**Expedite undertakings for regional development**

The government pays serious attention to equitable development of all parts of the Union in pursuance of the goal of building up a peaceful, modern and developed nation.

In order to achieve the lofty goal, it is building more and more economic, social, health and education infrastructures. Myanmar being an agro-based country, the agricultural sector is its major economy. The government utilizes advanced technologies to exploit water and land resources at full stretch to boost agricultural production, and to scale up cultivation capacity. It has constructed a large number of dams, reservoirs and sluice gates throughout the country, thus growing paddy and other crops and conducting mixed-cropping and multiple-cropping patterns on a wider scale.

In the meantime, the government is implementing long- and short-term health plans to provide better health care to the people. In the process, it is opening more universities of medicine and universities on health to produce human resources as well as building specialist hospitals, hospitals and health care centres on an extensive scale.

Besides, the government nurtures the youth for development of human resources in its bid to enhance the technological development of the Myanmar society. It has built many more educational institutions and education foundations including electronic communication networks across the nation to provide better opportunities for the youth to pursue education. Secure and smooth transport is a fundamental requirement for national development. Only through smooth transport will it be possible for social and economic growth. With this concept, the government is building roads and railroads the length and breadth of the Union. So far, it has built 236 bridges, 180 feet and above long.

Therefore, the people have to join hands with the government in regional development tasks for sooner emergence of a peaceful, modern and discipline-flourishing democratic nation.

**Energy Minister inspects Ayadaw oil field**

**NAY PYI TAW, 30 Sept—** Minister for Energy Brig-Gen Lun Thi visited Ayadaw Oil Field in Pakokku Township on 28 September and inspected tasks for conducting seismic data for drilling new oil wells in the field.

During the tour of inspection, geologists and the managing director of Myanma Oil and Gas Enterprise reported to the minister on seismic data for drilling new wells.

The minister called for more efforts for collecting necessary data to drill oil wells and laid down future plans.

Minister Brig-Gen Lun Thi inspected measures being taken for conducting seismic data with the use of Secret SN 428 Telemetric System. **ENERGY**

Next, the minister visited the oil field and gave instruction on supply of oil and natural gas. **MNA**

**MWAF Working Group on National Races Affairs holds educative talk**

**YANGON, 30 Sept—** An educative talk sponsored by the Working Group on National Races Affairs of Myanmar Women's Affairs Federation took place at the central training school of the Education and Training Department under the Ministry of Progress of Border Areas and National Races and Development Affairs in Dagon Myothit (North) Township here this morning.

Present on the occasion were officials of MWAF, trainees of advanced domestic training course No. 19 and cottage industry training course No. 6 of the central training schools, those from Nationalities Youths Resources Development Degree College and staff families of the central training school.

Leader of the Working Group Daw Kyin Khine made an opening speech on the occasion.

Next, Secretary of the Working Group Daw L Khun Yi gave a talk titled "Sports and Myanmar Women." After the talk, officials of MWAF looked into sewing of trainees of advanced domestic training course and learning of trainees in specializing in cane and bamboo subjects. **MNA**

**Earthquake Report**

**NAY PYI TAW, 30 Sept—** A strong earthquake of intensity (7.0) Richter Scale with its epicenter about (4300) miles Southeast of Kaba-Aye Seismological observatory was recorded at (21)hrs (49) min (31) sec MST yesterday. **MNA**
Russia says US blocking nuclear arms reduction talks

Russian Foreign Minister Sergei Lavrov.
The Strategic Arms Reduction Treaty, or START I, between the United States and Soviet Union was signed in 1991 and eventually resulted in an estimated reduction of around 80 percent of all nuclear weapons in existence at the time. Speaking on the sidelines of the annual open debate of the UN General Assembly, which ends later on Monday, Lavrov said the reason the talks had stalled was that “our American colleagues do not want to keep limits on the delivery vehicles (missile) and on nuclear warheads in storage.”

At least 168 killed in Indian temple stampede

JODHPUR, 30 Sept—Thousands of pilgrims panicked by false rumours of a bomb stampeded at a Hindu temple in western India on Tuesday, killing at least 168 people in the crush to escape, officials said.

More than 12,000 people gathered at the temple at dawn to celebrate a Hindu festival in the historic city of Jodhpur when the stampede occurred early Tuesday morning.

The temple floors were slick with coconut milk as thousands of devotees broke coconuts as religious offerings, causing pilgrims to slip and fall as they scrambled to escape.

At least 168 people were killed in the stampede, said Naresh Pal Gangwar, the district collector.

Jodhpur is some 180 miles (290 kilometres) southwest of the Rajasthan state capital of Jaipur.

3 pirates may be dead in shootout

MOGADISHU, 30 Sept—Disagreements between Somali pirates holding a ship laden with tanks and heavy weapons escalated into a shootout and three pirates are believed dead, a US defence official said Tuesday. The pirates denied the report.

The US destroyer USS Howard and several other American ships have surrounded the Ukrainian cargo ship Fatna, which was hijacked Thursday and is now anchored off the lawless coast of Somalia. The pirates have demanded a ransom of $20 million and the US Navy cordon aims to prevent them from taking any of the weapons ashore.

Piracy has become a lucrative criminal racket in impoverished Somalia.

British soldier kills Afghan civilian

LONDON, 30 Sept—A British soldier shot dead an Afghan civilian on a motorbike Monday who failed to stop as he approached a military patrol in southern Afghanistan, the Defence Ministry here said.

A spokesman said the man “failed to react to two verbal warnings and two warning shots” as he approached troops from the NATO-led International Security Assistance Force (ISAF) in Helmand province.

