IMPERIAL TABLE I.

Area, Houses and Population.

NOTES 1. The following areas were excluded from the census operations :—

- (i) the unadministered and loosely administered territories associated with the Upper Chindwin district, including the Naga Hills and Hukawng Valley ;
- (ii) the Putao and Sumpra Bum subdivisions of Myitkyina district with the exception of the eight Hkamti Long Shan States and Fort Hertz ;
- (iii) the Triangle ;
- (iv) the portion of the Arakan Hill Tracts which was brought under administration in 1930; and
- (v) the uncontrolled portion of the Wa States.

2. All the figures given in this table for houses and population were obtained by actual enumeration except in the case of East Mangliin in the Northern Shan States for which the figures were estimated. East Manglun was estimated to have 3,382 houses and a population of 19,649 (males 9,925, females 9,724).

3. The areas of all districts, townships and States have been worked out afresh, since many of the figures given in previous Census Reports were believed to be incorrect. The method of calculation is explained in paragraph 18 of Chapter I of the Report. In some cases the differences between the figures in this table and those given in the corresponding table for 1921 are due to erosion or accretion by rivers ; in other cases they are due to inter-district transfers since 1921 : a list of these districts is given in Note 2 to Imperial Table II on page 5.

4. In columns 3 and 6 “Towns” means places treated as towns or cities for the purpose of Imperial Tables IV and V, (see Note 1 to Imperial Table IV on page 13) and “ Urban ” in columns 9, 12 and 15 means the population enumerated in those places ; “ Rural ” in columns 10, 13 and 16 means the population enumerated in other places. Every cantonment has been treated as a separate Town.

5. In the Chin Hills district, the Arakan Hill Tracts, the Eastern States and the hill tracts of all other districts except Myitkyina and Katha the figures in column 4 represent villages ; in the hill-tracts of the Myitkyina and Katha districts the figures represent *Duwas*’ charges ; in the remainder of Burma they represent administrative units called village-tracts. Village-tracts or villages which lie wholly within towns have been excluded from column 4. The number of villages in the estimated area of East Manglun in the Northern Shan States has not been included in column 4 but figures for the area, number of houses and population have been included in the other columns.

6. In columns 5, 6 and 7 “Occupied Houses” means census houses. Ordinarily the census house was the separate residence of a family but any building which contained a single individual on the census night was reckoned a “house.” (See paragraph 17 of Chapter I of the Report Volume.)

7. Similar figures for smaller areas such as townships and States are given in Provincial Table I towards the end of this volume.

IMPERIAL TABLE II.

Variation in Population during last fifty years.

Notes 1. The figures in this table cover the same area as those in Imperial Table I (see Note 1 on page 1). All areas enumerated in 1921 were enumerated in 1931 and the only area enumerated for the first time in 1931 was a part of the Chin Hills District having a population of 18,327 (males 9,212, females 9,115) which was brought under administration in 1930.

2. The figures for previous censuses represent the population at those censuses of the districts as they existed on the 24th February 1931. Putao District was included in the Myitkyina District in 1925 and the Pakokku Hill Tracts in the Chin Hills District in 1929 ; since 1921 there have also been transfers of area involving changes of population between the following districts :—

From	To	Population in 1921.		
		Persons.	Males.	Females.
Insein	Rangoon	3,543	2,027	1 516
Toungoo	Pegu	1,086	619	467
Salween	Thaton	1,351	725	626
Myingvan	Magwe	2,674	1,324	1,350
Shwebo	Lower Chindwin ...	11,268	5,225	6,043
Katha	Myitkyina	21,762	11,279	10,483

3. The figures given for any district, division, etc., in any year exclude all areas omitted from the census of that year. Thus the large increases shown in column 12 for Divisional Burma and Thayetmyo District are due to the inclusion in the 1891 figures of certain areas which were omitted from the 1881 enumeration because they were outside British Burma. For further information regarding the areas omitted at previous censuses earlier census reports should be consulted.

