until 11 am Monday, adding that the exact number of casualties could not be confirmed yet.

Citing state prosecutor Salvador Mikel Rivera, local media reported that five civilians were killed in the clash, including two middle-aged women, a garage mechanic and a teenager. The incident ended with six arrests, some local broadcasters reported, adding that the exchange of fire also destroyed some municipal electricity transformers and caused blackouts in some areas.

The prolonged shootout took place when the army surrounded a house in the Alto de Vinas neighbourhood and tried to arrest the criminal suspects inside, local media said.

Mongolia reports outbreak of bird disease "Newcastle"

ULAN BATOR, 1 Sept—Mongolian State Emergency Commission on Monday announced an outbreak of contagious bird disease "Newcastle," the first time in the country's history.

The outbreak occurred at a commercial chicken farm in the Ulan Bator region. Chicken death was reported at the farm 10 days ago and experts confirmed the outbreak, tentatively concluding the disease was transmitted from chicken feed.

So far about 50 chicken on the farm have died. A total of 1,600 eggs will be confiscated and destroyed, 4,847 chicken be slaughtered and the farm is to be disinfected, according to a decree of the State Emergency Commission.

There are a total of about 270,000 chicken in chicken farms of the Ulan Bator region. Currently, quarantine has been imposed in all chicken farms and mobile patrols have been set up around the area.—Internet

Last 1930 World Cup player dies

BEIJING, 1 Sept—The last surviving footballer from the 1930 World Cup final, Francisco Varallo, has died at the age of 100.

Varallo played for the Argentina side that lost 4-2 to Uruguay in the Montevideo final. In 1994, he was awarded the FIFA Order of Merit. Varallo won the Argentine title with home-town club Gimnasia-La Plata in 1929. Then he joined Boca Juniors, and helped the team win three professional league titles with 194

goals. He retired due to injury at the age of 30 in 1940.

Argentina Soccer Association handed him a national team jersey with his name on it and the number 100 to celebrate his 100th birthday.

Rocket launcher explosion kills four Cambodians

PHNOM PENH, 1 Sept—At least four Cambodians were killed and three others injured in a rocket launcher explosion in Cambodia's northwestern province of Pursat, police said on Monday.

Ros Bunnan, deputy police commissioner of Pursat Province, said the incident happened at 4 pm on Sunday in Roveang Village, Phnom Kravanh District, some 230 kilometres northwest of Phnom Penh. He said a man in the village was using the recently found head of a leftover B-40 rocket launcher pretending it as a microphone to sing, then it fell down to the ground and exploded.

He said four men standing and sitting nearby were killed and other three women were injured.

Many explosive remnants of war are left in the country, especially the northwestern parts of Cambodia after several decades of civil war.

In a report released on Monday by Cambodian Mine Action and Victim Assistance Authority it said from January to July 2010, there were 184 mine and explosive remnants of war (ERW) casualties. The report also showed that since 1979, there has been 63,704 casualties related to mine and ERW.

Indonesia to send more aids to Pakistan

JAKARTA, 1 Sept—Indonesia plans to send an additional of 2 million US dollars funds along with medical men and armed forces personnel to help flood victims in Pakistan, a minister said here on Tuesday.

Coordinating Minister for People's Welfare Agung Laksono said that the dispatch of humanitarian assistance was part of Indonesian solidarity to the victims in the country.

"We will send a cash of 2 million US dollars along with National Defence Forces (TNI) personnel and medical personnel," Laksono said.

He said a 45-member group consisting of medical personnel, TNI personnel, and National Board of Disaster Mitigation personnel would soon be sent to Pakistan.

Earlier this month, Indonesia sent food and medicine to Pakistan valued at 1.3 million US dollars, Laksono was quoted by Antara news wire as saying.

John Lennon's toilet sells for \$14,740 at auction

LONDON, 1 Sept—A toilet that belonged to late Beatle John Lennon fetched 9,500 pounds (\$14,740) at auction on Saturday, around 10 times its estimate, the sale organizers said.