After the man was shot, he was treated by medics at the scene but “unfortunately he did not survive”, the spokesman said.

Three US-led soldiers killed in Afghanistan

KABUL, 30 Sept—Three soldiers from a US-led coalition force in Afghanistan have been killed in a blast in the south of the country, the US military said on Tuesday.

Violence has surged in Afghanistan this year with about 3,000 people, at least 1,000 of them civilians, killed in the bloodiest year since US-led and Afghan forces overthrew the Taliban in 2001.

This summer has also been the deadliest period for foreign troops in the country, with the militants launching more daring and deadly attacks. “Three coalition service members were killed on 29 September in southern Afghanistan when their vehicle struck an IED,” the US military said in a statement, referring to an improvised explosive device, or roadside bomb.

Afghan policeman opens fire on US troops, kills one

KABUL, 30 Sept—An Afghan policeman opened fire on US troops at a police station, killing an American soldier and wounding three, officials said Monday.

An American commander said US forces in the station in eastern Afghanistan then killed the policeman.

“Initial reports suggest that a rogue A NP (Afghan police) officer turned on our forces and shot and killed one of our soldiers, said Col John “Pete” Johnson, the commander of Task Force Currahee in eastern Afghanistan.

In all, 62 ships have been attacked in the notorious African waters this year. A total of 26 ships were hijacked, and 12 remain in the hands of the pirates along with more than 200 crew members.

International warships are patrolling the area and have created a special security corridor under a US-led initiative, but attacks have not abated.
Boat carrying over 100 people sinks offshore Malaysia

KUALA LUMPUR, 30 Sept—A boat carrying more than 100 people sank off the coast of a port near Kuala Lumpur early Tuesday morning and at least six people were killed, local media reported.

The vessel, believed to be a barter trade boat, sank off the coast near Klang, a sea port southwest of the Malaysian capital Kuala Lumpur, the website of English-language newspaper The Star said.

Rescuers had so far pulled out 107 survivors and six bodies, and were trying to ascertain the actual number of passengers and crewmen on board before the mishap, it said.

China finds 14,000-km underground rivers in rock desert areas

BEIJING, 30 Sept—A newly conducted geological survey has found more than 3,000 underground rivers with a total length of 14,000 kilometres in southwest China’s rock desert areas.

A latest report released by the China Geological Survey showed that these underground rivers collect water from a combined area of 300,000 square kilometres, with an annual runoff of 47 billion cubic metres, equivalent to that of the Yellow River, the country’s second longest river.

These underground rivers account for 70 percent of the total underground water in the rock desert areas, which is a valuable resource for future development, the report said.

China’s rock deserts are mainly in the karst erosion areas in southwestern provinces of Guizhou and Yunnan and the southern Guangxi Zhuang Autonomous Region. In these areas, surface water easily leaks through the carbonate terrane, leaving the land dry and leading to rock desertification.

The report suggested the government adopt more effective ways to stop the expanding of rock desert areas.

Hungarian cosmonaut praised Shenzhou-7 mission

BUDAPEST, 30 Sept—Hungarian cosmonaut Bertalan Farkas said on Monday that China’s manned Shenzhou-7 mission was wonderful.

Farkas told Xinhua in an interview that when first Chinese astronaut was launched into space, he was in Japan, and only several years later, three Chinese astronauts were sent into space in a spacecraft.

“A spacewalk was performed successfully, this is tremendous, and a very big step forward,” Farkas said. This needed technical preparation and harmonization of scientists, he added.

Polls show Obama wins 1st debate with McCain

WASHINGTON, 30 Sept—New polls show a small boost for US Democratic presidential candidate Barack Obama after his first debate with Republican foe John McCain last Friday, the US News and World Report said Monday.

Obama’s poll numbers have ticked up nationally since the debate, the first of three presidential debates scheduled this year, according to it.

The Gallup daily presidential tracking poll taken 25-27 Sept shows the senator from Illinois leading McCain 50 to 42 percent as the Rasmussen poll for 28 Sept says Obama leading McCain 50 to 44 percent.

The Los Angeles Times also said the debate appears to have helped Obama slightly widen a lead over his Republican opponent as a post-debate Los Angeles Times/Bloomberg survey shows.

Registered voters who watched the debate preferred Obama, 49 to 44 percent, according to the poll taken over three days after the showdown in Oxford, Miss. —Xinhua

HONG KONG, 30 Sept—A Cadbury spokesman says preliminary results show its Chinese-made chocolates contain the industrial chemical melamine.

**United Nations Secretary-General’s Message on the International Day of Older Persons**

(1 October 2008)

The theme of this year’s International Day of Older Persons, “Rights of Older Persons”, is especially apt in this year in which we mark the 60th anniversary of the Universal Declaration of Human Rights.

Promoting the independence, participation and dignity of older persons has long been on the agenda of the United Nations and is central to implementation of the Madrid International Plan of Action on Ageing.

In adopting that Plan six years ago at the Second World Assembly on Ageing, United Nations Member States committed “to eliminating all forms of discrimination, including age discrimination”. They recognized “that persons, as they age, should enjoy a life of fulfillment, health, security and active participation in the economic, social, cultural and political life of their societies”. And they determined “to enhance the recognition of the dignity of older persons and to eliminate all forms of neglect, abuse and violence”.

Despite this commitment, in many parts of the world, the rights of older persons are violated every day. Older persons often face age discrimination at a workplace. In social environments, they may experience a lack of recognition and respect. They may be deprived of full inclusion and participation in social, economic, cultural and political affairs.

This International Day is an opportunity to stimulate discussion on promoting the rights of older persons and strengthen partnerships aimed at securing their full participation in society.