4. In the corresponding table for 1921 the figures given for the Northern Shan States for the year 1891 do not appear to be correct. At the 1891 Census Mong Mit State was in the Ruby Mines district and the figure given for the Ruby Mines district in Imperial Table II of that census, namely 26,134, represented only Mogok and Twinngé townships, which were included in Katha district when the Ruby Mines district was abolished in 1920. The figures have been corrected accordingly.

IMPERIAL TABLE III.

Towns and Village-Tracts classified by Population.

Notes 1. The population of the estimated area of East Manglun in the Northern Shan States, amounting to 19,649 (males 9,925, females 9,724) has been omitted from this table because statistics for villages are not available.

2. Persons enumerated in places where they do not ordinarily reside were excluded before the towns and village-tracts were classified. These persons are shown separately in column 22 and include those enumerated in temporary encampments and travellers enumerated on boats and trains and at railway stations. Residents of railway premises have been included in the population of the town or village-tract in which the premises are situated. For the meaning of "town" and "village-tract" a reference should be made to Note 1 to Imperial Table IV on page 13 and to Note 5 to Imperial Table I on page 1.

IMPERIAL TABLE IV.

Towns classified by Population with variation for fifty years.

Notes 1. In this table figures are given for certain urban areas. The selection includes all towns to which the Burma Towns Act applies, all municipalities and notified areas and all cantonments ; a few other urban areas are also included. The towns are classified according to their population in 1931, and are arranged in each class in descending order of magnitude.

2. In column 3 the letters M, N and T are shown against those towns which contain a municipal area, a notified area and an area which comes under the Burma Towns Act, respectively. Each cantonment has been treated as a separate town and is indicated by the letter C in column 3.

3. The figures given for each town at previous censuses represent the population of the area recognised as the town at those censuses, *i.e.*, no adjustments have been made on account of subsequent changes of area. The class totals for previous censuses represent the total number of persons living in towns which belonged to those classes at those censuses, and in calculating these class totals the existing cantonments of Rangoon, Mandalay and Maymyo were treated as separate towns, except in the case of Maymyo for the year 1911. Separate figures for the notified area of Maymyo and the cantonment could not be obtained for the year 1911 and the combined figures have therefore been shown against Maymyo Municipality (Serial No. 17). Other areas which were cantonments and included in towns at previous censuses have not been treated as separate towns for the preparation of these class totals ; in most cases separate figures for the cantonment area and the remainder of the town were not available. Figures for previous censuses have been shown in brackets if the places were not treated as towns at those censuses.

4. Mogok and Loilem were treated as towns in 1921 but have now been omitted. The following 12 places which have been treated as towns were not so treated in 1921 :—

Chauk	Kanbe	Myinmu	Sagu
Thingangyun	Pyuntaza	Daik-u	Mingaladon (Cantonment)
Kamayut	Thamaing	Sinbyugyun	Minbya

These 12 towns had an aggregate population in 1931 of 71,289 and since Mogok and Loilem had an aggregate population in 1921 of 9,411 the net variation in the decade 1921-31 due to differences in the list of towns is 61,878 ; the total variation is 228,510 (column 10) and the variation in the aggregate population of places which were treated as towns at both censuses is therefore 166,632.

5. The boundaries of three towns extend beyond those of the municipal area ; separate figures for these areas are given below :—

Name of Town.	Municipal area.		Remainder of town.	
	Males.	Females.	Males.	Females.
Pegu	11,862	9,764	58	28
Thong wa	4,902	4,074	790	780
Meiktila	4,652	4,178	190	175

The figures given for Taungdwingyi Town are for the municipal area as it existed just before its boundaries were extended under Local Government (Municipal) Department Notification No. 195, dated the 22nd December 1930 ; the population of the area added by this notification was 973 (males 572, females 401).

6. Separate figures for the persons enumerated on vessels within the limits of the ports of Rangoon, Monlmein, Bassein and Akyab are given below :—

Name of Town.	Persons enumerated in Port limits.		Remainder of town.	
	Males.	Females.	Males.	Females.

Bassein	1,889	187	27,259	16,327
Akyab	3,423	12	25,301	9,358

7. Namtu and Panghai which are situated in different Shan States and together make up the town of Namtn-Panghai had populations of 9,637 (males 7,960, females 1,677) and 3,143 (males 1,889, females 1,254) respectively.