Lennon, who was murdered in New York in 1980, had the porcelain lavatory removed from Tittenhurst Park in Berkshire, southern England, where he lived from 1969 to 1971, and replaced with a new one.

The builders who took away the white and blue lavatory were told to "put some flowers in it or something," according to the auction catalog.

Builder John Hancock stored it in his shed for 40 years until he died recently and the lavatory was sent for sale, British media reports said.

The toilet was among Beatles memorabilia sold at auction as part of the Beatle week festival in Liverpool, the group's native city in northwest England. The pre-auction estimate was 750 to 1,000 pounds.

Anne-Marie Trace, who works at the Beatles Shop in Liverpool which organized the sale, said the high price paid had taken the organizers by surprise.

"I think it's the most unusual item we've ever had in our auction," she said.

The buyer was not identified but Trace said it was likely it was "going overseas."—Internet

Gunmen seize trader in Marawi, southern Philippines

COTABATO, 1 Sept—Unidentified gunmen abducted on Tuesday a local trader in the southern Philippine city of Marawi, local police said.

The victim, Abdulkarim Magarang, was forcibly taken by suspects at gunpoint, according to Chief Superintendent Bienvenido Latag, regional police commander.

"The suspects stopped his vehicle and took him. There's a pursuit operation," Latag said.

The police is still investigating who's behind the kidnapping.

Cinema attendance is down in US

LONDON, 1 Sept—Box office receipts in the US rose by \$100m (£64.9m) this summer, despite the lowest attendance in five years, figures have shown.

Movie website Hollywood.com said the actual number of tickets sold was expected to be 552m - the lowest since 2005, when the figure was 563.2m.

The drop in attendance is thought to be due to a steep rise in ticket prices, mainly for 3D screenings.

*Tickets for 3D movies, such as **Toy Story 3**, cost more at cinemas.—INTERNET*

A similar pattern has been recorded in UK cinemas, too.

The cost of an average US cinema ticket rose by 5% over the last 12 months, according to The National Association of Theatre Owners.

Cinema-goers now pay an average of \$7.88 (£5.10) per ticket, a rise of 38 cents (25 pence) from 2009.

3D movies such as Toy Story 3, Clash Of The Titans and Shrek Forever After are largely responsible, with cinemas charging several dollars more than for a regular 2D film.

Would-be burglar gets stuck in grease vent

A would-be burglar who tried to break into a South Carolina restaurant found himself in a tight and a greasy situation. *The Post and Courier of Charleston* reported a man tried to break into a North Charleston restaurant by climbing down a grease vent. He got stuck and had to wait almost seven hours until he could be freed.

North Charleston Police said the man was discovered shortly before 5 am Monday when an employee heard someone calling for help. Police arrived to find a foot dangling in a vent above a stove.

Kevin Michael Harley of North Charleston was charged with second-degree burglary. It could not immediately be determined if the 23-year-old Harley had an attorney.

Mileage jump has couple wondering where car's been

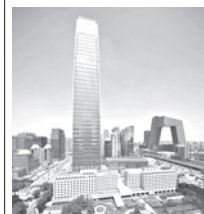

A couple who left their car parked in a long-term lot near Kennedy Airport during a trip to California were trying to figure out what their car has been doing without them. Mimi and Ulrich Gunthart said their car odometer reading jumped by 724 miles while they were out of town. Ulrich Gunthart said he was "flabbergasted" when he saw the number. Another surprise: when they returned to the car and started it up, a music CD came on at full volume.

Pa Officer shoots coyote headed for colleague

A western Pennsylvania police officer said he was saved from a coyote attack when a fellow officer shot the animal as it was about to attack. Aliquippa Sgt. Douglas Edgell said he stopped a speeder just before 10 pm Friday and was standing outside his cruiser with the motorist when the animal started running toward him on Route 51.

Two other officers pulled up in separate

cars when one of them, Officer John Lane, aimed out his window and shot the animal before it could reach Edgell.