Let us all redouble our efforts to realize the rights of older persons, and make the dream of a society for all ages a reality.—UNGC

**Sri Lanka Navy sink rebel boats, kill eight**

COLOMBO, 30 Sept—A Sri Lanka Navy patrol destroyed two Tamil Tiger boats, killing eight rebels on board, in a clash at sea off the island’s northern Pooneryn region, the Defense Ministry said Tuesday.

The Navy did not give its own losses during the battle, which occurred late Monday.

The Liberation Tigers of Tamil Eelam (LTTE), who have been fighting for an independent homeland since 1972, did not comment.

The attack came as ground troops pushed deeper into the guerrillas’ political capital of Kilinochchi, where the LTTE runs its own police, courts and banks and meets visiting dignitaries. Monday’s clash raised the number of rebels reported killed by government forces to 7,021 since January, when Colombo pulled out of a Norwegian-brokered ceasefire.—INTERNET

Five trapped Filipino miners rescued after 1 week

MANILA, 30 Sept — Five gold miners have been rescued after being trapped for a week in a flooded underground tunnel in the mountainous northern Philippines, officials said Tuesday.

Divers were working to extract another survivor from an inundated mine shaft and hoped to find eight other missing miners. The bodies of two miners were retrieved from the gold mine in the mountain township of Itogon on Thursday.

Rescuers and relatives applauded as the survivors were brought out of tunnels on stretchers, extremely hungry but in apparent good health, said Mines and Geosciences Bureau officer George Baywong, who supervised the rescue.

"This is some sort of a miracle," Neoman de la Cruz, another Mines and Geosciences Bureau officer, told The Associated Press by telephone. "Our hardships have been compensated and we won't give up our search for more survivors."

The first two miners rescued Monday managed to survive by standing on a ledge in one of the tunnels about 400-700 feet below ground where there was enough oxygen to keep them alive.

They drank the water that flooded the tunnel but had nothing else, Baywong said. Internet

Nintento pushing “play” on new DS console

TOKYO, 30 Sept — Nintento plans to release a new model of its portable DS gaming console with a camera, music player and high-speed WiFi capabilities by the end of 2008.

The new model would go on sale for less than 20,000 yen ($185), Japan’s leading business newspaper, The Nikkei, said Sunday. Nintento spokesperson Yasuhiro Minagawa said that the company is “always trying to surprise people and expand the gaming market, but would not confirm details about any new model."

Although the DS already is the best-selling portable console ever — with 80 million units worldwide — and looks likely to beat the 100 million-unit console record set by Sony’s PlayStation 2, the DS has, in the past six months, been outsold by the PlayStation Portable in Japan. Internet

Russia to help Venezuela build nuclear reactor

CARACAS, 30 Sept — Venezuela’s President Hugo Chavez expressed readiness Sunday to accept Russia’s offer to help develop his country’s nuclear energy programme for peaceful purposes.

The remark was made at a local electoral assembly. He said Venezuela is to accept Prime Minister Vladimir Putin’s offer last week to help build a nuclear reactor. The two countries have set up a special committee to work out a detailed cooperative plan, he added. MNA/Xinhua

Four dead as UN chopper fired upon over Darfur

KHARTOUM, 30 Sept — A helicopter contracted to UN-led peacekeepers crashed in Sudan’s Darfur region on Monday, killing all four crew members, after being fired at, the Sudanese police said.

The helicopter was contracted by the joint African Union-United Nations peacekeeping mission in Darfur (UNAMID) to carry food to a force team in South Darfur state and came under fire near Kalma camp, a police official said. "A helicopter hired by UNAMID was shot at from Kalma camp," Major-General Hashim Osman, the assistant director-general for security and criminal investigations, said.

"The three Russian and one Sudanese crew members were all killed," he added.

The helicopter crashed close to Kalma camp, a sprawling settlement for internally displaced people, shortly after taking off from Nyala airport laden with two tonnes of supplies, the state capital of South Darfur. Internet

Woman mistakes skunk for a cat, gets sprayed

A Pennsylvania woman who thought she was petting a neighbour’s cat got a smelly surprise when it turned out to be a skunk.

Not only did the skunk spray the woman before dawn Monday, but it ran into her Mount Carmel home. Police spent hours at the home before leaving the scene, but there was no immediate word if they were able to remove the animal.

NM ristra stringers say to Guinness HQ: it’s hot!

Men, women and children of all ages stepped right up and twirled together twice and danced at the New Mexico State Fair, trying to create the world’s largest chile ristra. Now they hope Londoners appreciate the chiles as much as they do.

In five hours and 45 minutes Sunday, the participants used a whopping 3,250 pounds of red chile pods to create a ristra spanning 157.7 feet, said New Mexico Department of Agriculture spokesman Doug Rams.

The New Mexico Chile Commission and the Agricultural Department lowered Guinness World Record guidelines in creating the ristra and will submit their documentation to Guinness headquarters in London for record consideration. Rams said he did not know how long it would take for Guinness to respond.

Men charged with stealing 82-year-old church bell

Two northwest Iowa men have been arrested and charged with stealing an 82-year-old bronze bell from a church. Authorities say the men stole the bell from the Oakdale Evangelical Free Church in Meriden on Sunday night.

The bell was sold at a salvage yard in Lakefield, Minn and was recovered by authorities. It will be returned to the church.

Rover, call me an ambulance — dog calls 911

"Man’s best friend" doesn’t go far enough for Buddy — a German shepherd who remembered his training and saved his owner’s life by calling 911 when the man had a seizure.

And it’s not the first time Buddy has heard barking loudly when the officers arrive. On a recording of the 911 call Wednesday, Buddy is heard whimpering and barking after the dispatcher answers and repeatedly asks if the caller needs help.