IMPERIAL TABLE V.

Towns arranged territorially with Population by Religion.

NOTES 1. In Imperial Table IV figures are given for certain towns (see Notes 1, 2 and 4 to 7 on page 13) and in this table the populations of these towns are classified by religion, the towns being arranged according to the division and district in which they are situated.

2. Figures for cantonments are given separately. The following are the figures for the civil and military populations of cantonments :—

Cantonment.	Population.			
	Civil.		Military.	
	Males.	Females.	Males.	Females.
Rangoon ...	475	261	571	141
Mandalay ...	5,938	4,629	1,880	535

IMPERIAL TABLE VI.

Birth-place.

Notes 1. The population of the estimated area of East Mangliin in the Northern Shan States amounting to 19,649 (males 9,925, females 9,724) has been omitted from this table.

2. The table is divided into three parts. In Part I figures are given for those enumerated in the whole province, Divisional Burma and the Eastern States, respectively, and the birth-places are given in detail for countries outside Burma. In Part II figures are given for each district of enumeration but the birth-places are not given in such detail as in Part I. Part III gives figures for persons born in Burma ; the birth-district and the district of enumeration are both given.

3. Throughout this table the phrase “ Within British Dominions ” should be taken to mean “ Within the British Empire and Mandated Territories.”

IMPERIAL TABLE VII.

Age, Sex and Civil Condition by Race.

Notes 1. The population of the estimated area of East Mangliin in the Northern Shan States amounting to 19,649 (males 9,925, females 9,724) has been omitted from this table.

2. This table differs from the corresponding one in 1921 inasmuch as figures are given here for racial classes instead of religions. " Other Indigenous Races" includes all races in groups A to O except Burmese ; Chinese and Indo-Burman Races form groups R and S, respectively ; Indian Hindus, Indian Muslims and " Other Indians " together make up group X ; " Others " represents races in groups Y and Z and is largely composed of Europeans and Anglo-Indians (see Imperial Table XVII for the races included in these groups). Statistics for age, but not for civil condition, are given for Europeans and Anglo-Indians in Imperial Table XIX.

3. The table is divided into three parts. Figures for the whole province, Divisional Burma and the Eastern States, are given in Parts IA, IB and IC, respectively, figures for districts in Part II and figures for towns in Part III. Figures are given for each racial class in Parts I A, IB and IC but only for the more important racial classes in Parts II and III. Figures for the racial classes which have been omitted from Part II have been given to the Director of Public Health. In Part III separate figures for unmarried, married and widowed have not been given.

4. In each part of the table figures have been given for each year of age up to 5 and thereafter by live-yearly groups up to 70, the last group being "70 and over." The age-group 5-10 includes all those who had completed 5 but had not completed 10 years ; similarly for the other age-groups. The method of compilation of these groups is different from that adopted at the last census. The age recorded at this census was the age at the nearest birthday, *e.g.* those who returned their age as 36 should have completed 35 V but not 36i years. Figures were first compiled for the following age-groups :—

0, 1, 2, 3,4-6, 7-13, 14-16 (alternate groups of 3 and 7).....
67-73, 74 and over.

If the figures for these age-groups are denoted by the letters A, B, C.....S, respectively, the method of obtaining the figures for the age-groups in this table is given by the following formulae :—

$$\begin{aligned} 0-1 &= A + iB \\ 1-2 &= |B + hC \\ 2-3 &= \text{£}C + iD \\ 3-4 &= iD + ^E \\ 4-5 &= \pm E \\ 5-10 &= iE + iF \\ 10-15 &= |F + iG \\ &\text{etc., etc.,} \\ 65-70 &= iQ + JR \\ 70 \text{ and over} &= iR + S. \end{aligned}$$

This method was adopted on the advice of the Actuary to the Government of India who considered that more accurate figures for the five-yearly groups would be obtained in this way. Formulae for obtaining figures for the age-groups A, B, C . . . S from (he figures in this table are given in Chapter IV of the Report.