The undated file photo shows the skyscraper China World Trade Centre Tower in Beijing, capital of China. As the tallest skyscraper in Beijing, the 330-metre-tall China World Trade Centre Tower was completed and put into use on Monday. The skyscraper located in the center of Central Business District of Beijing is a comprehensive business and shopping centre.

Four actors bite into "Shark Night 3-D"

LOS ANGELES, 1 Sept—First it was the piranhas. Now it's the sharks' turn to make the water unsafe.

David Ellis, who directed "Snakes on a Plane" and two installments of the "Final Destination" movies, and producer Mike Fleiss are assembling their cast for the horror pic "Shark Night 3-D."

Sinqua Walls ("Friday Night Lights"), Chris Carmack ("The O.C."), Alyssa Diaz and

Joel David Moore ("Avatar") are coming aboard for some fun fin action.

The story revolves around seven men and women who spend a weekend at a lake house in Louisiana's Gulf area. When their vacation quickly becomes a nightmare of hellish shark attacks, unheard of in freshwater lakes, they soon discover that the sharks are part of a sick, greedy plan on the part of several locals.

Walls is playing a Tulane University linebacker with plans on marrying his college sweetheart (Diaz). Carmack is the ex-boyfriend of the female lead, still uncast, who was scarred in a boating accident. Moore is providing the comic relief as a socially awkward guy who fancies himself a young Brad Pitt.

Internet

Performers take part in a rehearsal of a drama in Beijing, on 29 Aug, 2010. A drama telling the life story of Peking Man who lived approximately 500,000 years ago will be on show from on 10 Sep, 2010, which will be the first time for performers to act the Peking Man in a drama.

UT hits 'Gone With the Wind' dress donation target

AUSTIN, 1 Sept—Legions of "Gone With the Wind" fans have together donated tens of thousands of dollars to prove they, frankly, do give a you-know-what.

The University of Texas Harry Ransom Centre says it has met its \$30,000 fundraising goal to pay for restoring five of Scarlett O'Hara's gowns from the multiple Oscar-winning Civil War drama.

Ransom Centre

officials announced on Tuesday that contributions came from more than 600 people in 44 states and 13 countries.

The gowns worn by actress Vivien Leigh in the 1939 film include a green curtain dress.

The Ransom Centre is planning an exhibit to mark the movie's 75th anniversary in 2014. Once restored, the dresses may be loaned to other mu-seums.

Holden's Rangers face Dunfermline in League Cup

GLASGOW, 1 Sept — Rangers will start their attempt to retain the Scottish League Cup with a third round tie against First Division club Dunfermline at Ibrox.

Walter Smith's Scottish champions defeated St Mirren 1-0 in the final at Hampden Park in March and will expect to progress to the latter stages again.

Celtic have been drawn at home against Inverness Caledonian Thistle, who they beat 1-0 on the opening day of the Scottish Premier League season.

prise swoop for Barcelona midfielder Alexander Hleb on the final day of the transfer window.

Reds boss Roy Hodgson had been keen to land left-back Konchesky from his former club since taking over at Anfield in the close-season and he finally got his man on a four-year contract once Finnish striker Lauri Dalla Valle and Swedish winger Alex Kacaniklic agreed their moves in the opposite direction.

Internet

Potential picks not making Pavin's job easier

NORTON, 1 Sept — Too bad Ryder Cup eligibility is based on passports instead of property taxes. There still might be hope for Paul Casey, who has been living in Arizona for most of his adult life.

Ditto for Justin Rose, who makes his home in Florida.

Alas, those English-born stars were left off the European team when Colin Montgomerie had five worthy candidates as captain's picks and could only take three. Montgomerie famously referred to his dilemma as an "embarrassment of riches."

For US captain Corey

Pavin, there's more emphasis on "embarrassment" than "riches" at the moment.

Walcott ready to make amends for World Cup snub

LONDON, 1 Sept — Theo Walcott refuses to blame anyone for his failure to make England's World Cup squad and believes he is ready to reignite his international career in Friday's Euro 2012 qualifier against Bulgaria.