"Hello, this is 911. Hello ... Can you hear me? Is there somebody there you can give the phone to,“ says the dispatcher, Chris Scott.

Police were sent to Stalnaker’s home, and after about three minutes Buddy is heard barking loudly when the officers arrived.

Maj-Gen Min Aung Hlaing looks into regional development tasks in Shan State (East)

NAY PYI TAW, 30 Sept—Maj-Gen Min Aung Hlaing of the Ministry of Defence yesterday morning inspected Wan Paing physic nut plantations in Kengtung and found that the plantations were thriving. Maj-Gen Min Aung Hlaing visited the training school under the Ministry of Progress of Border Areas and National Races and Development Affairs in Loimwe, Maj-Gen Min Aung Hlaing presented school uniforms, stationery, exercise books, sports gear and cash assistance and viewed round Loimwe and presented gifts to warded patients and medicines and medical equipment for the hospital.

At the meeting hall of the Triangle Region Command, Maj-Gen Min Aung Hlaing met with secretaries, executives and members of State/Township/Region District/Township/Union USDA and gave necessary instructions.

Accompanied by Chairman of Shan State (East) Peace and Development Council Commander of Triangle Region Command Brig-Gen Kyaw Phyo and departmental officials, Maj-Gen Min Aung Hlaing looked into thriving paddy fields along Kengtung-Loimwe motor road and the conditions of road section.

At the Nationalities Youths Development NLD members from states and divisions resign in succession

NAY PYI TAW, 30 Sept—U Aung Soe, U Myo Oo, U Thant Zaw and Daw Win Myaing from Ngapal village, who are members of Myaung Township National League for Democracy of Sagaing Division, on 30 March, resigned from the party of their own volition and U Soe Naing Oo from Toequn village on 4 April, Daw Than Sein, U Soe Myint, U Soe Hay, Daw U Mo Oo, Daw San Kyi and Daw Aye Ngwe from Phonekang village on 8 May and U Myint Swe of Taungmyo village of Sagaing Town-ship on 15 May.

Similarly, U Khin Maung Soe (a) Dhattha, Daw Aye Aye Khine, U Maung Maung Oo, U Maung Maung Hwe, U Win Aung, U Tin Moe Aung, U Nyo Min Tun, Daw Khin Than Aye, U Khin Maung Than and U Mo Oo Myint from Aungmyethazan Township of Mandalay re-signed from the party of their own wishes on 9 June and NLD youth in-charge U Zaw Lin of Mandalay (South-West) Township on 12 August, Ma Cho and Hsan Aung Win (a) Hmatkyi of Dagon Myothit (South) Township on 20 August, NLD organizer U Aung Than Myint of Myawady Township of Kayin State on 28 August, Vice-President U Khin Maung Kyi of Nay Pyi Taw Tatkon Township NLD on 29 August, Secretary U Hla Kyu of Chaung Township NLD of Mandalay Division on 8 September.

Likewise, U Than Zin Win of Namhsan of Shan State (South) re-signed from the party of his own desire on 8 September and U Hnat of Taunggy Township on 10 September and U Maung Aye of Chaungzone Township of Mon State on 13 September.

The above 32 NLD members resigned in suc-cussion from the party of their own volition because they had no wish to carry out party duties any longer and then sent their resignation letters to NLD Headquarter and authori-ties concerned.

Special bus line for Kayah State launched

NAY PYI TAW, 30 Sept—A CEC member of the Union Solidarity and Development Association Minister for Forestry Brig-Gen Thein Aung together with Kayah State Peace and Development Council Chairman Brig-Gen Win Myint on 26 September attended the launching of Their Than Gaday Loikaw-Mandalay Special Bus Services held at the bus terminal in Loikaw.

The CEC member, the chairman and officials opened the bus line and viewed running of buses. The special bus line will operate Loikaw-Mandalay bus services with six air-conditioned buses daily.

At the ceremony to mark the International Day of Older Persons held at Dhammayon in Loikaw, the CEC member and the chairman viewed giving medical treatment to the aged by specialists and presented glasses to the aged.

Next, the CEC member and party met with the secretaries, execu-tives and organizers of State/District/Township USDA’s at the office of Kayah State USDA in Loikaw.

On 27 September, the CEC member delivered an address at the an-ual general meeting of Kayah State USDA and presented awards.

Next, the CEC member and the chairman met with local people at Tatapalu village in Loikaw Township and the CEC member, the chair-man and a well-wisher presented K 900,000 for the availability of electricity in the village.

Next, the CEC member and the chairman visited Kontha Taung Mok Parahita School and viewed learning of school children at the school.

Next, Minister Brig-Gen Thein Aung inspected Loikaw rafting station. —MNA

Tagun Dam in Seikphyu Township inaugurated

NAY PYITAW, 30 Sept — Tagun Dam near Thabyay Village in Seikphyu Township, Pakokku District, was inaugurated today.

As part of a plan to construct 71 irrigation facilities in Pakokku District, so far 32 dams and reservoirs including Tagun Dam have been constructed in Pakokku District and 5,172 more acres will be cultivated in the region, said Chairman of Magway Division Peace and Development Council Col Phone Maw Shwe.

Tagun Dam is the 41st irrigation facility in the region and was constructed to help boost agricultural production, to irrigate greening projects, to increase the number of acres of rain-fed paddy, summer paddy, mix-cropping and to improve the living standard of local people.

Dams, lakes and reservoirs have been constructed in Magway Division to store rain water as the average rainfall in Magway Division is only about 20 inches. Tagun Dam is a part of Pakokku District greening project and 215th dam project of the State.