5. Divorced persons who have not remarried have been treated as widowed.

6. Similar figures for selected races are given in Imperial Table VIII.

* In this part figures are not given for each civil condition.

IMPERIAL TABLE VIII.

Civil Condition by Age for Selected Races.

Notes 1. In this table figures are given not for the whole population but for certain selected races or racial groups in the districts and states where they are specially numerous. All the races are indigenous with the exception of Telugu.

2. In Imperial Table VII figures have been given for the usual five-yearly groups and in Note 4 to that table on page S3 the manner in which these figures were obtained has been described. In this table the figures have not been adjusted to form five-yearly groups since by leaving them in groups of 3 and 7 it is possible to give figures for the ages 14-16, which were considered of importance. It should be noted that the age-group 14-16 includes those who had completed 13-j but had not completed 16^ years ; the other age-groups have a similar interpretation.

IMPERIAL TABLE IX.

Infirmities.

NOTES 1. No record of infirmities was made in the estimated area of East Mangliin in the Northern Shan States which had a population of 19,649 (males 9,925, females 9,724). The population of the area covered by this table is therefore the same as that given in Imperial Table VII, namely 14,647,497 (males 7,480,676, females 7,166,821).

2. The infirmities recorded were the same as in 1921, *viz.*, insanity, deaf-mutism, total blindness and leprosy. The table is divided into two parts : Part I shows the distribution of the persons afflicted according to age, and Part II their distribution according to locality.

3. The figures for the age-groups were obtained in a similar manner to those of Imperial Table VII (see Note 4 to that table on page 53).

4. For columns 5 to 16 of the table persons with more than one infirmity were counted once for each infirmity, but for columns 2, 3 and 4 they were counted only once. The population afflicted does not therefore correspond with the total of the figures for the several infirmities. The following statement shows the number of persons afflicted with more than one infirmity :—

	Provincial Total.		Divisional Burma.		Eastern States.	
	Males.	Females.	Males.	Females.	Males.	Females.

Blind deaf-mutes	68	74	53	48	15	26
Leprous deaf-mutes	7	5	5	5	2	
Blind lepers	8	8	7	7	1	1
* Insane and blind deaf-mutes ...	2	1	2	1		
Total ...	255	201	197	144	58	57

* Persons with three infirmities are not included in the figures given above for persons with two infirmities.

5. The figures for some districts have been unduly increased owing to the fact that they contain leper or lunatic asylums or schools for the deaf or blind. Many of the inmates of these institutions were born in other districts. Persons with infirmities who were enumerated in such institutions are classified by birth-place in the following statement :—

IMPERIAL TABLE X.

Occupation or Means of Livelihood.

Notes 1. The population of the estimated area of East Mangliin in the Northern Shan States, amounting to 19,649 (males 9,925, females 9,724) has been omitted from this table.

2. The table is divided into two parts : figures for the province as a whole are given in Part I and figures for districts in Part II. The figures for Mancjalay City (which includes the Cantonment) are included in those for Mandalay District.

3. The occupations have been divided into 195 groups, 55 orders, 12 sub-classes and 4 classes. This scheme of classification, which differs only slightly from that adopted at the 1921 census, is given in full detail in Part I of the table. For further information regarding these classes, sub-classes, orders and groups and for a comparison between the schemes adopted in Burma at the 1921 and 1931 censuses, reference should be made to Chapter VIII of the Report volume. Figures for classes and sub-classes are given below :—

4. At the 1921 census the occupation of the person by whom a dependant was principally maintained was entered in the enumeration schedule, and not the occupation of the dependant even if he (or she) had any. At the 1931 census if a dependant had an occupation it was recorded, otherwise nothing (or rather a cross) was recorded. Thus only earners and working dependants *i.e.* dependants who returned an occupation have been classified by occupation in this table. The classification of the total population of each district into earners, working dependants and non-working dependants is given in columns 3 to 8 of Part II. For the meanings of the terms “earner”¹, “dependant”, “ principal occupation ” and “subsidiary occupation” Chapter VIII of the Report volume should be consulted.