Arsenal winger

Walcott was surprisingly omitted from Fabio Capello's World Cup squad amid rumours his lack of progress and inability to follow orders had left the Italian frustrated.

However, Capello has been quick to turn to the 21-year-old following England's miserable performances in South Africa and he is expected to start against Bulgaria at Wembley in the opening Euro qualifier.—Internet

Lille sign Rozenhal on loan

LILLE, 1 Sept — French Ligue 1 club Lille signed experienced Czech international defender David Rozenhal on a one season loan from Bundesliga side Hamburg on Tuesday.

The 30-year-old - capped 63 times and a member of the Czech Republic side that won the European Under-21 championship in 2002 - replaces Nicolas Plestan, who moved to Hamburg's rivals Schalke 04 on Tuesday.

Lille said in a statement that they had signed Rozenhal - who has previous experience in France with Paris Saint Germain

from 2005-07 - by his physical qualities and especially his vast experience across the European leagues.—Internet

Doubting Pacquiao feels Margarito deserves second chance

LOS ANGELES, 1 Sept — While happy to give disgraced boxer Antonio Margarito another chance in the ring, Manny Pacquiao refuses to believe the Mexican was ignorant of his illegal hand wraps before a fight in January 2009. Filipino Pacquiao has requested that two of his own representatives monitor Margarito's hands being wrapped before their 13 November super welterweight title fight at the Cowboys Stadium in

Arlington, Texas.

It will be the Mexican's first appearance in the ring since he and trainer Javier Capetillo were banned for a year after plaster-like bandage wraps were found in the fighter's gloves before a WBC welterweight title bout with Shane Mosley.—Internet

Rummenigge demands Robben compensation

BERLIN, 1 Sept — Bayern Munich president Karl Heinz Rummenigge has demanded compensation from the Dutch football federation for the lengthy injury lay-off of winger Arjen Robben.

Robben could be out for the rest of the year as he struggles to recover from a thigh injury he picked up before the World Cup finals.

For Rummenigge, the Dutch federation are liable to pay compensation to Bayern for the temporary loss of the 26-year-old's services. "I think that the Dutch federation should

assure compensation at the level of the salary during the period of unavailability," Rummenigge said.

Robinho ends City purgatory as transfer deadline looms

Brazilian star Robinho signed for Serie A giants AC Milan on Tuesday.—INTERNET

PARIS, 1 Sept — Brazilian star Robinho's nightmare two year stay at Manchester City came to an agreeable conclusion for both parties on Tuesday as he signed for Serie A giants AC Milan on a frenetic final day of trading as the transfer deadline comes into force on Wednesday.

Robinho may have gone for a relative song -

18million euros as opposed to the club record 42million City paid out two years ago - but his recruitment only added to the sense of urgency at the Milan club as they seek to end bitter city rivals Inter's dominance.

Robinho - who signed a four year contract - joins Swedish super striker Zlatan Ibrahimovic as a recent signing by Milan where they will join Brazilian duo Ronaldinho and Pato as they bid to end Inter's resurgence which climaxed with the domestic double - taking their fifth successive league crown - and the Champions League title last season.

Jankovic survives while Li leaves early at US Open

NEW YORK, 1 Sept — Former world number one Jelena Jankovic struggled into the US Open's second round on Tuesday while Chinese eighth seed Li Na became the first major upset victim at the

year's last Grand Slam event.