As Tagun Dam is inaugurated, the number of cultivation areas in Thabyay Village in Seikphyu Township would increase from 170 acres to 250 acres.

Chairman of Magway Division PDC Col Phone Maw Shwe and Deputy Minister U Ohn Myint unveiled the signboard of the dam and formally opened the dam.

The dam was constructed on Chaung-se Creek near Thabyay Village, and the embankment of the dam is 41 ft high and 2,000 ft long. It can store 1,000 acre ft and will irrigate 150 acres of paddy and other crops.

Powerful countries should refrain from practicing hegemonic policies

FM delivers a speech at UNGA

NAY PYI TAW, 30 Sept – Minister for Foreign Affairs U Nyunt Win attended the General Debate of the 63rd session of the United Nations General Assembly in New York. He delivered a speech on general policy on 29 September. The following is the full text of his speech.

Mr President,

I would like to congratulate you on your election as the President of the 63rd Session of the General Assembly of the United Nations.

The Myanmar delegation is confident that your vast experience and diplomatic skills will stand the Assembly in good stead.

Sanctions are unwarranted. Unilateral sanctions are also against international law. They are not only unfair but immoral. They are counter-productive and deprive the countries of their rights to development.

I would also like to pay tribute to your predecessor, His Excellency Dr Srgjan Kerim for his dynamic and able leadership of the previous session.

Mr President,

We live in an era when the world is becoming increasingly interdependent. Nothing illustrates this interdependency more than the Asian financial crisis of a decade ago and the current financial crisis gripping the world’s largest economy. The problems may have local roots but given the severity of the situation, their interdependency more than the Asian financial crisis.

The problems may have local roots but given the severity of the situation, their interdependency more than the Asian financial crisis.

Nothing illustrates this interdependency more than the Asian financial crisis of a decade ago and the current financial crisis gripping the world’s largest economy. The problems may have local roots but given the severity of the situation, their interdependency more than the Asian financial crisis.

Mr President,

I would like to congratulate you on your election as the President of the 63rd Session of the General Assembly of the United Nations.

The Myanmar delegation is confident that your vast experience and diplomatic skills will stand the Assembly in good stead.

Sanctions are unwarranted. Unilateral sanctions are also against international law. They are not only unfair but immoral. They are counter-productive and deprive the countries of their rights to development.

I would also like to pay tribute to your predecessor, His Excellency Dr Srgjan Kerim for his dynamic and able leadership of the previous session.

Mr President,

We live in an era when the world is becoming increasingly interdependent. Nothing illustrates this interdependency more than the Asian financial crisis of a decade ago and the current financial crisis gripping the world’s largest economy. The problems may have local roots but given the severity of the situation, their efforts will transcend borders. The world economy, and by extension the stability of nations, depends on stability of the financial markets.

In recent months, the world has also been challenged by the soaring prices of fuel and food, particularly such staples as rice. These daunting challenges add an extra burden to developing countries. The an...
Powerful countries should refrain...

(from page 10)

Mr President,

The Millennium Development Goals adopted in 2000 are imperatives that the international community has set for itself. We have now passed the mid-point but progress has been uneven. Much more remains to be done if the goals are to be achieved by 2015. While national governments have the primary responsibility to ensure progress, the international community must help by creating an environment that would enable developing countries to turn faltering steps at development into firm strides.

It is time for commitments made at international summits and conferences to be translated into concrete action. Fulfilment of the ODA commitments, increased investment flows, market access and resolution of the debt problem are needed to enable the developing countries to achieve the Millennium Development Goals.

For its part, Myanmar is striving to promote better living standards for its people. The implementation of MDGs is inextricably linked with the implementation of our National Development Plan. The national plan focuses on the promotion of equitable and balanced socio-economic development of both rural and urban areas. In recent years, we have made significant progress in areas, such as poverty alleviation, promotion of health and education.

In the health sector, Myanmar has been implementing a national plan that accords priority to eradication of major diseases, such as HIV/AIDS, malaria and tuberculosis. A high-level multi-sectoral Committee on AIDS has been overseeing HIV/AIDS prevention and care activities in the country since 1989. The activities undertaken by the Committee include active surveillance, prevention of mother-to-child transmission as well as community, institution and home-based care services. These activities are carried out by the Government in close cooperation with international organizations such as WHO, UNICEF, the World Food Programme, and national and international NGOs in order to reach out widely to vulnerable groups.

As a result, Myanmar has not only leveled the rate of HIV/AIDS infection but also reduced its rate. We would like to emphasize that if we are to have a more dynamic and effective global response to HIV/AIDS, adequate resources must be made available. Moreover, allocation of resources for HIV/AIDS, malaria and tuberculosis must be on need basis rather than on political consideration.

Mr President,

With regard to education, we envision a system for our people that will generate a learning society capable of meeting the challenges of the information age we live in. Long-term investment in the education sector is being made with the aim of building human resource development. The Government has been expanding the number of basic, primary, post-primary, middle and high schools throughout the country providing access to education for all. We strongly believe good education to be a fundamental requirement for attainment of sustainable development. It is a prerequisite for the achievement of other MDGs.

I am happy to be able to say that as a result of our efforts, the literacy rate, of 15-year-olds and above, has risen to 94.8%. Likewise, the enrollment rate in primary schools has reached 98%.

Mr President,

Myanmar also accords priority to creating job opportunities in rural areas as part of its poverty alleviation strategy. In this regard, development projects to improve economic, educational and health conditions for rural areas are being implemented all over the country.