5. Prisoners undergoing rigorous imprisonment have been treated as working dependants and included in the figures for group 192 ; prisoners undergoing simple imprisonment, civil and under-trial prisoners have been treated as non-working dependants.

6. Occupation figures for racial classes are given in Imperial Table XI. In Provincial Table VI *male earners* have been classified by race and “ economic function ”.

7. Groups 12, 30, 32, 35, 38, 41, 44, 46,48, 50, 72, 79, 8Q, 137, 154, 155, 156, 158 and 180 have been omitted from Part II of the table because they are blank ; groups 2, 3, 10, 34, 52, 58, 62, 65, 70, 87, 88, 89, 120,136, 149, 152, 153, 157, 168, 175, 184, 193 and 194 have also been omitted as their numbers are small. Groups 9, 11, 14, 15, 16(6), 16(c), 20, 22, 25, 26, 28, 29, 39, 42, 49, 51, 53, 57, 66, 67, 77, 91, 96, 97, 99, 103, 110, 133, 142, 148, 160, 176, 177 and 186, which are comparatively unimportant or are largely confined to a few districts, have also been omitted from Part I (but the figures for the most important districts are given on page 104. The figures for these omitted groups have been included in

the figures given in Part II for all occupations (page 112) and in those for classes, sub-classes and orders. Orders 41 (Navy) and 42 (Air-Force) have been omitted from Part II as they are blank. Provincial totals for all groups are given in Part I.

IMPERIAL TABLE XXI.

Literacy by Race and Age.

Notes 1. The population of the estimated area of East Mangliin in the Northern Shan States amounting to 19,649 (males 9,925, females 9,724) has been omitted from this table.

2. The test of literacy was the ability to write a letter to a friend in any language and to read the answer to it. The figures for “Literate in English” (columns 11 to 13) are included in those for “Literate” (columns 5 to 7).

3. The general arrangement of the table is the same as that of Imperial Table VII. Figures for the whole province, Divisional Burma and the Eastern States are given in Parts I A, IB and IC, respectively, figures for districts in Part II and figures for towns in Part III.

4. The racial classes in this table are the same as in Imperial Table VII (see Note 2 to that Table on page 53) ; figures are given for each racial class in Parts IA, IB and IC but only for the more important racial classes in Parts II and III. Figures for the racial classes which have been omitted from Part II have been given to the Director of Public Instruction. In Part II figures have been given for towns over 20,000 ; for towns over 10,000 but under 20,000 figures were compiled for the total population only and these figures have also been given to the Director of Public Instruction.

5. In each part of the table figures are given for five age-groups. The figures for these age-groups were obtained in a similar manner to those in Imperial Table VII (see Note 4 to that table on page 53).

6. Similar figures for selected races are given in Imperial Table XIV.

IMPERIAL TABLE XIV.
Literacy by Selected Races.

NOTES 1. In this table figures are given for certain selected indigenous races or racial groups in districts and states where they are specially numerous.

2. Only persons aged "seven years and over " have been included in this table and since the age recorded at this census was the age at the nearest birthday this means that only those who had completed 61 years are included.

3. The test of literacy was the ability to write a letter to a friend in any language and to read the answer to it. The figures for " Literate in English " (columns 12 to 14) are included in those for " Literate " (columns 6 to 8).

IMPERIAL TABLE XV.

Language.

NOTES 1. The population of the estimated area of East Manglun in the Northern Shan States, amounting to 19,649 (males 9,925, females 9,724) has been omitted from this table because statistics for language are not available. An estimate of the number of speakers of Maru, Lisiw, Nung, Kachin and Tibetan in the unenumerated parts of Myitkyina district, the "Triangle" and the Hukawng Valley is given in Chapter XII of the Report volume.

2. At the last census the language ordinarily used in the home was entered in the enumeration schedules ; at this census the mother tongue was entered.

3. The system of classification is given in Part IA of the table and is the same as that used at the 1921 Census. The indigenous languages have been formed into groups, branches, sub-families and families ; they include groups A to O and R (Chinese). For the sake of convenience all Chinese languages have been included among the indigenous languages. The remaining languages have been formed into three artificial groups, X, Y, Z, representing Indian, European, and other languages, respectively. The same classification system has been used for races in Imperial Table XVII. Group S has been used in that table to represent the Indo-Burman races but it does not occur in this table as these races do not have separate languages.