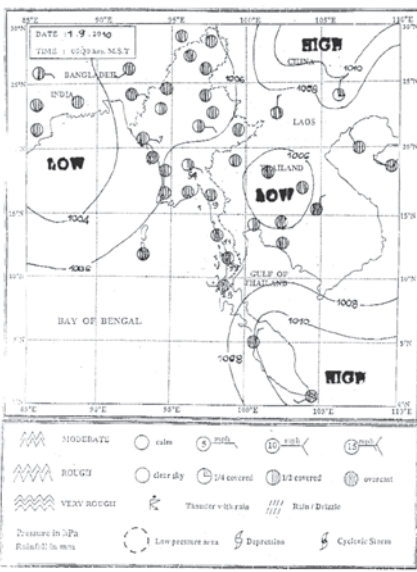

Fourth-seeded Serbian Jankovic, seeking her first Grand Slam title, beat 96th-rated Romanian teen Simona Halep 6-4, 4-6, 7-5. The 2008 US Open runner-up nearly suffered her first opening-match Slam exit since the 2005 French Open.

"For me, first match is always the toughest. She played really well," said Jankovic. "I had to work for every point. I wasn't playing my best tennis. I was able to find a way to get through."—Internet

Weather Map of Myanmar and Neighbouring Areas

WEATHER

Wednesday, 1st September, 2010

Summary of observations recorded at 09:30 hr. M.S.T.
 During the past 24 hours, weather has been partly cloudy in lower Sagaing Region, rain or thundershowers have been isolated in Kachin, Chin, and Kayah States, upper Sagaing and Magway Regions, scattered in Shan and Rakhine States and Mandalay Region, fairly widespread in Bago and Ayeyawady Regions and widespread in the remaining States and Regions. The noteworthy amounts of rainfall recorded were Nay Pyi Taw (Lewe) (3.03) inches, Nay Pyi Taw (Airport) (2.05) inches, Nay Pyi Taw (Pyinmana) (1.30) inches, Shwegyin (2.79) inches, Taungoo (2.13) inches, Kawkaik (1.65) inches, Kyaikkhami (1.57) inches, Myeik (1.54) inches, Ye (1.37) inches and Taungdwingyi (1.18) inches.

Nay Pyi Taw Weather

Maximum temperature on 31-8-2010 was 88°F. Minimum temperature on 1-9-2010 was 77°F. Relative humidity at (09:30) hours MST on 1-9-2010 was (92%). Rainfall on 1-9-2010 was (0.36) inch.

Yangon (Kaba-Aye) Weather

Maximum temperature on 31-8-2010 was 85°F. Minimum temperature on 1-9-2010 was 76°F. Relative humidity at (09:30) hours MST on 1-9-2010 was (82%). Total Sunshine hours on 31-8-2010 was (0.2) hours.

Rainfall on 1-9-2010 was (0.20) inch at Mingaladon, (0.04) inch at Kaba-Aye and (0.08) inch at Central Yangon. Total rainfall since 1-1-2010 was (59.57) inches at Mingaladon, (65.74) inches at Kaba-Aye and (75.79) inches at Central Yangon. Maximum windspeed at Yangon (Kaba-Aye) was (10) mph from Southwest at (17:30) hours MST on 31-8-2010.

State of the sea: Seas will be slight to moderate in Myanmar waters.

Outlook for subsequent two days: Likelihood of increase of rain in the Lower Myanmar areas.

Forecast for Nay Pyi Taw and neighbouring area for 2-9-2010: Isolated rain or thundershowers. Degree of certainty is (80%).

Forecast for Yangon and neighbouring area for 2-9-2010: Isolated rain or thundershowers. Degree of certainty is (80%).

Forecast for Mandalay and neighbouring area for 2-9-2010: Likelihood of isolated rain or thundershowers. Degree of certainty is (60%).

Gilbert wins third stage to take leadership of Spain cycling

MADRID, 1 Sept—Belgian rider Philippe Gilbert won the third stage of the Tour of Spain cycle race and also took the overall leader jersey on Monday. The Belgian, who rides for the Omega Pharma Lotto cycling team was the strongest rider on a day when three main factors influences the final result.

The first main factor was a temperature of almost 40 degrees centigrade that sapped the riders' strength on the 157.3 kilometre stage between Marbella and Malaga. The second was the first category climb, the Puerto de Leon, a mountain of 905 metres in height, which the riders had to scale twice in the second half of the race.