Mr President,

The Secretary-General’s initiative to convene a Ministerial meeting on “Reducing Disaster Risks in a Changing Climate” is indeed timely. We in Myanmar can relate to the growing concern of the world regarding climate change and its adverse effects. We felt the full brunt of the devastating consequences of climate change last May when a powerful cyclone slammed into the Ayeyawady delta. Cyclone Nargis left unprecedented death and destruction in its wake. The pain and sorrow felt by the survivors of the devastating storm continue even today. There is however a silver lining in the dark clouds. The Myanmar nation was united in its response to the emergency. The outpouring of generosity was overwhelming. People from all walks of life, regardless of their own difficulties, donated cash and kind to the victims. The United Nations, the ASEAN Member States, donor countries, NGOs and individuals from around the world also responded generously. We have been able to demonstrate willingness and ability to work in concert with the international community. We have been able to rebuild better and stronger homes, schools and monasteries. The paddy fields destroyed by the storm have been replanted.

I would like to take this opportunity to express our heartfelt appreciation to our friends, from far and near, who came to our assistance in our time of need.

An international pledging conference was organized in Yangon by the Government, the United Nations and ASEAN soon after the natural disaster. Following the conference, a tripartite core group composed of the Government of Myanmar, the United Nations and ASEAN was established to coordinate relief efforts and to conduct a post-cyclone joint assessment. The Group has come up with a report that describes at length the extent of the destruction caused by the storm, its impact on the affected region and the scope and scale of the humanitarian assistance that would be needed in the medium and long term. The report acknowledges the prompt and systematic response of the Government and people of Myanmar to the disaster. The effective cooperation between the Government and international organizations and NGOs is widely regarded as a model for effective cooperation in case of natural disasters.

Mr President,

Myanmar is home to over 100 national races and national unity is of paramount importance. Accordingly, we have been resolutely pursuing a policy of national reconciliation. Our endeavours have resulted in the return to the legal fold of 17 armed groups. We have effectively put an end to the decades-long insurgency. Peace and stability now prevails in almost all parts of the country.

We have also been implementing a 7-step political roadmap to democracy. The representatives of former armed groups together with the representatives of political parties, ethnic nationalities and other representatives took an active part in the National Convention process. The National Convention laid down the fundamental principles to be enshrined in a new Constitution. Based on those principles, a new Constitution was drafted and put to a nation-wide referendum last May. The people of Myanmar overwhelmingly approved the draft Constitution.

The 5th step of the roadmap, general elections, will be held in 2010. Necessary measures are being undertaken for elections. All citizens, regardless of political affiliation, will have equal rights to form political parties and to conduct election campaigns.

The Government will make every effort to ensure that the elections will be free and fair.

The international community can best assist Myanmar’s democratization process by respecting the will of its people expressed in the recent referendum.

Mr President,

The daunting challenges of the 21st century could only be addressed through international cooperation. We can only solve the international problems of economic, social, cultural or humanitarian character by working together. To do this, powerful countries should refrain from practicing hegemonic policies, either through political or economic pressures.

In the global village that we live, mutual respect, understanding and tolerance must be the values that we espouse. As we face environmental issues including the climate change that wrought great devastation to peoples in various regions, we need a united response to overcome them. Let us work together to give our global village a peaceful and prosperous future.

I thank you. — MNA

The Myanmar nation was united in its response to the emergency. The outpouring of generosity was overwhelming. People from all walks of life, regardless of their own difficulties, donated cash and kind for the victims. The United Nations, the ASEAN Member States, donor countries, NGOs and individuals from around the world also responded generously.
Mars lander finds minerals suggesting past water

LOS NGELES, 30 Sept—NASA’s Phoenix spacecraft has discovered evidence of past water at its Martian landing site and spotted falling snow for the first time, scientists reported Monday. Soil experiments revealed the presence of two minerals known to be formed in liquid water. Scientists identified the minerals as calcium carbonate, found in limestone and chalk, and sheet silicate.

But exactly how that happened remains a mystery.

“It’s really kind of all up in the air,” said William Boynton, a mission scientist at the University of Arizona at Tucson. A laser aboard the Phoenix recently detected snow falling from clouds more than two miles above its home in the northern arctic plains. The snow disappeared before reaching the ground.—Internet

7,500 Mexicans evacuate; flooding shuts oil wells

MEXICO CITY, 30 Sept—Mexican officials have evacuated 7,500 people and are keeping oil wells shut in Veracruz due to severe flooding from 7,500 rains along Mexico’s Gulf coast.

The state’s top civil protection official, Ranulfo Marquez, says large sections of the towns of Minatitlan and Hidalgotitlan are under 10 feet (3 meters) of water.

With rain-swollen rivers jumping their banks, residents have been wading through chest-high waters and floating down roads on canoes.—Internet

Suicide attacks kill 1,188 in Pakistan since ’07

ISLAMABAD, 30 Sept—Suicide attacks have killed nearly 1,200 people in Pakistan since July 2007, most of them civilians, according to military statistics Monday that underscored the ferocity of the threat facing the US ally in the war on extremist groups.

Meanwhile, heavy fighting between Pakistani troops and insurgents in the lawless tribal regions of the country’s northwest has caused some 20,000 Pakistanis to flee across the border into Afghanistan, the United Nations said. Nuclear-armed Pakistan has seen a surge in attacks by Islamic extremists since the July 2007 Army attack on militants held up in Islamabad’s radical Red Mosque, during which about 100 people were killed. The most recent major suicide attack was the 20 Sept truck bombing at the Marriott Hotel in the capital, which killed at least 54 people, including three Americans.—Internet

Ozone pollution more dangerous to some

New York, 30 Sept — It’s not just the elderly who are at risk. However, while age was the strongest risk factor, there was also evidence that older women were more vulnerable to ozone pollution than older men were, and blacks were more vulnerable than other racial groups.