4. Provincial totals for each language and language-group are given in Part IB of the table. If an indigenous language is spoken in only one district the name of that district is given in the *Remarks* column of Part IB ; if it is spoken in only a few districts the figures for the districts which contain the majority of the speakers are given in the *Remarks* column ; the distribution of the remaining indigenous languages is given in Part IE (see Note 7). The names given in italics in the *Remarks* column are alternative names, names of dialects or names which have appeared in previous census reports.

5. Part IC is an alphabetical index of the languages and dialects and enables them to be easily traced in Part IB. To make this index save the purposes of Imperial Table XVII some names are included which are used for races but not for languages ; these names are marked with an asterisk.

6. Part ID gives the district figures for each language-group. Separate figures are given for speakers of English.

7. Part IE gives the distribution by districts of the speakers of the most important and widely spoken indigenous languages.

8. Part II deals with Bilingualism. Only certain indigenous languages are taken into account, all other languages being ignored. For the purposes of the table the languages were formed into the following five classes :—■ ,

- (i) Languages of the Burma group.
- (ii) Other Tibeto-Burmese languages, *i.e.*, languages of the Lolo-Muhso, Kuki-Chin, Naga, Kachin, Salt (Lui) and Mro groups.
- (iii) Languages of the Karen group.
- (iv) Languages of the Tai (Shan) group.
- (v) Languages of the Mon-Khmer branch, *i.e.*, the Mon (Talaing) and Palaung-Wa groups.

Persons speaking two or more subsidiary languages in the same class or subsidiary languages in two or more classes have been counted once for each class. Such persons have been counted only once for columns 3 and 4 of Part II.

IMPERIAL TABLE XVII.

Race.

NOTES 1. The population of the estimated area of East Mangliin in the Northern Shan States amounting to 19,649 (males 9,925, females 9,724) has been omitted from this table because statistics for race are not available. An estimate of the number of Marus, Lisaws, Nungs, Kachins and Tibetans in the unenumerated parts of Myitkyina district, the “ Triangle ” and the Hukavng Valley is given in Chapter XII of the Report Volume.

2. The same classification system has been used for races as for languages (see Note 3 to Imperial Table XV on page 219).

3. Part I of this table corresponds to Part IB of Imperial Table XV and gives the provincial totals for each race by religion. Indians have not been classified by caste ; the Report volume should be consulted regarding the Indian races for which figures have been given. Figures for the separate European and allied races included in Group Y are given in Imperial Table XIX. The races shown with *nil* entries may exist in parts of the province outside the census area or they may have been recorded under some other name.

4. Alternative names for some of the races are given in Parts IB and IC of Imperial Table XV (see Notes 4 and 5 to that table on page 219).

5. Part II of this table corresponds to Part ID of Imperial Table XV and gives the district figures for each race-group ; for some race-groups there is a further classification by religion.

6. Part IIIA gives district figures for certain selected indigenous races ; for some of these races there is a further classification by religion. Part IIIB supplements Part IIIA by giving the distribution of all other indigenous races. Figures for the more important Indian races, classified by religion and birth-place are given in Provincial Table V.

IMPERIAL TABLE XVIII.

Variation of Population of Race-groups.

Notes 1. This table is new. Owing to the extreme instability of racial distinctions in Burma figures have been given for race-groups and not for individual races. The facility with which members of one race transfer themselves to another should therefore be borne in mind when examining this table.

2. The 1931 figures cover the same area as Imperial Table XVII. The areas excluded at previous censuses are described below ; population figures are given when available. '

* See page 6 of the Tables volume of the 1921 Census.

† The Pakokku Hill Tracts are now entirely administered and form the Kanpetlet subdivision of the Chin Hills district.

3. At the 1921 census the population of the unadministered portion of the Pakokku Hill Tracts was only estimated and figures for race were not obtained but for the purposes of this table the inhabitants have all been taken to belong to the Kuki-Chin group. Figures for this area have been included in the 1921 figures because the corresponding figures for 1911 are included in the 1911 figures.