Study suggests how cancers spread to lungs

San Francisco, 30 Sept — Cancers typically spread — or metastasize — to specific, predictable locations. Now researchers have a deeper molecular understanding of why, at least for lung metastases in mice.

The finding might someday lead to drug therapies that curb lung metastasis in humans, experts say. Dr Yoshiro Maru of the Tokyo Women’s Medical University and colleagues report that primary tumours transmit a series of signals throughout the body to “prepare the soil” in the lungs to accept the “seed” of metastatic cells.

The key players in this process are signaling proteins, which pass back and forth like text messages between different cells and between the primary tumour and the soil,” said Mikala Egeblad, an assistant research anatomist at the University of California, San Francisco.

Heart patients should be screened for depression

Dallas, 30 Sept — Heart patients should be regularly screened for signs of depression, the American Heart Association recommended Monday.

Depression is about three times more common in heart attack survivors and those hospitalized with heart problems than the general population, according to the recommendations published in the journal Circulation. The authors said only about half of heart doctors say they treat depression in their patients — and not all those diagnosed with depression are treated.

China detains 22 suspects over tainted milk

Beijing, 30 Sept — Police in the Chinese province at the centre of a scandal over tainted milk powder have detained 22 people suspected of involvement in introducing the chemical melamine into the supply chain, state media said on Tuesday.

Thousands of children have been hospitalized with kidney illnesses and four have died after drinking milk formula tainted with the chemical, causing public outrage and shining the spotlight back on safety issues in the country’s food industry after a series of earlier problems with other products.

Authorities in northern Hebei province held the people after raids on dozens of dairy farms and milk purchasing stations during which they seized more than 220 kg (485 pounds) of the cheap industrial chemical, the China Daily said.

Trouble on Hubble delays last shuttle service mission

Washington, 30 Sept — NASA has delayed the final service mission of the Atlantis space shuttle to the Hubble space telescope, probably until early 2009, after a “significant anomaly” occurred on the orbiting telescope.

“It’s obvious that 14 October is off the table” for launching Atlantis, John Burch, the shuttle programme manager at NASA’s space centre in Houston, Texas, told a telephone news conference.

The most likely new launch date for the mission to Hubble would be in February next year, the officials said. On Saturday, Science Data Formatter side A, the unit on Hubble that took data from five instruments, formatted it and sent it back to the ground, providing NASA with spectacular images of space, “totally failed,” Preston Burch, Hubble manager at Goddard space flight centre near Washington said.

NASA was working to get Hubble back up and “doing science” in a matter of days by reconfiguring a unit on Hubble that has lain dormant during the 18 years that the telescope has been in orbit, to do the work of the failed unit.

Internet
Wales welcome back Bellamy for World Cup qualifiers

CARDIFF, 30 Sept — Wales manager John Toshack has recalled Craig Bellamy and James Collins for October’s World Cup qualifiers against Liechtenstein and Germany.

Toshack welcomes back captain Bellamy and defenders Collins and Lewin Nyatanga after long-term injuries.

West Ham striker Bellamy has made two short substitute appearances after groin surgery, while club-mate Collins has yet to figure for the first team this season after a knee operation, but both are key figures for Toshack.

Nyatanga has been an unused substitute in Derby’s last three matches against QPR, Cardiff and Sheffield United after an ankle problem.

Midfielder David Vaughan is also recalled, having ended his unhappy spell with Real Sociedad with a move to Blackpool.

Nottingham Forest’s Arron Davies and Middlesbrough’s Rhys Williams are both out through injury, while Wrexham defender Steve Evans has been omitted now Collins and Nyatanga are available.

Resurgent Safina’s generous pledge

STUTTGART, 30 Sept — Russia’s Dinara Safina was voted on Monday to hand over the prize of a brand-new Porsche sports car to her coach if she wins this week’s WTA event in Stuttgart.

The world number three has had a good summer and is hoping to win her fifth title of the year having started her run by taking the Berlin Open title in May.

If she wins Sunday’s final here, Safina says she will reward her Croatian coach Zeljko Kranj for his faith in her by handing over the keys to her prize of a brand-new Porsche 911 Carrera 4S Cabrio — worth $98,500 US dollars.

“Winning the Berlin Open in May was really the key to my tennis life,” said the 22-year-old.

“I felt completely lost before that tournament.

“My performances on court were a disaster and I was on the verge of giving it up.

“It is only due to my coach that I am still here.”

Man Utd take Danish minnows seriously

AALBORG, 30 Sept — Sir Alex Ferguson has vowed to take champions League minnows Aalborg seriously in Tuesday’s Group E clash in Denmark after admitting he is still scarred by the memories of Manchester United’s embarrassing in Copenhagen two years ago.

European champions United launched the defence of their title with a disappointing 0-0 draw against Villarreal at Old Trafford two weeks ago and must claim three points in the Energi Nord Arena to put their campaign back on track.

But after crashing to a 1-0 defeat against FC Copenhagen after styles apologises to Bolton for Ronaldo penalty blunder

LONDON, 30 Sept — Referee Rob Styles has apologised to Bolton for the penalty decision that condemned Gary Megson’s side to a 2-0 defeat against Manchester United.

Bolton were level with United at Old Trafford on Saturday until Styles gave a spot-kick in the 60th minute for Jlloyd Samuel’s challenge on Cristiano Ronaldo.

Samuel clearly won the ball but Ronaldo converted the penalty to give United the lead in a game they went on to win 2-0.

---

Gisuly ruled out for up to three weeks

PARIS, 30 Sept — Former France international midfielder Ludovic Gisuly is expected to be out for around three weeks because of a left thigh injury, his club Paris Saint Germain announced on Monday.

The 32-year-old former Barcelona and AS Roma playmaker suffered the injury in the second-half of Saturday’s 1-0 defeat by newly promoted Grenoble.

Styles spoke to Bolton on Monday to apologise, even though Megson had insisted after the game that he didn’t want to hear from the official.

It is unknown in what manner Styles contacted the club or who he got in touch with, but it is not the first time Styles has made an apology for a mistake on the field - last season he apologised to Liverpool for a penalty error when Steve Finnan challenged Chelsea’s Florent Malouda.

Dinara Safina of Russia, seen here on 20 Sept, 2008, voted on Monday to hand over the prize of a brand-new Porsche sports car to her coach if she wins this week’s WTA event in Stuttgart.—INTERNET

Iran to continue uranium enrichment

TEHERAN, 30 Sept—Iranian Foreign Ministry spokesman Hassan Qashqavi said on Monday that Iran will continue uranium enrichment, the official IRNA news agency reported. It is Iran’s “right” to produce nuclear energy for civilian utility, Qashqavi was quoted as saying at his weekly Press briefing. The United Nations Resolution 1835 is a political statement and unjustified, Qashqavi said, added that “no Security Council resolution is required as long as Iranian nuclear programme poses no threat.” The UN Security Council unanimously adopted the resolution on Saturday to reaffirm its previous resolutions on Iran and demand full compliance from the Islamic Republic. He pointed out that Western governments and six major countries should make it clear what they have done for confidence building with Iran.

Bomb found in shopping centre area in Palu, Indonesia

JAKARTA, 30 Sept—A low explosive bomb was found in a shopping centre area in Palu of Indonesia’s Central Sulawesi Province on Tuesday, ahead of the Muslim festival of Eid al-Fitr, local police said. The hand-made bomb covered with a plastic bag was found after midnight on a side of Jalan Danau Poso street in Palu, provincial police spokesman Irfai az Nasution said. “It was a low explosive bomb,” he told Xinhua on telephone from the province.

52nd IAEA General Conference opens

VIENNA, 30 Sept—The 52nd International Atomic Energy Agency (IAEA) General Conference opened in Vienna, Austria, Monday, with the future role and development of the organization as its central theme. Director of Chinese Atomic Energy Agency Chen Qifa attended the conference as head of the Chinese delegation. In his speech in the general debate Monday, Chen stated the Chinese Government’s position on promoting the peaceful development of nuclear energy.

Weather Map of Myanmar and Neighbouring Areas

Forecast for Nay Pyi Taw and neighbouring area for 1-10-2008: Possibility of isolated rain or thunder-showers. Degree of certainty is (40%).

Forecast for Yangon and neighbouring area for 1-10-2008: Likelihood of isolated rain or thunder-showers. Degree of certainty is (60%).

Forecast for Mandalay and neighbouring area for 1-10-2008: Possibility of isolated rain or thunder-showers. Degree of certainty is (46%).
Model Hsein Yadana strain paddy field designed to help double farmers’ incomes

NAY PYI TAW, 30 Sept—Commander of Nay Pyi Taw Command Maj-Gen Wai Lwin inspected the 30-acre model monsoon paddy plot of the local regiment at Pinlaung junction here this morning.

Col Khin Maung Oo of the regiment gave an account of the purpose of the model field of Hsein Yadana paddy, whose per acre yield is more than 200 baskets. Agriculturalist U Myint Maung Htwe reported on the per acre yield of the paddy field. The commander viewed the model field, and thriving Hsein Yadana strain paddy fields of farmers U Mya Thein and U Bo Nyunt.

In his report, Col Khin Maung Oo said that the model plot was designed to help improve the economic growth and living standard of local farmers by inspiring them to choose Hsein Yadana paddy strain, with which they could double their paddy output and incomes. He added that seeds of high-yield paddy strain and agricultural methods would be distributed to interested local farmers. Agriculturalist U Myint Maung Htwe reported on the 10 scientific cultivation methods, through which paddy output would reach more than 200 baskets; Manager of the District Myanma Agricultural Service U Hmat Gyi, on calculating method of per acre yield; and Agriculturalist U Han Win Htut, on advantages of choosing the paddy strain.

The commander called for extensive cultivation of Hsein Yadana strain paddy in the regiments and units of Nay Pyi Taw Station and Nay Pyi Taw Command. The commander observed the broadcasting of paddy seeds, and ploughing process, and paddy fields of Paw Hsan Hmwe, Barsamardi and Hsein Yadana (Nay Pyi Taw).

The per acre yield of Hsein Yadana fields is expected to be over 200 baskets. The fields were put under Hsein Yadana strain paddy on 10 July and they are due to be harvested in the third week of October.

PUBLIC CHOSEN ROAD

Holding evil view
Ploting to betray nation
On the wrong road
Longing for aliens
Although born in nation
Never having trust in internal strength
Wishing to rely on aliens
Try never to play tricks
With lies and deceit
For people know the truth
People implementing with honour
The already chosen
Seven-step Road Map
People with patriotism
Building new golden land

How Jellyfish got its sting

Jellyfish may owe thanks to a humble bacterium for their ability to sting prey. Scientists have found that one of the genes necessary for them to sting is similar to a gene in bacteria, suggesting the ancestors of jellyfish picked up the gene from microbes. The research was published this week in Current Biology. “The result was a great surprise,” says developmental biologist Nicolas Rabet of the Pierre and Marie Curie University in Paris, France, who led the team. “[This kind of] horizontal gene transfer is often neglected, and could sometimes be more important than we thought.” Unlike vertical gene transfer from parent to offspring, the horizontal variety happens between different species. — Internet