4. The figures for 1901 and 1911 were obtained from Table XIII of those censuses and since figures are not given therein for Indian races the numbers have had to be estimated. These estimates differ from those given in paragraph 167 of the Burma Census Report for 1921. The manner in which the 1901 and 1911 figures for the different race-groups were obtained is explained in Chapter XII of the Report.

5. Arabs and Persians have been included in Group Z (Other Races) and Myedus in Group S (Indo-Burman Races) : at the 1921 census they were all included in Group X (Indian Races). Goanese have been included in Group X (Indian Races) as in 1921 : in 1911 and possibly also in 1901 they were treated as Europeans or Anglo-Indians.

IMPERIAL TABLE XIX.

European and Allied Races and Anglo-Indians by Race and Age.

Notes 1. The population of the estimated area of East Mangliin in the Northern Shan States, amounting to 19,649 (males 9,925, females 9,724) has been omitted from this table.

2. Part A of the table relates to European and Allied Races (including Armenians) and Part B to Anglo-Indians. Separate figures for (a) British subjects and (b) Others are given in Part A.

3. The ages given in this table are the ages recorded in the enumeration schedules (see Note 4 to Imperial Table VII on-page 53). Thus the age-group 14-16 includes those who had completed 13- but had not completed 16 years ; the other age-groups have a similar interpretation. A more detailed distribution by age is given for Anglo-Indians than for European and Allied Races.

4. In the statement given below the European and Allied Races are classified by Race and Nationality ; figures are also given for important districts.

PROVINCIAL TABLE I.

Area and Population of Townships, States and Hill-Tracts.

NOTES 1. The areas of all townships, states and hill-tracts have been worked out afresh (see paragraph 18 of Chapter I of the Report volume).

2. The words “ Towns ” and “ Village-tracts ” in columns 3 and 4 of this table have the same meaning as in columns 3 and 4 of Imperial Table I (see Notes 4 and 5 to that table on page 1). In Provincial Table I for 1921 the word “ Town ” meant a town as defined under the Burma Towns Act, 1907.

3. In column 5 “ occupied houses ” means census houses ; ordinarily the census house was the separate residence of a family (see paragraph 17 of Chapter I of the Report volume).

4. The figures in column 9 represent the population in 1921 of the districts, townships, states, etc., as they existed in 1931, and the percentage variations in column 10 have been calculated from the figures in columns 6 and 9. Similarly the percentage variations for districts and larger areas in column 11 are based on the populations in 1911 and 1921 of the districts as they existed in 1931. On the other hand the percentage variations for townships and states in column 11 have usually been calculated on the populations in 1911 and 1921 of these areas as they existed in 1921. In cases where there have been great changes in the boundary of a township or state since 1921 column 11 has been left blank. Where, however, a township or state has absorbed the whole -of another township or state the percentage variation in column 11 has usually been based on the population of the new township or state as it existed in 1931.

5. The figures in this table cover the same area as those in Imperial Table I (see Note 1 on page 1). All areas censused in 1921 were censused in 1931 and the only area censused for the first time in 1931 was a part of the Chin Hills district having a population of 18,327 (males 9,212, females 9,115) which was brought under administration in 1930.

6. The figure for the area of Rangoon Municipality (24'37 square miles) includes only the land area ; the figure for the Cantonment ('43) includes 06 square miles of military land at Monkey Point ; the figure for the Port (52'37) represents the water area, 7'69 square miles being within the municipality and 44'68 square miles outside it. Separate population figures are given in this table for the Port, but in Imperial Tables IV and V the figures for the Port are included in those for the municipality since practically all the Port population was enumerated within municipal limits.

7. The following townships, states and hill-tracts have been abolished since 1921 and included in others :—

District.	Township, state, etc.	District.	Township, state, etc.	District.	Township, state, etc.
Pegu ... Prome ... Magwe ... Myitkyina ... Shwebo ...	Nyaunglebin. Hinawza. Sathwa. Sima Kachin Hill- Tracts. Tatnadaw.	Katba ... Upper Chindwin.	Mawlu, Tagaung. Mawlu and Katha Kachin Hill-Tracts. Kyabin, Maing- kaing, Masein.	Southern Shan States. Karenni ...	Kenglon, Mawson, Kyawkku, Loimaw, Loi Ai, Namtok. Naungpale, Nammekdn.

The Kachin Hill-Tracts in Katlia district in 1921 were all transferred to Myitkyina district with the exception of Waga and Wudi. The Pakokku Hill-Tracts now form the Kanpetlet subdivision of the Chin Hills district.

8. The only new townships formed since 1921 are Nyaunglebin East, Nyaunglebin West and Waw in Pegu district, Kanbe in Myaungmya district and Ayadaw and Yinmabin in the Lower Chindwin district.

9. The following townships, states and hill-tracts which existed in 1921 have suffered a change of boundary since 1921 :—

PROVINCIAL TABLE II.
Population of Townships, States and Hill-Tracts
classified by Race.

Notes 1. The population of the estimated-area of East Mangliiu in the Northern Shan States amounting to 19,649 (males 9,925, females 9,724) has been omitted from this table because statistics for race are not available. The totals in this table for the whole province, the Eastern States and the Northern Shan States are therefore different from those in Provincial Table I.

2. "Other Indigenous Races" (columns 6 and 7) includes all races in groups A to O, except Burmese ; "Others" (columns 14 and 15) includes Indians other than Hindus and Muslims, Indo-Burman races (group S), Europeans and Anglo-Indians (group Y) and Other Races (group Z). The classification system for races is given in Part 1 of Imperial Table XVII and figures for districts are given in Parts II, IIIA and IIIB of that table.

PROVINCIAL TABLE III.

Towns arranged territorially with population by race.

Notes 1. This table was not compiled at previous censuses. In Imperial Table V the urban population is classified by religion. The form of this table is exactly the same as Imperial Table V, the only difference being that the population is classified by race instead of religion.

2. “ Other Indigenous Races ” (columns 9 to 11) includes all races in groups A to 0 except Burmese; “Indian Hindus”, “Indian Muslims” and “Other Indians” together make up group X, while “Chinese”, “Indo-Burman Races”, “Europeans and Anglo-Indians” and “ Other Races ” represent groups R, S, Y and Z, respectively (see Part I of Imperial Table XVII for the racial classification).

PROVINCIAL TABLE IV.

Christians classified by Sect and Race.

NOTES 1. This table corresponds to Imperial Table XV of the last census. In Part I of the table figures are given for all denominations and for eleven racial classes ; in Part II details are given for the more important sects but the number of racial classes has been reduced to six. In Part I “ Other Indigenous Races ” includes all races of groups A to O, except Karens (group N) and Burmese, while “Other Races” includes races in group Z ; in Part II of the table, and in Notes 3 and 4 below, “ Others” includes Chinese (group R) and Indo-Burman Races (group S), in addition to group Z. The races included in each group are given in Imperial Table XVII, Part I.

2. This table covers the same area as Imperial Table XVI. In that table district figures are given for Christians as a whole and not for each sect but provincial figures for Roman Catholics, Syrians and Others are given in Note 4 on the fly-leaf.

3. Provincial figures for the sects included under *Other Sects* are given in the table below :—

PROVINCIAL TABLE V.

Indians by Religion, Race and Birth-place.

NOTE. In this table Indians have been classified by race, separate figures being given for selected districts, for Hindus and Muslims and for those born in Burma and those born outside Burma. In Part 1 of Imperial Table XVII provincial totals are given for each of the Indian races ; in Part II of the same table district figures are given for Indians as a whole with further classification by religion.

PROVINCIAL TABLE VI.

Race and Economic Function.

NOTES 1. In Imperial Table X the classification is partly industrial and partly occupational *e.g.* the persons in group 71, rice milling, include managers, technical experts, carpenters, fitters, engine-drivers and other craftsmen, clerical workers and all unskilled labourers. In this table *male earners* have been classified according to the kind of work they do, without regard to the industry for which they do it. The relation between the two tables is shown by the schedules given below :—
